TIN—There was a decided break in spot tin to-day and the market closed dull at 75 points under last night's closing figure. There is very little consuming demand yet, as buyers' requirements are well covered by contracts. Speculative interest is wholly wanting. None of the Acara's cargo has yet come up, but the first of it is expected here to-morrow. At the close spot was offered at 26.75c., with 26.50c. bid. March was quoted at 25.37½c. bid and 25.60c. asked, April at 25 to 25.50c., May at 24.75 to 25.25c., and June at 24.50 to 25c. Spot tin in London advanced 5s. this morning, but lost 15s. later, closing 5s. below last night's figures. Futures declined 15s. for the day. The tone at the close in the English market was easy. To morrow the monthly auction sale of 6,000 piculs will be held in Batavia. The Crown Point has arrived at Philadelphia with 25 tons and the Statendam is landing 20 tons here, making the total arrivals since the beginning of the month 675 tons.

COPPER—The market is still in an uninteresting condition. Very little demand comes from consumers and speculative buyers do not appear to be interested. Quotations remain at 12¼c. bid and 12½c. asked for Lake and 12⅛c. bid and 12⅜c. asked for either electrolytic or casting. London cabled a quiet, easy market, with a further decline of 2s. 6d. in spot and 5s. in futures.

PIG LEAD—A featureless market was noted here, with prices unchanged at 4.10 to 4.15c. as to quantity and time of delivery. The reports from St. Louis indicated an easier feeling there, 52 tons of Granby selling at 4.02½c. No further change in the London market was reported.

SPELTER—The market remained quiet but fairly steady at 4.22½ to 4.27½c. The tone of the St. Louis market was firm, the quotation remaining 4 10c. London was unchanged.

REGULUS ANTIMONY—There is a moderate demand and prices are steady at 10¼c. for Cookson's, 8c. for Hallett's and 7½c. for other brands.

OLD METALS—Trade is slow, with prices steady. — N. Y. Journal of Commerce, March 12.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

MUNDLE & PERCIVAL, general merchants, Kemptville, Ont., are offering 60c. on the dollar.

Tire Co., Limited, bicycle sundries and sporting goods, Toronto.

Angus J. McVicar, contractor, Lorway Mines, N.S., has assigned.

Alfred Goulet, general merchant, The Brook, Ont., has assigned.

A. Champagne, carriagemaker, Chambly Station, Que., has compromised.

The creditors of Elias Will, lumber merchant, Windsor, N.S., met on March 8.

Wilfrid Chausse, hardware merchant, Montreal, is offering 25c. on the dollar.

Nugent & Taylor, tinsmiths, Kingston, Ont., have assigned to R. J. McKelvey.

E. R. C Clarkson has been appointed permanent liquidator of The American

The creditors of W. J. Clelland, general merchant, Hemmingford, Que., have held a meeting.

An extension has been granted to F. A. Thompson, general merchant, Buckingham, Que.

The creditors of Wm. Bennett, general merchant, Calumet, Que., held a meeting on March 11.

The creditors of (the late) Evans & Co., general merchants, Deloraine, Man., have held a meeting.

Benjamin Privat, tinsmith, Hanover, Ont., has assigned to C. V. Parke, Walkerton, and his creditors meet on March 18.

Lefaivre & Taschereau have been appointed curators of J. A. Renault & Co., general merchants, St. Ephrem de Tring, Que.

The offer of Mrs. George E. Champagne, general merchant, Pierreville, to compromise at 20c. on the dollar has been refused.

A winding-up order of The Shipe Manufacturing Co., Limited, manufacturers of rims, skewers, etc., Clarksburg, Ont., has been granted.

Cross Bros., general merchants, St. Chrysostome, Que., are offering 55c. on the dollar secured. The creditors held a meeting on March 6.

PARTNERSHIPS FORMED AND DISSOLVED.

Bithell Bros., saddlers, Montreal, have dissolved.

Niven & Bell, general merchants, Whitewater, B.C., have dissolved.

Benoit & Racine, general merchants, Casselman, Ont., have dissolved partnership; D. Racine continues.

DeWitt & MacKinley, electricians, Sydney, N.S., have dissolved, and The DeWitt Electric Co. succeeds.

George E. Smith & Co., wholesale & retail hardware merchants, Halifax, N.S., have admitted Albert W. Smith as a partner.

SALES MADE AND PENDING.

John Porter, blacksmith, Morden, Man., is giving up business.

G. Latreille, coal and wood merchant, Montreal, has sold out.

W. D. Archer, blacksmith, Spry, Ont., is advertising his business for sale.

The assets of F. D. Latour, general merchant, Montreal, have been sold.

The assets of O. Leger & Frere, general merchants, Coteau Station, Que., have been sold.

The assets of Mrs. Geo. E. Champagne, general merchant, Pierreville, Que., are to be sold.

The assets of T. E. Gravel, general merchant, Roberval, Que., are to be sold on March 12.

The stock of the estate of G. C. Bristow, general merchant, Aylmer, Ont., has been sold.

The assets of F. X. Deschenaux, general merchant, Pierreville Mills, Que., have been sold.

The assets of R. Bergeron & Cie., general merchants, Shawenegan Falls, Que., have been sold.

R. H. Benson & Co., general merchants, Markdale, Ont., are advertising their business for sale.

The stock of the estate of T. J. Metheral, general merchant, Singhampton, Ont., has been sold.

CHANGES.

G. Baile & Cie., builde*s, etc., Montreal, have registered.

F. Decary & Fils, contractors, etc., Montreal, have registered.

The Brantford Carriage Co., Limited, has registered at Montreal.

W. W. Peck & Son, lumber merchants, Sutton, Que., have registered.

F. Dowkes, general merchant, Venlow, N.W.T., is closing up his business.

The McCormick Harvesting Machine Company has registered at Montreal.

Eli Croft is the successor to W. C. Fiendel, blacksmith, Middleton, N.S.

John Donaghy, general merchant, Gorrie, Ont., has sold out to W. H. Litt.

T. Wadsworth, blacksmith, Nilestown, Ont., has sold out to L. A. Columbus.

Wm. Hillier, blacksmith, Burketon Station, Ont., has removed to Burk's Falls.

W. H. Howell, general merchant, Carlow, Ont., has sold out to W. O. Jones.

H. W. Carter, general merchant, Gorrie, Ont., has sold out to Andrew & Son.

R. H. Williams, lumber merchant, Yellow Grass, N.W.T., has sold out to W. H. Hunt.

W. B. Lennard, hardware merchant, Russell, Man., has opened a branch store at Langenburg.

Robert Bailey, general merchant, Valley River, Man., has opened up a branch store at Sifton.

Daniel & Chambers, painters, etc., Rossland, B.C., have been succeeded by Daniel & Arthur.

The Inglewood Manufacturing Co., machinists, Inglewood, Ont., has sold out to W. C. Thompson.

W. J. Batho, of G. B. Batho & Co., general merchants, Ferguson, B.C., has sold his interest to K. A. Edwards.

D. J. Jamieson & Sons, general merchants, Vankleek Hill, Ont., have purchased the business of Neve & Fortin, L'Original.

The stock of L. A. Frechette, general merchant, Thetford Mines, Que., has been sold to L. I. Frechette, Halifax South, for 72½c. on the dollar.

FIRES.

Peaker & Son, hardware merchants, Brampton, Ont., met with loss by an explosion.

Crowell Bros., hardware merchants, Halifax, N.S., have been burned out; they were insured.

The premises of A. W. Gay, carriagemaker, St. John, N.B., were damaged by fire; the loss is covered by insurance.

The British Columbia Shingle Manufacturing Co., Limited, Vancouver, B.C., has been burned out; they were partially insured.

The sawmill of J. E. Murphy, lumber and cement merchant, Hepworth, Ont., at Murphy, Ont., has been burned; it was partially insured.

DEATHS.

Jeffrey Roe, of Cote, Roe & Co., coopers, Que., is dead.

Daniel K. McDonald, lumber merchant, Sunny Brae, N.S., is dead.

HALIFAX AND YARMOUTH RAILWAY.

The Nova Scotia Government has made a contract with Mackenzie & Mann for the construction of a line of railway from Halifax to Yarmouth, on the south shore of the Province. On the second reading of the Bill ratifying this agreement, which is now before the Nova Scotia Legislature, Attorney-General Longley stated the Government would lend the company the sum of $13,500 per mile, at 3½ per cent. interest. The Federal subsidy is $3,200 per mile, making a total grant of $16,700 per mile.

The estimated cost of this road is $18,000 per mile, and its length 100 miles. But the Attorney-General holds that it will cost more than $20,000 per mile before it is completed.

IMPORTANT CHANGES IN BOLTS.

QUITE a change has been made in the price of bolts. In carriage bolts, machine bolts, plough bolts, blank bolts, bolt ends, sleigh shoe bolts, coach screws the discounts have all been reduced, while on carriage bolts a new list has been issued in which prices have been advanced, except on ¼ and 5-16 gauges. The new list of discounts is as follows :

Carriage bolts, common, ($1) list	50 p.c.
" full square ($2.40) list	55 p.c.
" Norway iron ($3) list	55 p.c.
Machine bolts, all sizes	50 and 5 p.c.
Plough bolts	50 and 5 p.c.
Blank bolts	50 and 5 p.c.
Bolt ends	50 and 5 p.c.
Sleigh shoe bolts	65 and 5 p.c.
Coach screws, cone point	66⅔ p.c.
Nuts, square, all sizes	3½c. per lb. off
Nuts, hexagon, "	3¾c. per lb. off

The new list is as follows :

Length inches.	Price per Hundred ¼	5-16	⅜	7-16	½	9-16 and ⅝	¾
1½	$1 00	$1 50	$1 60	$2 20	$3 00	$5 20	$7 20

EXPLOSION IN A FOUNDRY.

An explosion occurred on Saturday afternoon, March 8, at the foundry of John Reynolds, Victoria street, Kingston. Mr. Reynolds does some manufacturing work in his small foundry, melting the scrap metal which he secures from various dealers in a cupola. Amongst these scraps was an old cannon ball which proved to contain gunpowder or some other explosive, for when he consigned it to the flames a terrific explosion followed, almost blowing the cupola to pieces, badly damaging the building and shattering the windows of almost every dwelling in the neighborhood. But nobody was injured.

PROPOSED LINSEED OIL FACTORY.

The council of St. Henri, Montreal, recently received a communication from three Chicago capitalists, Messrs. G. M. Ferguson, T. G. McCulloch and F. E. Lyster, in which application was made for a bonus in the event of their starting a linseed oil factory in that city. The proposition was to organize a company with a capital of $500,000 under the style of The International Linseed Oil Co., Limited. The amount of the bonus was left to be determined upon between the parties to the contract. No definite course of action has been decided upon as yet by the council of St. Henri, but it is believed that negotiations will be opened with the above-named gentlemen, with the purpose of bringing the factory into the city, as the opinion prevails that such a venture would be most successful.

A HALIFAX BLAZE.

On Saturday morning, March 8, a disastrous fire damaged the hardware store of Crowell Bros., at the head of Commercial wharf, Upper Water street, Halifax. The place was badly gutted and the damage to both the stock and the building was heavy. The hardware stock is about three quarters covered by insurance.

The prompt action of the fire brigade did much to keep the blaze from spreading. The fire started in the back part of the building near the elevator shaft, but its origin is unknown.

LAID UP WITH A SPRAINED LEG.

Mr. J. H. Brent, representative for Caverhill, Learmont & Co., Montreal, has been laid up for the last two weeks with a sprained leg. He expects to be able to go out again next week.

CATALOGUES, BOOKLETS, ETC.

IVOR JOHNSON'S CATALOGUE.

In Ivor Johnson's Arms and Cycle Works, Fitchburg, Mass., are made the well-known Ivor Johnson bicycles. These have for the past 18 years been winning for themselves a reputation for excellence of build and moderate cost. And the Ivor Johnson bicycle of 1902 is an improvement on its predecessors. There is a variety of nine models with which this wheel meets the requirements of almost every class of rider.

Their catalogue for 1902, which has just been issued, is handsomely printed on fine paper and adorned with cuts of their different models of bicycles. Upon sending their address, a copy of the catalogue will be mailed to any readers of HARDWARE AND METAL who have not obtained it.

VISIBLE SUPPLY OF MANILA HEMP.

The visible supply of manila hemp on March 1 was as follows :

	1902.	1901.
Stock in U. K.	29 000 bales	13,386 bales
On the way to U. K.	46,000 "	130,454 "
Loading for U. K	14,000 "	37,000 "
Total for U. K.	89,000 "	180,840 "
Stock in U. S.	7,000 "	570 "
On the way to U. S.	55,000 "	40,140 "
Loading for U. S.	10,000 "	6,000 "
Total for U. S.	72,000 "	46,710 "
Stock in Manila	51,000 "	181,000 "
Grand total	212,000 "	408,550 "

TRAVELLERS' TAX IN P.E.I.

In the House of Commons, on Tuesday, the question of the imposition of a tax upon commercial travellers in Prince Edward Island was brought up by Mr. Kemp, who characterized the measure as illegal, and urged that the Minister of Justice should consider its constitutionality. Hon. Mr. Fitzpatrick replied that he had not looked into the question recently. But the Act had been allowed to go into force, and the courts were open to those who were affected by it, if they chose to apply to them. Mr. Farquharson, who was Premier of the Province when the Act passed, said it had not had the effect of keeping the commercial travellers from coming in, some 400 paying the tax every year. He entertained the opinion, judging from the sentiment of the people, that the tax was likely to remain in force. Mr. Hackett expressed the opinion that the tax was a disgrace to the Province. The people of the Island, when they entered Confederation, hoped to sell their products in the other Provinces without having a tax placed upon them. Mr. Fielding regarded Mr. Kemp's statement, that the Act was illegal, as rather strong, and, although there might be no doubt about the wisdom of the tax, there was considerable doubt about the legality, which was an open question. Good lawyers were to be found who held that it was illegal, and other equally eminent men upheld its constitutionality. He did not justify the tax, but thought the question could only be determined by the courts. Mr. Clarke inquired whether the Department of Justice had given an opinion upon the legality of the Act. Mr. Fielding replied that the Act was allowed to go into force, but its legality had not been determined.

THE FORT WILLIAM ELEVATORS.

The elevator capacity of the Canadian Pacific Railway at Fort William, Ont., will be increased from 5,500,000 bushels to 8,000,000 or 9,000,000. These proposed extensions involve an expenditure of nearly $1,000,000. The alterations will comprise the doubling of the large 1,500,000-bushel elevator built by The Weber Company, provisions for which were made at the time it was erected, and the construction of a 2,000,000-bushel elevator between the two existing wooden ones. The steelwork of these will be built within a year.

Mr. Weber, of The Weber Elevator Co., Buffalo, N. Y., and his two engineers, Messrs. Nephers and Wait, are at present in Montreal conferring with the general manager of the C.P.R. and Mr. Vautlet, chief engineer.

NOVA SCOTIA MARKETS.

Halifax, N.S., March 10, 1902.

WHILE some of the hardwaremen report trade only nominally fair, others state that they are, for the season, unusually busy. This may be somewhat accounted for by the fact that in Halifax the hardware firms run on, or rather make a specialty of some particular line. For example, take fishing supplies. While a number of firms handle these lines, two or three of the older firms have the "run of the trade" and it is hard for a newer firm to acquire the trade. Other lines stand on a similar basis. Just now, the fishermen shore, Banks, and lobstermen are fitting out for the spring fishing and trade in this line has been remarkably good, and at a somewhat earlier stage than usual.

* * *

Spring orders from the country are coming in from all over the Province in good volume, and also from Prince Edward Island and New Brunswick. These run largely in the line of fishing supplies and builders' hardware and denote that there will be considerable activity in the building line throughout the Maritime Provinces. Halifax, too, will have considerable work in this line. North-street Station is to be remodelled at considerable expense; a new Customs house is already under way; a new library building, consequent on Mr. Carnegie's gift of $75,000, may be built, and a number of other public and private buildings are spoken of.

* * *

On Saturday morning the hardware firm of Crowell Bros., located on Water street, had the misfortune to be burned out. The fire started in the rear of the building, near the oil and varnish department, and though the firemen soon had the fire under control, the building was completely gutted and the stock ruined—more by the water than by the fire. The stock in the building was valued at $35,000, with $25,000 insurance. The building was insured for $4,000. The firm was fortunate in having a warehouse with a large quantity of goods which were untouched by the fire, and considerable orders for spring to arrive shortly. They have taken an adjoining building and will be able, with a little interruption, to attend to their spring orders.

* * *

A change has been made in the firm of George E. Smith & Co., by the admission of Mr. Albert W. Smith to partnership in the firm. The new partner is a son of Mr. George E. Smith, who has been at the head of the firm since its establishment, and who is one of the best known hardwaremen in the city.

R. C. H.

HOW TO AVOID "SWEATY" PIPES.

The cause of so-called sweaty pipes is very simple and the remedy equally simple. Perhaps it is hardly necessary to explain that the pipes are not sweaty in the sense that the moisture comes through the pores from the inside, though this is a not uncommon belief among those who do not understand the cause. The moisture on the pipe is, of course, caused by the condensation of the moisture in the air, the difference in temperature between the air and the pipe causing the condensation of the natural moisture in the air and depositing it on the pipes. The difference in temperature between the air and the pipe is caused by the water flowing through the pipes. Water at rest in the pipes soon takes nearly the same temperature as the room. Even an occasional flow of water through the pipes will not cool them sufficiently to make them sweat, but even a slight constant dropping will cause the trouble. That being the case, it is only necessary to make tight all faucets and cocks on supply and flush pipes in order to put a stop to the trouble. Packing the pipes will, of course, help matters, but this is expensive and unnecessary.—Domestic Engineering.

FREIGHT RATE ON SYDNEY IRON.

In the House of Commons a few days ago, Hon. Mr. Blair, Minister of Railways, in reply to a question put by Mr. A. E. Kemp, Toronto, said that the Intercolonial receives for carrying pig iron from Sydney, C.B., to Montreal and points west of Montreal, $2.95 per ton, and for coal, $2.55.

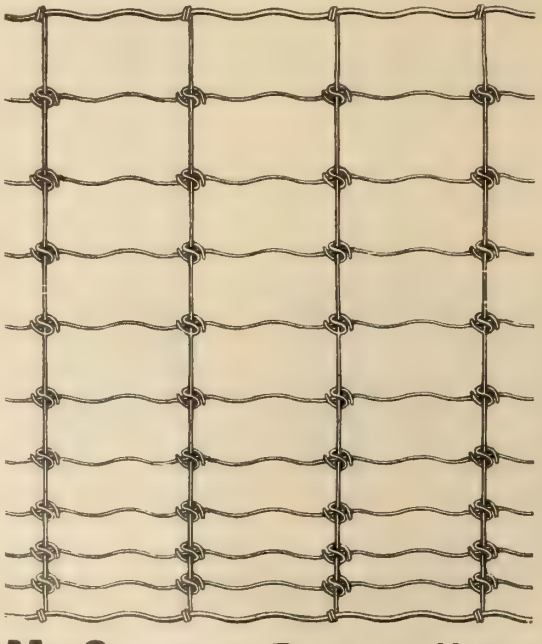
THE HOBBS HARDWARE CO.

The Hobbs Hardware Co., wholesale hardware merchants, London, have dissolved. Wm. R. Hobbs retires, and Thomas S. Hobbs continues. The company is now applying for incorporation.

EXPLOSION IN A HARDWARE STORE.

The store of Peaker & Son, hardware merchants, Brampton, Ont., was badly damaged by a gunpowder explosion on March 10, and Wm. Peaker, the junior partner of the firm, was seriously injured. The cause of the explosion is unknown, the only person who was on the flat where the powder was stored being the man who was injured.

Mr. Peaker when found was much cut and bruised, and the little clothing remaining on him was on fire.



A traveller representing a gunpowder firm called to secure an order, and Mr. Peaker went upstairs to ascertain how much gunpowder he had on hand. It was just at this time that the explosion occurred. The north end of the building was wrecked, bricks being hurled across the street, and every pane of glass in the second and third storeys broken.

A NEW FOUNDRY.

The formal opening of the new iron and brass foundry of the Vancouver Egineering Works, Vancouver, B.C., took place on March 6. In the presence of a number of citizens the cupolas, already charged, were blown, and everything passed off without any difficulty. This new foundry is up to date in every particular.

THE NEVER-LOST SCYTHE WRENCH.

A simple device that every tiller of the soil will buy on sight was patented by me in 1900. I will sell the patent outright to someone who is prepared to manufacture and sell same. Circulars and full particulars sent to all who write. Desirable for mail-order houses—canvassers and hardware dealers generally. Terms reasonable and fair. Address, **H. O. KRUSCHKE,** inventor and patentee, Dexterville, Wis., U.S.A. (11)

Woven Wire Fencing

HINTS AND IDEAS FOR MEN WHO ADVERTISE.

Schemes and Programmes.

EVERY advertising man should have lots of backbone, says Printers' Ink. He should be able to say no, and stick to it. If he is wise he will have a given time each day to receive solicitors. He will admit them all, be friendly and stick to his knitting. Special editions and programmes generally have some sort of a "cause" to promote. A hospital, a lecture-course programme, those earnest young men with a college paper, a pastor that is getting up a church paper, the winning young woman that is "just getting it up for the society, you know," and so on to the end of a list that never ends, and never will until men stop spending money just to see their names in print or to be considered "a real nice man."

I believe in charity. Once I presented to the president of a bank a proposition to advertise in a concert programme. I could not pass upon it, but the solicitor had made such a strong appeal, that I ventured to bring it to the attention of the bank's president. He heard me to the end, and then sat down on me. He said, "Brown, it is not creditable to you to bring this matter up. You are presuming that I am not doing my full share of charity. It would be well for you to understand that we hired you to make investments of our money in advertising and not charity." Possibly he was a little severe, but he told the truth and I learned a lesson.

Take the money out of the cash drawer and donate to charity for the sake of charity, and charge it to charity. Keep your name out of such "grafts" and make the business stand or fall on its merits as a business. These solicitors don't always realize that they are running a confidence game, but they are.

Another form of the programme evil is found in societies that sell the privilege to get out a programme or souvenir edition to some advertising solicitor. They give him a nice letter of introduction, stating that the edition will be "official." He comes in the name of the organization, and you pay money that goes mostly to the solicitor and you think you have helped the cause. The postmaster writes a letter authorizing a certain "official post-office guide," and you feel that you surely ought to be in this "official" publication.

Another form. A good-looking man comes in. "Mr. Brown?" "Yes." "I have been referred to you as the party having charge of the advertising of your company. Now, we have no advertising to sell, but the character of your company is so well known and your people are so influential that our editor has prepared an editorial on your company, and I wanted you to look it over and see if it was all right. We are going to get out a large edition of this number." You read over the ordinary rot about the great and good concern you are working for, and see that your name is prominently mentioned as being one of the main spokes in the wheel, and how progressive and businesslike your firm does things, and advising everybody to be sure and call, upon the personal assurance of the editor that everything is all right.

"Yes, that is very nice," you say. "Glad you like it," says our friend. "By the way, would your company like to have a quantity of this edition to send to your friends? We charge you nothing for the editorial, you know, but if you want we shall be glad to supply you with 500 copies." You price the 500. Ten cents each. If you don't come down with the $50 you will not find your great and good company mentioned. The chances are even that the 500 copies would comprise the entire special edition if you did decide to reap the benefits of free editorial mention. Any paper that sells its editorial columns is a good one to let alone.

Advertising.

We may live without poetry, music and art,
We may live without conscience, and live without heart;
We may live without friends, and live without fads,
But business to-day cannot live without ads.—The Country Merchant.

Sincerity in Advertising.

When we read the advertisements that crowd the newspapers and magazines, says Profitable Advertising, we find it rather hard to believe that downright sincerity is a part of the present age, but now and then we come upon something that tends to help our unbelief. There are a few sincere advertisements published, and they stand out very noticeably. They are always short and simple, more notable for the clean, wholesome, direct business methods they reveal than for those glittering generalities that seem to be the present rule. One cannot read them without feeling that the advertisers are honest in their statements, and that the goods will be exactly as described.

It is not pleasant to think that sincerity has departed from among business men. One would just as soon think that fidelity and honor and knightly courage had departed also. Yet we know that these things still exist, and we are glad to believe that there are still sincere advertisers, also.

The Price Element.

The elimination of the price element or factor in any grade of advertising is and always will be a serious handicap to its "pulling" quality, writes George Hippard in Profitable Advertising. It emasculates the strength and depreciates the value of the advertisement, no matter whether the article advertised is low or high priced. What the public want to know is the price of the article and why it is worth it. Of course, it is understood that the article is good and just what it is represented, for no amount of advertising will or can keep up a bad thing.

The tendency in the novices in the advertising field to-day is too much toward attempts at literary construction, and artistic creation or adaptation. Alliterative text and pictorial design are no doubt often desirable and effective, but they are secondary to the leading part of the advertisement, and should be used only to supplement and strengthen the argument. To the ignoring of this vital fact by thousands of advertisers and their agents can be traced the numberless failures in the advertising field.

To its recognition can be attributed the great successes of every mail-order business in the country.

"Good advertising consists in, first, reaching the people who are able to buy your article; second, telling them the price; third, telling them why it is worth the price."

What It Is.

Advertising is the life blood of the business world to-day, and well-directed advertising is like the powerful searchlight of a river steamer, thrown upon a distant cottage on the bank, cutting it out like a picture painted on a black canvas, remarks a contemporary. The timid buyer and the prospective industry will follow the rays of the searchlight of publicity, just as surely as will the eyes of the steamer's passengers follow the light thrown from their vessel. They will not

search the surrounding gloom for objects of interest when a beautiful picture is clearly shown before them. Prospective buyers will not search the surrounding gloom for your competitors if the searchlight of publicity is turned on your own place of business.

Help Sentences for Advertising.

The following were gleaned by a contemporary from some New York windows and advertisements :

Could they be lower ?

Prices lean your way.

Wide range narrow prices.

Prices speak louder than promises.

We have been " caught with the goods."

" Little and often fills the purse " is our price-proverb.

Purchase or be merely curious, but come in, anyway.

Our way of bidding for money to move in new stocks.

Where good things are cheap and cheap things are good.

We save in buying and can afford to be liberal in selling.

Honesty is the only policy, and all customers are good friends.

Economy leads to wealth. To miss these values is extravagance.

Demonstrating how little we care for cost when we want results.

Small profits, of course, but that's our lookout. You profit by the saving.

Not a clearing sale of broken lines, but a big, broad, comprehensive movement.

A good driver turns in a small space—a good merchant turns on a small profit.

It's an ill wind that blows nobody good—especially when it's a manufacturer's ill wind.

Simply another proof that there is always " something doing " in this window—and inside.

We aim to secure your confidence, and our prices are calculated to make us good marksmen.

" A fault confessed is half redressed." We confess to being overloaded on these ties and pay for our fault by foregoing the profit.

Value of Distinctive Names.

The Saturday Evening Post tells of an instance in which an attractive name was sufficient to create a demand for a waste and almost worthless product. New Mexican turquoises are found in a stone of a rather pretty reddish color. Sometimes small bits of turquoise are mixed with this material, which has little value. A New York gem expert took to polishing small pieces of this useless material and setting them in jewelry. Then he cast about for a name, and settled upon " matrix turquoise." To his surprise the novelty took at once, and the demand created for " matrix turquoise " has set other jewelers to counterfeiting the new gem. Furthermore, the fashion has extended to other gems, and there is call for " matrix " emeralds, rubies, sapphires, and so on. There is little doubt but that the name was largely instrumental in making the novelty popular. The public loves a name, and will often tolerate very ordinary things when they are distinctively named, whereas the lack of an effective name has frequently caused the failure of articles of unquestioned merit and utility.

DANGEROUS CREDIT.

IT passes our comprehension how some people can get credit and plenty of it, and if we said we were sorry for the manufacturers who allowed their goods to be cut down to such preposterous prices, we should be saying what we certainly do not feel. Protests were made by the old established houses, who knew that not only was a living profit not being made, but that the goods were being sold at a loss, if they were being fairly dealt with, and only charged the same rates as the new comer. The experience is common in all trades that persons without any practical experience come into a neighborhood and disorganize matters by pretending to benefit the community by selling cheaply when the real object is to swindle the factors. At the present moment there is a man who has opened at least a score of unsuccessful businesses, in every case in a different part of the country ; and we think in such a case as the one we have cited the retail trade has a distinct grievance against the manufacturers or wholesale suppliers, many of whom make it their practical motto to help the cutters so as to help the sales. " If we don't, others will," is the argument which operates with them. As in the learned professions, so in such an intricate business as that of an ironmonger, knowledge ought to be paid for, and such profits should be provided for as will enable a man to live respectably, and commensurately with the elevation of his calling ; but as long as manufacturers will supply any miscellaneous Tom, Dick, or Harry, who may be a tinker, tailor, soldier, or sailor, as in the adage, for all they know, as readily, and on as good terms, as a legitimate trader of old standing, so long will a field for adventurers be provided. The retail buyer will go to the cheapest market, and as long as " cutting," either by adventurers or ironmongers, who ought to know better, lasts, so long will the trade as a whole suffer. We say " as a whole " advisedly, for the case is exactly the opposite of the mercy which Shakespeare tells us is " twice blessed," for it is twice cursed. Hardwareman.

HE BOUGHT IT.

A Washington attorney had a caller yesterday. He was an uncouth looking individual, and said he hailed from Montgomery County, Md.

" Judge," he said, " I reckon I'll hev ter buy a few words of advice."

" Well, what is it ? "

" Thar's a sto'keeper up my way, an' I've hed a good many dealin's with him fust and last. I reckon I've seed him put his right thumb in the scales a hundred times when he weighed things I bought."

" Well, you ought to have stopped him. You can't collect damages for that," interrupted the attorney.

" I don't want no damages."

" Well, what do you want ? "

" You see, we got in a fout yestiddy, an' I bit off that thumb, an' I want to know if, as many times as I bought it, I don't own it, so that he kain't get damages for my bitin' it off."—Washington Star.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, March 14, 1902.

HARDWARE.

THERE has been little, if any, improvement over the trade of last week in general hardware. The bad roads are still accountable for a considerable falling off in the demand from country merchants. Travellers, too, have had some difficulty in getting about the country, so that the wholesale houses have had rather a quiet week of it. A new list is out on washers. The small sizes are now lower and the large sizes higher. There have been changes in the lists of machine bolts, carriage bolts, and coach screws also. Among the most satisfactory lines of the week are shelf goods, many orders of which have been booked. The demand for nails has not improved yet, but the outlook for spring business in this line is regarded as very promising. It is rumored that a shortage may be experienced in wire nails.

BARB WIRE.—Trade is quiet and quotations are unchanged from last week. The price per 100 lb. f.o.b. Montreal is $3.

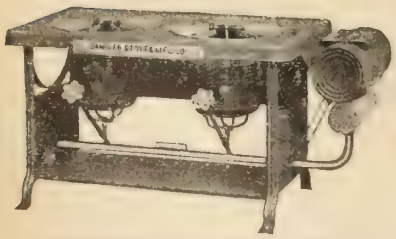
GALVANIZED WIRE.—The market is quiet and steady. Quotations are as follows: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No 12, $2.95, No. 13, $3.05; No. 14, $4.05 No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—Business is not as satisfactory this week. The market is quiet and prices are steady. Our quotations are as follows: Bright iron and annealed on a base of $2.60 per 100 lb., f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras, per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—There is but a small amount of business doing in fine wire. The discount has not been changed from 22½ per cent.

BRASS AND COPPER WIRE.—Trade is quiet. On both brass and copper wire the discount is 60 per cent.

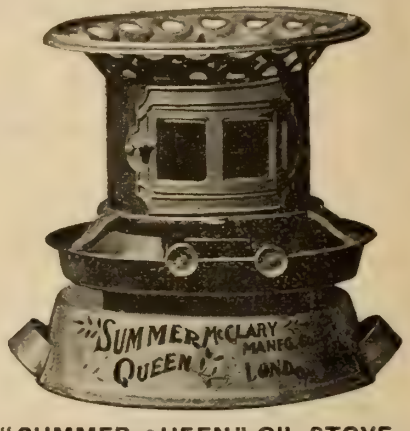
FENCE STAPLES.—The orders booked this week have been somewhat fewer than for the past two weeks, owing to the condition of the roads in the country. Business, however, is fairly active still. The price per 100-lb. keg for bright fence staples is $2.90, and galvanized, $3.25.



WIRE NAILS. There is a quiet market, the demand for spring business not having opened up yet to any great extent. A couple of weeks' time will see a big improvement in the trade in this line. Our quotations are as follows: $2.55 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—The market is dull. Cut nails are worth $2.35 per keg, in small lots, and $2.27½ per keg, in carlots. The discount on coopers' and flour barrel nails is 10 per cent.

HORSE NAILS.—There is little or nothing doing in horse nails. Our quotations are as follows: "C" brand at 50 and 7½ per cent. off and "M" brand at 60 per cent. off on oval and new city heads and 66 2-3 per cent. off for new countersunk heads.



HORSESHOES.—Trade is dull, and our quotations are as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS.—There has been no improvement in this market during the week. Trade is fair. Discounts follow: Flat head bright, 87½ and 10 per cent. off list; round head bright, 82½ and 10

The Robin Hood Powder Company
SWANTON, VT.

per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.

BOLTS.—These continue to move fairly well. New lists on machine bolts, carriage bolts and coach screws have been issued. The discounts on Norway carriage bolts and full-square carriage bolts have been changed from 60 and 5 per cent. to 55 per cent. off. On common, machine, sleigh shoe, blank and plough bolts and bolt ends and coach screws the discounts are also altered. Tire bolts remain the same. The extra discount on all but tire and stove bolts is now 10 per cent. instead of five. In nuts there is now ½c. per lb. off list. We quote as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3½c. per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ½c. per lb. is allowed.

BUILDING PAPER.—There is a very active inquiry for building paper this week, and the market is steady. Prices have undergone no change. We quote: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 30c. per roll; tar sheathing, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE.—There has been an improvement in the demand for cordage this week. Prices are unchanged. We quote as follows: Manila, 16c.; British manila, 14c.; sisal, 12½c.; lathyarn, 11c. Prices on binder twine are as follows: Blue ribbon, 650 feet to the pound, 14½c.; Redcat, 600 feet to the pound, 13½c.; Tiger, 550 feet to the pound, 12½c.; Standard, 500 feet to the pound, 11c.; sisal, 500 feet to the pound, 11c. Prices are subject to a rebate of ½c. in carload lots.

RIVETS AND BURRS.—There is nothing new to note. The movement is about what is expected at this time of the year, and as the season advances there is a notable improvement from week to week. At present trade is fair. We quote the discounts as follows: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, 35 and 5 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH.—There has not been a very active inquiry this week. A moderate amount of business is doing at $1.25 per 100 square feet.

POULTRY NETTING.—This is going well, and a continued improvement is experienced in the demand. The discount on either Canadian or English netting is 60 per cent. off 2 x 2 mesh, 19 wire, and 55 per cent. off on 2 x 2 mesh, heavier, Canadian list.

HARVEST TOOLS.—There is a moderate inquiry. The discount has been changed from 70 per cent. to 60 and 10 and 10 per cent. off, making a difference

THE FRANCIS-FROST CO. Limited

TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

of about 5 per cent. higher. The trade have been buying harvest tools in good quantities lately, however, and their stocks are in good condition, so that at the advanced cost there is likely to be a considerable falling off in the demand.

FIREBRICKS.—The market is not active, and prices are steady and unchanged. Scotch sell for $19 to $23.50, and English, for $18.50 to $22.50 per 1,000.

CEMENT.—In cement there is not as good a demand this week as last. Business is just moderate. Quotations are: German cement, $2.30 to $2.40; English, $2.25 to $2.35; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.20 to $2.30 ex-cars.

METALS.

The foreign metal market shows practically no change. Prices are firm all round, and on nearly every class of metal the feeling is growing stronger. In the local market there has been an active movement at prices that are well maintained. Were it not for the heavy stocks which wholesalers are now fortunate in possessing there would undoubtedly be an advance in more than one line. Bar iron is stiffening, and it is the opinion of some dealers that an advance in price may occur before very long. The heavy buying of scrap, in Germany, by Americans, has had much to do with the present condition of iron. The German market has been considerably strengthened and others have risen in sympathy. The lack of sufficient cars in the United States continues, and buyers find difficulty in getting their goods shipped. Pig iron is at present also hard to obtain from the manufacturers.

PIG IRON.—There is something of a firmer feeling in the pig-iron market, owing to a difficulty in getting deliveries. Prices remain at $21 to $21.50 for Summerlee, and $18.50 to $19 for Canadian.

BAR IRON.—There is a very good demand and the market is firmer. We quote: Merchants' bar, in small lots, at $1.95; horseshoe iron, $2.15 to $2.20.

BLACK SHEETS.—The demand is only moderate and no quotable change has occurred. We quote as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—The market remains quiet and steady. Quotations are: No. 28, Queen's Head, $4.40; Apollo, 10¾ oz., $4.40; Comet, $4.25 with 10c. extra in less than case lots.

INGOT COPPER.—We quote 14c.

INGOT TIN.—Straits sell for 29c.

PIG LEAD.—There is not as active an market this week. The trade is no more than fair. The price remains at $3.25.

LEAD PIPE.—The market is rather quiet. Composition is worth 7½c.; ordinary, 7c. Discount 35 per cent.

IRON PIPE.—This is still quoted at the same price. An active inquiry continues. We quote, per 100 feet, for standard pipe, screwed and coupled, in lengths under 19 feet, as follows: Black pipe, ⅛, $3; ¼, $2.50; ⅜, $2.75; ½, $3; ¾, $3.70; 1-inch, $5.25; 1¼, $7.40; 1½, $8.90; 2-inch, $12.40. Galvanized, ⅜, $3.55; ½, $4; ¾, $5.05; 1-inch, $7.25; 1¼, $10.10; 1½, $12.15; 2-inch, $16.70. Extra heavy pipe, plain ends, are quoted, per 100 feet, as follows: Black, ½, $4.35; ¾, $5.30; 1-inch, $7.60; 1¼, $10.60; 1½, $12.70; 2-inch, $17.45. Galvanized, ½, $5.35; ¾, $6.70; 1-inch, $9.60; 1¼, $13.30; 1½, $15.95; 2-inch, $21.75. For threads and couplings, 5 per cent. is added.

TINPLATES.—There has been no change. Prices here and on the foreign markets are very firm. We quote: Cokes at $4.25 to $4.50 per box, and charcoal at $4.75 to $5.25 per box.

CANADA PLATE.—These are still selling at the quotations of last week. Wholesalers have no need to raise their prices as yet in accordance with the advances on the primary market, but any imports now would command a much higher figure. The local market is firm. Our quotations are now as follows: 52's, $2.65 to $2.70; 60's, $2.75 to $2.80; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35.

STEEL.—A good demand keeps up, at unchanged prices. Our quotations are as follows: Sleighshoe, $2.10; tire, $2.15; bar, $2.05; spring, $2.85; reeled machinery, $3; toecalk, $2.60.

SHEET STEEL.—The demand is hardly even moderate. Prices are as follows: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—This is not moving very well. The price for Diamond is 8c., and for Jessop's, 13c.

TERNE PLATES.—We quote $7.75 to $8.00.

COIL CHAIN.—No advance has been made, though the market, for some sizes, is becoming firmer. A good trade is doing. Quotations are as follows: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-in., 7½c. per lb.; 5-16, $4.80; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.85; 9-16, $3.75; ⅝, $3.55;

¾, $3.50; ⅞, $3.45; 1-in., $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—We quote $5.75 to $6.25.

ANTIMONY.—We quote 10c.

ZINC SPELTER.—There is almost no inquiry for spelter. The price is 5c.

SOLDER.—A steady demand continues. Bar solder is worth 18c., and wire solder sells for 20c.

PAINTS AND OILS.

A firmness characterizes the white lead market now that there appears to be no change in prices in sight, and during the past few days shipments have materially increased. The bulk of these orders has been for strictly pure lead, but a large quantity of No. 1 and No. 2 grades have also been turned out. Linseed oil is selling fairly well for immediate shipments at the prevailing prices, the tendency being to buy in small lots for instant requirements. Turpentine is unchanged in price and is in fair demand. The paris green market has steadied wonderfully, and a number of sales are being made at schedule rates. Canadian manufacturers of it are now busily engaged in shipping, and it is thought that in a month's time there will not be much paris green afloat. This article is peculiar, in that whatever quantity is made for the year, it is all manufactured in the cold season, and none at all is made at any other time of the year, as it does not pay to start making afresh, however good the demand, when warm weather comes on. In colors and varnishes there is no change, and business is brisk. We quote as follows:

WHITE LEAD.—Best brands, Government standard, $5.87½; No. 1, $5.50; No. 2 $5.12½; No. 3, $4.75; No. 4, $4.37½ all f.o.b. Montreal.

DRY WHITE LEAD—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC — Pure dry, 6¼c.; No. 1, 5¼c.; in oil, pure, 7¼c.; No. 1, 6¼c.; No. 2, 5¼c.

PUTTY — We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200 lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL—Casks, 7c.; 100 lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD — Genuine red lead in casks, $4.50; in 100-lb. kegs, $4.75; less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE—Ground, casks, 5c.; less, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 80c.; boiled, 83c. In 5 to 9 bbls., 1c. less; 10 to 20 bbl. lots open, net cash, plus 2c. for four months. Delivered anywhere in Ontario between Montreal and Oshawa at 2c. per gal. advance and freight allowed.

TURPENTINE.—Single bbls., 67c.; 2 to 4 bbls., 66c.; 5 bbls. and over, open terms.

SHELLAC VARNISH — Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS—$1.20 to $1.45 per gal.

CASTOR OIL—8¾ to 9¼c. in wholesale lots, and ¼c. additional for small lots.

SEAL OIL—47½ to 49c.

COD OIL—32½ to 35c.

PARIS GREEN — Petroleum barrels, 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

The market seems to be about cleaned up on some lines. There is some scarcity of all metals, and wrought iron is very hard to obtain. It is the opinion among jobbers that imports from England to Canada will be light this year. Wholesalers are paying the following prices: Heavy copper and wire, 11c. per lb.; light copper, 8c.; heavy red brass, 11c.; heavy yellow, 9c.; light brass, 5c.; lead, 2⅜ to 2⅝c.; zinc, 2 to 2¼c.; iron, No. 1 wrought, $17; machinery scrap, $15; stove plate, $9 to $11; light iron, No 2, $7 per ton; malleable and steel, $4; rags, country, 60 to 70c. per 100 lb.; old rubbers, 6c. per lb.

GLASS.

Practically all retailers have booked their orders for spring. The trade continues fair at steady and unchanged prices. The unfavorable weather has interfered with this trade. We quote: First break, 50 feet, $2.10; second, $2.20 for 50 feet; first break, 100 feet, $4.00; second break, $4.20; third break, $4.70; fourth break, $4.95.

HIDES.

There is very little doing. Caliskins are 1c. higher, and No. 1 are now worth 10c. We quote: No. 1 hides, 7c.; No. 2, 6c.; No. 3, 5c. Sheepskins, 65c.

MONTREAL NOTES.

The discount on harvest tools has been changed from 70 per cent. to 60 and 10 and 10 per cent. off list.

Square nuts are now 3½c. per lb. off list; hexagon nuts, 3¾c. per lb. off list.

Alterations have been made in the discounts of all bolts except tire and stove bolts.

ONTARIO MARKETS.

TORONTO, March 14, 1902.

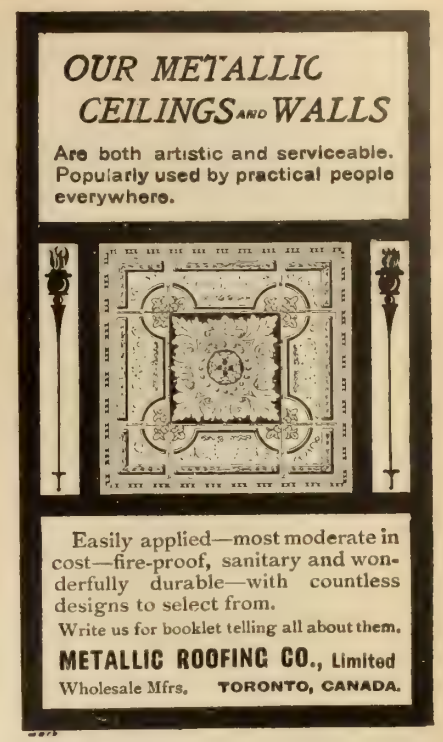
HARDWARE.

THE improvement noted in the wholesale hardware trade last week has been maintained. Large quantities of seasonable goods are being shipped and a good many orders are coming to hand. As far as prices are concerned, the feature is an advance in both bolts and harvest tools. The latter are about 7½ to 8 per cent., and the former about 10 per cent., higher. At the advance prices are firm in both lines. The demand for bolts, rivets and screws is brisk. Wire nails are meeting with a good demand and wire is moving out fairly well. A nice business is being done in tinware and enamelled ware. Sap buckets are still being shipped.

BARB WIRE—Shipments are going forward fairly well, but most of the orders have been booked. We quote as follows: F. o. b. Cleveland, $2.77½ for less than carlots, and $2.65 for carlots. From stock Toronto, $3.

GALVANIZED WIRE—A nice trade is being done in shipments from stock. Our quotations are as follows: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15; No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15, $4.60 to $5.50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE—A few shipments of oiled and annealed have gone forward, and a little is being done in hay-baling wire. The base price is: $2.60 per 100 lb. Oiling 10c.; coppering, 60c., and tinning, $2 per 100 lb. extra. Delivery points, Toronto, Hamilton, London and Montreal, with freights equalized on those points.



FINE STEEL WIRE—The movement is light. Discount is 22½ per cent.

WIRE NAILS — Business is improving, and the factories are all busy. We quote $2.55 for less than carlots, and $2.50 for carlots. Delivery points, Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS — Business continues dull. We quote base price $2.35 per keg, with 7½c. allowance on carlots.

HORSE NAILS—There is no improvement. Discounts are as follows: "C" brand, oval head, 50 and 7½ per cent., and on "M" and other brands, 50, 10 and 5 per cent. Countersunk head 60 per cent.

HORSESHOES—Business is still light. We

quote f.o.b. Toronto: Iron shoes, No. 2 and larger, light, medium and heavy, $3.60; snow shoes, $3.85; light steel shoes, $3.70; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85; snow shoes, $4; light steel shoes, $3.95; featherweight (all sizes), $4.95.

SCREWS — Business continues good. Discounts are as follows: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze 70 per cent.

RIVETS AND BURRS—There is a good demand, and the requirements of purchasers are increasing. We quote as follows: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 and 10 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS—Discounts have been reduced and a new list has been issued on carriage bolts. The list is printed in another part of this paper. The demand for bolts is good, and dealers are disposed to anticipate their requirements. We quote: Carriage bolts, common ($1 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent.; machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66⅔ per cent.

ROPE—The demand is fair, and prices continue firm. We quote: Pure manila, 16c.; British manila, 14c.; sisal, 12½c.; lathyarn, 11c.; sisal bed cord, 3 cord, 48 ft., 65c.; 60 ft., 80c.; 72 ft., 95c. per doz.

MILK CAN TRIMMINGS—Business is not as heavy as it was, as requirements have been pretty well satisfied. Discounts 25 per cent.

SAP BUCKETS—These are still being shipped in good quantities. Discount 40 and 10 per cent.

EAVETROUGH—A fair business is being done. We quote 10-inch at $3.10 per 100 feet.

SCREEN DOORS AND WINDOWS—A good many orders have been booked, but shipments are not yet going forward. Common doors, 2 or 3 panel, are quoted f.o.b. factory points as follows: Walnut, stained, 3-in. style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-in. style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2.50 per dozen.

GREEN WIRE CLOTH—Little or nothing is going forward yet. We quote $1.25 per 100 square feet.

SPADES AND SHOVELS—There is a fairly good movement in this line. Discount 40 and 5 per cent.

HARVEST TOOLS—The discount has been reduced, being now 60, 10 and 10 per cent. The market is firm. There was recently an advance of 10 per cent. in the United States.

BUILDING PAPER — A fair business is being done. We quote as follows: Dry sheathing, grey or straw, 30c. per roll; tar sheathing, grey or straw, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

CUTLERY—A fair business is being done for this time of the year.

SPORTING GOODS—The volume of business in this line is light.

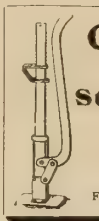
LAWN MOWERS—A little business is passing. We quote: Discount on high-wheel mowers, 50 per cent.; "Star" mowers, 9 in. wheels, $2.50 to $3; "Daisy" mowers, 17 in. wheels, $2.25 to $2.50.

BINDER TWINE—Although dealers are not buying large quantities there is a fair business doing, the idea appearing to be to place orders for probable requirements. We quote: "Blue Ribbon," 650 ft., 14½c.; "Red Cap," 600 ft., 13½c.; "Tiger," 580 ft., 12½c.; sisal, 500 ft., 11c.

PIPE FITTINGS—The manufacturers in the United States have withdrawn their prices on pipe fittings and are quoting on application only.

CEMENT—The demand continues to improve with the advance of the season. Prices are steady. We quote: Canadian Portland, $1.90 to $2 75; Canadian hydraulic, $1.25 to $1.50; German, $3; English, $3 to $3.15; Belgian, $2.50 to $2.75 per bbl., and American, $2 20 to $2.30 ex cars.

METALS.



Iron and steel continue firm. In metals generally a good business is being done, particularly for shipment from stock.

PIG IRON—The pig iron market continues firm. In the United States heavy premiums are being given, in some instances, in order to secure prompt delivery. We quote: Canadian pig iron on track Toronto at $19 for No. 1, and $18.25 to $18.50 for No. 2.

BAR IRON — There is an increase in the demand this week, and prices are firm. There appears to be an indisposition among some of the mills to advance prices, fearing that it would check consumption. We quote price at $1.95 to $2.05. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

STEEL—The demand is rather light, but a scarcity still exists in many lines. Quotations by Toronto wholesalers are: Merchantable cast steel, 9 to 15c. per lb.; drill steel,

CLELAND BROS & CO.,
MEAFORD, ONT. (12)

8 to 10c. per lb.; "BC" and "Black Diamond" tool steel, 10 to 11c.; Jessop's, Morton's and Firth's tool steel, 14c.; toe-calk steel, $2.85 to $3; tire steel, $2.30 to $2.50; sleighshoe steel, $2.10 to $2.25; reeled machinery steel, $3, hoop steel, $2.90.

BLACK SHEETS—The demand continues good. We quote: Common, $3.15 for 28 gauge; and dead flat, $2.50 for 26 gauge.

CANADA PLATES—A small business is being done from stock. Import orders are being booked for fall delivery. We quote: All dull, $3; half polished, $3.10; all bright, $3.75.

GALVANIZED SHEETS — The demand continues good. Quite a few import orders have arrived during the week. We quote: "Queen's Head" brand at $4.50 in case lots, and $4.65 in less quantities.

TIN—A fair business is being done. The outside markets are rather higher. The London market closed 7s. 6d. higher on Wednesday. In New York there is a scarcity of tin, but consumers are holding back in order to avoid paying premiums. The market there is consequently dull. Locally, quotations are higher at $29 to $30.

TINPLATES—A good business has been done during the past week, both from stock and for importation. We quote IC at $4.25 per box.

TINNED SHEETS—The demand is good. We quote as follows: 72 x 30, up to 24 gauge, 7½c.; ditto, up to 26 gauge, 8c.

COPPER — The London market on Wednesday closed 10s. higher on spot and 12s. 6d. higher on futures. The New York market is quiet. The American Metal Market says: "It is said that another curtailment of copper production in the Butte district will be made unless the price of copper is advanced." Locally, a good trade is being done in ingot copper, but sheet copper is quiet. We quote: Half-and-half, guaranteed, 19c.; do. commercial, 18½c.; refined, 18c.; wiping, 17½c.

BRASS—A fair business is being done at 15 per cent. discount.

PIG IRON—Trade is quiet. We quote: Pig lead at $3.50 to $3.75, and bar lead at $5.

IRON PIPE—There has been a readjustment of prices, and quotations are lower on sizes of black, down to 2 in. We quote per 100 ft.: ⅛ in., $3; ¼ in., $2.50; ⅜ in., $2 75; ½-in., $3; ¾-in., $3 70; 1 in., $5.25; 1¼ in., $7.40; 1½ in., $8 90; 2 in., $12.40; galvanized, 1 in., $7.25. Trade discount 4 per cent.

ZINC SPELTER—Some business is being done in small lots. We quote $5.50 to $6 per 100 lb.

ZINC SHEET—Orders, though numerous, are small. We quote $6 to $6.25 in casks and $6.25 to $6 50 in part casks.

SOLDER—There is a fairly-good demand. We quote: Half-and-half, guaranteed, 19c.; do. commercial, 18½c.; refined, 18c.; wiping, 17½c.

ANTIMONY—The demand is brisk this week. We quote 10c. per lb. for Cookson's.

PAINTS AND OILS.

Wholesale jobbers are busy shipping goods that have been previously booked for spring delivery and report that this season's volume of trade is fully equal to that of last year. The indications of an early spring also point to a big business this year. White leads are active, as are also mixed paints. Dry colors and zinc white are still a little quiet. Raw and boiled linseed oils are firm and are moving freely. Turpentine is steady. Varnishes are active and firm, the high prices of the gum and turpentine used in their manufacture making them have a tendency to advance. We quote:

WHITE LEAD—Ex Toronto, pure white lead, $5.87½; No. 1, $5.50; No. 2. $5.12½; No. 3, $4.75; No. 4, $4.37½ in pkgs. of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb. $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

LITHARGE—Genuine, 6 to 6½c.

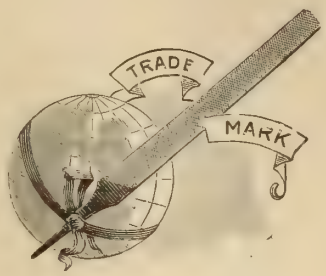
ORANGE MINERAL—Genuine, 7½ to 8c.

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.

BENZINE—In barrel lots, 16½c. per gal.; less quantities, 25c. per gal.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING — 65c. per 100 lb.; Gilders' whiting, 80c.



GUM SHELLAC — In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY—Bladders, in bbls., $2.25; bladders, in 100 lb. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

CASTOR OIL — English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL—Raw, 1 to 4 barrels, 82c.; boiled, 85c.; 5 to 9 barrels, raw, 81c.; boiled, 84c., delivered. To Toronto, Hamilton and London, 2c. less.

TURPENTINE—Single barrels, 68c.; 2 to 4 barrels, 67c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

There is a fair local trade. Prices are firm. We quote : Under 26 in., $4.25; 26 to 40 in., $4.65; 41 to 50 in., $5.10 ; 51 to 60 in., $5.35 ; 61 to 70 in., $5.75; 71 to 80, $6.25 ; 81 to 85, $7 ; 86 to 90, $7.75 ; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33⅓ per cent.

OLD MATERIAL.

Trade is improving and prices are steady. The bulk of the movement is in the metals. We quote as follows : Agricultural, 60c. per cwt. ; machinery cast, 60c. ; heavy copper, 10c½. per lb.; stove cast, 40c. ; No. 1 wrought, 50c. per 100 lb. ; new light scrap copper, 7½c. per lb.; bottoms, 8½c.; coil wire, 10c.; light brass, 5c.; heavy yellow brass, 7½c. ; heavy red brass, 8½c. ; scrap lead, 2¼c. ; zinc, 2c. ; scrap rubber, 6c. ; good country mixed rags, 50 to 60c.; clean dry bones, 40 to 45c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES—The market is weak owing to the unsatisfactory condition of the skins usual at this season of the year. We quote : No. 1, green, 7c.; No. 2 green, 6c. ; No. 1 green, steers, 8c.; No. 2 green, steers, 7c.; cured, 7¾ to 8c.

SKINS—The market is dull and the prices are unchanged. We quote : No. 1 calfskins, 9c.; and No. 2, 7c.; deacons (dairies) 55 to 60c. each ; sheepskins, 65 to 80c.; deerskins, 12½ to 14c. per lb.

WOOL—The wool market is in an unsatisfactory condition owing to the weak export demand. We quote : Fleece, 13c., and unwashed, 7 to 8c. per lb.

SEEDS.

Red clover and alsike are dull, owing to the close of the export season, and the prices are weak but unchanged. We quote buying price at outside points : Red clover, $4.50 to $4.75 ; alsike, $7.25 to $8.25, and timothy, $2.50 to $3.25 per bush.

COAL.

The situation is improving, but still there is a delay in shipments, owing to a lack of motive power. Prices are nominal. We quote at international bridges as follows: Grate, $4 75 per gross ton ; egg, stove and nut, $5 per gross ton ; soft coal, $2.50 to $3.25 in bond, according to grade.

PETROLEUM.

Business continues fair. We quote: Pratt's Astral, 16½ to 17c. in bulk (barrels, extra); American water white, 17 to 17½c. in barrels; Photogene, 16½ to 17c. ; Sarnia water white, 16 to 16½c. in barrels; Sarnia prime white, 14½ to 15c. in barrels.

MARKET NOTES.

Pig tin is quoted 1c. higher.

Iron pipe is quoted lower down to 2 in.

Bolts are higher.

The discount on harvest tools has been reduced, being now 60, 10, and 10 per cent., instead of 70 per cent.

A good trade is being done in "Triumph" corn planters, Samson's boot calks and "Premier" broadcast seed sowers.

ELECTRIC SMELTER FOR PARRY SOUND.

A conference between the Anglo-American Mining Co., of Duluth, and Mr. Hatch, the inventor of the Hatch electric smelter, was held at Parry Sound recently, when negotiations were entered into for the erection of a smelter for the reduction of copper ore and the formation of a company to handle the Canadian business of the Electric Smelter Co.

The necessary stock has been subscribed and Hatch & Young have been notified that their offer has been accepted by the local company. It is expected that by the end of the coming summer an electric smelter will be erected in Parry Sound.

ORANGEVILLE FIRM DISSOLVES.

The partnership that has previously existed between Adamson, Hewitt & Sproule, hardware, stove and tinware merchants, Orangeville, Ont., has been dissolved. This was on account of the continued ill-health of Mr. J. J. Hewitt, who, upon the advice of his physician, has decided to change his residence and occupation by going to the Canadian Northwest, where he intends to engage in ranching.

This firm has been in business at Orangeville for five years, during which time it has met with a good measure of success.

J. B. Adamson and Ed. H. Sproule continue under the style of Adamson & Sproule.

GRAIN SHIPMENTS.

In the House of Commons on Thursday, Dr. Sproule was told by Mr. Paterson that during the year 1901 the number of bushels of grain or other seeds shipped from various ports was :

	Bushels.
Depot Harbor	17,524
Midland	7,840,546
Collingwood	222,000
Meaford	1,447,222
Owen Sound	1,576,527
Sarnia	5,624,520
Goderich	2,665,420

During the same year 143,262 barrels of flour were shipped from Depot Harbor, 13,963 barrels from Owen Sound, and 297,669 barrels from Sarnia.

TO MAKE SILICATE BRICK.

A NEW industry for North Sydney, C.B., will be the manufacture of silicate brick. A company has been formed with a capital of $100,000, and is applying to the Nova Scotia Legislature for incorporation, for already sufficient stock has been subscribed to guarantee the commencement of the undertaking.

The officers of the company are to be : Hiram Donkin, ex-manager of the Dominion Coal Co., president ; A. C. Bertram, ex-mayor of North Sydney, vice president ; E. E. Odell, chief engineer of the Dominion Coal Co., secretary, and H. F. McDougall, ex-M.P., John Vooght, John McCormick, M.P.P., Capt. David Rudderham, A. A. McLennan and J. A. Gillies, K.C., directors.

This North Sydney Co. has secured the exclusive rights of manufacturing bricks by the Swedish process. This method is a secret one, and in Germany and France, where it is much used, the silicate brick is rapidly surpeseding the clay brick on account of its cheapness.

By the application of intense pressure the bricks are manufactured from ordinary sand. The finished article is both handsome and durable for all classes of buildings, presenting the appearance of very fine sandstone. Exhaustive tests which have been made at McGill University, Montreal, in regard to its pressure, freezing, breaking, etc., have proved most satisfactory. A company has also been formed by Charles Shephard & Sons, Montreal, for the manufacture of silicate brick in Quebec for which they have purchased the rights.

CHANGE IN AN ATWOOD FIRM.

Mr. John Roger, Atwood, Ont., has taken into partnership Mr. T. G. Ratcliffe, and they will continue to do business at the old stand as hardware merchants under the name of Roger & Ratcliffe. Mr. Roger was in Toronto this week and called on HARDWARE AND METAL.

ANOTHER BEREAVEMENT.

The hardware trade will regret to hear of the death of Mr. Peleg Howland's 19 months' old son. The little fellow had been ailing for some time and died on Tuesday last. It is only three or four weeks ago, it will be remembered, that Mr. Howland lost his father.

Wettlaufer Bros. & Sons., Stratford, Ont., are now looking for sample and show rooms in Winnipeg. They are at present showing several lines of their goods in the warehouse of The Fairchild Co. Among the lines offering, new to this market, are a combined wagon box, hay rack and cattle pen, a washing machine with some new features, a fanning-mill of exceptional power, a churn and a wheelbarrow. There is a possibility of a local company being formed to manufacture the wagon boxes as it is expected they will be popular here.

LEADER CHURN

New Century Improvements

FOUR DIFFERENT STYLES:

A—Steel Frame with double reversible Steel Lever.
B—Wood Frame with double reversible Steel Lever.
C—Steel Frame with Crank.
D—Wood Frame with Crank.

Styles **A** *and* **B** *may be operated from a sitting or standing position.*

Steel Frames and Hoops beautifully ALUMINIZED.

All LEADER CHURNS are equipped with BICYCLE BALL BEARINGS and PATENTED CREAM BREAKERS.

Stands are so constructed that they are particularly strong and rigid, and there is nothing to interfere with the placing of pail in the most convenient position for draining off buttermilk.

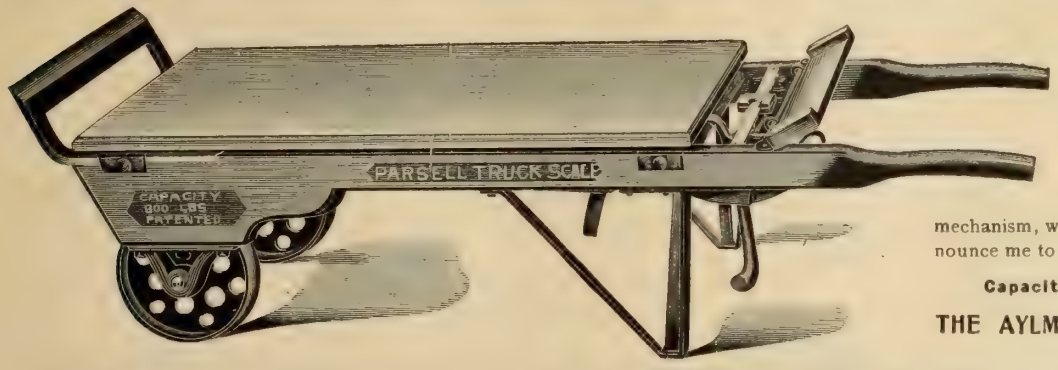
It Pays to Have the Best. None are Better Than the Leader.

THE DOWSWELL MANUFACTURING CO.,
HAMILTON, ONT. Limited.

Eastern Agents: W. L. Haldimand & Son, Montreal, Que.

The New Century Washing Machine

IT LOOKS EASY.
IT IS EASY.



Steel Ball Bearings, same as used in High-Grade Bicycles, and strong tempered steel spiral springs render it so No machine on the market approaches it in simplicity, ease, quickness, or thoroughness.

Equally well adapted for use in Public Institutions, Hotels, Laundries, or the Home.

The operator does most effective work while seated. Splashing impossible.

Quick Seller. **Once Inspected, Soon Selected.**

I AM THE PARCELL DROP LEVER TRUCK SCALE.

I HAVE no connection or relationship with any other Truck Scale. Do not condemn me because some other Truck Scale was not right, but give me a chance to prove to you that I am the most convenient scale made, and that I am perfectly correct and a first-class piece of mechanism, which I must be, as good inspectors pronounce me to be a first-class article.

Capacities: 800 lb., 1,200 lb., 1,600 lb.

MANITOBA MARKETS.

WINNIPEG, March 10, 1902.

THE trade of the week has been good in nearly all lines and the promise of the early opening of navigation is having a stimulating effect. The very mild weather is also creating more movement among contractors and builders, and preparation for spring work is fully two weeks ahead of the ordinary season.

There are few changes of prices to note in any line; in fact, the advance of 50c. per cwt. on manila rope is the only one that can actually be quoted.

All lines of paints, oils and glass are moving freely, but without change of price.

Binder twine is active just now, and representatives of various factories are visiting the city. The indications are that prices will be firm and high all season.

Price list for the week is as follows:

Barbed wire, 100 lb	$3 30

HEATING AND PLUMBING

BUILDING PERMITS IN TORONTO.

DURING the week building permits have been granted from the Toronto City Commissioner's office to Caleb Evans, for a detached two-storey and attic residence on Bloor street west, for $6,000 ; S. Coma, for alterations and putting on a mansard roof to his store at 1088 Queen street west, for $500 ; The Toronto General Trusts Co., for a one-storey frame stable in rear of 195 King street east covered with galvanized, corrugated iron, for $300; W. H. Thompson, for three attached two-storey brick dwellings at 36, 36½ and 38 McPherson avenue, for $5,000; Mrs. A. McGregor, for a two-storey and attic brick dwelling at 342 St. Clarens avenue, for $3,000; Alexander Manning, for a third additional storey to brick warehouse at 74 and 76 Front street east, $1,500 ; Walter J. Clubb, for the erection of a two-storey and attic brick and stone dwelling at 380 Manning avenue, for $4,000 ; W. M. Douglas, for the erectiou of a two-storey brick addition to dwelling at 52 Homewood avenue for $300; John Badgerow for a pair of semi-detached brick houses on the corner of O'Hara and Marion avenues, for $5,000 ; Thomas McIlwain, for a pair of semi-detached stone and brick two storey-and-attic dwellings, at 1468 and 1470 King street west, for $5,000; A. Wills, for a pair of semi-detached brick houses on Harrison avenue, for $4,000 ; J. W. Butchart, for a two-storey frame and roughcast carpenter shop on Dundas street, for $300 ; Sovereign Bank, for alterations to bank at 28 King street west, for $2,000; Menzie Mfg. Co., for the erection of a three-storey brick addition and alterations to burnt buildings at 41 and 43 Pacific avenue, for $4,200 ; F. J. Goodman, for three attached two-storey-and-attic brick dwellings on Delaware avenue, for $6,900, and Fox & Co., for the erection of a one-storey brick addition to factory at King and Charlotte streets, for $250.

BUILDING IN OTTAWA.

There have been recently issued at Ottawa building permits to McKinley & Northwood for a brick dwelling on First avenue to cost $2,500 ; John E. Fudge, for a brick dwelling on Fourth avenue to cost $1,400 ; Wm. Thompson, for a brick veneered house on Flora street for $1,200 ; St. Germain & Black, for a brick veneered building on Waverley street for $2,500 ; the Brown estate for three brick buildings on Maria street for $5,000 ; Miss Ann Walsh for two brick veneered dwellings on Lisgar street for $1,300 ; Felix McCullough, for alterations to his house on Theodore street for $500 ; Duncan Brown for a double brick veneered dwelling on First avenue for $3,600 ; G. Rennock, for a brick veneered house on Waverly street for $800, and A. M. G. Harris, for a brick veneered house on Neville street for $800.

BUILDING IN WINNIPEG.

Building operations in Winnipeg will be active this summer. Already a number of new buildings are being contemplated. Amongst the most imposing of these will be St. Stephen's Church (Presbyterian), which is expected to cost, when finished, over $40,000. It will have a frontage of 75 ft. on Portage avenue and 125 ft. on Spence street, and three entrances. The exterior will have stone trimmings, and a tower will be at one corner.

The addition to St. Boniface College will consist of a wing 60 x 100 ft. of brick and stone and four storeys high, and will cost $30,000. It is to be fully equipped with all modern improvements, and the most improved system of plumbing and sanitary draining will be introduced.

The new building for St. Mary's Academy, which will be built during the summer, will be a five-storey structure with a frontage of 150 ft. long.

The Fairchild Company, Limited, will erect a large four-storey brick and stone building, 70x150 ft., to be used as a warehouse.

A residence for Mr. McManus will be built at the corner of York avenue and Edmonton street, to cost $6 000.

PLUMBING AND HEATING CONTRACTS.

Fiddes & Hogarth, plumbers, steamfitters, etc., Toronto, have secured contracts for the plumbing and heating of a house for Captain Trigge on Walker avenue, the plumbing of two houses on Gerrard street east for W. H. Gibbs, the plumbing of a number of houses around Kew Beach, the plumbing of the new meeting house for the Society of Friends on Carlton street, the plumbing of three houses on Maitland Place for Thomas Wilkins, and the plumbing and heating of the residence of Gerard Heintzman on Gerrard street.

SOME BUILDING NOTES.

W. A. Clow is building a store at Oak Lake, Manitoba.

James E. Watson is going to erect a new store at Beecher, Ont.

A new $5,000 church is being erected by the Baptists at Arnprior, Ont.

A big summer hotel will be built at Balmy Beach, Owen Sound, Ont.

Dr. Brown is calling for tenders for the erection of a solid brick office building at Port Arthur, Ont.

Charles Reckin is preparing for the erection of a new four-storey flour mill, 36x75, at Wiarton, Ont.

Robert Willis, of the I.C.R., has decided to build a house on Duke street, St. John, N.B., and has awarded the contract to Alex. Maxwell.

The Gurney Foundry Co., Limited, Toronto, contemplates the erection of a new foundry at Toronto Junction, Ont., at a cost of $40,000.

A new two-storey schoolhouse will be erected by the congregation of Rosh Pena Jewish synagogue, Winnipeg, in the rear of the present synagogue.

HAMILTON SEWERAGE.

Engineer Barrow, of Hamilton, recommends to the sewers committee of the Hamilton City Council that $400 be spent on the repairing of the Ferguson avenue sewage disposal works, which would be the cost of placing concrete around the walls where the leaks are between the bottoms of Nos. 4, 5 and 6 basins.

THE ATTRACTIONS OF VICTORIA.

A meeting of the Executive Committee of the Victoria Tourist Association, Victoria, B.C., was held on February 27 with a full attendance of members.

An address was given by G. S. Bennett on the methods employed by the Tourist Associations at Detroit, which he had been in close touch with for several years, at Halifax, St. John, and other places.

The question of employing a travelling advertising agent came up, but nothing definite was done.

A committee on printing was appointed to supervise the publication of a small folder for early distribution throughout the Pacific States, the Territories and Manitoba.

GET A PAINT

for your paint business that stands up against the weather at all times. It will give you something to talk about, something to induce customers, something to be proud of.

RAMSAYS PAINTS

are made to give you just such talks, such inducements, such helps to increase your business. And then you get handsome counter cards, posters, hangers, show cards, fence signs, everything that points the way to your store for the proper paints to paint with, and you have neat, attractive packages, nicely labelled, showing colors on the can in all the grades.

Why are
Canada Radiators
better than any other ?

1st—They have perfect circulation.

2nd—They work in steam and water.

3rd—They save money both in plant and fuel.

The Fairbanks Company, 747 and 749 Craig Street, Montreal
SALES AGENTS,

THE HALIFAX PLUMBING BY-LAW.

THE following is the draft of a by-law adopted by the city health board of Halifax, N. S. :

Be it enacted and ordained as follows :—

Sections 33 to 55, both inclusive, of the Rules of the city board of health as amended, are hereby repealed and the following substituted therefor :

33. A board of plumbing examiners is hereby constituted, to consist of the city engineer and the city inspector of plumbing. The board shall be called together by the city engineer (who shall be chairman of the board) at such times as the board of health may direct.

34. No person shall carry on the business of plumbing in the city of Halifax unless he is duly licensed to carry on the same, and is registered as such in the office of the board of works for said city, and the person obtaining such license shall pay for said license to the board of works the sum of $10.

35. To entitle any person to a license under the next preceding section, he shall be of the full age of 21 years, and have a place of business as a plumber in the city of Halifax ; and shall agree as a condition of obtaining said license to carry on said business in compliance with all rules and regulations now made or which may hereafter be made by the city health board, and his license, when issued, shall be kept in a conspicuous place in his place of business.

36. Every person before doing any plumbing work in the said city for or on account of himself or any licensed plumber shall be a practical and experienced plumber and furnish the board of plumbing examiners sufficient evidence that he is capable of properly doing and performing plumbing work in said city, and if the board is satisfied of his competency to perform said work, they shall cause his name to be registered in the said office of the board of works and give him a certificate of competency as a journeyman plumber, after which he shall be at liberty to do such plumbing work, but not before.

37. Every person desiring a license as a licensed plumber, or a certificate as a journeyman plumber, shall file a petition in writing with the clerk of works, giving the name of the applicant, and if the applicant is applying for a licensed plumber's licence he shall state in his petition his age and place of business in said city, and the said p tition shall be accompanied with the bond hereinafter referred to.

38. Any change in the location of the business of a licensed plumber shall be promptly reported to the said clerk of works.

39. Any journeyman plumber desiring to become a licensed plumber shall first comply with these rules and regulations as to licensed plumbers, and no journeyman plumber shall do business as a licensed plumber until he has obtained a license, notwithstanding anything in these rules and regulations.

40. Any journeyman plumber who furnishes satisfactory evidence to the board of plumbing examiners that he has carried on the business as a practical and experienced journeyman plumber in the city of Halifax for not less than 4 years next previous to November 29, 1897, shall be entitled to receive registration without examination.

41. All licensed plumbers shall be held responsible for all acts of their employes for work done in connection with their plumbing business in respect to which such license is granted.

42. Every licensed plumber shall on the first day of every month report to the city engineer, upon printed forms to be supplied at the city engineer's office, the number, nature and extent of all new plumbing fixtures placed by him or his journeyman plumber in any building in said city, but they shall not be required to make returns of any old fixtures renewed, except water closets and urinals.

43. Every licensed plumber shall only employ certificated journeymen plumbers to do said plumbing work, but said work may be done and performed by any practical plumber under the guidance and direction of a certificated journeyman plumber then present directing the work.

44. Every plumber, before obtaining a license, shall file a bond with the clerk of works in the penal sum of $200 conditioned for the faithful performance of his duty as a licensed plumber and for his not permitting or allowing any plumbing work that he may be called upon to do to be performed by any person in his employ except by such persons as may be authorized to do plumbing work under these rules and regulations, and for his not violating any of the terms and conditions of said rules and regulations or any other rules or regulations in force in the city respecting plumbing, drainage, sanitary matters and the city waterworks.

45. No person shall carry on business in the said city as a licensed plumber unless he is the holder of the license herein mentioned, nor shall any journeyman plumber do or perform any plumbing work until he has obtained his certificate under these rules and regulations.

46. No person shall be allowed, without having first obtained a permit from the city engineer, to open or shut off the street stopcock connected with the service supplying any premises or buildings, unless in case of urgent necessity to prevent loss or damage from flooding, and shall in every such case leave the stopcock as he found the same, and any person who shall commit any damage or injury to any stopcock in the service pipes of the department shall be liable for the amount of any such damage, in addition to any penalty imposed for the violation of these rules.

47. When any old fixture or plumbing requires renewal the work shall be done in accordance with these rules and regulations, as far as they apply, but it shall not be necessary to take out any old work which, in the opinion of the plumbing inspector, is in good sanitary condition. In every case where in the opinion of the city engineer and plumbing inspector the enforcement of any rule or rules respecting plumbing is impracticable or inadvisable, they shall have power to modify or suspend any such rule or rules to meet the exigencies of the particular case.

48. The city engineer, the foreman of waterworks, or any inspector appointed for that purpose, shall have the right at proper hours of the day, and upon reasonable notice given and request made upon the owners, to enter upon and have free access to all parts of any building in the city of Halifax, in which water from the city waterworks is delivered or consumed.

49. The city health board shall have the power at any time to cancel any plumber's license or any journeyman plumber's certificate for cause, and thereupon all rights of said licensed plumber or journeyman plumber to do any plumbing work under these rules or regulations shall cease and determine.

50. The license to licensed plumbers shall expire on the 31st day of December in each and every year, but they may be renewed by the city board of health on the recommendation of the board of plumbing examiners, and the licensed plumber shall pay one dollar ($1) for each and every renewal.

51. The city health board shall from time to time, as occasion may require on the nomination of the city engineer, appoint such inspectors of plumbing as may be found necessary, but no person shall be eligible for such appointment who has not passed a satisfactory examination for proficiency in both practice and theory of plumbing and drainage before the board of plumbing examiners.

52. Such inspector or inspectors shall be under the supervision of the city engineer, and shall be attached to the office of the said city engineer, and shall be paid such salary as the city council determines.

53. All work contemplated in these regulations shall be done by a certificated journeyman plumber in the employ of such licensed plumber, or as provided in rule 43, and shall be subject to the inspection, supervision and approval of the city engineer or of an inspector appointed by the city health board for that purpose, and all faulty or defective work which is at any time discovered shall be made satisfactory to the said engineer or inspector, as the case may be, and when found satisfactory the certificate shall issue to the plumber at the expiration of thirty (30) days from date of inspection, unless in the meantime such work has become faulty or defective.

54 Hereafter no person or member of any company or employe or apprentice of such person or company shall do or perform any work authorized by these rules, nor shall any such person or member of any corporation direct or instruct any employe or apprentice to do or perform any such work until the owner or his agent shall have first obtained the permit and filed the plan and specfication mentioned in rules 27 to 31, both inclusive, of the rules hereby amended.

55. Every person violating any of these rules and regulations of the board of health shall be liable to a penalty of not less than five ($5) dollars, nor more than eighty ($80) dollars for each offence on summary conviction before the stipendiary magistrate, and, in default of payment, to imprisonment in the city prision for a term not exceeding ninety (90) days.

BOOK-KEEPING BY HYPOTHESIS.

There was once, according to an exchange, an aged merchant of Ohio who carried the accounts of the day in his head, and just before going home, would sit down and enter his charges and credits. One evening he remembered very well that a customer named Fuller had asked about a hammer, but could not be sure whether he had bought one. The merchant scratched his head and figured over it a long time, and then, to make no mistake, evolved the following original specimen of bookkeeping :

John Fuller, one hammer ..... 75c.
(Maybe perhaps, and maybe perhaps not).

ORIGINALITY.

Originality is one of the qualifications necessary to ultimate success, This is especially true in the advertising world. Originality is a broad term, and it can be brought into profitable play in an almost unlimited field and in diversified forms.

In advertising this quality is made apparent in different ways, bringing into play the products of thousands of brains, each brain having a kink therein different from all others. Originality is simply a brain kink.—Business.

Some Horse Nail Pointers:

The "C" brand Horse Nails are not the lowest priced, but they are the cheapest—that is if you will take quality, pattern and durability into consideration. It is an accepted truth which has found expression in the saying "the best are the cheapest." To assert that the "C" brand Nails are the best is only to repeat the experience of the hardware trade and farriers who have bought and used them for the past thirty-seven years. They are the standard Horse Nails of Canada, because they are the best. **No other Horse Nails made in Canada have ever been sold at a better price than the "C" brand. Why?** Because there were none better. If you want the best article, either Horse Nails or anything else, you have to pay a price corresponding to its value. The best cost the most to produce. Our "C" brand costs more to make, because we do not admit anything of a cheap nature into their composition, or the process of manufacture. The best material that is known or used in the world for the manufacture of Horse Nails forms the basis of the "C" brand. The "hot-forged" hammered process is the only one we use, because it thoroughly hammers a Nail from the solid rod or bar of Swedish charcoal-toughened steel, which we use exclusively, and is made specially for our works in Canada.

If other brands were sold at even seventy-five cents a box lower than our "C" brand, **it would only reduce the cost of the 32 nails used in shoeing a horse—one cent.** There is no economy in using cheap Nails. Order the "C" brand and satisfy yourselves and your customers.

All the leading wholesale firms in Canada have them for sale or will obtain them for you; if not, send your orders direct.

Canada Horse Nail Company

MONTREAL.

ANOTHER RAILWAY PROJECT.

A SCHEME is on foot to construct a trans-continental railway from Quebec to Port Simpson, on the Pacific Coast. To make the first move in this gigantic undertaking a meeting of a number of Quebec Province's representative commercial men was held on March 5 at Quebec. Among those present were Geo. Tanguay, President of the Quebec Board of Trade, in the chair; J. G. Scott, V. Chateauvert, J. T. Ross, C. Baillairge, W. A. Marsh, F. Billingsley, E. Beaudet, W. Shaw, A. E. Doucet, H. O'Sullivan, Alex. Hardy, Quebec; Lieut.-Col. B. A. Scott, Roberval; J. D. Guay, Mayor of Chicoutimi; A. E. Vallerand, Cyrille Tessier.

The company was incorporated by the Dominion Parliament in 1895, and is known as The Trans-Canada Railway Co. Its charter was amended in 1897, when it was capitalized at $20,000,000. The incorporators were a number of railroad capitalists in London, Eng., and Ottawa, Canada, but since then they have associated with themselves a number of railroad magnates from Quebec, Montreal, Chicoutimi, Lake St. John, Boston and New York. The Quebec men have the control of the concern.

Plans and profiles of the first 60 miles of the road were submitted by the company's engineers, Messrs. Doucet and H. O'Sullivan, besides a map of the route the line would follow across the continent. The road is to be divided into four sections. These are as follows: The first, from Quebec to James' Bay, via Roberval; the second, from James' Bay to Norway House, at the north end of Lake Winnipeg; the third, to Peace River Pass, in the Rockies; and the fourth, from the summit to Port Simpson, the best Canadian harbor on the Pacific Coast.

The advantages claimed for this route are that it is about 300 miles shorter than the C.P.R. from the Atlantic to the Pacific; 600 miles shorter than Mackenzie & Mann's proposed line, and 700 miles shorter to Japan and China than the C.P.R. The point at which it will cross the Rockies is less than half the elevation of the C.P.R.

The Dominion Parliament has given this undertaking its support by voting a subsidy to the first 60 miles of the road, from Roberval westward. This section is to be placed under contract immediately.

The financial statement of the company was read by the chairman, the stock book was reopened for the subscription of shares, and the company was duly organized.

Charles Rousseau, general merchant, Cedar Hill, Que., has assigned, and a meeting of his creditors has been called for March 12 to appoint a curator.

"Lay On Macduff"

All admire the thrifty appearance of a well-kept house, barn or outbuilding, and it is safe to say that this is largely obtained by the abundant use of paint — good paint. With the advent of better times we are entering upon the greatest painting season than has ever been experienced. It has become the fashion, almost a craze, to paint, stain and kalsomine. From a hygienic point of view, as well as the knowledge that the value of all buildings is enhanced by the plentiful application of genuine paint, this is a good sign and house-owners should take a day off immediately and "lay on" the brush. The brush should be well charged with first-class stock, such as is made exclusively by the **CANADA PAINT COMPANY, Limited, of MONTREAL and TORONTO.** They assist in making painting a veritable pleasure. Their well-known brands of Mixed Paints, Stains, Enamels, Wagon Paints and Varnishes are put up in a handy form ready for use, and any dealer who desires to extend his business should get in touch with the **CANADA PAINT COMPANY,** who are by far the most extensive manufacturers of painting materials in Canada.

BRITISH COLUMBIA ASSOCIATED BOARDS OF TRADE.

THE Associated Boards of Trade of Eastern British Columbia held their fourth annual meeting at Kaslo, B.C., on February 28, when some important resolutions were passed. Twenty-eight delegates were present from Nelson, Kaslo, Fernie, Trail, Rossland and other centres. President C. Scott Galloway was in the chair.

In his address, Mr. Galloway dwelt on the allotting of a seat in the Laurier Cabinet to a British Columbian, the Hon. Mr. Templeman; the obtaining of a bonus for the refining of lead ores in the Slocan from the Dominion Government by the Mine Owners' Association, and the appointment of a British Columbian representative in London, Eng., to keep before the British capitalists the boundless opportunities afforded by the Pacific Province for profitable investment. He also touched on the necessity of increased railway facilities for the development of British Columbia, and urged the appointment of a delegation to request the Provincial Government to remove the obstructions at present placed on railway construction in the Province. This would enable capitalists and others to have a free hand in the opening up of new districts with their railroads or the paralleling of existing lines.

Several important resolutions were passed. Probably the most noteworthy is the one asking the Dominion Government to so adjust the duties on lead products as to encourage the manufacture of white leads and lead products in the Dominion, thus enlarging the home market for Canadian lead. This resolution will be placed before the Ottawa House by G. O. Buchanan, W. H. Aldridge and James Cronin.

A resolution was passed regarding the bounty of $5 per ton on pig-lead produced in Canada, asking that the Dominion Government be requested to modify this bounty for the first year, so that the full amount, amounting to $100,000, be distributed, providing 15,000 tons of pig-lead be produced during the first year; should there be less than 15,000 tons produced during such year, then the rate allowed during the first year to be $7 per ton, instead of $5, as at present, provided furthermore, that the bounty for each of the succeeding years shall be at the rate of $5 per ton, but such bounty not to exceed $100,000 per year, as at present.

Resolutions also were passed asking that timber rangers be appointed by the Provincial Government to assist in the prevention of bush fires; that the Dominion Government pass a general railway Act on the lines of the present Provincial Tram Act, and that the Rossland riding be cut in two so that the Boundary District might have a representative of its own in the present Provincial Legislature.

The secretary-treasurer's report showed a balance of $40.47 in the treasury.

NOVA SCOTIA TOURIST ASSOCIATION.

The annual meeting of the Nova Scotia Tourist Association was held at the Board of Trade Rooms, Halifax, last week, when the following executive was elected: G. S. Campbell, G. E. Faulkner, I. C. Stewart, F. G. J. Comeau, F. S. West, H. L. Chipman, W. E. Hebb, C. R. Hoben, W. E. Thompson, Ald. MacIlreith, Alex. McNeil, LL.B., A. F. Macdonald, W. R. McCurdy, T. J. Egan, J. W. Vidito, F. P. Hayden, J. Frank Colwell.

The annual report reviewed the history of the Association since its formation in 1898, and then went on to describe last year's work. They had distributed 20,000 copies of their booklet in 1901, and every Monday morning had issued a small leaflet entitled, "What is going on in Halifax." The report dealt with the methods of advertising Halifax at the Pan-American Exposition, the organization of various other associations throughout the Province, the establishment of the Bureau of Information and the Lodging Bureau at Halifax, the illustrated lectures about that city, and the visit of the Canadian Press Association.

The financial report of the Association showed a balance of $169 97 in the treasury.

INQUIRIES ABOUT CANADIAN GOODS.

The following were among the recent inquiries relating to Canadian trade received at the Canadian Government office in London:

1. A firm in the eastern counties importing roofing shingles desire to get into communication with Canadian houses shipping these goods. Size 18 x 4 inches, with rounded corners at one end, to be packed very closely for shipment.

2. A firm of brushmakers (tooth, nail and shaving) desires to be furnished with the names of large buyers of these commodities in Canada, and are also open to appoint agents in the Dominion.

3. A London firm of timber brokers are desirous of being placed in communication with some leading exporters in Canada.

4. A well-known bottling firm who only put up high-class beers for export are desirous of extending their trade with Canada, and will be open to appoint agents.

5. An important firm of wholesale and export druggists are seeking openings for an extension of their business with Canada in chemicals, drugs, tinctures, fruit essences, sundries, and surgical instruments.

6. A military and general saddlery firm are contemplating an export business with Canada, and make inquiry respecting a possible market for the goods they manufacture.

7. An importer and broker asks for names of exporters of oatmeal, farina, peas, etc., in Canada.

8. An important firm of carriage builders are prepared to accept agencies for Canadian carriage makers and to arrange for the display of such Canadian goods at some of the leading exhibitions in the United Kingdom.

9. Inquiry is made for the addresses in Canada of lumber firms making egg cases for export, in stock; also for names of makers of fillers for egg cases.

10. A person with experience in the line wishes to take up the representation in the United Kingdom of Canadian houses shipping whitewood picture frame mouldings and other similar wood goods.

[The names of the firms making the above inquiries can be obtained on application to the editor of HARDWARE AND METAL]

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

The Evolution of the Radiator

Like all other inventions, the radiator of to-day is quite a different thing to what it was fifteen years ago. The "SAFFORD" marks the highest point yet attained. It combines in construction and decoration all useful and necessary points.

It is built without bolts or packing, the connection being made by screwed nipples. "SAFFORD" for hot water and steam heating.

If you have not our catalogue, write us.

TROWELS,
ETC.

A Practical Mechanic

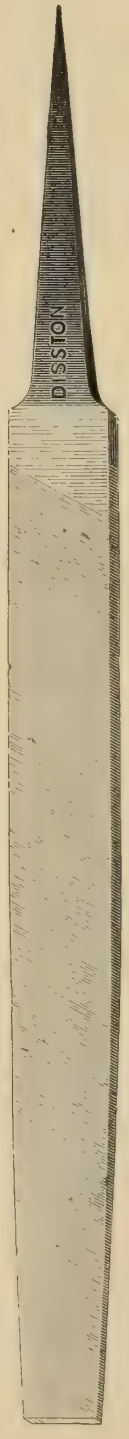
practices economy in the selection of his tools. Real economy lies in buying tools of long established reputation for quality.

The name **"DISSTON"** on a hand saw saves the salesman an amount of talking. It is backed up by quality and reputation; that which mostly appeals to the mechanic.

An Experienced Lumberman

needs but a few strokes through the log to determine the quality of a cross-cut saw. The quality of the **"DISSTON"** is of the very highest standard, the temper perfect. Most lumbermen prefer the **"DISSTON"** to any other. All dealers handling the **"DISSTON"** recommend them as the best manufactured. The name sells them.

An Expert Machinist



when once accustomed to using the **"DISSTON"** is not easily persuaded to buy a file not bearing the **"DISSTON"** brand.

Reason; DISSTON'S wear longer and will not clog like other files.

A Skilled Farrier

knows the value of time. Less time is consumed in rasping a horse with the **"DISSTON"** than with the ordinary rasp. It's not only the quality, but the way it's cut.

Result; more horses shod, less time to do it, more profit for the farrier.

ROCK FACE BRICK.

PATENT "SAFE LOCK" SHINGLES.

CEILING PLATE
557.

WHY are there more dealers selling "SAFE LOCK" Shingles than those of any other make? We deal fairly and supply good material which, of course, is a big factor in our success, but the real secret is

Their Superiority.

In the "SAFE LOCK" we have a construction which cannot be successfully imitated. If you are not familiar with the construction, procure samples of the different styles of metal shingles on the market and compare them, and you will then understand the success of the "SAFE LOCK" construction. A comparison never fails to bring us the business.

STOP a moment and **CONSIDER** what style of a roofing is to supersede the wooden shingles? Will it be slate or gravel do you think? If you consider the advantages of metal roofing you will not be slow to arrive at a conclusion, and if metal roofing is to be the universal covering for buildings in the future, are you planting for the coming harvest? If you have not been one of the fortunate ones who have planted "SAFE LOCK" seed, and are already reaping, would it not be wisdom to act quickly if not already too late? We only appoint one representative in a locality.

SIDING. Have you tried our large sheet siding? Each sheet measures 30 x 96. It has real talking points, and your customers will not hesitate to pay a good price.

METAL CEILINGS. Orders are coming our way thick and fast; in fact, they surprise us. Our customers seemingly control the trade in their localities. We can help you to do the same. . . .

WHAT ABOUT YOUR TROUGHING, CONDUCTOR, Etc.? Do you know that we are manufacturing a superior trough without prick marks and mechanically uniform in size? This means a saving in solder and time erecting which you cannot afford to ignore. Prices guaranteed.

We are continually adding new lines and believe that we have greater facilities to help live dealers to a lucrative business than our competitors. It will pay you to become acquainted with our line and methods of fair treatment to our customers.

WRITE NOW BEFORE YOU FORGET ABOUT IT.

BUSINESS AND ITS MANAGEMENT.

AVERAGING PROFITS IN THE RETAIL STORE.

S all lines in the retail hardware store cannot bear an equal percentage of profit, it is obviously no easy task to so fix the selling price of each in order that the average profit on all shall bring the merchant sufficient remuneration for his capital invested and his labor expended.

It is generally conceded that most retail hardware stores should be able to show a gross average profit of from 25 to 30 per cent. on the total annual sales in order that all expenses and depreciations may be covered. This can only be done under the operation of a carefully thought-out system. It must be remembered that 25c. added to every dollar's worth of goods bought does not represent a profit of 25 per cent. As a rule, it will probably be found that in order to procure a profit of 25 per cent. in the neighborhood of 33 1-3 per cent. must be added to the cost.

There are occasions on which it would be desirable to sell a line of goods at almost any price in order that a customer may be found for it. But such occasions are only exceptions. As a rule, 10 per cent. is low enough for the minimum per cent. of profit. But it is obvious that the more goods that are sold at 10 per-cent. profit, the larger will have to be the percentage realized on other lines if an average profit of 25 or 30 per cent. is to be earned. And this suggests the importance of the retail merchant being at all times on the lookout for goods upon the sale of which he can secure substantial profits.

As a writer in "Hardware Store Business Methods," says, it is impossible to state on general principles just what proportion of profit each line of goods shall earn to fit individual cases, since the problem in detail is a personal one, and every merchant must be guided by the proportions of his sales in previous years to determine the exact course to pursue. Suggestions only can be made. And for this purpose we turn to the book we have just quoted.

Taking first the goods which earn from 10 to 20 per cent. gross profit, we class such lines as are very staple and competitive, as nails, barb wire, sash weights, builders' hardware under contract, and such leaders as may be thought desirable for advertising purposes.

From 20 to 25 per cent. includes a large share of sales. Such lines as machinists' tools, cordage, files, paints and generally stable goods sold in moderate quantities.

From 25 to 30 per cent. we find carpenters' tools, wooden ware, agricultural tools, shelf hardware and a variety of articles which may be classed as staple goods, but yet of such a nature as to admit of a higher rate of profit.

At 30 to 50 per cent. we come to table cutlery, pocket knives, razors, scissors and shears, plated ware, tinware, sporting goods, lamps, housekeeping sundries and newly patented specialties and novelties.

Beyond these we find some articles which sell singly for a few cents each, as various brass hooks, tacks and small articles of shelf hardware in general, which will earn a profit ranging from 50 to 75 per cent., according to circumstances.

Suppose, for example, that a retail store with annual sales of, say, $25,000 and expenses of $5,000 requires to average not less than 25 per cent. gross profit on the sales to earn a net profit of $1,250, which represents the total income of the owner.

Under ordinary circumstances the sales would be divided about as follows :

$10,000	sale at	15	per cent.	$1,500
5,000	"	20	"	1,000
4,000	"	25	"	1,000
3,000	"	40	"	1,200
3,000	"	50	"	1,500
$25,000	sales equal a profit of			$6,200

or approximately, 25 per cent. gross profit on sales.

Now, it will be apparent that if the expenses were $5,000, as stated, a slight decrease in the goods sold below and including 40 per cent. would leave nothing for the owner ; and, indeed, the goods to the amount of $3,000 which were sold at 50 per cent. more than covered his entire income and constituted his sole support.

If the sales had been so divided as to have earned a gross profit of 30 per cent. in the place of the 25 per cent. his net income would have been $2,500, or double what it was at 25 per cent. The difference between these per cents. (25 per cent. and 30 per cent.), while seemingly slight, is, therefore, in reality a matter of 100 per cent. in net income to the owner.

To illustrate the difference in net income compare this table of sales with the former example :

$5,000	sales at	15	per cent.	$750
5,000	"	20	"	1,000
5,000	"	25	"	1,250
5,000	"	40	"	2,000
5,000	"	50	"	2,500
$25,000	sales equal a profit of			$7,500

or exactly 30 per cent gross profit on the sales, netting the owner an income of $2,500, or, as stated, 100 per cent. more than the same amount of business with the same set of expenses earned at 25 per cent.

In order to secure this result it is necessary to be continually pushing forward new goods, which naturally earn a higher per cent. of profit than do staple articles.

It is also necessary to carefully discriminate between the selling qualities of goods as regarded in the light of earning capacity, without regard to their relative cost, since some lines of goods, costing, say, $8 per dozen, will only retail at 90 cents each, or 25 per cent. profit on the sales ; whereas another line of wares costing $8 per dozen will sell for $1 each, or 33 1-3 per cent. profit on the sales, which means a more than doubling of the owner's net income for the year.

It is for these reasons that the necessity of departing from the old ruts of the trade of the past and handling any class of goods which may be profitable, without regard to personal prejudices as to what constitutes the supposed limits of "straight hardware," has been so often urged upon the retailer. In fact, there are to-day no "limits" recognized by leading merchants in any line of trade.

KEEP AND USE A WANT BOOK.

A "want book" in which can be entered the goods that are already out of stock, or nearly so, is essential to every well-conducted hardware store. It is idle for anyone to think that he can keep his stock well assorted without something of the kind constantly at hand. But the utility of a "want book" is measured by the way in which it is used. If the entry is not made the moment it should be there is a possibility it will not be entered at all. And then some day it is possible a sale may be lost ; and not only a sale, but a customer as well.

PRO-RATING SHOP AND FACTORY EXPENSES.

By KENNETH FALCONER.

THE distributing or pro-rating of shop and factory expenses upon the cost of the goods produced is one of the most important accounting questions a manufacturer will be called upon to face. He may install a necessarily complicated system by which some manufacturing expenses are pro-rated on the L. & M. cost of the article produced, some on the value of productive labor, some on the number of hours used, and some on the value of a given machine, the length of time it is worked, and its probable life. On the other hand he may decide on the simpler plan of lumping everything into general expenses, and providing for such expense by a percentage on the gross direct cost of output. The days when the latter plan could be safely followed are past, and it is not every concern that could justify by the results obtained, the adoption of the former.

Before outlining any plan I would like to call attention to an important point which I think is frequently overlooked. There is a general impression that it is a safe and conservative plan to advance costs of product sufficient to cover other expenses than those incurred as a result of manufacturing. Some firms go so far as to provide for selling expenses in this way, so as to be "on the safe side." In the case of a concern manufacturing only for customers' orders and not for stock, or in the most improbable event of selling each year all product of such year, such a course, though wrong, might not be dangerous. In the case, however, of a company manufacturing and carrying stock, the danger of such a course is not limited to the question of wrong costs. It goes right through all the books, affects the balance sheet, and results in an inflated and misleading statement of the company's assets. To make this more clear, suppose an extreme case

A furniture company make up a table at a prime cost of :

Labor	$5 00
Material	5 00
	$10 00

The actual expenses incurred by the factory during manufacturing of this article are : say, 100 per cent. on productive labor, thus giving an actual cost ex-shops of :

Labor	$5 00
Material	5 00
Proportion of manufacturing expenses	5 00
Total	$15 00

Suppose the firm's expenses, other than the manufacturing, are one-half the amount of what may be correctly called manufacturing expenses. This table would be charged to stock at a value of :

Labor	$5 00
Material	5 00
Proportion of expenses	7 50
Total	$17 50

If it were sold before the end of the year, stock would be credited and sales account charged with this value, and the difference between this amount and the selling price would be the correct profit, so that the error would have no result.

If, however, it were inventoried at this figure, the assets of the company would show $17.50, composed as follows :

Material	$5 00
Wages	5 00
Actual increase in commercial value on account of expenses which would be incurred to replace table	5 00
Fictitious increase of value owing to expenses incurred in order to sell	2 50
Total	$17.50

The first three items composing this $17.50 are legitimate assets, but the folly of including the last item as an asset is evident on its face. As long as its funds held out or credit remained good, this plan liberally carried out, and the office and selling expenses figured at a high rate, any manufacturing business could be made to show a constant increase of assets, quite irrespective of either sales or profits.

The distributing of manufacturing expenses as a percentage on the L. & M. cost of an article is gradually being recognized as an improper procedure, and it is now generally admitted that the greater part, if not all of the expenses, should be distributed in proportion to the productive labor expended. Whether the amount so distributed should be as a percentage of the value of labor, or at a rate per productive hour, is not so easily determined. The advocates of each plan have strong arguments in their favor.

In the case of a concern using very expensive machines, which from their nature must lie idle a large part of the time, it would seem as though the output of such machine should bear a larger proportion of "burden" than the output of a cheaper machine being used regularly eight or ten hours per day.

Whatever plan is decided upon, it is well to remember that the value or inefficiency of any system depends largely upon its being properly introduced on a correct basis.

Inventories of manufactured stores and stock should be taken on sheets so ruled as to admit of pricing at two costs and extending two values. These sheets should show the values at the costs in use based on the old plan of pro-rating expenses, and also the value at prices obtained by taking the L. & M. cost as shown by the orders on which the articles were manufactured, and adding an advance thereto, based on the plan it shall have been determined to follow. The difference between these values must be closed out to profit and loss.

Inventory of work in progress must be adjusted on the same lines, but because of part deliveries to stores or stock on account of uncompleted orders, more work would be necessitated, and the greatest care required.

Before beginning the inventory of work in progress, the actual uncompleted orders in each shop should be compared with the unfinished orders, as shown by the office records, and any differences adjusted. A statement should then be made at costs obtained by the method in past use.

A similar statement must be made up at what would be the costs and values if the new rates had been used. The difference must then be closed out to profit and loss. If this is not done, and the rate of advance is changed without providing for a corresponding change in the values at which manufactured stores and stock stand in the books, correct cost of manufacture cannot be secured. Some manufactured stores will be charged out to the manufacturing orders at a value which includes the old rate, and some at a value including the new rate adopted.

As regards stock, if values at which it stands are not adjusted, both sales accounts and also profit on sales will be wrong.

Changing the rate of advance without changing inventory value of both stores and stock will thus render inaccurate and unreliable the records of costs ; of outputs of shops ; of cost of sales ; of profit on sales ; and at the close of the year of stores and stock on hand. The records of costs of output would be misleading as long as the stores continued to use or issue any product manufactured prior to the change ; cost of sales and profit on sales as long as any stock received from the shops before the change was charged to sales accounts, and the inventories would not be accurate until such time as every manufactured article, whether stores or stock possessed by the company prior to the change had been disposed of.

Generally speaking, all the expenses of a manufacturing company may be divided into the following classes :

A. Expenses of receiving, keeping and handling stores.

B. Expenses incurred as a direct result of manufacturing, such as superintendence, production of power, etc.

C. Expenses attributed indirectly to manufacturing at factory, rent (or its equivalent), lighting and heating, etc.

D. Expenses of receiving, keeping and handling stock.

E. Selling expenses, such as travellers' expenses, and salaries, commissions, etc.

F. Commercial and administrative expenses (many items as salaries, insurance, etc., will have to be distributed amongst these expense accounts).

A.—Expenses of receiving and handling stores should be provided for by a percentage advance on the price at which raw material is charged out and credited to stores. The amount provided in this way to be credited to an amount called "Stores Cost Advance," which should be sufficient to cover all expenses of the stores department.

B. C.—Manufacturing expenses, both direct and indirect, should be provided for by either a flat rate per productive hour, or a percentage on productive labor, as determined. The amount so obtained to be credited to an account known as "Factory Cost Advance," and the credit to this account for a given length of time should be sufficient to cover all expenses properly coming under either of these heads during such time.

D. E.—Stock-room and selling expenses are to be provided for by a percentage advance on the price at which goods are credited to stock, and charged to sales account. This amount to be credited to "Stock Cost Advance," and to be sufficient to cover all stock-room and selling expenses.

F.—All expenses other than the above are charged to profit and loss, which account is, of course, credited to the profit of sales. Sales account will thus show the difference between actual cost of goods sold and the price at which they are charged to customers, or, in other words, the actual "Profit on Sales," leaving to profit and loss account its correct function of showing the net profit or loss, as the case may be.

If this plan is adopted on a very careful estimate, based on the records of previous years, the various cost advance accounts should closely balance with the expense accounts which they are intended to cover. Any slight difference should be adjusted from time to time, not directly to profit and cost, but through an account which might be called "Cost Advance Adjustment Account," which should ultimately be closed out to profit and loss. This, for record only, in order to ascertain how much the cost advance account may exceed or fall short of the amount required to offset expenses they ought to cover. Absolutely correct rates of advance could not be expected for the first year, when they would, necessarily, be largely based on estimates.

In most manufacturing concerns advertising should be treated as a selling expense, and the correct proportion charged out from month to month, according to the time covered by the contract of payment. In certain cases it might be treated as an investment, to be credited with a percentage on the sales which it causes. This, however, comes more under the scope of an article on advertising systems than on manufacturing accounts.

In a very large concern, instead of one factory cost advance account, there should be one for each productive department, based upon the amount of product, and the expenses of each department, and a proportion of general manufacturing expenses.

CUTTING PRICES AND OVERBUYING

During the recent meeting of The Pacific Retail Hardware Association a paper was read by Oscar C. Schultze, which touched on a couple of points which should be of interest to hardwaremen everywhere. These two particular points were on cutting prices and overbuying. They were as follows:

"While I am drifting away from the topic which has been assigned to me, I cannot refrain from saying just a word in reference to cutting in prices. In the two score and five years that I have had the responsibility of managing my business, I have never allowed myself to be entrapped into a cut war. The rule to which I have adhered most persistently is to mark my goods at a just and fair profit, then if a competitor cuts under, to follow that cut where I feel warranted in doing so, in order to retain my customer, and where I feel that it is to my interest to do so; but I never cut under, for it has a two-fold danger. 1. It leaves your customer in the belief that you originally overcharged him; then it enrages your competitor, who at times loses his reason, and in a frenzy goes you one better; but if you go along in the even tenor of your way, meeting cuts that you feel to your interest to meet, saying nothing but sawing wood, your competitor does not know where to find you.

"The success of merchandising is to keep a clean stock, have no old goods and be continually getting new stock. * * * It takes an exceptionally bright buyer to steer clear of the danger of overbuying, and overbuying is a trade cancer which eats two ways—interest on the one side and deterioration on the other. It is not always gold that glitters.

"I learned a lesson 20 years ago which impressed itself firmly on my mind, and although it cost me $80, it was well worth it. One day a finely-dressed man, followed by a colored porter carrying a couple of sample cases, came into my office and unfolded a most glowing tale of a wonderful sash fastener. The price was only 10c. a set, and the retail price 25c. He would give us the entire sale of our town. The advantages were many, burglar proof, etc., he would paint signs on all the fences leading to town, bill all barns and create such a demand that we would make a big thing of it. I was one of those 'suckers' of which they tell us one is born every minute. I took the hook and he had me down for 6 gross before I could say scat. He, of course, made immediate delivery of them. They hung around for years, and I finally sold the whole lot for $5 to a street fakir. As they went out of the door, I dropped a tear of sorrow at parting with such an old friend, but said Amen, and have been ever since afraid of overbuying."

A VIEW OF HALIFAX AND ITS HARBOR.

CREDITS IN THE HARDWARE TRADE.*

By T. B. GIBSON, of Woodland, Cal.

THE subject of credits and collections is one that requires a great deal of thought from the head of every business house, for upon the judicious granting of credit and the prompt collection of bills depends the success of every business.

The best method of doing this, no doubt, has been a perplexing question to every member of this convention, and I think that the solution of the problem depends very largely upon organization and unity of action between business men generally.

AFTER-HARVEST TERM OF CREDIT.

I know of no greater good that this association can do than to establish some rule for country merchants to follow in extending credit to customers. The after-harvest term of credit, which obtains to a great extent throughout agricultural districts of this State, should be abolished, if possible, and something more of the same terms established between merchants and customers as now exist between the retailers and jobbers.

Year by year we have seen the margins on goods getting smaller, and for that reason I believe that the terms of credit should be made shorter. The trouble is that one merchant continues on the same old methods simply because his competitor in business does the same thing, and, as a result, loses a great of money which might have been saved had there been a better understanding between merchants upon the matter of granting credit and making collections. I know this to be a fact, for I have had some rather sad experiences myself in selling goods without taking the proper precautions.

CHARGING INTEREST ON OVERDUE ACCOUNTS.

I believe that a strict rule should be established that all accounts should be settled at least once a year, and a rate of interest fixed to be charged on overdue accounts. You will find quite a number of people who will object to paying interest on their overdue accounts, but they do not seem to consider that the merchants have to do the same thing, and that the money thus tied up is virtually taken out of their business and lying idle. Merchants seldom make anything by carrying an account over from one year to another, and you are more likely to retain a man's trade by insisting on a settlement each year.

It is a mistaken idea that you will get all of a man's trade simply because he owes you an account, or because you have allowed him to settle by giving you his note. One man will run an account with you with the understanding that he will pay after harvest, or at the end of the year. If at that time he finds that he cannot do so, he is willing to settle any way he can, and will go on trading with you; while, on the other hand, another man, who is perfectly good financially, will run a large account with you, and, after harvest, you will send him his bill. He will not come near you, nor offer to settle, and the next thing you will see him buying his hardware from one of your competitors and give you the go-by completely. Then you can't help but think of man's ingratitude, and will probably get a little angry and say some things that would not sound well in polite society.

AN ILLUSTRATION.

A short time ago a man whom I carried over last year, and who had not traded with me since, came into my store. When I spoke to him about his account and asked him why he had not been giving me his trade, he said as he already owed me quite a bill he did not like to make it any larger. When I asked him if he did not consider that he was under some obligation to give me his patronage, since I had accommodated him by carrying him over, he said he had never looked at it that way, but thought, perhaps, I was right about it.

VIRTUE OF A CASH BUSINESS.

It is such things as these that make a merchant long for a cash business where such unpleasant things are unknown. So I believe we should get as near a cash system as possible.

AN ATTORNEY TO LOOK AFTER CREDITS.

I believe that the merchants who do a credit business should form an organization in every town and establish rules for their own protection, and also employ a competent attorney at an annual salary, whose duty it would be to look after the financial standing, as far as possible, of the people in the community, and make a report to the organization whenever required, and also to bring suit when necessary to sue a man. Another very wise precaution is for every merchant to get the daily reports of the filings in the recorder's office, thereby keeping himself posted on the real-estate transfers, mortgages, etc. Banks very often get the advantage of the merchant by taking crop mortgages. The result is that the merchant furnishes the goods, and in the event of a small crop, it takes it all to satisfy the bank's mortgage, and the merchant loses his bill. It seems to me a very good plan, where a crop mortgage is given, to have the mortgagee stand good for what the farmer may need in putting in and harvesting his crop.

MERCHANTS SHOULD HELP EACH OTHER.

It is too often the case that the banks and landlords take everything in sight and leave the poor merchant to get what he can, which is usually nothing. This would not be so if merchants would stand together in such matters, lay aside petty jealousies, and remember that the only way to help themselves is by helping one another.

I do not suppose that where a credit business is done a plan can ever be perfected which will entail no losses whatever, but I believe that the present system, or, more properly speaking, the lack of system, which prevails to-day can be greatly improved.

* Paper read before the Pacific Retail Hardware Association.

A FEW DON'TS FOR THE OFFICE.

SHOULD you be unable to pay your accounts at the expiration of 30 days or whatever it might be, don't deduct the discount if the account is paid 10 to 30 days after the date has expired which entitled you to do so. Strictly speaking it is not honest, for indirectly you are paying a lower price for the goods than you agreed to pay. But that is not all. Your credit is impaired as well. No one can do that which is questionable and preserve a good name. And a good name is the basis of credit.

* * *

Don't try to conduct your business without printed stationery. Printed stationery has some value as an advertisement, and more is lost than gained by economy in this particular. Then it looks decidedly bad and by no means tends to improve one's credit.

* * *

Don't give a creditor a false statement when he asks you for particulars in regard to your financial standing. Aside altogether from the moral aspect of the matter there is the possibility of being called to account by the law of the land, as some have recently learned to their cost.

* * *

Don't refuse a draft unless you have positively good grounds for doing so. There is nothing next to positive dishonesty that discredits one more in the eyes of creditors. The fact that there is a slight error in the amount does not warrant rejection of the draft, for if the house that is the drawer of the draft is honorable it will rectify the error. At any rate, when it is necessary to refuse a draft, it is much better that the drawer of the same should be notified by letter, and proper explanations made than that he should first become acquainted of the fact by the document coming back to him. It is more businesslike, and it pays.

Galvanized Facts

The name **"LYSAGHT"** is a guarantee of quality and value.

"QUEEN'S HEAD" Galvanized Iron—the standard of the world for quality, durability and flatness.

Better to-day than ever, and more popular. Sales in Canada last year away ahead of all records and still increasing.

Every sheet of **"Queen's Head"** and **"Fleur de Lis"** Iron guaranteed free from any defect.

"FLEUR DE LIS" brand—a good second to "QUEEN'S HEAD."

Not a second grade, but "QUEEN'S HEAD" quality with less durable galvanizing.

Lysaght's Black Sheets, Corrugated Iron and **Poultry Netting** are also standard.

Dawson As It Is

By Henry J. Woodside

FROM a mosquito haunted muskeg in 1896, the city of Dawson has sprung up like magic, and is now a place of probably 7,000 inhabitants. It has broad wooden sidewalks, well-graded streets, an excellent system of drains and ditches, electric lights, telephone system, telegraph service south and north, and many fine buildings, two or them solid brick, and a great number of warehouses.

Lieut. Schwatka, passing down the Yukon river in 1883, notes that there is a fine stretch of hay land at the mouth of the Troandike river (now Klondike), which would make a good grazing place for cattle if the mosquitoes would not eat them up. The cattle graze on the side-hills now, and there are not as many mosquitoes in Dawson in summer as there are in the city of Chicago. The drainage system and civilization are too much for the northern bloodsuckers.

The town plot proper of Dawson was what is technically called a "nigger-head muskeg," that is a stretch of soft black muck strewn with little bristly round blocks of turf, over which a man may walk at night as freely as a drunken man walks a tight rope. It was formerly sprinkled with bushes, and along the river front grew a fringe of spruce trees. The town plot is about ten feet above the level of the river at low water. It is about a mile long, by over a quarter of a mile in width. It is bounded on the north and east by steeply sloping mountain and hillsides, on the west by the Yukon river, and on the south by the Klondike river, which comes into the Yukon at right angles from the east, from the Rocky Mountains over one hundred miles away. At the lower or northern end of the city plot, a great landslide came down the mountain, and is said to have buried a small tribe of interesting aborigines. Over that reputed grave it piled up small loose rock and gravel in high mounds and terraces, and thus made an ideal plot for dry-cellared private residences, where the wives and families of Dawson citizens may look down on the Yukon river flowing from 50 to 100 feet below their piazza.

In the rest of the city the foundations of buildings are laid in trenches six feet deep, chopped down into the eternally frozen black muck. Smaller dwellings have their foundations on the frozen soil, below the upper covering of moss. When this covering of moss is removed the sun in spring and summer thaws a considerable distance into the soil, and thus gardens are formed where wanted, although the flats of the river beds and the warm hillsides are the favorite places. The climate is so dry that gardens have to be watered or irrigated. This can be done artificially.

The Klondike river has two mouths, and between them a low island, where a large sawmill is operated. Here are several fine vegetable gardens which produce luxuriantly. Beyond or south of the branches of the Klondike river is a little town plot nestling against a high hill, called by some Klondike City, but by the pioneers here the sinister name of "Lousetown." A suspension foot bridge crosses each branch of the Klondike river near its mouth, and connects Dawson with Klondike City. The latter was ambitious to become the metropolis at one time, but there was not room enough in it for the necessary number of cabins. A cabin is usually a small unpretentious log house, with enough yard in which to cut wood and throw slops; but at one time there was such an epidemic of cabin building that no ordinary townsite could accommodate the number built here. As I stumbled around the country on the Sabbath day, for a couple of summers past, and located fresh cabins in batches everywhere I went, it was my intention to lump the probable number at ten thousand, more or less, but a more careful revision of statistics keeps the number down to about one-fourth of that figure. Fires have run over the hills, and have cleaned out groups of from 10 to 40 log cabins at a time, and although they stayed cleaned out, with their contents, yet the number did not seem to be much decreased. The log buildings of the business streets, between fires and discomfort, are making way for frame and iron structures, many of them with pretentious fronts and plate-glass windows. Some of these old three-storey log buildings cost from $40,000 to $60,000 in 1897-98. They were chiefly saloons, gambling and dance houses, and their owners expected to recoup themselves within a year in the gold swim. The heart of the city was burnt over twice, in one spot thrice, and as often has the plot been rebuilt, each time better than before.

In the gold rush of 1898 Dawson became a canvas city, and the white tents gleamed all over the flats and up the hillside. In autumn everyone who could built a cabin. As it was impossible to obtain a satisfactory title to lots in much of the plot, and lots down on the flats were held at very high figures, the cabin builders had to take to the hillside, and over its top, and up the valley of the Klondike. Ornate highly-decorated cabins, plain, common-place cabins, and delapidated, unsightly cabins or "shacks" fresco the whole upper landscape. They perch in all sorts of crannies and nooks, hanging by their eyebrows on the steep incline; they nestle at the foot of rocky cliffs, where masses of overhanging rock appear ready to wipe them out of existence; they sprinkle the narrow flats of the Klondike, and form

an almost solid three-deep fringe along its banks for miles, wherever the banks permit of it.

These cabins cost high in work or in cash, for suitable logs were scarce and dear. But their era has passed. Many of them are being pulled down and sold for firewood. The new houses are of wood or galvanized iron. They look roomier, cleaner and lighter than the log cabin, with its chinked crevices, its mossed and earthed roof, a tremendous weight that frequently broke down with the steady strain. There was another order of buildings, unique in their beauty and grace. That was the scow cabin, built of two sections of a scow cut across the centre. One section formed the floor and half of the walls, the other the roof and remaining half of the walls, with a little insertion in the middle to make the roof high enough for a man to walk erect under it. Then there was always, until recently, a fringe of floating palaces or cabins on scows adorning the upper water front. In springtime, after the ice had gone out, the wide bar opposite the police barracks is covered with scows that have been built at the lower end of Lake La Berge, and have been the first to arrive with loads of fresh meat, vegetables, fruits and luxuries.

It is hard to satisfy some men, but if I had the laying out of Dawson townplot and its environments, I would have raised the whole flat ten feet higher, removed the mountain to the southwest and placed it northwest, where it would not obscure the sun two hours before it sets, and remove a southern range of hills that prevent the sun from shining on the city for six weeks in December and January. With these trifling changes, Dawson's situation would be much improved. On the west side of the city the banks rise so steeply from the water that a cabin can hardly get foothold anywhere, until opposite the lower, or northern end of the city, where the western hill slopes gently down to a flat. On the slope, West Dawson, a suburb, has sprung up. It is reached by a small steam ferryboat in summer and by an ice trail in winter.

South Dawson is that portion of the city built on the Klondike banks, beginning where the river issues from the shadow of the cliffs, or golden gateway, and running west to where the Klondike joins the Yukon. It is about a quarter of a mile long and is separated from Dawson proper by the Government reserve. It is a rapidly growing district, and has quite a business of its own in all lines.

The system of schools in vogue in the Northwest is followed here. The churches have all been conducted by pastors of acknowledged ability, who are striving to keep pace with the growth of the country and to improve the moral tone of the community. This, although orderly and law-abiding, tolerates some things not seen elsewhere in Canada—open gambling and dance houses. These evils were very prominent and numerous, and are an importation from the Western States, but in future, thanks to the efficiency of the police, these will be reduced to a minimum, and another cause for stumbling on the part of our miners and citizens will cease to exist. The scarlet women, who have held the whole of a long block on Fourth avenue, have been warned to vacate, and are removing to places outside the city limits.

The city, from an original front street along the river, has successfully overflown and occupied Second and Third avenues, as well as their intersecting streets, Harper, First, Second and Third streets. Fourth avenue is not wanted for business purposes, and Fifth avenue is wanted for schools and residences. The avenues run parallel to the river and the streets from it toward the hill. Sixth avenue runs along the base of the hill.

The administration of justice in Dawson is the admiration of foreigners. Canadians are naturally proud of it, but take it as a matter of course.

There is a body of about 275 N.W.M.P. in the Yukon, of which 125 are in the upper, or White Horse division, and 150 in the Middle Yukon or Dawson division. The whole force in Yukon is commanded by Major Z. Wood, with headquarters at Dawson. A large portion of the force is scattered along the Yukon river in detachments, and along the gold creeks. There are usually about 60 men available for service in Dawson between the downtown station and headquarters. The admirable system and conduct of this force is a matter of the greatest pride to Canadians, and it is due to them that the law is so rigorously enforced against crime, so that life and property are as safe in this city as in any other in Canada. It is a wonderful contrast to the condition of mining towns in the United States.

The streets are well drained and graded, and furnished with electric lights. The streets are well drained and graded, and are furnished with electric lights. The city is provided with an excellent fire brigade of paid members, three large steam fire engines, hook-and-ladder apparatus, double chemical, etc., and, thanks to the efficiency of Chief Stewart's men, the city has escaped this year the customary conflagration of former winters. During the winter time two of the fire engines are kept housed on the river ice with steam up all the time, ready to pump as soon as the hose is laid.

The Dawson Electric Light and Power Company is growing to be a large concern under good management. It furnishes 3,000 16-candle lamps and 300 32-candle

lamps for private consumers, and 78 32-candle lamps for street lighting. The company is providing electric power for machinery in the city and on the creeks. The telephone company is another well-managed concern, having 140 telephones in the city, and 26 scattered along the creeks. Captain Oleson manages both of these prosperous companies. The city is supplied with the purest cold water, pumped from a well near the confluence of the two rivers. This well was sunk to a depth of 20 feet at a venture, and struck a strata of sand and gravel free from frost. The water is pumped to the surface, and is then forced through a system of iron pipes laid along the principal streets. It is kept flowing steadily, and this, with a little artificial heat, has kept the pipes free from ice all during the severe winter, although the pipes are only laid a few inches below the surface of the ground, in wooden boxes. The hydrants are covered with small houses furnished with stoves.

DAWSON—First Mail to arrive from St. Michaels, July 6, 1900. It consisted of over 100 Sacks.

Dawson now has several up-to-date hotels. The city swarms with restaurants, as only a small half of the inhabitants keep house, except as a sleeping place. The price of standard meals remains at one dollar. There are some places where cheap meals may be had for 75 and 50 cents. Meat of all domestic kinds and poultry remain high, ranging from 40 cents to a dollar per pound. It would be still higher if it were not for the immense quantities of cariboo and moose brought down the Klondike from the foothills of the Rockies. This is sold at from 25 to 35 cents per pound. Eggs are $1 per dozen. Flour averages $5 per 50-lb. sack. Prices are very variable, and the least sign of scarcity sends the price of an article up, as for instance, flour went up last spring to $7 per sack, owing to a supposed shortage. Fresh vegetables are always dear, but an increasing quantity of them are being grown each year. The great bulk is imported, and is kept in warm storage during the winter.

Furnished rooms rent from $50 to $35 per month. There is a lack of privacy in all the hotels, owing to the thin partitions. The price of lumber, ranging about $100 per thousand feet, is responsible for this. Many rent cabins to sleep in, and get their meals at the restaurants. Spruce logs for cordwood sell at $15 per cord in eight-foot lengths, and it costs about $4 to have it cut up into stove lengths. Local coal is coming into use rapidly, and retails for $30 per ton.

The banking interests are in the hands of two strong Canadian concerns, branches of the Canadian Bank of Commerce and the Bank of British North America. These banks have sometimes as much as a couple of million dollars' worth of gold dust lying in their vaults. They are guarded at night by detachments of N.W.M.P. inside the building. In a country where such an enormous amount of machinery is used, valued at between two and three million dollars, machine shops will naturally flourish, and there are four of them equipped with large modern machinery, and a foundry. A dozen steamers lie up at Dawson, and furnish much repairing. The innumerable steam-thawing plants on the creeks furnish more.

Three or four big sawmills supply the demand for lumber, plain and dressed, and to see the succession of long rafts of sawlogs that arrive at Dawson during the season gives one the assurance that there is much good timber in the Upper Yukon and its tributaries. All the timber in the country should, as far as possible, be reserved for lumber alone. The city is well supplied with newspapers. There are the two afternoon papers, The Klondike Nugget, and The News, The Morning Journal and The Weekly Yukon Sun; also a couple of mining journals, The Yukon Mining Journal and The Record. The former is an excellent illustrated monthly journal devoted to Yukon interests alone. The Sun and Journal are Canadian, The Nugget, Canadian-American, and The News, purely American, devoted to the interests of Alaska, where it should have been located.

The aggregate amount of goods landed at the extensive system of well-built wharves fronting the city, or from scows at the bar, runs up close to ten million dollars ($10,000,000) per year, of which half comes from Canadian cities, the remainder from across the line. Some 12,000 tons come by way of Behring Sea and up the Yukon. The same quantity comes over the Pass and down the river by steamer. Scows bring about 5,000 tons more. The total tonnage landed in Dawson is about 30,000 tons.

To handle this bulk of goods some 20 small, medium and large stern-wheel steamers connect at Whitehorse with the White Pass and Yukon Railway, running inland from the Lynn Canal 110 miles, and run to Dawson 450 miles, by the Upper Yukon and Lake La Berge. Passengers and tourists get first-class accommodation. The travel for various reasons is large during the summer; the first and last boats are always crowded. On the Lower Yukon run, another 20 steamers of the largest class, some of them rivalling the big Mississippi ones, ply between St. Michael, at the mouth of the river, and Dawson. They have to bring their load over 1,200 miles against a stiff current, in a shallow and shifting channel or channels.

The number and extent of the warehouses in Dawson is a marvel to a newcomer. They number about 50, all built of corrugated iron, and will store about 50,000 tons of goods, or say the freight of 5,000 ordinary freight cars. One company, The Alaska Exploration Company, have seven, with a capacity of 10,000 tons. There is a row of warehouses on the wharves, another row on the opposite side of First avenue, and blocks of them or single ones elsewhere through the city. Every care is taken to protect them from fire, and so far they have escaped the destructive conflagrations of earlier years. The destruction of one or more of them might mean a serious shortage of provisions for the rest of the winter. There are several warm storage buildings, one of them solid brick. In these are kept the perishables and vegetables.

The trade of the city and Klondike is largely in the hands of eight big trading companies. They are McLellan, Mc-

OTTAWA - - CANADA

Feely & Co., hardware, of Vancouver, who, I am informed did the largest business of any firm in Yukon last season: The Alaska Exploration Co., London and San Francisco, whose palatial Dawson branch netted a profit of $187,000 last season: The Trading and Exploration Co., of London; The North-American Trading and Transportation Co., of Chicago; The Alaska Commercial Co., of San Francisco; The Seattle-Yukon Trading Co., of Seattle; The Ladue Co., and The Ames Mercantile Co., of American cities. These companies in the autumn carry enormous stocks to last about nine months, or until the opening of navigation at the end of May. Many smaller Canadian firms are working up a good trade in the respective lines of dry goods and groceries, and, as elsewhere, the trade of the country will pass gradually into Canadian hands and into Canadian channels, if a sustained effort is made with that end in view by outside manufacturers and merchants. Of all the bi companies here, The Alaska Exploration Company deserves most credit, not only for its very handsome stores, but for developing coal and quartz mines. The N. A. T. and T. Co. have developed a coal mine a short distance below Dawson and have placed quite a quantity of coal on the market.

The placier gold fields within an area of 50 miles southeast of the city produced on an average $20,000,000 worth of gold per year for several years past, and the output is likely to be increased this year. There appears to be enough alluvial earth in sight to last for ten years yet, and the field is broadening. We appear also to be on the eve of great quartz development.

A very fair system of roads up the different gold-bearing creeks has already been constructed, and the programme for this year is more extensive than ever, involving the expenditure of about $200,000 in much-needed highways to open up the remoter creeks. A fine new steel bridge has been built across the Klondike, two miles above its mouth. Horses are the principal draft animals, but dogs are much used on the narrow trails. Stages run from Dawson to points along all the creeks, and the automobile has made its appearance in competition for the passenger traffic. Two well-equipped automobiles, carrying half-a-dozen passengers each, are in commission on the creek roads. Bicycles are used very extensively in and around Dawson, especially in winter time when the creek roads and trails are smooth and hard, and good time can be made over them. Regular horse stages run between Dawson and Whitehorse. They follow the ice of the Yukon much of the way, but leave it in a couple of places to make cut-offs that shorten the line greatly. Mails come and go by the same route weekly. The service has been very good this winter. Canadian newspapers are brought in by mail; the contract is for 700 pounds of letters and papers per week each day. The telegraph line now gives a through service direct to all Canadian cities. The Dominion Government deserves great credit for the way in which the country has been opened up by telegraph lines.

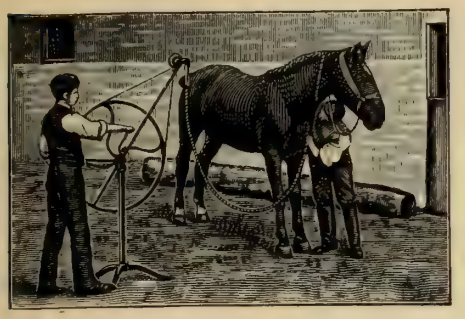
Building material is naturally costly, both lumber and brick. Lumber of the rough class is usually not lower than $75 per 1,000 feet. Brick are 10 cents apiece, or $100 per 1,000. A very good quality of brick is manufactured close to the city. Good lime is burnt within a few miles, so that with lime, brick, and plenty of building stone, the material is at hand for permanent dwellings and stores.

Dawson is gradually turning from an aggregation of log cabins and tents, a flaring canvas-sign mining camp, to a city of wide streets, pleasing blocks, and up-to-date conveniences of every kind. With the advent of warm, properly heated buildings, much of the terrors of the climate will disappear. As it is now, more than half the people here are living in stores and dwellings not fit to be inhabited, so far as comfort is concerned, even in the southern part of Ontario. Fortunately it is a city of almost perpetual calm, and of little rain.

Its permanency does not seem to be doubted by those shrewd financial men who so freely invest their money in various kinds of permanent enterprises on the strength of an assured future. Prices have come down in nearly all lines of clothing and furnishings, as well as in some lines of eatables, but there is still room for a big decline in that respect.

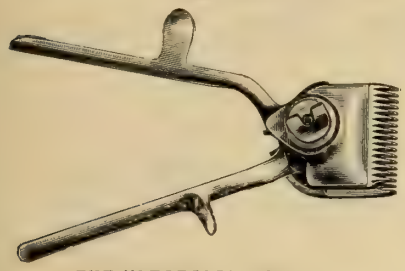
The open gambling and dance-houses which surprise eastern visitors will, in a short time, be a thing of the past. Their going is hailed with satisfaction by the best business class, as they are parasites on the miners. There will be two things still left to surprise visitors in summer. One is the perpetual daylight for a couple of months, when travel and work goes on steadily the 24 hours. The midnight sun is not visible at any time from the highest mountains near Dawson. The other is the number of dogs around the city. These spend a good deal of their time in adjusting differences that have laid over from the busy winter time.

The amusements of the city are furnished by theatres, with more or less good drama or horseplay. A good public library is partly sustained by grants from the council. A well-managed, privately owned reading-room has 1,500 members. The curling rink is well patronized by crack curlers from Ontario and the Northwest. There is a large skating rink and a couple of hockey rinks. Half-a-dozen hockey clubs maintain a contest for the championship of Yukon. St. Andrew's Night and some other special nights are celebrated by balls of great magnificence, as there are hundreds of wives, mothers and sisters here now from Canadian and American cities. The 24th of May is celebrated royally, with games and parades. The 4th of July, a compromise between the 1st or Dominion Day and the American holiday, is also celebrated in true Western style, with a parade of gorgeous floats symbolizing historical events and conditions.



One word about advising Canadians to come to Dawson, I do not see any reason why a young man who is of an adventurous disposition should not come here rather than go across the line to United States mining camps. If he has patience, energy, and is resourceful, he should do well here. It is far better for the new comer to secure work before going out to mine on his own account. Mining, while a perfectly legitimate industry, has many blanks for the prizes. The average wage on the creeks is from $4 to $5 per day and board. Good mechanics are usually paid somewhat higher, or get $1 per hour straight, and board themselves. The Yukon Council has passed a by-law to pay its employes at the rate of at least $5 per day and board. Our friends from the United States pour in fast enough, and usually do well both at mining and commercial ventures. A man coming here to succeed should especially eschew wine, women and gambling: they are the vices of a mining camp or city. I hope to see the trade not only of Dawson but of all Yukon in the hands of Canadians before many years pass, and Canada will then be getting more value from its most northerly inhabited territory. I am satisfied as to the future. Letters should be addressed to Dawson, Yukon, Canada, not to "Dawson, Alaska."

SENSE—THEN BREVITY.



Year in and year out the student in advertising is enjoined to be brief. Almost everyone who writes about advertising makes sage observations about brevity. One person will talk of the possibility of condensing a novel into two pages, and someone else will take a column as his standard and protest that everything essential in it might have been said in one paragraph. We claim that it is possible to carry the idea of brevity too far. We have seen advertisements which were nothing but a group of disjointed sentences. On one occasion Lincoln was asked how long a man's legs ought to be. "Just long enough to reach the ground," was his reply. And so it is with an advertisement. It should be just long enough to tell a story completely.—Merck's Report.

We want a share of your trade and assure you best attention.

THE DURHAM RUBBER CO., LIMITED

BOWMANVILLE, ONT.

The Wholesale Hardware Trade of Halifax.

A Sketch of the Leading Firms.

A VISIT to a hardware store is not generally considered an interesting pastime. It is associated in one's mind with unattractive-looking nail-kegs, blood-thirsty looking saws, axes, and other edge tools, and shelves laden down with possibly neat and neatly arranged packages of screws, bolts, bars and other requisites, but wholly unattractive otherwise to the visitor. Of late years, however, a change has been made in this respect by many firms, and the nail-keg is relegated to the back shop, while the more attractive goods are displayed in as handsome show cases as may be found in any other line of trade. We notice this improvement in Halifax.

Halifax has always been noted for its hardware stores, and its position as a great shipping port, and the principal headquarters for the fishing business, give it unusual advantages in this respect. According to the directory, there are some fifteen hardware stores in the city, besides a number of other places where a limited line of hardware may be found. Some of these are very old institutions, having grown up with the city. Though the original founders are long since dead, and all of their names disconnected with the business, still the original firm name remains, and the business is carried on by others who came in as young men and have worked themselves up to the top of the ladder. In other cases there have been many changes, and in many instances the men dropping out only did so to open up a business of their own. In only one instance, however, do we find a firm in existence for the last 25 years without any change in the original partners.

The hardware business, too, of Halifax is peculiar. One firm makes a specialty of ship chandlery and fishing supplies; another, general shelf hardware and building materials; another, kitchen furnishings; another, cutlery; another, mill and mining supplies; another, mill and mining machinery, while all keep a general line of hardware, and all cater to both the wholesale and retail trade. No business men in the city are of greater business calibre, or more energetic and enthusiastic in their business. At the same time they are among the best of our best citizens.

BLACK BROS.

The firm of Black Bros. & Co. is probably the oldest in the city, its establishment dating back to before the year of the battle of Waterloo, the firm being then known as W. A. & S. Black. On a visit to their place of business a few days ago, we were shown a curious relic of this olden time in the shape of a "penny token," dated 1816, recalling the days when every merchant, if he chose, had his own copper coinage.

In 1855 the firm name was Black & Bros. In 1855 Mr. George J. Troop became a member of the firm and the name changed to Black Bros. & Co. In 1885 Mr. W. H. Troop became a member of the firm, and in 1892 Mr. Gilbert Troop, and the firm as now constituted consists of Hon. G. J. Troop, M.L.C., and the two sons mentioned, who have grown up in the business and are thoroughly acquainted with it in every detail.

The firm carries a full line of general hardware, but makes a specialty of fishing supplies and vessels' outfits. From the importance of Halifax as a fishing centre, the specialties mentioned have always been an extensive and somewhat profitable line of business.

Black Bros. & Co. keep two regular travellers on the road, Mr. W. P. Mahar and Mr. T. D. Graham, who cover Nova Scotia, Prince Edward Island, and a part of New Brunswick, and whose work brings to the firm a fair share of the trade.

The firm considers the business of 1901 to have been excellent, and that the prospects for 1902 seem to denote even a better trade.

GEO. E. SMITH & CO.

The firm of Geo. E. Smith & Co., known to everyone as "The Hardware Store," has one of the best locations in the city, fronting the post office. The firm was established in 1875 by Mr. Geo. E. Smith and J. E. Irish. The latter soon retired, and in 1880 Messrs. John White and James Simmonds were admitted to partnership. A. J. Grant, sr. and A. J. Grant, jr., were also connected with the firm, but retired in 1887. In 1890 Mr. White retired, and Messrs. R. H. Neal and Percy Simmonds were admitted to partnership.

In 1897 Messrs. James and Percy Simmonds retired and the business has since been conducted by Mr. Smith, who has been in the business since its establishment, and Mr. R. H. Neal. Their business is a large one, and has been built up by the persistent energy and business capacity of Mr. Smith, who has been the business man of the firm since its organization. The specialties of the firm are carriagemakers' supplies and builders' hardware, both wholesale and retail, and they are the Nova Scotia agents for the "Never Slip" horseshoe.

Two travellers, Messrs. George W. Somers and R. H. Neal look after the trade in Nova Scotia and Cape Breton, and bring in to the firm their due share of business. As to the business of 1901 and the prospects for 1902, this firm agrees with the opinions given by others—Excellent in 1901, and bright prospects for 1902.

A. M. BELL & CO.

This firm is one of the progressive ones of the city, which, with new and modern ideas and the introduction of special lines, is pushing for a foremost position in the hardware business. The firm was established by Mr. A. M. Bell in 1875, after having had 12 years' training in the hardware line, and from the outset he was remarkably successful. In 1885 he moved into the large and commodious quarters now occupied in the business portion of Water street. By following up-to-date methods and keeping pace with the march of progress, he built up and holds a large retail trade in the city, besides a wholesale business which requires four travellers constantly on the road, and a large staff of employes in his establishment. At the meeting of The Maritime Hardware Association in the summer of 1900, Mr. Bell had the honor to be elected president of the association. Since 1896 Mr. Bell has had associated with him, as a member of the firm, Mr. A. B. Wiswell, whose experience dates back to 1879.

Messrs. C. H. Northup, S. S. Wetmore, A. W. Morton and W. R. Morton are the hustling travellers of the firm who cover Nova Scotia, Prince Edward Island, Newfoundland, and a part of New Brunswick.

This firm has the special agency for Tower's oil clothing, Woolsey's copper paint, and Wood's ice tools. They make a specialty of tinware and enamelled ware. A few years ago they purchased a large stock of the latter which had been thrown on the market, and since then have probably kept the largest stock in the Maritime Provinces. Guns, ammunition and sporting goods are other lines in which they excel. A glance over their elaborate catalogue of these goods and household hardware show a variety hard to equal. Fishing supplies and general outfitting in nets, lines, twines, etc., have always been a specialty of the firm, and in these they have established a large trade, both in this Province and in Newfoundland.

The firm considers the general hardware business to have been most satis-

factory during 1901, and their own business showed a large increase over previous years. Though the outlook is not so bright at present as it has been, they look forward to a good year's trade in 1902. Progress is their watchword, and if business is going, the firm of A. M. Bell & Co. will, no doubt, get their full share if push and energy can secure it.

CRAGG BROS. & CO.

No doubt, the most attractive hardware store in the city is that of Cragg Bros. & Co., situated on Barrington street, corner of George street, facing the Parade with the City Hall to the north and Old St. Paul's to the south, a most central and desirable location. This firm

HALIFAX—A View from the Citadel, with Dartmouth in the Distance.

was established some 15 years ago by Messrs. J. R. and F. J. Cragg, but the decease of the former, two years ago, leaves Mr. F. J. Cragg sole proprietor.

The firm carries a full line of general hardware, both for retail and wholesale, but they give special attention to builders' hardware, cutlery, athletic requisites of all kinds, and their line of kitchen furnishings, imported direct from makers in Germany and France, is probably the most extensive in the city. They occupy five flats of a building of large ground area, and a tour through the various departments is an interesting one.

Their wholesale trade is extensive and increasing, and two travellers, Messrs. E. K. Puddington and Horton Covey, cover all parts of Nova Scotia.

The firm advertises itself as "The Cutlery House of Halifax." On a recent visit to their establishment Mr. Puddington gave us a glance through one of his lines of cutlery—pocket knives. This line consisted of over 150 samples—and who could not be satisfied with a choice from that number—of English and German makes, ranging in price from 60 cents per dozen to $36. Other lines in cutlery are quite as full and valuable. The firm also carries an extensive line of athletic and sporting goods for the wholesale trade.

One prominent feature with the firm is advertising. They advertise largely and systematically, using space in the city papers, and also by illustrated catalogue, which places their goods before their customers almost as plainly as if they had the samples before them.

Mr. Cragg considers the business conditions of 1901 to have been most satisfactory during 1901, and looks forward to as prosperous a year's business for 1902.

H. H. FULLER & CO.

In 1855 the late H. H. Fuller established the business now run under the name given above. The firm at present consists of Mr. W. C. Brine, who has been connected with the business for over 30 years, and for a number of years was the partner of H. H. Fuller; Mr. George H. Richards, who has been connected with the business for some 22 years, and Mr. W. H. Sterns, for some 10 years. The two latter were admitted to partnership at the opening of 1902. Mr. H. H. Fuller, who died some two years ago, was a thorough man of business, and some time before his death had the honor of an appointment to the Legislative Council of Nova Scotia. He had built up a large and prosperous business, which has since been maintained by the energy of Mr. Brine. With the younger blood recently added, no doubt the firm will have continued success.

Besides carrying a full general line of hardware, the firm makes a specialty of mill and mining supplies, giving special attention to gold-mining supplies. Other special lines with the firm are railway contractors' supplies and builders' supplies, both at wholesale and retail.

The travellers for the firm are Mr. A. W. Way and Mr. G. H. Richards, who cover Nova Scotia, Prince Edward Island, Magdalen Islands and Newfoundland.

The firm considers the business of 1901 to have been beyond the average of previous years; in fact, the volume of business was the largest in the history of hardware, but drawbacks were experienced in having orders promptly filled by the manufacturers. It is too early yet to judge fairly of the prospects for 1902, but reports from all quarters are good and prospects look bright.

AUSTEN BROS.

The firm of Austen Bros., whose location is in the central portion of Water street, has been in existence for over 25 years. The members of the firm are J. Howe Austen and Harry E. Austen, and they can boast of a continuous existence for the whole period mentioned without any change in the firm—except that the business has grown from a small beginning to one of the largest in the city.

Two travellers are kept busy by the firm, and their trips cover Nova Scotia and Prince Edward Island, and they frequently fill orders as far off as British Columbia. Their specialties are all kinds of mining and mill supplies and machinery, and railway contractors' supplies, including engines, boilers, stamp mills, water wheels, rock breakers, drills, rotary and other mills, and all kinds of woodworking machinery.

The firm believes in advertising—generally a good index of business ability—both in the local papers and by circulars, etc. On a call at their place of business we saw being put up to send out 13 different lots of blotting pads, each advertising some special article which the firm handles. The business is carried on both as wholesale and retail, and they represent in their special lines the principal firms of Great Britain, the United States and Canada.

With reference to the hardware trade of 1901 they are of the same general opinion as others—that it was extremely good, and that the prospects are extremely bright for 1902. They expect a heavy year's work as mines of various kinds are being opened up all over the country, and there will be a great amount of work opening up as soon as spring weather comes in.

SOME IDEAS AND SUGGESTIONS.

No. 1—A Display of Cutlery, Chafing Dishes, Coffee Pots, etc.

SPECIMENS OF HARDWARE TRIMS

By H. H.

HARDWARE articles are admitted to be about as difficult a line of goods to display properly as any line, and yet, when a clever trimmer makes a good, stocky, well ticketed trim of household goods, that trim never fails to attract great attention from the housewife, and always sells goods, which is the object sought after when making any kind of a window display.

As there is nothing very attractive looking about the hardware articles themselves, owing to their lacking of colors, etc., yet they can be made up into a striking and effective trim, when arranged in some novel, out of the ordinary way.

We herewith present in this number a few specimens of hardware trims from which numerous ideas can be gleaned by those whose lot it is to look after the windows. The illustration No. 1. is a very elaborate display made by a big Chicago hardware firm. While this is, perhaps, a little too elaborate for the average hardware house to attempt, yet the ideas are there from which smaller trims can be made. What man or woman could pass this beautiful display without stopping to examine and admire it? Note how almost every article or line of articles is price-ticketed. These price-tickets are the "whole thing" in any kind of a display, and without them a window is robbed of the best part of its selling force.

The following explanation of how this trim, or rather the framework of it, is gotten up may be of value to anyone interested. The background is set out about a foot from the wall. The top piece, as supported on the four columns, is just a light skeleton frame of 1 x 2-in. strips, covered with white cotton and then puffed in white cheesecloth. The columns are easily made by taking two circular pieces of wood for a top and bottom, then nail a support from centre of circular piece to the centre of other circular piece. Cover this with carpet felt paper and pleat white cheesecloth on this. There is very little weight on them, as most of the weight of the top portion is supported from the ceiling. A solid background is placed behind this, and the end space is made separate and can be lifted out so that access can be had to the window.

This solid background is covered in green baize or felt (which costs about 70 cents a yard, and is over two yards wide). Shelves covered in the same mate-

New Silverware Patterns for 1902

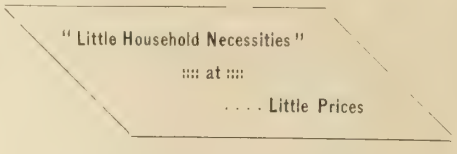
Standard Silver Co., Limited

31-43 Hayter Street. TORONTO.

rial are put on this background on which to show the various articles. These shelves are supported by brackets. Black felt or baize also makes an effective backing for all hardware articles, and is preferable. Three steps, full length of window, are arranged in front of the background and covered with the same material as the background. On these can be displayed any of the small lines from the hardware or tinware stock. As very few hardware stores have the windows and the stocks of this size, the suggestion can be used for a window half the size. Half of the design could be used. A background of this kind can be constructed at a very small cost, and with frequent changes in the goods this background could remain in the window for a few weeks and yet be attractive. If electric lights were arranged around the arches it would greatly enhance the effectiveness of such a background.



No. 2—A Display of Stoves and Stove Furniture.

No. 2 shows a neat "business-bringing" display. The beauty of this trim lies in its simplicity of design. The background in this trim is also a solid partition, covered with wall paper of a white porcelain imitation. The floor is covered with oilcloth. A few choice kitchen utensils are arranged on the stoves. The arrangement of the stovepipes as seen in the foreground is a very simple one and quite novel. This is an "out of the everyday" sort of trim and one that would strongly impress anybody in need of one or more of the articles shown.

DISPLAYING HOUSEHOLD GOODS.

By H. H.

During the dull season the following suggestion, if tried, will be found to be a paying one in nine cases out of ten, viz.: Take a lot of baskets (about 18 inches square, say), and fill each basket with a line of articles at one price. Say, for instance, you fill one with table knives, another with tack hammers, another with nutmeg graters, or egg beaters, or match safes, or soap boxes, or scissors, or pocket knives, or dog collars or screwdrivers, tack pullers, corkscrews, boxes of brass and nickel polish, etc. Arrange these in the window, side by side, and in every basket put a price and descriptive card. Have a large card arranged in a conspicuous place in the window, worded somewhat after the following :

A window display of this kind never fails to draw attention and sell goods, if this idea is properly carried out.

Housecleaning time will soon be around again, and here is a chance for the hardwareman to make a good, catchy trim of all housecleaning articles. A good window can be made from the following articles, viz., step ladders, curtain stretchers, carpet beaters, tack pullers, tack hammers, carpet sweepers, dustpans, mops, wringers, whitewash brushes, paints, kalsomines, etc. Ticket each line of articles in this window, and have a large card calling attention to your complete line of "Housecleaning Requisites."

PRICE CARDS.

By H. H.

Anyone can with very little practice become sufficiently expert in the art of printing cards to suit everyday requirements. All that is necessary is patience, perseverance and practice. White cardboard with black lettering is preferable. To make black paint, take a little "drop black" and mix it to the proper thickness with turpentine. The best kind of a brush is a sable brush—No. 3 or 4. The flat brush is preferable (one about $\frac{3}{4}$-inch long and about $\frac{1}{2}$-inch wide). Use a plain, easily-read letter or figure. Avoid all flourishing or fancy work, as it only confuses the eye and also takes up a lot of valuable time. The size of card should not be too large as it may hide up a big part of the display. The little tickets, about 3 or 4 inches square, are preferable. It is always best for the beginner to draft out in lead pencil the wording or the figures. After you have become accustomed to the formation of the letters and figures, they can be done from free hand without the aid of the pencil outlining. The first few attempts at ticket making are always discouraging, and, in most cases, a person that attempts it will "pitch it" after his first attempt. With perseverance you will be surprised at the progress you will make in this line, and it will be found very interesting and profitable work.

THE DISPLAY IN TWO WINDOWS

In a certain hardware store are two windows recently dressed. In the one, a wooden partition, about six feet high, extends the length of the window. It is about three and a half feet back from the glass. This is met by another partition at the end remote from the entrance, that forms an angle of about 60 degrees with the glass. The walls and flooring are covered with a cheap, red cloth, which makes a background. Six cross-cut saws are fastened to the first partition by nails driven into the wood. These run the length of back. On the second partition, eight handsaws are hung in two rows, four in each row, by their handles from nails in the wall. In front of the partition are four piles of cobblers' outfits for home repairing, two boxes in each pile. These piles are separated by equal spaces. In front are the contents of these same boxes, needles, threads, awls, hammers, spread neatly and evenly.

The other window is more elaborate. There are similar partitions and a similar background as in the first, but in-

stead of saws, ten even rows of sponges, all of which are about the same size, strung on cords, hung from the top to the bottom of the partition facing the front. These rows were placed at equal distances apart, and a single row, half way between the top and bottom, stretched the partition's full length. Two or three small egg crates, placed in such a way as to display their interiors to the public gaze, formed the central figure. On either side of this were two "Daisy" revolving churns. Between the churns and the end facing the entrance, a number of washboards were piled up. At the other end were three or four bird cages fastened to the wall by nails driven into the wood. S.

A Display of Tinware and Graniteware.

SAVING TIME IN WINDOW DRESSING

The work of changing a window display should be done as quickly as possible. Time is money with the window display. The longer the time occupied in dressing the window the longer is the period during which it is not attracting customers and not earning money for the firm.

A certain large department store in New York is said to value its window space at $50 a day for each window, which I should think is a moderate estimate. At any rate, whether it is moderate or not it sets one thinking about the value of the window and the necessity of utilizing it as much as possible.

Recognizing the value of the window display and the necessity of making changes as quickly as possible, it follows that the man who has charge of the work should utilize all the assistance he can. For instance, the younger men in the store can remove the goods from the window and bring those which are to take their place. They can also be trained in writing cards and doing rough carpentering work.

A Massachusetts window-decorator has an arrangement, according to a contemporary, which enables him to save time when arranging his window display. It was a long series of wood units, joined together in such a manner that the chain could be twisted and turned into arches, circles, crescents and squares of all sizes in a moment. This bendable fixture, when once adjusted, stays in position. After being arranged in the shape desired, the fixture was covered with a filling of cheesecloth or some like material. This fixture was capable of being lengthened or shortened as desired, and was practically indestructible, it costing about 10 cents a foot for 50 feet and slightly less when bought in lots of 500 ft.

A BROOM DISPLAY.

I saw a simple, yet effective, broom display the other day in a retail hardware store in Toronto. A frame, about five feet high, and running the full width of the window, was covered with a red cotton substance. To this were attached about a dozen brooms, every alternate broom being upside down. That is while the first was placed with the handle upward the next was in the reverse position. The frame to which the brooms were attached was placed in a perpendicular position, and about 18 inches or two feet from the front of the window.

In addition to the brooms attached to the frame were a few resting on the floor of the window and leaning against the window pane and the frame. E.

A STOVE DISPLAY.

A stove window I recently saw had for its central piece, about six feet back from the front, a large kitchen range, its side facing the front so as to give a view of its brightly-polished steel parts about the sides and oven. On each end or side, about five feet from the front, were two gas heaters, with plenty of nickle-plated work about them. In front of these again were two andirons with logs placed thereon.

A row of four large teakettles of graniteware, running parallel with the window glass and about four feet back, were in front of the stove. In front of these again was another group of graniteware teapots arranged in a line running the same way as the kettles. There were four teapots also in this row. In a semi-circle, surrounding these kettles and saucepans, curving towards the remote corners of the window, where the andirons and heaters were placed, was arranged a row of graniteware saucepans, the largest size in the centre of the row. These were in piles of threes, and about eight inches apart. There were seven groups of saucepans altogether. S.

TO PREVENT WINDOWS FROSTING.

Among recent suggestions for the prevention of windows frosting is the following: Place one or two electric fans in the window, directing the air current toward the glass. After they have run for an hour or two the frost will disappear and will not return so long as the fans are kept going.

The fans should be placed in opposite corners of the window, about 30 inches from the glass. After the frost is once removed a very gentle movement of the fans suffices to keep the windows clear.

Ups and Downs of Travelling in the West.

A Drummer's Graphic Description.

Strive as we may, we never can
Tell who is happy, who forlorn;
The 'cutest little shoe of tan
May hide a very painful corn.

WHEN a traveller (with his grip) sallies forth on Monday morning from some eastern city, permeated with a spirit somewhat like that of the Great Alexander, seeking greater worlds to conquer, the confidence inspired by the fact that back of him stands his house, with right prices, right goods of large variety, and excellent facilities for prompt and careful shipment, coupled with a personal knowledge of his customers, and his train service, so that at the beginning of the week his plans are so well laid that he can almost account for every hour of each day till the welcome Friday that finds him on his homeward journey, satisfied with the results both financially, as well as fully utilizing the time at his disposal. His thorough knowledge of train service has enabled him to jump, or double back, sandwiching a couple of hours here, rushing a customer there, and keeping continually on the move makes him feel that he has responsibilities and troubles all his own. But transport such a one past the curves and windings of Jackfish, and over the rolling prairies of the Great West, through the marvellous defiles and tunnels of the Rockies to the Pacific Coast, and behold problems formerly unknown to him are his to solve.

Fully imbued with his Eastern spirit he goes forth to clean up Winnipeg in a day, and finds at the end thereof that he has succeeded in visiting his customers, and, if lucky, has several engagements for a couple of days hence. Worrying, fuming, growling are all to no purpose, and it is only the experience of several trips that enables him to let things come their own way.

* * *

On his eastern route, freight rates were one of the least of his troubles, but the further he journeys to the land of the "Setting Sun," the more is his knowledge of rates and classification called into use. And with a 24,000 lb. minimum weight staring him in the face, he feels like "thirty cents in Dawson."

With what planning, scheming and work he finally succeeds in "making weight," for a "straight" or "pooled" car is only known to the initiated, and the points of success are sometimes embittered by finding after all, that that unknown quantity, unsolvable problem, "Freight Classification," with its 2nd and 4ths, 3rd and 5ths, arbitraries, flat rates, etc., by some peculiar ruling, the inspector has raised his car; and the "fat's in the fire."

Then Friday night comes. He sits in a lonely hotel, shut in as it were by mountains, or, perchance, viewing the broad expanse of prairie, with the wind whistling around the place, as it knows how (when it gets busy). And while one hand may hold a fat order book, the other holds a watch that tells him were he East, he would be nearing "home," where brightness and welcome awaits him, and he calmly considers the old, old problem, "What profiteth a man."

Trains don't worry him; his eastern knowledge of train service is a lost or useless art. If he gets one train a day he has to be content; but frequently he struggles with three trains per week. If he decides to drive in British Columbia he is asked the modest sum of $8 for a 15-mile drive. Alberta asks him $5, and Manitoba, $4, while the livery barns only charge him $1 to feed oats to his team.

* * *

His hotel fare, on the whole, is exceptionally good, particularly in British Columbia, taking into consideration the newness of the country. But that the hotelmen are not there for the benefit of their health is clearly shown when considering the price charged. And the baggage transfer companies. Oh! Well, they just look you up and down, take all you have, and if you look cheerful leave you just enough to partake once only of the "oil of gladness" with a friend.

An item in a trade journal, setting forth the "Ideal Traveller," came to my notice recently, and the exemplification of the qualities it attributed to the ideal traveller were such as to make a decided acquisition to the "millenium." In manners and dress he is unostentatatious and perfection; his correspondence, orders and expenses are sent in with that punctuality and command of detail, calling forth encomiums of the highest order from the office staff; selling only those whose credits were unimpeachable, etc. But this is "ideal," and more particularly the last-named, that is "the credits." And while this is a very essential feature in a traveller's makeup, and, as a general rule, excellently developed in this portion of the globe, it is the more necessary that great care and judgment be exercised by the traveller, so that undesirable credits be not contracted. But where to draw the line is the question, as it is in my knowledge where, what appeared as the most desirable, by a turn in the wheel of fortune, became most undesirable, and on the other hand, where men have started with a hammer and tinner's snips, backed by energy and perseverance, in a few short years are more than comfortably fixed financially. The greatest difficulty, however, is the infrequency of opportunities for purchasing and the desirability of buying in such quantities so as to insure a reasonable rate of freight, and in many cases the over confidence in the future, resulting in overbuying, and a depression often cripples what otherwise would be a healthy, remunerative business. In the East a doubtful account can be handled gingerly, with careful watching as to payments, and the proximity of the markets obviates the necessity of heavy buying, particularly the swinging of a business on limited capital, but with the West, it means "whole hog or none."

On first experience, a traveller is apt to put business methods of the West down to easy-going, independent slowness, but when thoroughly in touch with his customer and requirements, he realizes that when buying a merchant has to anticipate his wants for from four to six months ahead; that unlike his eastern brother, if a line is overlooked it has to remain overlooked, as the L.C.L. rate precludes the possibility of ordering it separately, so that post card and telephone orders are an innovation not yet inaugurated, and therefore a careful consideration of all lines is not only desirable but imperative. Rushing business would be erroneous. As the "path of glory leads but to the grave," a traveller finds, as a general rule, that merchants are not looking for that "glory" obtainable through the medium of "price cutting," which invariably results in a graveyard for their hopes. Unless a line can be sold at a profit it is eschewed.

* * *

If buying is methodical, so also is stock keeping, and the general arrangement of stock is such as to make easy and economical its handling, as price of labor is no small item, and one clerk less means much in the successful handling of a business. As the freight rates have been cited as an important item to the traveller, so are they likewise to the merchant; and while, in the East, a merchant can roughly strike a cost "laid down" by a certain percentage, his Western confrere must need have his gross and net weight of each case and article, and

it is a novel experience for a traveller to have his sample thrown into a scale to arrive at an approximate cost laid down.

* * *

An editor of a paper in one of the Kootenay towns alludes to Ontario as the "Cent Belt," ironically dwelling upon the minuteness to which business transactions are carried out, and as the West have as yet nothing smaller than five cents in currency, takes the latter as an evidence of the broadness of principle on which business is transacted in his portion of the globe.

An exchange of commodities or courtesies might be effected to mutual advantages to both sides along this line, as in the first case, a little less tightness, appearing somewhat in the light of off-hand generosity, would often accomplish the desired result, as well as lessening that friction that sometimes attends business transactions, while, in the second case, a study of the eastern methods of economy would tend to lessen the leak holes attendant upon business institutions, resulting in greater profits to a concern that may already be a paying investment.

In the matter of claims for damages or defective goods, the denizen of the "five cent" region has the preference, in showing greater allowance for the rough handling in transportation, in approaching the matter with a strong desire for friendly settlement, and not sticking at trifles. And in this manner accomplishes more with his travelling man than if an arbitrary spirit was adopted.

* * *

A traveller finds his Western customer of a more sensitive nature, with regard to the man who waits on him for business, and the travelling man who is thoroughly conversant with his lines gains and retains the respect of the merchant, who looks to him for his opinion on business matters and considers him a very desirable medium through which he may keep in touch with the newest and best goods as well as the lowest prices the market affords. He also finds him of a more conservative nature, more ready to appreciate a good turn, and one with whom price is not everything, but where sentiment and past relations bear a great part, and while, in some trival or isolated cases, he may pay slightly more on account of that sentiment, yet, on the whole, he comes out ahead of that man, "who has no friends in business," whose first, last, and only qualification is "price, price, price." Owing to the nature of the country wherein the resources are confined to one particular branch of industry, the business is of a spasmodic nature, being either a feast or a famine, so that if wheat fails, then all has failed; if copper or silver drops in price, then everything is at a standstill; the latter being augumented by labor struggles from time to time. That this state of affairs will continue to exist till increased population and minor industries arise, goes without saying, but that this desirable state of affairs is coming to pass, even a causal observer cannot fail to see. Travellers cannot help but admire this Western man, with his unbounded faith in his country, and particularly his town, cannot help but appreciate his enthusiasm as he dilates on his town's merits, and also note the way he goes about obtaining that recreation and enjoyment, especially when so far removed from the big centres of civilization, and becoming to some extent imbued with the spirit of progress and hope that is something of a fascination, which once experienced can never be forgotten.

SCOTT McKERROW.

THE MANUFACTURE OF CUT TACKS.

IT is not everyone who sells cut tacks that is conversant with the manufacture of them. Most of the tacks made are from soft steel, the raw material coming in the shape of tack plates of about 14x30 inches in size, and from 14 to 17 gauge in thickness. In describing the process of manufacture in a well-known factory, a recent writer says the plates are first arranged edge up on a rack standing on a four-wheel truck, a space of about half an inch being left between the plates. The truck is wheeled into the cleaning room, containing three large wooden vats of about 500 gallons capacity each, and arranged in a semi-circle around a hydraulic crane. With the aid of the crane the rack containing the tack plates is lifted from the truck and plunged into a vat half filled with a sulphuric acid solution. This removes the hard, black oxide and exposes the white natural color of the metal. After remaining in the vat but a few minutes, the rack is lifted and again lowered into a similar vat containing pure water, after which it is finally given a bath in a steaming vat of lime water.

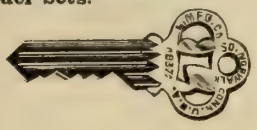
The rack of plates is again placed on a truck and carried up an elevator to a floor above, where the plates are sheared into lengths of 30 inches and from ¼ to 2¼ inches in width, varying with the tack or nail which is to be made.

The material is now ready for the tack machines, which are near at hand, making a cheerful din. The long metal strips are fastened one at a time by a pair of plyers attached to a long, jointed stick, and thrust through a tube which automatically feeds the metal to the cutting jaws. The tube is on a slight angle to the cutter, and is so arranged that every time the jaws open the metal is turned over. This makes a wedge-shaped slice. As the small blanks are cut from the long strips, they are held by the blunt end by a spring, which is pushed down about half an inch, allowing the blank to be gripped by dies, giving the nail or tack a more finished appearance, and leaving a small portion, just sufficient to form the head, exposed; barbs are also produced by this process. The head is formed by a hammer-like motion of one of the parts while thus clamped, and may be of any shape, according to the die used. The nail or tack is now complete as far as shape is concerned, and as the clamping dies separate, the finished product is pushed away and falls into a trough leading to a box below.

The machines repeat this operation from 270 to 450 times a minute, so that very little time is allowed for each operation.

Although finished as far as shape is concerned, there are several processes through which the tacks are obliged to pass. Leaving the machine room, the tacks are carried in boxes of about fifty pounds to the annealing ovens, where their contents are placed in pans and slowly heated; this operation requiring about thirty minutes, or until the right heat is attained. The heating does not change the color. If it is desired to blue the tacks, they are taken after annealing to other ovens having a much higher temperature, where they remain only seven or eight minutes.

If the tacks are to be tinned or coppered, they are tumbled in revolving barrels. This gives a smooth appearance and at this stage are what are known as "silver steel." Coppering is done by placing a small quantity (about twenty-five pounds) at a time in a sieve-like basket, which is suspended in a vat of blue vitriol for about a minute and occasionally shaken. The basket is then lifted out, rinsed in cold water, then in hot water, and finally emptied with a quantity of sawdust in a wooden tray, constantly agitated by machinery, where the contents are polished and dried.



The tinned tacks are given an acid bath, in which tin is dissolved, and coated in much the same way as the coppered. Copper-plated shoe-nails, for instance, are generally electroplated in a revolving cylinder composed largely of rattan. After these different processes are completed the finished product is taken to the packing room.

The method adopted for indicating size is little understood. "In days of old," when a tack was a tack and only one kind was recognized, the different ounces designated referred to the actual weight of a paper containing 1,000. If tacks were put up in smaller packages they would be marked half or quarter weight, according to the fraction of 1,000 included. The "ounces" now refer only to the length and weight of a package of full weight tacks, but not to the number in a package.

SOME POINTS IN COMMERCIAL LAW.

Contracts and Partnerships.

LAW REGARDING CONTRACTS.

A BUSINESS MAN cannot be his own lawyer at all times; but it is possible for him to be so sometimes. He cannot be expected to obtain such a knowledge of the law that he will be an authority upon it in its many phases; but there are certain features of the law relating to commercial matters with which he should at least have some acquaintance. Contracts for the sale of goods, for instance, he should be well acquainted with.

The necessary requisites in regard to this particular matter depend in part at least upon the value of the goods. In case the goods concerned in the contract, for example, are

UNDER THE VALUE OF $40

there can be no sale without a tender or part payment of the money or a tender or part delivery of the goods, unless the contract is to be completed at a future time. The Canadian Lawyer illustrates this point nicely. "Thus," it says, "if A. should agree to pay so much for the goods, and B., the owner, should agree to take it, and the parties should then separate without anything further passing, this is no sale. But, if A. should tender the money, or pay but a cent of it to B., or B. should tender the goods, or should deliver any, even the smallest portion of them to A., or, if the payment or delivery, or both, should be postponed by agreement till a future day, the sale will be valid, and the property in the goods will pass from the seller to the purchaser. If, however, any act should remain to be done on the part of the seller previously to the delivery of the goods, the property will not pass to the purchaser until such act shall have been done. Thus, if goods, the weight of which is unknown, are sold by weight; or, if a given weight or measure is sold out of a larger quantity, the property will not pass to the purchaser until the price shall have been ascertained by weighing the goods in the one case, or the goods sold shall have been separated by weight or measure in the other. So, if an article be ordered to be manufactured, the property in it will not rest in the person who gave the order until it shall, with his consent, have been set apart for his benefit."

This gives in outline the law regarding the sale of goods less in value than $40. Now, with regard to the sale of

GOODS OF $40 OR UPWARDS

Section 17 of the Statute of Frauds provides "that no contract for the sale of any goods, ware and merchandise for the price of £10 sterling or upwards, shall be allowed to be good except the buyer shall accept part of the goods so sold, and actually receive the same, or give something in earnest to bind the bargain or in part payment, or that some note or memorandum in writing of the said bargain be made and signed by the parties to be charged by such contract or their agents lawfully authorized."

In the Revised Statutes of Ontario, 1897, it is provided that this enactment "shall extend to all contracts for the sale of goods of the value of $40 and upwards, notwithstanding the goods may be intended to be delivered at some future time, or may not, at the time of the contract, be actually made, procured or provided, or fit or ready for delivery, or, although some act may be requisite for the making or completing thereof, or rendering the same fit for delivery."

In Manitoba and New Brunswick the law is the same, and in Prince Edward Island, the Statute of Frauds is extended in the words of the last section to goods of the value of $30.

Provided an agreement for the sale of goods is not to be performed within the space of one year from the making there of, then, however small be the value of the goods, no action can be brought upon it, unless the agreement or some memorandum or note thereof shall be in writing and signed by the party to be charged therewith, or some other person thereunto by him lawfully authorized.

LAW REGARDING PARTNERSHIPS.

A SUMMARY of the law in regard to partnerships may, perhaps, not be uninteresting to some readers of "Hardware and Metal." A partnership, as everyone knows, is an association of two or more persons. Every person who shares in the profits of a business is a partner in the business as regards the public and third parties and is liable to such whatever may be the private stipulations and agreements between him and the parties who appear to the world as the managers of the business, because the profits form a portion of the fund on which the creditors have a right to rely for payment. A general partnership is one formed for trade or business generally without limitations. A special partnership is one in which the joint interest extends only to a particular concern. A limited partnership is one in which one or more of the partners put in a certain amount of capital which is liable for the contracts of the firm, but beyond that the party advancing is not liable.

RESPONSIBILITY TO THIRD PERSONS

does not cease after withdrawal from a firm if the name is still allowed to continue in the firm. It is important that this should be known.

ACTS OF INDIVIDUAL PARTNERS.

A partner may buy and sell partnership effects; make contracts in reference to the business of the firm; pay and receive money; draw and endorse and accept bills and notes; release ordinary partnership debts, payable on demand under seal; and all acts of such a nature, even though they be upon his own private account, will bind the other partners, if connected with matters apparently having reference to the business of the firm, and transacted with other parties ignorant of the fact that such dealings were for the particular partner's private account. So also the representation, or misrepresentation, of any fact, made in any partnership transaction by one partner, or the commission of any fraud in such transaction, will bind the entire firm, even though the other partners may have no connection with, or knowledge of the same.

A partner will bind the firm by his representations and admissions, made to others in the general course of the partnership business, but cannot bind them by deed, unless empowered by deed so to do; nor by giving guarantees, unless the giving of such is part of the regular business of the firm. He can hire clerks and workmen, but cannot discharge them against the will of the partners. In lawsuits, he may prosecute or defend an action for the firm, but if his partners object to his course they have a right to

WHEELBARROWS

Navvy, General Purpose or Garden Barrows.

All styles and sizes.

No. 1—General Purpose Barrow.

Navvy Barrow—Iron or Wood Wheel.

Our Lawn Mowers, Churns and Barrows are sold by the leading wholesale firms. If your wholesale house does not handle them write us direct.

DAVID MAXWELL & SONS

ST. MARYS, ONT., CANADA

demand that he shall indemnify them against law costs.

DORMANT AND SECRET PARTNERS

whose names do not appear to the world, may be made responsible for the engagements of a trading firm of which they are members.

Persons may become clothed with the legal liabilities and responsibilities of partners as regards the public and third parties, holding themselves out to the world as partners, as well as by contracting the legal relationship of partners among themselves. If a man, therefore, allows himself to be published to the world as a member of a particular firm; if he permits his name to appear in the partnership name or to be used in the business; if he suffers it to be exhibited to the public over a shop window; or to be written or printed on invoices or bills of parcels or prospectuses; or to be published in advertisements, as the name of a member of the firm, he is an ostensible partner and is chargeable as a partner, although he is not in point of fact a partner in the concern, and has no share or interest in the profits of the business. But if a man's name is used without his knowledge or consent, and he is represented by others to be a partner without his authority or permission, he cannot, of course, be made responsible as a partner upon the strength of such false and fraudulent representation.

An incoming partner cannot be made responsible for the non performance of contracts entered into by the firm before he became an actual and reputed member of it.

Dormant and secret partners may release themselves from all further liability by a simple withdrawal and relinquishment of their share in the profit and loss of the business; but, if they are not strictly secret as well as dormant partners, notice of the termination of their connection with the copartnership must be given. A general notice is sufficient as to all but actual customers; these must have some kind of actual notice.

DISSOLUTIONS OF PARTNERSHIPS.

If no time has been limited for dissolution of a general trading partnership, it is a partnership at will, and may be dissolved at any time at the pleasure of any one or more of the partners. If the partnership was established by deed, the renunciation and disclaimer of it by the party who withdraws from the firm ought to be made by deed. But if the partnership was contracted without deed, or, as it is technically called, by parole, it may be renounced in the same manner. If the partners have agreed that the partnership shall continue for a definite period, it cannot be dissolved before the expiration of the term limited, except on the mutual consent of all the parties, or by the outlawry, felony or death of any one or more of them, or by the decree of Court of Equity.

If a partnership for a definite term has been created by deed the mutual agreement of the parties to dissolve it must be by deed also. The partnership is dissolved by the death or insolvency of one of the partners; or by an assignment by any partner of his share and interest in the business. A dissolution by one partner is a dissolution as to all.

An executor, administrator or personal representative, continuing in the business after the death of a partner, is personally responsible as partner for all debts contracted.

Immediately after a dissolution, a notice of the same should be published in the public papers, and in The Official Gazette for general information, and a special notice sent to every person who has had dealings with the firm. If these precautions be not taken, each partner will still continue liable for the acts of the others to all persons who have had no notice of the dissolution.

EMPLOYES SHARING PROFITS

In Ontario and British Columbia agreements whereby an employe receives a defined share of the net profits or proceeds of a business, in lieu of or in addition to salary or wages, do not create the relation of partnership with the rights and liabilities attending such relation. Persons advancing money by the way of loan, on similar terms, the widow and children of a deceased partner receiving a portion of the profits by way of annuity, and persons receiving a portion of such profits in consideration of the sale of the good-will of the business, are likewise similarly protected.

LIMITED PARTNERSHIPS.

In all of the Provinces limited partnerships may be formed consisting of general and special partners, the latter of whom are not liable for their debts of the partnersnip beyond the amount they contribute to the capital. The general partners only can transact the business, sign for the partnership and bind the firm. A certificate in a given form must be signed by all the partners and deposited with the registrar and prothonotary. The provision of the statutes upon these subjects should be carefully followed.

By the statute 39 Vic., cap. 8, it is enacted that all persons composing a partnership for the transaction of mercantile, mechanical, or manufacturing business, except banking and insurance, shall make and severally sign a certificate in the presence of one or more witnesses, which shall contain the name or firm of the partnership, the names and respective residences of the partners, the general nature of the business to be transacted, and the time when the partnership is to commence and terminate.

MAKING OF A PROMISSORY NOTE.

A promissory note is an unconditional promise in writing made by one person to another, signed by the maker, engaging to pay on demand or at a fixed or determinable future time a certain sum in money, to, or to the order of, a specified person, or to bearer. The person who makes the note is called the drawer or maker; the person to whom it is payable, the payee; the person endorsing it, the endorser, and he to whom the endorser transfers his interest therein by such endorsement, endorsee. The person in whose possession it is is called the holder. Minors cannot be parties to a note or bill of exchange.

A promissory note to be valid must be in writing; the promise to pay must be an absolute and not a conditional promise; it must promise to pay money; and the amount must be fixed and certain and payable at a fixed period of time or upon some event which must certainly occur. If no time is fixed in the note for its payment, it is payable on demand; if payable to a fictitious person it is payable to the bearer. If it bears no date, the time will run from the first day it can be proved by evidence the note was in existence.

A note signed by more than one person is either joint or joint and several. If two or more persons desire to become responsible so that one cannot be sued upon it without the other or others, the note should read "We jointly, but not severally, promise." If each intends to become responsible for the whole debt without any regard to any defence the others might have or subsequently acquire to resist payments, it should run thus: "We jointly and severally promise." The holder may then sue all jointly or each separately.

While no precise form of words is demanded, it is better, in order to avoid risks, to use the common forms and words, which, as reproduced from The Canadian Lawyer, are as follows:

A NEGOTIABLE NOTE.

$100. Ottawa, May 1, 1886.

Three months after date I promise to pay John Scarlett, or order, at the Bank of Montreal, Toronto, the sum of One Hundred Dollars, value received.

THOMAS ATKINS.

NOTE NOT NEGOTIABLE.

$2,000. Chatham, N.B., March 15, 1886.

Sixty days after date I promise to pay Samuel Harrison Two Thousand Dollars, value received.

HENRY TURNER.

JOINT NOTE.

$350. Annapolis, N.S., January 10, 1885.

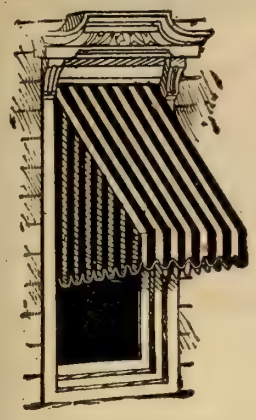
Six months after date we jointly, but not severally, promise to pay Samuel Richards, or order, Three Hundred and Fifty Dollars.

H. THORNE.
THOMAS BARFOOT.

JOINT AND SEVERAL NOTE.

$580. London, Ont., July 4, 1885.

Thirty days after date we jointly and severally promise to pay to the order of Nathan Quigley Five Hundred and Eighty Dollars.



CHARLES WOOD.
IRWIN SECORD.

NOTE ON DEMAND.

$150. Winnipeg, Man., October 17, 1885.

On demand I promise to pay Edward Chase, or order, One Hundred Dollars, value received.

40 Years' Experience.

"If it's Wire Work or Metal Work, tell us what you want--we can make it."

AN OPEN LETTER.

To The Hardware Trade:

We want you to act as selling agents for our manufactures. A very considerable and profitable trade can be done in lines not kept in stock. Residences, stores, churches, public buildings, factories, theatres, hotels, banks, offices, etc., require our Wire, Iron and Metal Work. Learn the requirements and supply them—at a profit. This trade belongs to you. We furnish catalogues, advertising matter, lowest trade prices and special designs, when required. Get acquainted with us—we wish to explain the proposition more fully. Awaiting the favor of an early response,

Yours, very truly,

Dennis Wire and Iron Co.

THE PAINT, OIL AND BRUSH TRADES.

HINTS ON THE CARE AND SALE OF BRUSHES.

THERE is nothing in ordinary use that requires more careful looking after than a brush ; indeed, it may be said, that unless a brush is in good condition and well taken care of, good work cannot be done. This is particularly applicable to painters and varnishers' brushes. They should never be kept in a place that is either too warm or too dry, for they are liable to shrink, and the hair will come out.

THE CARE OF BRUSHES.

To restore a brush that has thus shrunk place it in a cellar or any other moderately damp place for a short time. Many brushes have had their bristles completely destroyed because they had been used in water and newly-slacked lime. The hair of a brush also may be caused to loosen and fall out by it being placed in water or paste, for the water easily dissolves the cement with which mostly all brushes are set.

Liquid shellac is very harmful to a varnish brush, the cement or glue of the setting being dissolved by the alcohol in the liquid, causing the hair to come out.

When in use varnish brushes should be kept over night suspended in the varnish, and after using they should be thoroughly cleaned before being put away. Paint brushes, also, should be kept well cleaned. This may easily be done by washing the brush in turpentine or benzine. Lettering and striping pencils should be pointed in oil, when they are cleaned, before being put away. Kalsomine and whitewash brushes should always be washed after using, and always kept out of paints and varnishes. They are only made for cold-water paints and colors.

When brushes are being kept in a showcase, window, or drawer, to prevent their bristles being eaten by moths, they require constant watchfulness and care. Moths may be kept away by the using of camphor or camphor balls.

CARRY SMALL BUT ASSORTED STOCKS.

In these days of the electric telegraph, and steam railway a merchant need not carry a heavy stock of brushes ; the only thing that is necessary for him is to carry something of every line. When his supply runs low in any particular line it can soon be replenished. It only takes a few hours from the placing of an order till its arrival at its destination. The distance, for example, between Winnipeg and Montreal, can be covered by express in two days.

What the dealer should be most particular about is the line of goods he carries. He will find it will always pay best to purchase, if possible, his goods from some well-established and reliable house. A reputation for manufacturers' goods has probably already been gained, and at any rate they will have already had the advantage of extensive advertising. Probably they will also have been made known to the customer, and it will be all the more easy to sell them to him. Being well made and proving satisfactory in every way, a repetition of orders is insured.

WINDOW DISPLAYS.

Make a good window display of the brushes you carry. This can easily be done, either separately with them alone, or with cans of paint. Keep them always before the public in a showcase, where they may be neatly and carefully arranged. The bristles should be kept straight and be clean. Most manufacturers will replace brushes that have become soiled through being shown in a window.

The stock should be suitable to the season. In the spring the demand is mostly for painters' and housecleaners' brushes ; in the summer, for sorting-up lines, and in the fall, for horse and dandruff brushes, and similar lines.

Advantage should be taken of these facts in making window and showcase displays and keeping up the stock.

CANADA'S IMPORTS OF PAINTS AND OILS.

PAINT dealers in Canada annually import about $2,000,000 worth of such goods as paints and colors, varnishes, linsced oil, turpentine and glue. This will be gathered from a glance at the following table giving in values the imports for the past three years :

IMPORTS IN VALUES.

	1901.	1900.	1899.
Paints and colors	$794,478	951,691	791,010
Varnishes, lacquers, japans, etc	116,625	86,763	85,165
Turpentine	309,339	359,675	228,995
Linseed oil	441,048	479,277	328,487
Glue, powdered and sheet	168,489	140,931	145,307
Glue, liquid	19,758	21,059	18,098
	$1,849,737	$2,039,396	$1,597,062

The following table gives the imports more in detail. The figures are for quantities except in one or two instances, in which the official trade returns only furnish values :

IMPORTS IN QUANTITIES.

	1901.	1900.	1899.
Colors, dry, lb	990,831	1,275,281	1,216,462
Colors and paints, pulped or ground in oil or other liquids, lb	2,139,225	1,987,202	1,497,370
Dry white and red lead, orange mineral and zinc white, lb	10,307,548	14,859,143	14,378,909
Ochre, ochrey earths and raw siennas	805,509	1,099,042	1,088,181
Oxides, fireproofs, umbers and burnt siennas, lb	1,270,278	1,431,911	1,347,818
Paints, ground or mixed in or with either japan, varnish, lacquers, liquid dryers, collodion, oil finish or oil varish, lb	56,766	40,154	70,461
Paints and colors and rough stuff and fillers, anti-corrosive and anti-fouling paints commonly used for ships' hulls, lb	250,972	96,296	83,603
Paris green, dry, lb	323,583	308,523	204,137
Paints and colors ground in spirits, and all spirit varnishes and lacquers, lb	457	504	441
Putty, lb	238,996	406,623	332,536
Brocade and bronze powders and liquid gold paint	$32,680	$27,223	$29,489

FROM CHEMICALS TO COLOR.

By C. G. H.

WHEN a customer enters a hardware store and pays 40 or 50 cents for a quart of ready mixed paint he troubles himself very little with the thought of how the paint was made, or what ingredients entered into its composition. Nor is the average hardware merchant himself very well acquainted with the interior workings of our immense paint factories, or with the details of the manufacture of these goods, which are among the most important items of his business.

In olden times buyers came from all parts of the country into the market several times a year, and thus had frequent opportunities of paying personal visits to the paint and other factories which supplied them with their requirements. But this has all been changed. The noble army of travellers, scouring the whole country for business at frequent intervals, has rendered it unnecessary for the merchant to leave home to make his purchases, and the paint manufacturers have no longer the pleasure of showing them about the works. That it was a genuine pleasure to do so cannot be doubted.

The fact that merchants do not trouble themselves to visit the factories does not necessarily imply that they are not interested in the workings or management of such places. Indeed, to take a trip through a large paint factory, accompanied by a guide who can explain the ins and outs of everything one sees, will prove so entertaining and instructive as to remain very long in one's memory. Having decided that an account of such a trip would be of interest to readers of "Hardware and Metal," it was next in order to select some factory which would be large enough to afford the inspection of all the newest machinery and most modern methods. I decided on The Canada Paint Company's works at Montreal. The finding of a guide was easy, for Mr. W. H. Evans, notwithstanding the fact that he is an exceedingly busy man, with his usual genialty, offered to conduct me.

We first of all went to a building some distance from the main works, where the different chemicals which constitute the bases of the various paints are received from abroad. In what is called the chemical room are kept barrels of these different paint fundamentals, blue vitriol, orange lead, nitrate of lead, eosine, which is the base of vermilion, copperas and yellow prussiate of potash, which together go to make prussian blue and many others.

The first step in the making of paint is to weigh these chemicals out in their proper proportions, which is done according to a set formula. They are then placed separately in large vats and dissolved in boiling water. From these they are run into a common vat, where they mix and form the desired color. Sometimes three or four vats, each containing a different chemical, are used to feed one large vat, and great care must be exercised to see that the proper temperature is preserved in all.

From the vat the mixture is pumped into a hydraulic press. This is divided into sections, and the liquid is forced through the press from one end to the other until it is filled, the water running out at the bottom and leaving the clear paint. When the water has been completely got rid of, the paint, in the form of a soft paste, is carried to the kiln, where a temperature of about 120 degrees dries it. It was found that when a certain temperature was reached the paint would get so dry, but would not develop further. So, to produce a continuous current of hot air, a turbine was arranged, which drives the heat from the boiler in the engine room into the kiln, and another turbine below which draws the air out again. With this apparatus the operation of drying the paint was performed successfully.

The paint is then taken to the crushers, where it is ground to powder, falling, after coming through the machine, into barrels, and being automatically packed, so that nothing is required to make it ready for shipment but putting the heads on the barrels. From here, I was informed, it was sent over to the main factory to be made into liquid paints and paste in their various mercantile forms.

Paints, in pulp, for wall paper purposes form a considerable part of the manufacturing, and before leaving this part of the works I was shown huge vats or tubs of this paint, some of which held 1,000 gallons. Lemon yellow is very much used, and it is one of the shades that requires all the knowledge and skill that can be put into its manufacture. Paris green was being made here. To see the different chemicals that go to make this much-used article one would never dream that there would be any green in the mixture, and when from the feeding tubs gush forth streams of blue into the large vat, where the liquid is already blue, one is not prepared for the sudden change of both into a light green, which, by its own action, in a couple of hours, deepens into the green which we so well know. Canadian arsenic is almost altogether used in making the paris green here.

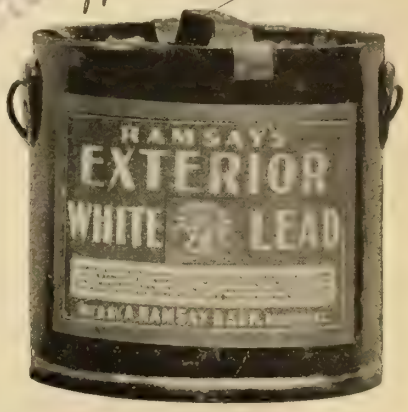
But let us get to the main factory. I was first introduced to the "color man." His duty is to see that for mixed paints the right proportions of the right colors are placed in the mixers, where they are thoroughly amalgamated. From here they go to the gang mills, where the paint is ground.

Some of these grinding machines have two stones, others three. They have to be very finely adjusted, and an ingenious device has been invented by which they are kept cool with running water.

The paints, which are sent out in paste form, are ready to put into the cans when they come from these grinding machines. But for the ready-mixed paints, the process of manufacturing is not yet completed. These require to be still more thoroughly amalgamated; and from the grinding machines or gang mills, to give them their proper name, the paint, in thin paste form, proceeds up a belt to a weighing machine. It drops off the belt as it turns round the shaft wheel into a tub resting on scales. When a certain quantity has been received in the tub it is wheeled to the finer mixers, which, like giant egg beaters, whirl the paint around till it has become of a consistency ready for the brush.

It oozes thence into the cans which rest upside down on scales. When a can is filled to the desired weight it is carried to a press, where the bottom is sealed on. Then it passes quickly through various hands. One polishes the tin, a daub of paint of the same color it contains is put on by another, a third pastes on the labels, and it is then ready to be packed for shipment.

Certain colors are much more commonly used than others. Vermilion, for instance, is always being made, and an immense quantity of window-blind green is turned out for spring work, for it still keeps its place as the favorite color for shutters and sash. To keep pace with the demand for construction paints, several mills were continuously running graphite and oxide. This speaks well for the prosperity of the country, for unless there is a good deal of building going on, the business in construction paints is a dead letter.



White lead is given a section of the building all to itself. A ponderous chaser rushes round a circular vat grinding and mixing the lead in preparation for the gang mills. From the large chaser it goes to a smaller one, then up a belt into a series of rollers. It is

THREE OF THE 1902 PAINT MONEY-MAKERS.

Now, a money-maker must be something good. No use merely **saying** it's good, it must **be** good. **Ramsays Paints** have proved themselves money-makers, therefore they must be good. There are dealers in Sydney, C.B., and dealers in Vancouver, B.C., and hundreds of dealers in between. These dealers are in business to make money; they are making money handling **Ramsays Paints,** because they are good paints; they satisfy the people—satisfy them with paints better than any paints they could mix themselves. They live on a house as paints should live. **Ramsays Paints** are money-makers, because the price is just right: gives the dealer a profit and the consumer, paints at a price he expects to pay for the best that goes in the way of paint making. As other dealers have done with a money-maker so can any dealer.

Ramsays Exterior White Lead

is the greatest money-maker in the lead market to-day. It's the best advertised lead in Canada. Every painter in the land knows about it, booklets are sent to them regularly. Architects demand it; householders and builders want it. We know it is better than Pure Lead—so do the painters who have used it. It costs less than pure, and can be sold for more. It has larger bulk than pure, works easier and goes farther. That's why **it** is a money-maker.

Ramsays Vienna Green

is a green that **is** green and **stays** green. Look at the greens that fade out with a little touch of summer sun. What's the good of them? Give your customers a green that keeps the blinds green, the doors green, the garden ornaments green—everything green that should be green. **Ramsays Vienna Green** is a better green than imported green and costs less. That should be a money-maker shouldn't it?

Handsome Catalogue of Paints, Varnishes, Stains, Brushes, Glass, Painters' Supplies, and all the goods we manufacture and import sent for the asking.

ST. JOHN, N.B.

scraped automatically from the last roller into the irons which are on scales. There were huge piles of these irons of white lead, almost enough to build a block house, and they were continually being added to, being hauled away for shipment when the stock has been well aged.

In another portion of the building are the varnish and linseed oil floors. In the former, a large number of tanks in the maturing room remind one of the underground storage warehouses of London, where wines and spirits are stored for ripening purposes. Each tank in the varnish room bears a date of when it was filled, and it is not allowed to be tapped or drawn until a certain time has elapsed. And even then it is considered fit for use only after the varnish expert has tested it thoroughly, and made his report upon its efficiency for the different work to which it may be put, for furniture, carriages, or house decorating. Except for the boiling, clarifying and settling of the linseed oil, which is done in huge, riveted tanks, there is not much to see here. The varnish cans are closed up with modern stoppers, and then hermetically sealed with a brass top, which prevents tampering.

One floor is devoted to coach and car colors. Here the greatest possible care must be exercised. Cleanliness prevails throughout. The mills are kept polished, and attendants are ever on the alert, keeping an eye on the delicate tints and shades which this fine machinery turns out.

There are many other departments in a big paint factory not directly connected with the work of manufacturing, but, which are, nevertheless, important features of the factory. For instance, they have a permanent staff of millwrights, machinists, carpenters and electricians.

Those neat little sample cards, for instance; where do they come from? Your big factory makes these, does its own printing, gets out its own advertising, and does a good many other things which are not expected of it by the uninformed public.

Heavy sheets of calendared paper are painted in the desired color and laid out to dry. One man superintends this work, and sees that the exact tints are reproduced. The slips of wood, which almost every hardware dealer has in his store, are also painted in this room. They are cut up according to measure, and sent to another room, where a hilarious lot of girls, with complexions reflecting the bright and cheery tints of the color sheets, paste them under their proper numbers on the cards.

A room which looks for all the world like the inside of a flour mill is devoted to the making of kalsomine and Opalite colors. The ingredients are brought in in rock form, ground, levigated and bolted to a degree of fineness almost beyond imagination.

Then there is the room for oxides and dry colors ready in barrels for shipment, the room for Opalite paints, where an immense range of tints is shown the visitor, and the room where is kept the gold leaf, English vermilion, and other fancy items, which are carried mainly for the customers' convenience.

A section of the works is devoted to the manufacture of that much-abused article called putty. The whiting is imported in bags, and ground with linseed oil, put into bladders, tins, kegs, or barrels, as ordered, and shipped.

I could hardly convey to a reader a true idea of the extent of a big paint factory without mentioning that these huge buildings in Montreal are only a part of the whole plant, and I suppose other factories are the same. The Canada Paint Company does most of its varnish-making in Toronto, where the plant covers about two acres. In addition, they have a plant at St. Malo, Que., where they control a mine rich in pockets of oxide and other earth colors, from which is manufactured a large range of Indian and Venetian reds and the stains used in mortar. Then there are graphite mines near St. John, N.B. This pigment is especially meritorious for iron painting.

When I had been taken over the whole factory we again came into the office, where I was shown the immense vaults. In taking my leave, with many thanks to my conductor, Mr. Evans, we parted with this injunction: "Don't forget, Mr. 'Hardware and Metal,' to mention that your readers will be welcomed in the factory and warerooms any time they call. We are a purely Canadian company using Canadian stock, employing Canadian workmen, and selling to Canadians, and we want to have as many of them as possible to see our factories and how we make the stock they buy from us."

THE CAUSE OF VARNISH CRACKING.

Cracking of varnished surfaces may be caused by a non-elastic ground, says Sanitary Engineering, a journal published in the United States, be it color or varnish; by a ground of too great elasticity; by applying too many coats of color or varnish in too short a time; perishing of the elastic qualities of the varnish by the influence of atmosphere and sun heat, and the influence of ammonia and other alkalies; undesirable drying materials in the varnish or faulty manufacture thereof; and by the breaking of the groundwork under the varnish.

JOURNEYMEN TO THE FRONT.

ENGLISH painters look forward to spring activity in the trade as eagerly as the painters of America. That is the time when the journeyman is in demand and when the "boss" is strictly on his good behaviour. Henry Fenelon, in The Journal of Gas and Sanitary Engineering, describes the spring rush in England in the following language:—

"Will you kindly assist the boy, please, to get up some turps and oil (ile)?
I've a sweet little job for you, Bill, at the villa from here a mile;
Here's a crown (keep the change) for the cab fare—
I really can't ask you to walk."
Oh, it's easy to see the spring's coming on when that's how the "bosses" talk.

The journeyman painter in one short month from now will emerge from his obscurity. He will again clothe himself in the white garments of a blameless life, and with them he will assume that "cheek" which has been wofully absent during the winter months. Then may the employers look out. Then, indeed, may they tremble, for on the very slightest provocation the journeyman decorator will "chuck" his brushes on the office desk and demand his "blooming money."

Aye, aye, the spring is coming again, "tra-la-la," and almost immediately the cheerful "skibbo" will leave his winter's job at cab driving. He will look with a sneering contempt on his winter's work of scene shifting in the local theatres at one shilling six pence each performance, and for the next few months will cease his feeble struggles with the huge bales of cotton he has been laboriously handling on the dock quays.

Spring is coming, and even now as I write grave discussions are taking place between the painter and his wife as to the advisability of purchasing a new jacket and overalls, and having formed themselves into a committee of ways and means, the decision has been arrived at that owing to the great depression which has existed for the last five months it would be as well to defer buying a new "rigout" until the advent of the "Ides of March," and that for the time being a piece might be neatly let in at each elbow, and a couple of patches at the knees will suffice for the next four weeks; for, as Mrs. Painter remarks, they must settle with the landlord; and, besides, there's a balance owing to the very courteous Scotch gentleman who so unfailingly turns up each Monday morning for the remainder of the money owing on Jim's last suit. And Jim mutters something highly condemnatory of the eyes and limbs of the gentleman from the Highlands, whom he thinks has charged 50 per cent. too much; and having borrowed "tuppence" from his worthy spouse, hies him down to the clubroom to see how trade is.

THE BEST IN THE WORLD.

MONTREAL, CANADA.

The Making of White Lead.

EXPLANATION OF THE DIFFERENT PROCESSES.

WHITE lead, or carbonate of lead is a well-known substance used everywhere by painters as a pigment, and has been so used for centuries. It is also utilized for cementing water pipes and glazing pottery. When it reaches the painter's hands, it is either in a dry state or paste form, ground in linseed oil, the latter being the most commonly used. It is made from the metallic lead, a soft metal of bluish color, tending to grey and having also a bright metallic lustre when newly cut or melted. The lead mineral is extensively used in the manufacture of bullets, water pipes, and also at one time for roofing. It is mined extensively in the Rocky Mountains, Great Britain, Prussia, Saxony, Austria, and near Cartagena, in Spain. Extensive deposits of this metal are known to exist in New South Wales.

TWO METHODS OF MAKING WHITE LEAD.

This white lead or carbonate of lead is made from the metal by two methods, the second of which is merely a development of the first. The first or old Dutch method is still widely used, and has been the way of manufacture, perhaps, since the Roman times, and the Dutch, centuries ago, learned it from the Venetians. The metallic lead is cast into the form of stars, gratings, or thin perforated sheets, in such a way as render quite easy its conversion into the carbonate. These pieces of lead are placed in small earthenware jars, resembling flowerpots, about six inches deep, and wider at the top than at the bottom. A piece of wood is placed in the pot so as to confine the lead to the upper portion thereof. Some acetic acid (vinegar) is then poured into the bottom of the vessel, the lead placed in the upper part, occupying about two thirds of the jar, and kept from the vinegar by the wood, and a slab of lead is placed on top. These jars are then arranged in parallel rows, forming a square tier of about 20 feet each way, or 400 altogether, and the whole covered with spent tan bark or stable litter. Another tier is placed on the top of the first and treated likewise. This process is repeated until there is a pile eight or ten tiers high formed, all embedded in the litter.

Left to themselves for six or eight weeks, the fermentation of the litter keeps up a suitable temperature and a constant supply of carbonic acid. The vinegar in the jars is converted into gas by the heat, and this, aided by the imprisoned air, attacks the lead which becomes thickly coated with a white substance (basic acetate). The carbonic acid given off from the hotbed in turn converts this basic acetate into the carbonate or white lead.

During the whole of the six or eight weeks this constant action and reaction continues until the whole of the metallic lead is changed into the white lead. After this is completed the pots are emptied and the newly-made carbonate of lead broken up and ground in water to a fine paste. It is then placed in little conical moulds and allowed to dry. It is then ready for use, and is what is called dry white lead.

Some years since this was an extensive industry in Holland, and numerous factories had their existence around Rotterdam. But of later years white-lead manufacturing is being conducted extensively in Prussia, Great Britain and the United States, causing the Dutch industry to dwindle down to smaller proportions.

In Saxony and Prussia, and also in Great Britain and the United States, the second method, which is merely a development of the first, is followed. The factory is a two-storey building, the ground floor of which is occupied by a furnace. The floor of the upper chamber is composed of boards loosely arranged, so that the heat may readily pass through from the furnace beneath. Square or rectangular watertight boxes, with numerous openings in the top, are placed on the first floor. Above these are erected frameworks reaching to the roof to which short sticks are attached in such a way as to enable them to sustain the bars or thin sheets of lead above the boxes. Some unfermented grape or raisin juice or cider is placed in the boxes, and this is made to ferment by the action of the heat from the furnace. The fumes from the grape juice together with the oxygen in the air decompose the lead, changing it to the carbonate. This falls in flakes to the floor where it can be gathered by the workmen, broken into fine particles, ground in water and dried in the moulds. It is then ready for shipment.

WHITE LEAD MAKING IN GREAT BRITAIN.

In Great Britain white lead has been manufactured since the days of Elizabeth, the foreign policy of that Queen in excluding, as far as possible, foreign productions from her dominions, doing much to foster and encourage native industries. The English manufacturers copied their method of white-lead manufacture from the Dutch, and even to-day practically the same methods are adopted as elsewhere.

Another way that has been recently adopted in this: Oxide of lead (litharge) is worked on a solution of acetate of ammonia. Carbonic acid is then injected into this solution and the carbonate of lead or white lead is precipitated in the form of a sediment in the bottom of the vessel. By this process white lead is quickly made. The acetate of ammonia is recovered and used again. This is called R. MacIvor's process, and is used in Great Britain.

In the United States there are numerous patents covering the manufacture of white lead, which has been conducted in that country for upwards of a hundred years. The methods employed there are mostly modifications of the Dutch method.

NO WHITE LEAD MADE IN CANADA.

In Canada no white lead is, as yet, manufactured, but large quantities are ground in oil by the various paint manufacturers, who import it from Holland and Germany. The immense deposits of lead ore or cerusite at Fernie, B.C., and the extensive smelting operations being conducted there ought much to encourage its manufacture in the Dominion.

OUR IMPORT TRADE IN BRUSHES.

CANADA'S import trade in brushes during the past five years has increased by over 83 per cent. The following table gives the imports from the different countries during 1901, 1900 and five years ago:

IMPORTS OF BRUSHES, 1901, 1900 AND 1897.

	1901.	1900.	1897.
Great Britain.....	$ 16,032	$ 15,982	$ 12,294
Anstria-Hungary ...	3,029	895	3,480
France.....	67,972	57,362	31,091
Germany	26,632	28,266	45,861
Japan	1,537	4,621	2,568
United States	76,025	80,821	38,792
Other Countries.....	76	174	72
	$191,303	$188,227	$104,158

The largest increase, it will be noticed, is in the imports from France, being 118 per cent. Next in order comes the United States with an increase of over 90 per cent. The Canadian Customs tariff on brushes is 25 per cent., which, it is claimed by the manufacturers, is not sufficient, especially in view of the competition of the cheaper makes of European brushes.

Venetian red, obtained by roasting iron sulphate, was produced in the United States in 1900 to the amount of 14,696 short tons, about 2,000 tons more than the average annual production of the previous four years.

STAUNTONS LIMITED, TORONTO

A Leading Ingrain Frieze in Our New Line.

all the Stauntons Oct 31 1903 see cut book 12 page 78

A large stock of our most successful patterns in all grades is now ready for shipment.

We have a set of samples specially prepared for mailing and expressing.

A postal from you will bring these samples (free).

Or if you wish to place a large order we will send a traveller to see you.

Our goods and our prices will command your orders and will bring you good profits.

All orders placed with us can be filled immediately.

These facts are worth remembering.

A WONDERFUL ALUMINUM PAINT.

WITHIN the last two years The Sherwin-Williams Co. has placed on the market a new paint specialty, that has been meeting with exceptionally great success all over the continent. It is an aluminum paint for use on both wood and metal surfaces, producing a silver finish.

For a long time the company experimented to produce an article of this sort that would be more practical than anything of a similar nature ever placed on the market, and as a result they are offering an aluminum paint that outranks all similar products in so many respects as to stand practically alone in its field.

The Sherwin-Williams Aluminum Paint produces a velvety lustre as though the silver bronze had been dusted on, and gives a durable paint surface that withstands high temperature and extreme cold, that will not blister, scale or crack, and that will not discolor.

Besides this exceptional durability the paint does not possess the nauseating, banana-like odor so common in paints of a similar nature. It works exceptionally easy under the brush, and has a great covering capacity. Under the most severe tests this aluminum paint has successfully withstood exposure to gases, extremes of heat and cold, and contact with large quantities of lubricating oil without discoloring, and without any injury whatever to the paint surface.

It is a truly wonderful paint, and can be unhesitatingly recommended with the assurance of giving entire satisfaction on decorative work, radiators, gas stoves, gas and steam pipes, machinery, engines, novelties, gas fixtures, and a wide variety of other uses.

The Sherwin-Williams Co. have prepared a number of samples of this paint on sheet iron, and will be very glad to send them to any person inquiring for them, in order that the paint surface may be put to test to prove the statements that have just been made concerning it. It is an article of good selling qualities for hardware dealers, and should prove a splendid specialty to push during the busy paint season.

SOMETHING ABOUT BRUSHES.

The brush manufacturing business of Canada is of long standing, and for the most part has an honorable record. The leading firms in the business have an experience of many years and have no need to be ashamed to compare the quality of their manufactures with those of any other country. The material which enters into the manufacture of brushes is gathered from most parts of the world, and as lumber in Canada is suitable and abundant, the advantages to the manufacturer are many, and equal, if not superior, to any other locality.

The most expensive material, the long hogs' bristles, are brought from Russia and Germany, which countries are unequalled in the production of this material. For finer qualities, the French bristles are generally used, and during the last few years a large business has sprung up with China in black bristles, which make excellent paint brushes.

It may be a surprise to many to know that, notwithstanding the immense number of hogs that are killed annually in Canada and the United States, there are comparatively few bristles obtained from them, and those of a very inferior quality, used mostly in household brushes. The principal reason for this great difference in bristles is due to the high state of breeding to which the American hog has been brought, for the better the quality of the pork, the poorer the bristles which he bears. Besides bristles, which are obtained from other countries than those mentioned, fibres are used extensively, the principal ones being brought from Mexico, South America, and many parts of the East Indies.

Among the large manufacturers of brushes in the Dominion are T. S. Simms & Co., Limited, of St. John, N.B. Beginning under the present management in 1872, and incorporated in 1895, they have grown from a small local business to one which extends, not only the length and breadth of Canada, but also includes Newfoundland and the West Indies, as well as exporting some to the Old Country. Situated on the seaboard, they have all the advantages of ocean freights, and with an equable climate, which allows of men working every day in the year, and with an abundance of lumber right at hand, their facilities for manufacture cannot be surpassed. As they have outgrown their present premises, they have contracted for a new factory and warehouse, which will be erected this summer in time for the business of another year. This new factory will contain the most improved machinery for the manufacture of all kinds of brushes, some of which they control, and which are not to be found in any other factory in America.

We refer our patrons to their advertisement on page 57, where some idea of the variety of the goods they manufacture may be had. They are also manufacturers of corn brooms, having turned out last year more than 33,000 dozen.

We bespeak for this firm large success with the new facilities which they will have at their hand.

T. S. SIMMS & CO'S NEW FACTORY.

The new brush factory for T. S. Simms & Co., St. John, N.B., is expected to be completed by September 1 next. It will be situated on Union street, and will have a frontage of 115 feet. Three storeys in height with a basement, it will contain a factory 75 x 100 feet and a store

New Factory of T. S. Simms & Co., Limited, St. John, N.B.

80 x 75 feet. On the ground floor will be the suite of offices and a fireproof vault. A one storey building, 20 x 100 feet, at the east end of the structure will contain the engines and boilers. Everything within will be arranged with a view to fire protection. The floor will be of solid timber, five inches thick, and will rest on girders of solid Georgia pine. It will be underlaid with asphaltized building paper, and will have a slight inclination towards the walls. The elevator will be solidly encased in brick shafts and the means of entrance to it will be protected by fireproof doors. A brick wall will separate the factory from the store and both will be heated by exhaust steam from the engines. The most modern and improved machinery will be installed and everything adapted for a greatly increased output. A larger number of hands will also be employed by the company, which, at present, has 120 men on the pay roll.

TORONTO, ONTARIO, CANADA.

GENTLEMEN,

We, the undersigned Hardware Merchants and Paint and Varnish Dealers, who are handling your Elastilite Varnish, have pleasure in testifying that it has given our customers and ourselves splendid satisfaction, and has proven to be all you claim for both inside and outside uses. It produces a high-grade finish, equal in durability to the best outside wearing varnishes.

The price being moderate, and it being peculiarly adapted for both inside and outside work, or in other words suiting all purposes, it does away with the necessity of stocking so many different lines of varnish. The packages are neat, attractive and handy. The large Cabinet Show Can provides not only a compact way of carrying a stock of the varnish, but is a very attractive ad. in our store or window.

JUN 2 1902

A MONEY MAKING PAINT AGENCY

THE Sherwin-Williams Paint Agency is a money making proposition. The dealer who secures it in any place, large or small, can sell more paint with better profit than he ever sold before.

He can win greater success and win it more quickly; he can hold his trade better and make greater gains; he can build up his whole business better than with any other paint.

There are three principal reasons why this is so:

First. An S. W. P. agency gives the best paint quality that can be produced.

Second. It gives the best and most aggressive advertising in the paint field.

Third. The Sherwin-Williams Co. do more to help their agencies sell paint than any other concern in the business.

The Sherwin-Williams Advertising attracts trade.

The Sherwin-Williams Paint holds it.

The Sherwin-Williams Methods increase it.

When you take the agency for S. W. P. you get something besides paint and color cards—you also get the same methods and advertising, and the benefit of the same organization and brains that have made us the largest and most successful paint makers in the world.

If you are interested in what we mean by a money making paint agency, send for the "B-13 Booklet." It contains illustrations and brief descriptions that will fully explain our proposition. A postal card will bring it.

COVER THE EARTH

A Centre of Electrical Energy.

What is being done to develop the Water Power at Shawenegan Falls.

SHAWENEGAN FALLS, unknown by name to a great many even in Canada a few years ago, is gradually widening out in the public eye all over this North American continent. While not approaching Niagara Falls in its majesty, it promises to be second only to that famous place as a centre for the development of electrical energy.

A couple of years ago Shawenegan Falls had but a few houses where to-day are many houses and a population of 3,000. And this transformation has been brought about by the schemes which have been undertaken to harness the immense water power which has hitherto been allowed to play and not forced to labor.

Shawenegan Falls is about 90 miles from Quebec, 84 miles from Montreal and 21 from Three Rivers. The electrical power plant which is nearing completion at Shawenegan Falls is designed to supply an electric service not only to the nearby towns, but to the city of Quebec in the east, the city of Montreal in the west, and to Three Rivers in the south.

For a number of years the great power of the St. Maurice River has attracted the attention of promoters; but until recently the title to the property and water has been more or less complicated. The Privy Council of England recently decided that the Provincial Government could dispose of its water powers, and recently it has been selling these privileges with the understanding that the development be immediately commenced.

The Shawenegan Water and Power Company was formed under a charter granted by the Provincial Government, with the power to develop the water power, manufacture gas and electricity for the purpose of light, heat and motive power, to construct works needed for such purposes, to transmit power generally throughout the Province of Quebec, and to transmit electric power and sell same in the various towns and cities, with the right to expropriate land for its various purposes, including the necessary right of way to any point.

The president of the Shawenegan Water and Power Company is J. N. Greenshields, K.C., of Montreal; the vice-president is John Joyce, of Andover, Mass.; the treasurer is Mr. J. E. Alfred, of Boston, Mass.; the secretary is Mr. Richard W. Douglas, and the chief engineer, Mr. Wallace C. Johnson, who has had much to do with the Niagara power development during recent years.

The Shawenegan power system, as explained by Frank C. Perkins, obtains its water by a canal 1,000 feet long, 100 feet wide and 20 feet deep. The water is conducted through this canal to a forebay, formed by building a solid concrete wall, or bulkhead, from which the water is conducted through pipes to the power house, 130 feet below. This substantial concrete wall is 40 feet in height and 30 feet in thickness at the bottom. Each pipe, water wheel and generator will produce 5,000 horse power. The water for the operation of the wheel is obtained from the forebay, and is conducted in steel tubes to the power house, each tube having a diameter of nine feet. Three of these penstocks are now in place, and three more are still to be installed and are now under way. The canal has a capacity of 60,000 horse power, and the present development includes a bulkhead for 30,000 horse power, power house and pipe lines for 15,000 horse power, and water wheels and generators for 10,000 horse power.

The company purchased about 1,000 acres of land, of which 200 acres were reserved for mill sites, and about 500 acres for the location of the town, the latter being particularly well adapted for this purpose, being high and comparatively level. The former is an ideal location for manufacturing plants using large quantities of power, both electrical energy and water power privileges being available.

The St. Maurice has a total length of over 400 miles and is supplied from a great many lakes and streams, the drainage area being about 18,000 square miles. The water flow is very steady throughout the year on account of the dense forest covering this area, and is in the neighborhood of 26,000 cubic feet per second. The power which may be developed will not fall short of 100,000 horse power ultimately, and the working head is more than 125 feet.

Besides the main development, it was decided to take advantage of the fact that at one point the Shawenegan River and the St. Maurice came within 1,000 feet of each other, but with a difference of level of 150 feet, and it was here, at a point on the upper bay, a second installation was made. This is about half a mile from the main power station of the Shawenegan Water and Power Company. This installation was built by the Belgo-Canadian Pulp Company, whose enormous pulp mill is supplied with water for operating their turbines by the Shawenegan Water and Power Company. This development consists of a large crib dam through which the water passes at the bottom. The headworks consist of a concrete forebay, which has a height of 40 feet, with the necessary racks and headgates. This solid concrete bulkhead is inside of the crib dam on the bank of the river, and from it the penstocks lead the water through the bank and down to the lower level, discharging into the Shawenegan River as a tailrace, after passing through the turbines. The steel penstock between the forebay and the mill is 12 feet in diameter, and a special tunnel about 200 feet long had to be excavated through the clay bank for its reception. This plant will have a capacity of 15,000 horse power, which is to be utilized by the Belgo-Canadian Pulp Company, but double this power may be obtained by duplicating the crib and bulkhead next to the present one. The present pulp mill will be able to turn out 10 tons of pulp per day, using for this work about 8,000 horse power. An additional 7,000 horse power, making the entire 15,000 horse power, will soon be used by another additional paper and sulphite mill.

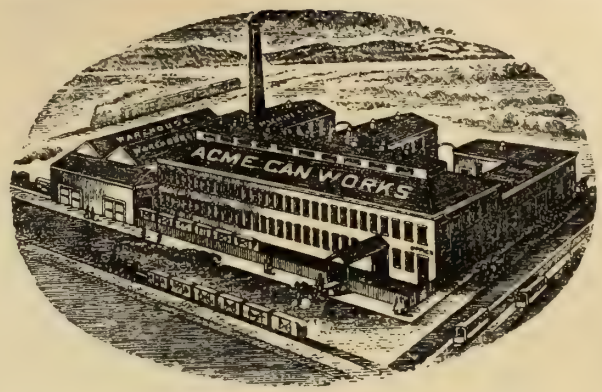
The water wheels in the main power house were built by the I. P. Morris Company, of Philadelphia, and each has a capacity of 6,000 horse power under a working head of 125 feet. Two of these turbines are now in course of erection and two alternating current generators of 5,000 horse power are already installed. The electrical generators were supplied by the Westinghouse Electric and Manufacturing Company, of Pittsburg, Pa. There is provision for another 6,000 horse power unit in the present power house; and an addition is provided for duplicating the present plant, which will increase the output to about 36,000 horse power.

The steel tubing from the forebay to the power house increases in diameter from 9 feet to 11 feet near the turbines, the thickness of the shell of the flume also increasing from 5-16 inch to 9-16 inch. The diagram of the wheels shows them to be of the twin-turbine type, having one runner at either end of the casing. The water enters the turbines radially from without, discharging radially toward the centre of the shaft into the draft chambers. The draft chambers connect with an 8-foot draft tube which passes to the tail water. It increases in diameter to 11 feet. The tail water has a low mean level of 25 feet below the centre of the wheel shaft. There are two large air chambers above the casing, which is of cylindrical form. The turbine is 30 feet long, and is controlled by gates in the draft chambers. The gates consist of butterfly valves, closing together at the centre between the shafts.

There is little question that quite an industrial centre will be established at this

Standard Pumps.

Each article bearing our name carries full assurance that your customer will be satisfied.



We make pumps of **all kinds** adapted to every purpose at prices which prohibit importation. We solicit orders from the trade only, and all wholesale houses supply our goods.

power plant. Already the Calcium Carbide Works have been established and a large plant known as the Shawenegan Carbide Company's works has been installed. The Pittsburg Reduction Company's plant for the making of aluminum, is also in operation. The above-mentioned concerns alone will in the near future use about 35,000 horse power. The example of the Pittsburg Reduction Company and that of the Shawenegan Carbide Company is being followed by other users of electrical energy. It is said large plants for the manufacture of bleaching powder, caustic potash and chlorate of potash and other electrolytic products will have an exceptional opportunity at Shawenegan Falls.

HARDWARE AND METAL is indebted to the Montreal Chambre de Commerce for the excellent illustration which accompanies this article.

THE FAMOUS SHAWENEGAN FALLS.

HOUSEHOLD HARDWARE.

THE P. R. Cumming Co., Limited, 90 Richmond street east, are a Toronto firm engaged exclusively in the manufacture of household hardware. These articles they have been placing on the Canadian market for about a year, and they claim to be the first firm in the Dominion to take up the manufacture of this class of goods.

Mr. P. R. Cumming, who is a Canadian, has been in the United States engaged in household hardware manufacture for fifteen years. He returned to Canada upwards of a year ago, and at once perceived the possibility of developing that industry here, as he found that the majority, if not all, of the household utensils in use were of United States manufacture.

Since its establishment the business has greatly increased, and additional lines are being added to the already wide range of articles made by this firm day by day.

The most recent of these additions is an ingeniously thought-out mouse trap of new design, which has many advantages on its side. It is easily set from the outside by means of a simple pressure of a lever, makes the escape of the mouse an utter impossibility, killing it instantly and without mutilation. There is also a contrivance by means of which the dead animal can be easily removed without the necessity of handling it. This contrivance is meeting with good sales in the United States, and the firm says it is deluged with orders on Canadian account.

Amongst other lines of household utensils manufactured by this firm may be mentioned the "Cumming" corkscrew can-opener—a combination of a steel blade and a corkscrew of steel wire; the "Acme" window cleaner, consisting of a steel tube holding a rubber that when desired can be quite easily removed; a handy fruit and vegetable slicer, needing no further description, and a new style of spring lever mop called the "Best."

They are also the sole Canadian agents for a number of United States manufacturers, such as the National Sweeper Co., Marion, Ind.; The Perfection Manufacturing Co., Clayton, Mich., and The C. T. Williamson Wire Novelty Co., Newark, N.J., besides a number of others.

They will be pleased to send their illustrated catalogue and samples of any of their goods to any of our readers who write for them, mentioning HARDWARE AND METAL.

THE TRIALS OF A PAINT SALESMAN.

BY RUFF STUFF.

"Good morning Mr. Sprigbit, have you any liquid paints?"

"Yes, indeed, Mrs. Felloplate, lots of them, the 'Giraffe' brand."

"The 'Giraffe?"

"Yes."

Mrs. Felloplate: "But the 'Giraffe' has very little body."

Mr. Sprigbit: "That's so, but it has lots of neck—far reaching. See the point? The 'Giraffe' brand spreads well, covers well, looks well, wears well, will not chip, chalk, flake, powder, creep, crawl, fade, crack, tack or blister."

Mrs. F.: "Dear me, how very peculiar. Do the colors stand out well?"

Mr. S.: "Yes ma'rm. They will stand out clear and sharp like quills on the back of the fretful porcupine, and no mistate!"

Mrs. F.: "Are your paints elastic? I want some for the folding-doors between the drawing-room and the woodshed."

Mr. S.: "Elastic? certainly; just the paint for folding-doors, because it will go and come, contract and expand, moreover, notwithstanding, likewise, nevertheless, to suit the occasion. The 'Giraffe' brand is the great universal paint. Licks all creation into fits and knocks everything into a cocked hat!"

Mrs. F.: "Lor', I think I'll try some."

M. S. (with a deep sigh): "Thanks. What color?"

Mrs. F.: "Maria Jane wrote it down, because she is so particular. Here it is, Half a pint of heliotripe.' I'll take a pint. I like to order liberally!"

Mr. S.: "Heliotrope, you mean. Will you take anything else?"

Mrs. F.: "Yes, I'll take a color-card. Good day!"

(Exit Mrs. Felloplate, leaving Mr. Sprigbit so elated at the big sale that he grabs some coil chain and tries to do the Sandow act by breaking it across his knee)

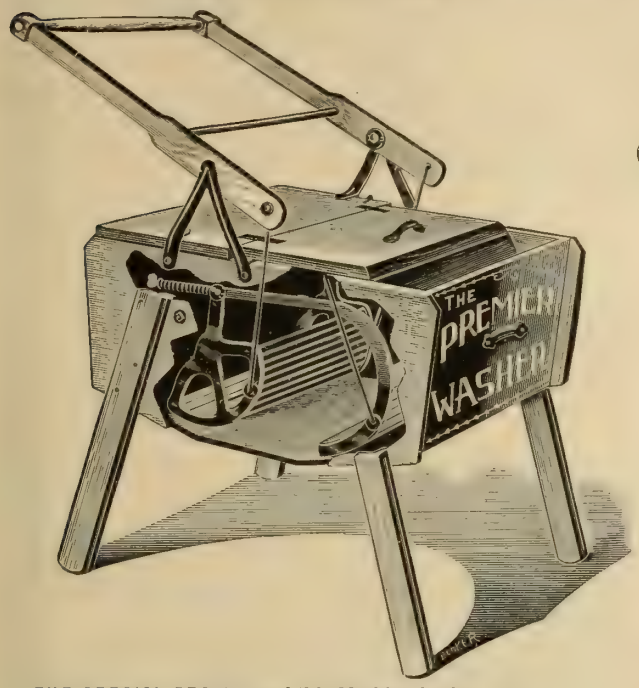
Where and How Galvanized Iron is Made.

WHILE there are countries where galvanized iron is used much more largely than in Canada, for roofs and even walls of buildings, there are probably none where it is adapted to such a variety of uses. As an English manufacturer visiting the country recently said: "When I remark on your substantial stone fronts, stone cornices, and so on, I am at once told that it is not stone at all, but galvanized iron. You seem to use it for everything here." And that being the case, a short description of a galvanized iron works may be of interest. For this purpose no better selection could be made than the works of John Lysaght, Limited, which is the leading enterprise of its kind in the British Empire.

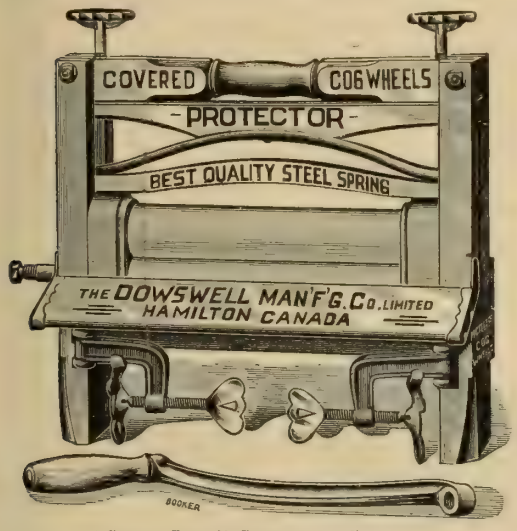
Forty odd years ago the late John Lysaght started a galvanizing business in Bristol, at first buying the black sheets, but later acquired a large rolling mill in Wolverhampton, which until recent years had been the great centre for the sheet iron trade. New conditions, however, have resulted in steel replacing iron in the manufacture of the better grades of sheets, and the sheet steel trade, like the tinplate trade, has been largely concentrated near the seaboard in South Wales, saving freight on such raw materials as are imported and on the finished product for export. On this account John Lysaght, Limited, have removed their sheet mills to Newport, where they have a large tract of land, nearly 80 acres in all, with a frontage on the River Usk, enabling large sea-going vessels to discharge and load at their own wharf. These mills are equipped with the most modern machinery, embracing American as well as British improvements, and are claimed to rank second to none in the world. A considerable portion of the output at Newport is sold for various manufacturing purposes, Lysaght's "dead flat" sheets being specially well known, but the great bulk is shipped in the company's own boats to the galvanizing department at Bristol, directly opposite Newport, on the south side of the British Channel. Bristol is the headquarters of the company and has special advantages for galvanizing, a spelter works being part of the plant. Here the black sheets are pickled to remove all scale, then run through the galvanizing baths, the machinery used being so complete as to make the process almost automatic. After galvanizing they are rapidly dried over a fire, and the better grades are then flattened, as the galvanizing process has warped them more or less. There are two galvanizing processes, the best grade of sheets such as "Queen's Head" and "Orb" being more heavily coated than other brands. There are also two or more qualities of steel used, only the best grade being sent out for flat "working-up" sheets, while a cheaper quality answers for corrugating, which is done on a large scale at Lysaght's works. Canadians would hardly realize the extent to which corrugated galvanized iron is used, but the shipments to Australia, South Africa, South America, and other countries is enormous, and the proportion of "working-up" sheets in comparison is small. The packing-room at Bristol affords an interesting sight, with its great piles of iron for markets all over the world.

At another point on the outskirts of Bristol, Messrs. Lysaght have a large plant for the manufacture of galvanized wire netting, and a very extensive structural iron works, the latter an outcome of the demand in certain countries for buildings made entirely of iron, with corrugated iron walls and roofs. Numbers of these buildings are manufactured in Britain, and sent out to be erected at destination.

The successful management of such an extensive business as that of John Lysaght, Limited, with its branch offices and warehouses all over the British Empire and in other lands, demands more than ordinary business ability. The late Mr. Lysaght was a man of strong character, indomitable energy, and great executive ability, and he established and carried out most successfully a system of agencies in all the leading markets. The present company is presided over by his son, Mr. F. P. Lysaght, and is ably managed in every department. The managing director, Mr. Sidney R. Lysagt, a nephew of the late Mr. Lysaght, is not only prominent in commercial life, but is well known as an author of no mean ability. His brother, Mr. William R. Lysaght, takes personal charge of the large interests at Newport, and has a thorough grasp of every detail of the manufacture of sheet steel. Mr. Edward Davey, the secretary, and Mr. Henry G. Hill, the accountant of the company, are men of exceptional business ability, and those in charge of the practical manufacturing are the most experienced and capable who can be found for their respective positions. The attention to detail and careful inspection of material at every stage of the manufacture, which have had so much to do with the building up the reputation of British goods in the world, have always been maintained in these works, the personal element never being destroyed by the great increase of output.



John Lysaght, Limited, General Offices, Bristol, Eng.



The Canadian agency for the late Mr. Lysaght's goods was placed with the late Mr. A. C. Leslie, of Montreal, in March, 1872, and the connection, which has grown to large dimensions, has remained unbroken for 30 years. In 1897, Messrs. Lysaght established their Canadian business as a branch house instead of an agency, in order to become more closely identified with the Canadian trade, and are giving more attention than ever before to this market.

THE PREMIER WASHER

Patented in Canada and United States.

THE SPECIAL FEATURE of this Machine is the very even adjustment of pressure obtained by means of strong spiral steel compression springs. Very easy on clothes, and will wash the finest garments without tearing them.

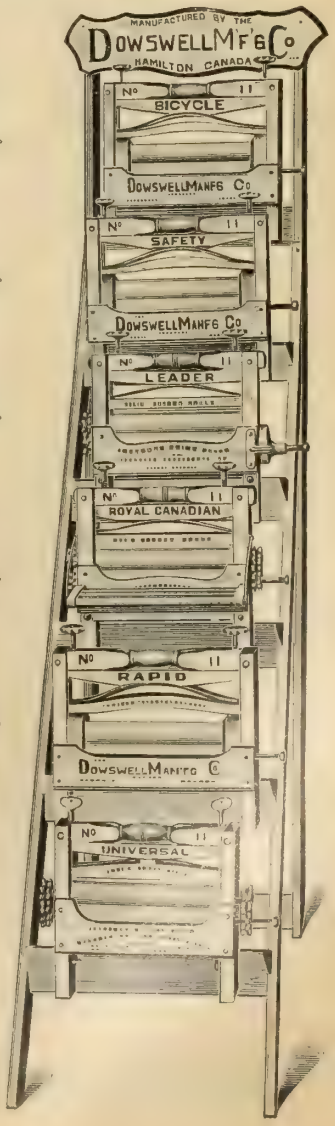
"Sure Grip" Swinging Clamp,
For Galvanized Iron, Wood or Fibre Tubs.

PROTECTED GEAR

- Won't allow water to get into bearings.
- Removes liability of accident to children.
- Increases durability of rolls.
- No oil or grease can get on them.
- Gives greater wringing surface.
- Exposed bearings—easy to lubricate.
- Requires longer springs, giving greater elasticity.
- Simplifies care of machine.

The New Century Washing Machine

IT LOOKS EASY.
IT IS EASY.



Steel Ball Bearings, same as used in High-Grade Bicycles, and strong tempered steel spiral springs render it so. No machine on the market approaches it in simplicity, ease, quickness, or thoroughness.

Equally well adapted for use in Public Institutions, Hotels, Laundries, or the Home.

The operator does most effective work while seated. Splashing impossible.

Quick Seller **Once Inspected, Soon Selected.**

The Practical Superiority of "Oxford" Lines Explains their Popularity.

Whoever Handles "Oxford" Lines Is Sure Of The Best Business Of His Locality.

Dealers who handle our famed "Oxford" lines, including every class of cooking and heating goods, realize their up-to-date supremacy by the ease with which they sell.

We shall be more forehanded than ever for 1902, and promise the trade a progressive showing of new features—the latest wrinkles in improvement crop out in every line of goods we make, maintaining the standard of excellence for which we are noted.

From Vancouver to Halifax our goods are advertised, used and praised, the name "Oxford" standing for all that is best in cooking and heating lines.

Make the most of this popularity—appropriate some of our hard-earned fame to swell your own income—write for our catalogues with fullest details of information about all "Oxford" goods, and be ready for the biggest year's business you've ever known.

WHAT IS GALVANIZED IRON?

THIS is the age of galvanized iron. Sixty-five years ago, such an article was unknown; to-day in any populated part of the globe you can hardly get out of sight of it. It takes the place of stone, brick and wood; of slate, tiles and shingles; of zinc and copper, of tinplates and black sheets; in fact, there seems no limit to its usefulness.

Properly speaking, it is not galvanized, as there is no galvanic action employed in casting the sheets, though in the early days of the industry this was tried, and hence the name. Neither is it iron, as all the better grades have for years been made of soft steel.

HOW IT IS MADE.

A brief account of the process of manufacture may interest some of those who use or handle galvanized iron.

The roughly rolled steel bar, or "tinplate bar," as it is usually called, which forms the raw material, is cut to lengths equal to the width of sheet wanted, heated in a furnace, and rapidly passed backward and forward through the rolls until reduced to the required gauge. When partly reduced in thickness, the sheets are folded over and rolled double, and this may be repeated more than once, so that some of the thinner gauges are finished in packs of as many as eight sheets. These packs after cooling off are sheared to the proper size, the sheets separated, annealed, and flattened by cold rolling or stretching.

They are then pickled, the acid cleaned off, and they enter the galvanizing bath which is filled with molten zinc with a small percentage of tin to produce a bright spangle.

John Lysaght, Limited, Bristol, Eng.—Packing Department.

After passing through this bath, they are cleaned, dried, flattened, and then packed in cases or bundles. If they are to be corrugated, this is done after the galvanizing.

TWO SYSTEMS OF GALVANIZING

It will be seen that there are many points in which sheets may vary—the class of steel used, care in the rolling, annealing, pickling, and flattening—but nothing is more important than the galvanizing, for on that depends the life of the sheet. There are two distinct systems in use—the "flux" process, in which the sheet passes out of the galvanizing bath through a flux and retains all the zinc that it has taken up, and the "non-flux" process, in which the sheets pass through rolls which remove part of the metal. The latter is the cheaper process and does not produce so smooth and bright a surface as "flux" galvanizing, and what is of the greatest importance, the coating is uneven and will rust through much more quickly.

"Non-flux" sheets can be easily distinguished by the "tiger marks," or whitish streaks running across the sheet, showing where it has been pinched in the rolls after galvanizing. These streaks turn black soon after exposure and will be the first parts of the sheet to rust.

GAUGE OF GALVANIZED SHEETS.

A controversy, says our London correspondent, is at the present moment taking place upon the question of the gauge of galvanized sheets. An English firm, having bought a parcel of galvanized iron, tested the weight according to official tables given in The Ironmonger diary for 1902. Finding that the weight for a given gauge and dimension did not tally with the weight stated in the invoice, they inquired

John Lysaght, Limited, Bristol, Eng.—Entrance Hall of General Offices.

as to the actual trade custom. One authority states, "If a buyer asks for 24-gauge galvanized iron, we should assume that he meant iron which, in its galvanized condition, was of 24-gauge, and that is what we should deliver." Another firm, however, say that their custom is to sell sheets which in the black are fully the thickness of the gauge specified. From inquiries made by The Ironmonger this latter course appears to be the general practice, especially among the larger makers. It would thus seem that there is no fixed rule in England governing the gauge, so that when buyers require sheets of a certain gauge it is necessary to state in the order whether the thickness refers to the material before or after galvanizing. American exporters would do well to make this point quite clear to their foreign buyers, particularly in the Australian market.—Metal Worker.

IT CUT THE WRONG WAY.

A young married woman who began housekeeping a short time ago, went into a hardware store in a Maine town and asked for a biscuit cutter. The proprietor, one of her friends, selected a small axe and, with a sober face presented the same to her. Without smiling, the young lady took the axe, put it over her shoulder and marched out of the store and to her home with it. And now the young hardware merchant is in doubt as to its being so much of a joke on the young lady.—Boston Journal.

HINTS FOR STOVE AND TINWARE DEALERS.

HANDLING STOVES IN THE HARDWARE STORE.

Address by A. Rothwell, before the Ohio Retail Hardware Association.

HISTORY informs us that even before the time of Christ the early inhabitants of the Old World used braziers, in which they burned charcoal, for the purpose of not only heating the room in which the apparatus was, but by means of hollow walls the heat was conducted to other apartments of the building.

It is generally conceded that the Franklin was one of the first of American stove products, but some of our English brethren contend that our own Benjamin got his ideas from their open fireplaces.

The old six (6) plate box heater, for wood, was first made in Ohio about the year 1830, and as there were no foundries west of the Alleghanies the patterns were shipped to Maryland to be cast. The old high oven step stove soon made its appearance, and as various foundries were springing up in almost every section of the country, we find that in the year 1860 many Ohio towns could boast of their foundries making stoves, however, only in a limited manner. The dealer of to-day occasionally runs across one of these old relics and no doubt it soon finds its way to the scrap pile.

THE MODERN STOVE.

The ancient type of both heating and cook stoves have been supplanted by the modern steel range, gas range, base burner or air-tight, and it can truthfully be said "that no household article has had the many improvements and the vast amount of money expended on it as the kitchen stove or range."

The stove industry of to-day is quite an important factor in the iron and steel market, being one of the largest consumers. Some of our stove foundries of the present day cover acres of ground, employing hundreds of skilled mechanics.

Stoves are, nowadays, essential to every home, and the dealer should impress his customers that the peace and happiness of the entire household depend upon the kitchen stove or range, for it is said "the way to the average man's heart is through his stomach."

DIFFICULTY OF KEEPING POSTED.

Living as we do in such a progressive age, and with manufactures of stoves keeping up with, and in many instances ahead of the procession, it seems hard for the ordinary hardwareman to keep thoroughly posted on round flues, square flues, hot or cold blasts; slide drafts, down drafts or screw drafts: simplex or duplex; base burner, air-tight or sixty-hour heater.

The relation of the manufacturer to retailer has been, up to a few years ago, pleasant and profitable; but as conditions have changed, certain rules have been adopted by the manufacturers, which have caused some little murmurings of discontent from the retailer; the latter holding that he is compelled to stand the brunt of all complaints and losses. Owing to severe competition in his special district, he is not getting profit enough for the amount of work necessary to conduct his business; caused to claim damage for breakage from transportation companies; compelled to meet price on same make of stoves sold by cross-road groceryman, who does not carry a line of goods on his floor, but simply sells from catalogue. The department store, likewise, of late makes his business life troublesome. Personally, I can say that some of these grievances could be amicably settled if we, as retailers, would keep up with the times.

UNPLEASANT FEATURES.

Permit me, if you please, to enumerate a few of the pleasant and unpleasant features of handling stoves. How pleasant it is, after having driven some 10 or 12 miles in the country, especially on a cold day, to look after a sick stove (one that the good housewife claims will not bake on the bottom, can't do a measly thing with it, is thoroughly disgusted and makes her complaint in such tones that every customer in the store has heard her, says she has tried and tried to bake and she won't try again), to find when you look at the job of setting up this stove that the pipe is too far in the flue, or that the chimney is too low; open grate in the same flue, or the good lady did not know that the damper should be turned up for baking. Then it is that you wonder whether some people have any sense.

Now that gas ranges are being used extensively it is advisable to not only inform your customer that the pilot is for lighting the oven burners, and that it is practically useless to light burners by holding a match in the air mixer. And we often find that the reason Mrs. Brown's stove does not work satisfactorily is because she wants a range like her next door neighbor. Another very pleasing incident is to have a customer bring back to you a bundle of castings that will not fit his stove, simply because he gave you the wrong number. But then a stove is such a simple proposition, and should work anywhere, consequently the dealer should be content, always be courteous, for he will undoubtedly receive his reward in the bright hereafter.

CANADA'S FOREIGN TRADE IN STOVES.

THE foreign stove trade of the Dominion is so far only a small one. Taking both exports and imports together it was only $137,684 in 1901. But it is growing, particularly in regard to exports, which last year were 120 per cent. larger than the preceding year. The exports during the past five years were as follows:

EXPORTS OF STOVES.

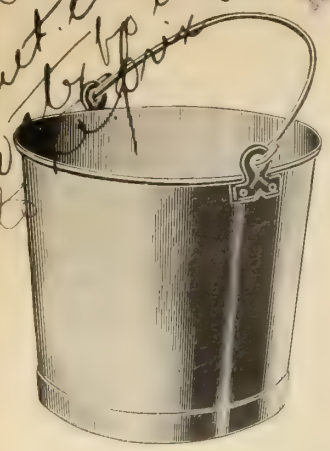
1897	$3,816
1898	4,660
1899	4,253
1900	3,594
1901	8,908

The countries to which we exported stoves during the past two years and the value sent to each during 1900 and 1901 were as follows:

COUNTRIES TO WHICH EXPORTED.

	1900.	1901.
Great Britain	$ 74	$2,066
Australia	143	156
British West Indies	333	496
Newfoundland	1,019	2,449
Cuba	55	.....
France	218	.....
St. Pierre	857	989
United States	895	2,752
	$3,594	$8,908

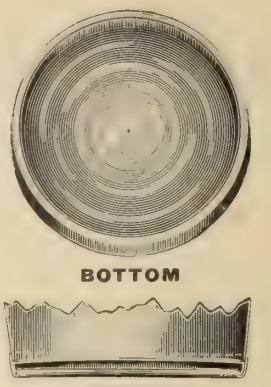
The imports of stoves during the past five years were as follows:



IMPORTS OF STOVES.

1897	$ 67,482
1898	88,770
1899	126,944
1900	129,864
1901	128,776

Nearly all the stoves we import came from the United States, as will be seen from a glance at the following table:



COUNTRIES WHENCE IMPORTED.

Great Britain	$ 420	$ 365
Austria	3	.....
France	.....	60
Germany	327	929
Norway and Sweden	.....	394
United States	129,114	127,035
Japan	.....	2
Total	$129,864	$128,776

Over 50 Years of Stove Building Success

While the season of nineteen hundred and one has been the greatest in our experience, we must do more in 1902. With our increased facilities for the manufacture of goods for the ensuing year, we will be in a better position than ever to take care of our numerous customers and their business.

The **NEW LINES** which we are preparing for the coming season, together with those so well and favorably known, will enable our agents to be in the front rank, with not only standard lines but with quick-selling up-to-date specialties, which are the money-makers and command the business.

GIVE INSTRUCTIONS TO PURCHASERS OF STOVES.

By an Observer.

STOVE and furnace dealers would be saved time and unpleasantness if more pains were taken to properly instruct their customers in regard to the management and care of same.

There are a great many people, who, notwithstanding years of experience, do not appear to possess the knack of properly looking after a stove. Some of them possibly never will learn, no matter what pains may be taken to teach them. But the great majority of people are teachable.

Printed instructions are all right as far as they go. And every stove and furnace sold should be accompanied with printed instructions. But the dealer should not depend alone upon these. There are some people who never read instructions, while there are others who seem to be too dense to understand them when they do read them. It is all very well to say that such people do not deserve to be instructed. But it must not be forgotten that, while they dwell in ignorance regarding the proper care of a stove or a furnace, the reputation of such stove or furnace is in danger of suffering. It is this that should be the concern of the manufacturer or dealer, and it is this that means should be taken to prevent. In addition to printed instructions, there should, therefore, be both verbal and ocular instructions. By ocular instructions, I, of course, mean teaching by actual demonstration, "how to do it."

It was only the other day that was demonstrated to me the necessity of proper instruction being given to purchasers of stoves and furnaces. A friend of mine had purchased a small heating stove. The man who was sent by the dealer to put it up left not a word of instruction in regard to dampers or anything else. He just put up the stove, and, no doubt, considered his duty ended there.

Shortly after he left fire was kindled in the stove. And then there was consternation. Smoke poured from the stove in volumes, and soon several rooms in the house were filled with it. And although the day was cold, doors and windows had to be opened in order to make the house habitable. Each experiment met with a like result. The good housewife looked for dampers, but found none. And finally in disgust gave up the attempt to kindle a fire.

Just at this stage I called, and forthwith was consulted. The stove was a make I never remember having seen before. I examined it carefully, but for some time without any result. But, just as I too had given up in despair, I by mere chance discovered the handle of the damper in a little dark out-of-way recess of the stove.

"Well, I never would have thought of looking there for the damper," remarked the purchaser.

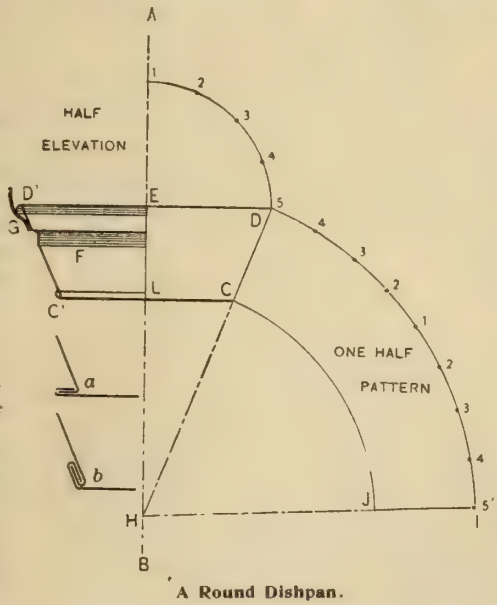
"Nor I, either," I added.

The next attempt to kindle the fire was successful. And the stove that promised to be a source of discomfort turned out to be a source of much comfort. But with very little thanks to the forethought of the dealer, however.

TWO USEFUL PATTERNS.

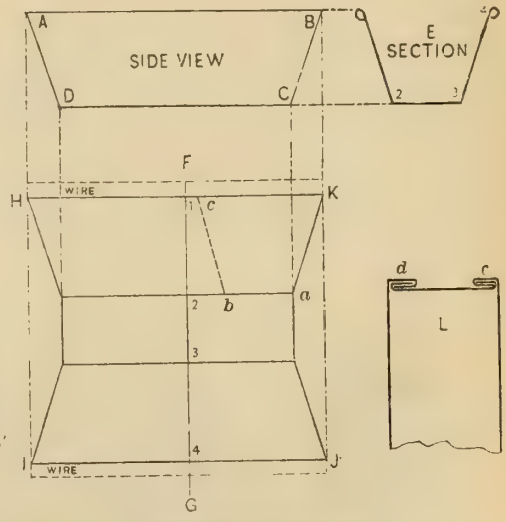
THE accompanying diagrams of patterns are from recent issues of The Metal Worker, and will doubtless prove of interest to some of the readers of Hardware and Metal. The first illustration shows a pattern for

A ROUND DISHPAN



without allowance for laps, which can be made in two or more pieces of I C or I X tin with grooved seams. First draw any line, as A B, upon which place the height of the pan, as E L. From E and L at right angles to A B draw the lines E D and L C to their required dimensions, and draw the line D C, which extends as shown, until it meets the centre line at H. Then with H as centre and radii equal to H C and H D, draw the arcs C J and D I respectively. Now, with E as centre and E D as radius describe the quarter circle D 1, which divide into equal spaces, as shown by the small figures 1 to 5. Set the dividers equal to one of these spaces, and starting at D step off twice the amount of spaces contained in the quarter circle E 1 5, as shown by the small figures 5 to 1 to 5′ on the arc D I. From 5′ draw line to the centre H, intersecting the inner curve J C at J. Then will C D J I be the one-half pattern for the dish-pan.

The bottom to the pan is double seamed. The first operation is shown by *a*, the second and final operation by *b*, D¹ E L C¹ shows a half elevation of the finished pan. Using the small beader, a bead is placed as at F. Tinned iron handles are riveted in position, as at G, and a wired edge is made at the top.



PATTERN FOR A BREAD PAN.

The second illustration shows a pattern for bread pan without allowance for laps. This pan can be made of tinplate or sheet iron, and can be bent over the hatchet stake if no brake is at hand. The top edge is wired, and the ends double seamed. Let A B C D, in the illustration, be the side view of such a bread pan, having equal flare on four sides, and E the section, showing the amount of material required for the body of the pan, as indicated by the small figures 1, 2, 3 and 4. For the pattern draw any line, as F G, at right angles to D C, upon which place the stretchout of the section E, as shown by the small figures 1 to 4 on F G. Through these small figures and at right angles to F G draw lines, as shown, which intersect with lines drawn from similar points in side view, as shown. Trace a line through intersections thus obtained, as shown by H I J K, which will be the pattern for the body of the pan. As the flare of the pan is equal throughout, as before mentioned, then for the pattern for the end pieces simply take the distance 3 to 2 in section and place it, as shown, from *a* to *b* in pattern, and the distance 4 to 1 in section and place it from K to *c* in pattern. Connect these points, when K *a b c* will be the pattern for ends. Allowance for wire is shown by the dotted line. Diagram L shows the method of double seaming the ends or heads to the body, as at *d* and *e*, showing that single edges must be allowed to the ends and double edges to the body of the pan Wire rings can be riveted to the ends desired.

TWO USEFUL ARTICLES.

A Round Dishpan.

Pattern for a Bread Pan.

WHAT SHOULD A TINSMITH KNOW?

IN answer to the question, "What should a tinsmith know?" a writer in The Metal Worker, who signs himself W. A. F., says:

"As a first requisite the average employer wants a young man; next, he must have had a certain number of years' experience in each of from three to a dozen different trades. How any man can yet remain young after such an expenditure of time is an unsolved mystery, but the tinsmith is expected to do it, along with other things almost as difficult. If a young man is unusually bright, and has the opportunity, he may be able to acquire a good working knowledge of more than one trade, but life is too short for the average man to become proficient in more than one. It is proverbial that "jack-of-all-trades is master of none." Versatility may have its uses, but the versatile man is not the one usually selected for special work.

What a tinsmith should know depends very much upon where he is located. If in the country, he will have to do more or less work, which in cities and large towns falls to the lot of the plumber, the steamfitter and other mechanics. But no matter where located, an "all-round tinsmith," as the advertisements generally read, means just what it says. He is expected to do any and every thing that comes along. What he really should know is his own trade first. That is, he should be able to cut patterns, and make up almost anything that can be made of tin or sheet metal. After that, if he has the opportunity to acquire a smattering of other trades it is, of course, to his advantage to do so. But it is not reasonable to expect him to be an expert in more than one."

THE LABOR ON STOVEPIPES.

Some curious statistics on the amount of human energy expended in the manufacture of stovepipe were recently given to a paper in the United States by an expert sheet metal worker. "Few realize," said he, "the amount of work required to make one joint of stovepipe. I have figured the amount out about this way:

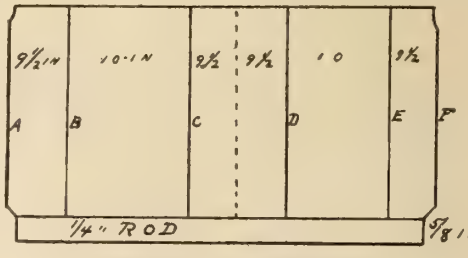
"The first thing the sheet of iron is unloaded on our back walk, put on the elevator, hoisted to the third floor, unpacked and put on the cutting bench. Then it requires two motions of the feet and four more of the arms to cut each joint, four motions of the arms to edge, eight revolutions of the crank to form it, four of the arms to feed the rollers, six motions to operate the grooving machine, four motions of the arms and six strokes of the hammer to rivet it; four motions of the arms and four revolutions of the crimper crank, six more to join two joints together (to see if they will fit) and four more motions to put them on the shelf.

"Thus there are 56 motions required for each and every joint. Our yearly output for each fall is about 20,000 joints, which represents 1,120,000 motions of the human body. A joint of 6-inch pipe is 20 inches wide, 24 inches long and contains 280 square inches, consequently the output of 20,000 joints requires 5,600,000 square inches of steel surface."

TWO QUESTIONS REGARDING STOVES.

During the recent convention of the Wisconsin Retail Hardware Association two questions were produced from the question box in regard to the stove trade.

One was: "Is it advisable in towns of less than 1,000 population to push the sale of hot air furnaces instead of heating stoves?"



The advice given by those who had experience was that if a merchant does not have in his employ a first-class tinner who can put in a furnace, he is better off without the furnace business. A ripple of laughter was caused by a member who stated that in handling furnaces "You get old stoves for your profit."

The other was: "Why are retailers pledged to carry freight on stoves until the invoices are paid?"

This question was explained as relating to cases in which manufacturers assume freight. It was answered that freight is cash and must be paid. Those who buy on credit cannot expect manufacturers to pay their freight. In such cases a cash discount is deducted from the full amount, not deducting the freight.

COPPER WASH BOILER.

A correspondent of the American Artisan recently furnished that journal with a pattern for making a copper No. 9 wash boiler from a copper sheet 5 ft. long and 14 in. wide. His instructions were as follows: With sheet laid on bench, trimmed side up, cut off from length 1½ in., and from

Pattern for No. 9 Wash Boiler.

each side of centre of sheet lay off 9½ in.; also from each end, 9½ in., which leaves 10 in. on each side "approximate." (See illustration). Notch corners of sheet for boiler rod and bottom seam, next turn lock on ends, same as you would for ordinary tinware. Turn down ⅝ in. on bench for ¼ in. boiler rod, and wire same with wireing machine.

To form "Perfect boiler": First, cut out bottom 22¾ in. long, 12½ in. wide, and burr up; now cut a piece of wagon box iron ⅞ in. wide, in length to correspond with the distance from A to B; form in rollers, turning bevel sides of iron inside, shape to fit inside of burr of boiler bottom, forming one-half of one end. Cut another piece, and form from C to D, forming entire end. Now adjust rollers and start boiler sheet and form, placing form on top of sheet, care being taken not to set roller so tight as to cut copper, and roll both from F to E; remove form and slide sheet through rollers to D, and on line D place next form and roll to C, then finish with first form from B to A It is a good plan to start ends of sheet with mallet before rolling.

With a little practice you will be able to form a perfect boiler, and in less time than any other method I know of. This plan can be used on any size of boilers, tin or copper.

Swedge with O. G. swedge, but not too deep, and finish to suit your taste. This size boiler will take the pressed covers O K.

THE "SUN" HEATER.

PROBABLY no stove attracted more attention during last season than the "Sun" heater, the improvements which had been made in it by the patentees having much improved its already excellent heating properties. As those in the trade are aware, the "Sun" is a down-draft heater. During the past winter, HARDWARE AND METAL has met with a number of people who use the heater, and all spoke most highly in its commendation.

The great heat which this stove gives out, in comparison with the quantity of fuel used, is due to the fact that the deflecting-plate extends from side to side, completely around and above the back of the fire-pot, leaving just sufficient space at each side between it and the jacket for the escape of smoke, thus causing the heat from the burning fuel to pass around the upper portion of the hot-air tubes, and against the body of the stove. The result is that there is not a cold spot in the whole stove And even a few sheets of paper will cause the heater to become hot. Through the feed which is attached, a continuous fire may be kept up during cold weather.

TINS FOR FRUITS, MEATS, ETC.

James A. McGolpin, manufacturer of tinware, Toronto, has removed his plant to more commodious premises at 156 to 162 Duke street, Toronto. He has also added improved machinery and otherwise increased the facilities of his factory, being now in a position to supply the trade with fruit, meat and oil cans, lard pails, baking powder tins, etc., etc. The move has been necessitated by a largely increasing business.

THE WISE MAN.

The wisest advertiser is the most patient and philosophic one, says Printers' Ink. He has discounted results before starting. He neither expects returns too soon nor too large, but having mapped out his campaign, does not vary his course until he has given his advertising every chance.

BUSINESS MEN IN THE PUBLIC EYE.

MR. JAMES ROSS.

ONE of Canada's business men who can always be depended upon to look, first of all, after the interests of the country, is Mr. James Ross, who is to be the next president of the Dominion Iron and Steel Company, and who is now its vice-president and able managing director. In arousing Canadian monied men to a sense of their duty and also to a realization of their own interests in investing in domestic enterprises, Mr. Ross has done a good deal, both directly and by his own example.

Canada is a good place for Scotchmen. This is apparent by the numbers of them who have made big names and big moneys here; and to say that the subject of this sketch is one of the most successful of Scotch-Canadians is to say a great deal, but to say it truly.

Mr. Ross is by profession a civil engineer, having received his training in Scotland, where, before coming to Canada, he held several responsible positions in railway and harbor works. He was employed in various works in this country also, but his first great prominence came with the construction of the Canadian Pacific Railway, when, in the difficult passes through the Selkirk and Rocky Mountains, he displayed an engineering ability that brought him an enviable reputation. Since then he has been connected with a number of street railways in Canadian cities, and those of Montreal, Toronto, St. John and Winnipeg owe much of their success to Mr. Ross' energy and ability. He has by no means confined his attention to Canadian enterprises alone. Together with Mr. William Mackenzie, he acquired the tramway of Birmingham, England, intending to make it an electric system; and these two gentlemen are now building electric railways in Jamaica, having obtained a charter from the Government of that island. In Argentina and Chili Mr. Ross has an option of constructing railways amounting to more than $20,000,000. Apart from works of this kind, different institutions in Canada have claimed his attention. He is on the board of the Bank of Montreal; a director of the Canada Life Insurance Company; a governor of McGill University, and a governor of the Royal Victoria Hospital, Montreal.

Besides his many pronounced traits of character—for it need not be said that with so much force, ability, success and Scotch, Mr. Ross has much individuality—one of his strong points is his Canadianism, and this, notwithstanding that he is Scotch by birth and lived in his native land for years after attaining manhood. The changes in the management of the Dominion Coal Co. and the Dominion Iron and Steel Co. are, no doubt, partly owing to this feature in his make-up.

MR. JAMES ROSS, MONTREAL.

They afford an example of the interest he has always shown in nationalizing our industries, and bringing the huge enterprises he is connected with, as much as possible, into Canadian hands.

MR. J. R. BOOTH.

We are very well accustomed, when looking over a sketch of a prominent Canadian business man, to read, "he came to Canada in such a year." It is a decided relief, then, to come upon a gentleman in the front rank of our commercial affairs, and find that there was no need for him to come to Canada, he having been so fortunate as to have been born here.

Such a man is Mr. John R. Booth, "The Lumber King of Canada," as he has often been called. To become a lumber king requires the same methods of procedure as to become a merchant prince. The formula is, "Mind your own business." Mr. Booth had this by heart when he went to Ottawa from his birthplace, Waterloo, Quebec, in 1857, being 31 years of age.

The first thing he did in Ottawa was to see that everybody else had missed a big opportunity in making use of the power from the Chaudiere Falls. He erected there a modest little sawmill, which was the beginning of the present immense plant, the largest in that great lumber centre. Several times fires, more or less disastrous, occurred in the mills and about the yards, and it was thought advisable to reduce the extent of the works. In the great fire in Hull and Ottawa two years ago, the Booth mills alone escaped damage.

To convey some idea of the extent to which the business grew, it may be said that at one time Mr. Booth controlled more than 1,000 square miles of timber limits, from which the annual cut was about 25,000,000 feet of lumber.

Mr. Booth was the virtual owner of the Canada Atlantic Railway, which he began building in 1881. When the road was continued to Parry Harbor he constructed splendid terminal facilities at that place. The sale of this road a few weeks ago to the Vanderbilt interests caused Mr. Booth to loom up in the public eye larger, perhaps, than before. At any rate, the public began to talk about him with added interest.

Other enterprises have owed their inception and success to him, and all these are Canadian. He is a practical patriot, and has several times shown his faith in this country by undertaking important projects into which other capitalists did not care to venture.

That all of these have resulted successfully speaks well for Mr. Booth's judgment and management.

Mr. Booth has been the centre of business enterprise in the Ottawa Valley; and in nothing was his courage and business foresight more strikingly exhibited than in his undertaking the building of the Canada Atlantic Railway, already becoming one of the great routes for bringing the grain of the West to the Atlantic seaboard. Although he has passed the allotted three score and ten, it is to be hoped he will be spared many years to lend his counsel and expend his energy in developing the industrial life of the Dominion.

A cut of Mr. Booth will be found on page 88 of this issue.

FISHING TACKLE for Hardware Dealers

Our stock of fishing tackle is admittedly the finest in Canada, our range the most complete. Fishing tackle shows you 100 per cent. profit if you buy right. LITTLE IDEAS WHICH HAVE MADE MEN RICH.

TRAMPING through Reading, with his pack on his back, John Venner, according to an English paper, stopped at a little baker's shop to buy a penny roll, all he could afford for his evening meal. He got outside the town, sat down, and began to eat his humble supper.

Suddenly his teeth struck something hard. It was a sixpence, which had by some accident fallen into the dough while it was being mixed. After a moment's rejoicing at his good luck, a happy thought struck Venner. Why not advertise rolls with coins in them, or, better still, packets of sweets with prizes in the shape of money in every tenth or twentieth packet?

Venner kept the idea to himself, and as soon as he could save a few shillings out of the slender profits of his trade as pedlar he bought a pound or two of sweets, put them up in penny packages, and concealed a small coin in several of the packets. The scheme caught on like wildfire, and in a few days the man was obliged to hire an assistant to help to put up the sweets. That was 42 years ago, but when the prize-packet pedlar died in 1878 he left a fortune of over $70,000.

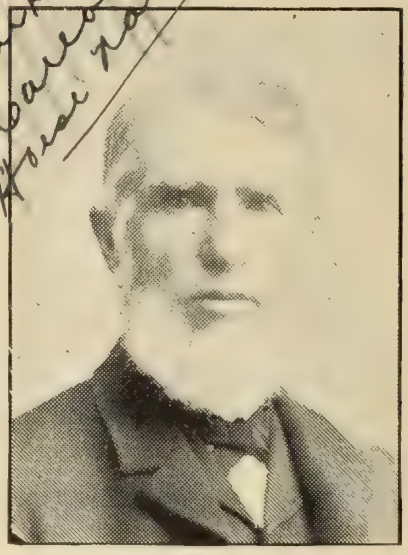
Loafing in the sunshine on the cliffs seems at first sight to be hardly a profitable occupation. But an afternoon on the short turf of the rocks near the Lizard put into Alfred Weston's head an idea which is bringing him to-day thousands a year.

It was a very calm day, and as Weston lay there, gazing into the deep water below the cliff, he became aware that he could see right down through the glassy surface to the seaweed-covered rocks fathoms below. He could even make out the broken timbers of an old

WRECK THIRTY FEET BENEATH

the water. "If," he thought, "I can see to the bottom of 30 feet from a height of 150 feet, I can see much deeper from a height of 1,000 feet."

Weston immediately began experiments, in company with a friend who was interested in ballooning. These were so successful that the two are now directors of the Great Lakes Salvage Co., which is at work on Lakes Erie and Superior, locating wrecks of coal and grain boats. Their last achievement was the winning of the $25,000 reward offered by the millionaire Dixon Robey for the recovery of the bodies of his two sons, who went down five miles from shore in the yacht "Sunrise."



Mr. John Cook, founder of the great firm which bears his name, began life in a printing office. He owed his great fortune, and Cook's Tourist Agency its beginning, to a happy thought which came into his head one day during the Great Exposition of 1851. He was then only 17; and his father, who was a temperance lecturer, was very busy organizing excursions from his home in Derby to the Exposition.

"Why not try other towns

AS WELL AS DERBY?

thought young Cook. And why should not the mill-hands see the wonders of London? The thing was to capture them while they still had their wages in their pockets.

On the following Saturday young Cook appeared in Leicester with an empty excursion train. Meantime, his agents were parading the town with a brass band and a number of empty vans. The mill-hands, just leaving work, were caught by this novel attraction; and before the Exposition was over Cook had helped to convey no fewer than 165,000 visitors from the Midlands to the Exposition.

MR. J. R. BOOTH.

Many people have made fortunes from newspapers, but no one, probably, in so curious a fashion as Mr. Francis Allen, a London solicitor. This gentleman had to wait half an hour for his train at Shrubhill Station, Worcester, so strolled into the waiting-room, and picked up a half-sheet of newspaper which lay upon the table.

He began reading an account of a cyclone in America. The wind was so furious, said the writer, that planks from the boardwalks were driven through the houses, and chickens were found stripped of their feathers.

"What a delightfully easy way of plucking chickens!" thought Mr. Allen, who, during a recent fishing trip in Wales, had been obliged to help once or twice in preparing a pullet for table. He went on to consider that it would be possible to get a tremendous current of air from electric fans. The project was found to be perfectly feasible, and many large firms are now paying royalties on the

CYCLONE CHICKEN PLUCKER.

It was the simple operation of filling a fountain-pen that gave Mr. Theodore Gilyard the idea of the pneumatic painter. He sprayed the remainder of the ink from the fine-pointed nozzle on to a piece of white paper, and the thought occurred to him how much more rapidly paint could be spread by air than by a brush. The machine which grew from this notion was a steel tank, connected with a reservoir of compressed air.

The tank is filled with paint of the consistency of cream, and when a valve is opened the air forces this through a flat nozzle. Houses, fences, and railway-trucks can thus be painted at nearly five times the rate that the best brush-painter can accomplish; and Mr. Gilyard, who three years ago was a clerk in a city office at $15 a week, is now receiving an income of $20,000 a year.

EXPERT AWNING MAKERS.

The Windsor Awning and Tent Co., Windsor, Ont., is a branch of an old firm that has over a quarter of a century's standing in Detroit, Mich., who are considered experts in everything they undertake to do. They have fitted out a large majority of the steamers and sailing vessels built on fresh water, and also have fitted out very large camps with tents; hotels with window awnings; and the finest stores in Detroit with the most complicated kind of awnings and fixtures. It is an acquisition for Windsor to have a branch in this line started by such reliable people, who can save their customers money and guarantee the best of satisfaction.

FROM A NEW ONTARIO HARDWAREMAN.

Sam. D. Eplett, who has been carrying on a hardware business at Coldwater, has sold out and removed to New Liskeard City, New Ontario.

In a letter to HARDWARE AND METAL, Mr. Eplett says: "This town is growing very rapidly. We have a most beautiful country lying north of us, and there will be a great rush here in the near future. There have been some very valuable finds of copper, nickel and gold, which will surpass any yet discovered. The new line, which is to run from North Bay to James' Bay, has been surveyed through to this town, and work begins early in the spring to build the road."

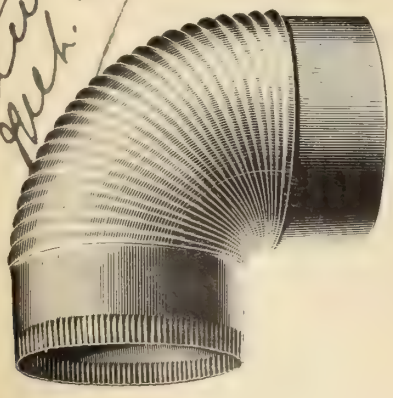
"Cornwall" Steel Range



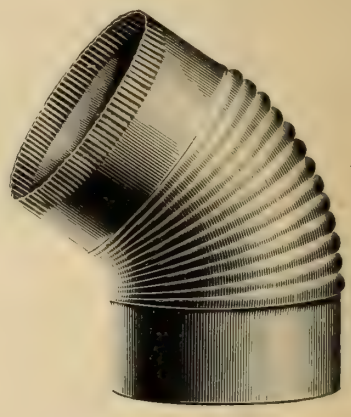
The accompanying illustration is a good reproduction of our leading steel range, the "Cornwall."

Last year these ranges were considered by the trade to be the most handsome and up-to-date line on the market, and this, in conjunction with extensive advertising in the newspapers, placed the "Cornwall" in the happy position of being the best known and most talked of range in Canada.

We intend to advertise it liberally again this year, and those of our customers who keep a sample in their showroom will reap the benefit of all this publicity. No other steel range is advertised to any extent in Canada.

This year we have added a hearth-plate (see cut), which is a very useful attachment and greatly adds to the appearance of the range.

We will be pleased to supply our customers with illustrated advertising matter free.



Our New Elbow

Decidedly the Strongest and Neatest One-piece Elbow on the Market.

The elbow seam is grooved and is therefore much firmer than a lapped joint elbow, and there can be no variation in size.

Our travellers are now carrying a sample of this elbow, and will be pleased to explain it to you in detail.

"Everything for

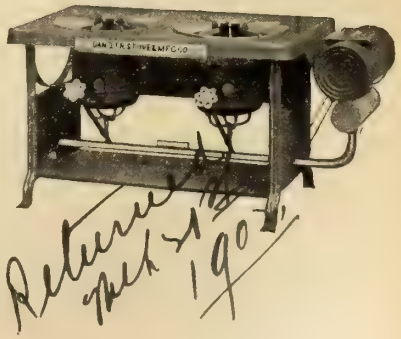
WITH RESERVOIR, HIGH CLOSET AND HOT WATER BOILER.

"Famous Active" Range

The "Famous Active" Range is well known to the trade and requires very little comment here.

Like our "Cornwall" it has been well advertised throughout the Dominion, and now holds the undisputed leadership among the cast-iron ranges on the Canadian market, which was clearly demonstrated last year by the scores of orders which we were obliged to cancel, owing to our incapacity to build the ranges fast enough.

However, we will not be obliged to cancel any orders this year, having purchased the Copp Foundry, in Hamilton, which we are now operating to its full capacity.



We will be pleased to send advertising matter free to any of our customers who require a supply.

"Dangler" Wickless Oil Cooking Stoves

The new No. 431 series of these stoves is absolutely the best oil-stove made.

They are the cheapest, safest, easiest to keep clean, and simplest to work of any oil stove we know of.

They also have a very strong flame.

the Tinshop."

CORDAGE AND ITS METHOD OF MANUFACTURE.

N a comprehensive sense, recently remarked Scientific American, the word "cordage" may be said to include all sizes and varieties of the article, from binder twine to a cable 16 in. in circumference, but, strictly speaking, the term is hardly applicable to a rope less than half an inch in diameter.

The materials employed for rope-making are various, embracing hemp, flax, manila, sisal, jute and other vegetable fibres. Sisal from Yucatan and East Indian jute are largely used for the manufacture of cheaper grades of rope and for binder twine. Russian and American hemp are preferred for standing rigging, owing to their ability to absorb a great amount of tar. Manila hemp is more extensively used in the manufacture of cordage than any other material, as its great pliancy and strength adapt it to a multitude of uses.

MANILA HEMP

is obtained from a species of wild plantain belonging to the banana family and is a native of the Philippine Islands. Its stem has a height of from 15 to 20 feet, is of a dark green color and very smooth on the surface. The fibre is round, silky looking, white and lustrous, easily separated, stiff and very tenacious, and also very light. These fibres, although in themselves not very large, are composed of very fine and much elongated bast-cells. The length of the cells is about a quarter of an inch, and they are not, as commonly supposed, held together by an intercellular tissue or mucilaginous substance. The characteristic roughness possessed by Manila fibre is due entirely to mechanical causes, such as, for instance, the laceration of a cell in the separation for the leaf-stalk, or the subsequent opening out of the ends of the cells. While the fibres are weak transversely, they have great strength in the direction of their length. The tensile strength of manila fibres will average over 30,000 pounds per square inch of section. The plantain is cut near the roots when from 2 to 4 years old, and the leaves cut off just below their expansion. The outer leaf is then stripped off, and the fibrous coats are left for a day or two in the shade to dry and then divided lengthwise into strips 3 inches wide. They are then scraped by an instrument made of bamboo until only the fibres remain. Bundles of fibres are shaken into separate threads, after which they are washed, dried and separated according to quality and shipped in bales. From 150 to 200 trees are required to produce 140 lb. of fibre.

SISAL HEMP

is the product of the agave, a large genus of fleshy-leaved plants found chiefly in Mexico and Yucatan. The fibre is yellowish white, straight, smooth and clean, and is about 25 per cent. weaker than manila fibre. Much of the sisal hemp is prepared for export by machinery. Its consumption is fully as large as that of manila, and it is chiefly used for binder twine.

When the fibre reaches the mill, its preliminary treatment is practically the same whether it be manila or sisal. A description of one will therefore answer for the other.

THE MANUFACTURING PROCESS.

The bales of manila hemp average about 270 lb. each, and after the material has been lightly shaken apart it is placed in layers, which are sprinkled lightly with oil to soften and lubricate the fibres previous to their passage through the machinery. The first mechanical operation consists in passing the hemp over roughing cylinders bristling with sharp steel prongs, or teeth, which straighten out the fibres and remove the tow and fine broken particles, dirt or other foreign substances. It then passes to the breakers, which are large frames about 25 ft. long, consisting of two endless chains studded with steel pins. The first chain runs slowly and feeds the fibres to the second, which runs much faster, the effect being to comb or straighten out the fibres and draw them into a "sliver," or ribbon. The hemp is then hoisted on elevators to the top of the building. Following this operation comes the passage of the hemp through the spreaders and drawing-frames. These machines are similar to the breakers, but are smaller and furnished with steel pins and teeth of gradually-increasing fineness, which still further comb and straighten out the fibres, a number of slivers being put together behind each machine and drawn down to one sliver again at the end of each machine. This drawing is repeated a number of times with machines of various degrees of fineness, in order to make the sliver even, without which it would be impossible to spin fine, even yarn. The process is completed in a very fine drawing-frame called a "finisher," and from this the material finally emerges in complete readiness for spinning, having been drawn into slivers, or small, soft ribbons, in readiness for the spinning-frames.

From the finisher the sliver is carried on to the spinning jenny, which, as usual, operates two spindles. The small sliver is fed from one of the cans over the endless belt provided with needles, as in the breakers, spreaders and finishers. These needles carrying the fibre move toward a conductor or "nipper" carrying the sliver with it. The sliver is by this time exceedingly small, and is capable of passing through a small hole in the face plate of the nipper, where it is compacted in passing through the orifice. A jaw is controlled by a spring which can be regulated, so as to adjust the size of the feed. At it leaves this part of the machine the twisting begins. The speed is 1,500 revolutions per minute. The yarn is twisted in a direction called right-handed, and feeds through the pulley, passing through the head block and moving the face plate, and, is finally warped around grooved pulleys in order to give the necessary strain to pull the compacted fibres through the nipper. It is then wound upon a bobbin, about 1,000 yards being wound upon it. A special mechanism traverses the bobbin in order that the yarn may be evenly wound. The attendants see that the sliver is regularly supplied and that any accidental breakages in the thread are repaired. The yarn is placed in small cars and sent to the various rope-making departments. If a rope is to be tarred, the yarns are run through the copper tanks filled with heated tar. The yarns enter through holes in an iron plate and are drawn through the tank by machinery. As the yarns emerge, the superfluous tar is removed by means of pressing rollers and the yarn is wound on bobbins. If the yarn is to be used for binder twine, the sisal hemp is spun finer than manila, and, after being spun, the yarn, which is now on bobbins, is carried to the twine balling and packing-room, where the balling machines wind the yarn into balls of proper size.

ROPE-MAKING

is accomplished in various ways and is all done by machinery. The yarn is twisted into strands by means of machines called "formers," and the strands are twisted into rope by means of machines called "layers." If the rope is to be of moderate size, not exceeding 1 in. in diameter, the formers and layers are combined in one machine. The large machines are very impressive on account of their great size and the rapidity with which the finished product is turned out. In the Farmer machine there are many bobbins, which are arranged in three frames, each of which revolves independently around its own axis, and they are all carried around while in motion by a large frame which supports all three smaller frames. The threads from the varions bobbins are passed through apertures in an iron plate, and the motion of each small frame serves to twist the yarn drawn from the bobbins into a strand. The three strands pass upward through a "top" at

the upper portion of the machine. As the strands come together they are twisted to form a rope by the movement of the entire machine carrying the three sets of bobbins, which are each rotating separately. The result is a finished rope. The new rope is rotated around several pulleys in order that the proper pull may be obtained to draw the rope tightly through the "top," and it is then wound on one of the reels. This rope can, of course, be used for any purpose and can be made of large size. For well-drilling and other purposes where rope of great strength but little flexibility is required, cables are used. Cables vary from 1,400 ft. in length up, and usually measure from 1⅞ to 2½ in. in diameter. They are composed of three manila ropes instead of strands, and the ropes are twisted together with a very hard "lay," so that they will not untwist when used for drilling, and so that they will resist wear in the continuous rubbing against the side of the casing and the wall of the wells. Owing to their length and construction, cables are always made on machines and not in ropewalk.

Machines large enough to make cables 15 inches in circumference have been made, and are in use in several factories.

The reel containing the rope that has just been made, is placed on a

CABLE-MAKING MACHINE.

The principle of cable-making is the same as rope-making, only that actual ropes are used instead of strands. Each reel is turned around on a horizontal plane by means of gears, while it is paying out its rope. The entire machine carrying the three reels is turned simultaneously on a horizontal plane; the ropes are roved around various pulleys, and finally as they pass through a "top" at the upper part of the machine they are twisted together to form the cable, and then after being roved around grooved sheaves to obtain the necessary pull are reeled up by a power-reel. When a sufficient length of cable is obtained, it is ready for shipment. There are also large horizontal rope and drilling cable-laying machines in use in various rope factories.

Ropes of considerable size, towing lines and ship's cables of the largest dimensions are usually made on a ropewalk, which is sometimes as long as 1,200 feet.

The yarn is rewound on larger bobbins, and the number used depends on the size of the rope. These bobbins are put on a framework of wood, located near one end of the ropewalk, and the ends of the yarn are passed through holes in an iron gauge-plate, which is known as the face-plate. It then passes through cast-iron tubes, and the yarn is fastened on hooks of the forming machine, which consists of a truck which travels on a track the entire length of the walk. There are as many hooks as there are strands. As the former moves away from the face-plate it draws the yarn with it, and, at the same time, each hook revolves by means of gears, twisting the yarn left-handed into a strand. The machine is actuated by a cable which lies along the floor of the ropewalk. The cable passes over a large wheel at the left, and serves to operate the mechanism which turns the hooks, and, at the same time, winds up a cable attached to the end of a ropewalk, thus making its motion positive. When the forming machine has reached the upper end of the ropewalk, the strands are completed. They are now taken and laid over on the other side of the walk, and are then ready to be "laid," or made into rope. Two laying machines are required, one at each end of the walk, and are known as the "upper" and "lower" machines. They also give the rope what is known as a fore turn and an aft turn. As many of these strands as are required for the rope are stretched to full length, and are attached to hooks on the laying machine. The upper machine has several hooks, but only one is used. All the strands are fastened to this hook, and they turn left-handed in laying, and the lower machine has as many hooks as there are likely to be strands, and operates in the opposite direction. The strands are meantime placed in the grooves of a conical wooden block called a "top," through which is passed an iron bar which is fastened to an upright post of a car called a "top sled." Pieces of rope called "tails" are fastened on the bar and wound round the rope to be laid. They help regulate the lay and assist in giving the rope a finish-gloss. The top having been mitred between the strands as closely as possible to the top, the sled is gradually forced along as the twisting proceeds in a right-handed direction. The lower machine keeps all the strands from untwisting. The top sled finally arrives at the lower end of the walk, with the full length of completed rope behind it. It is then compactly coiled by a reeling machine, covered with burlap, and shipped to its destination.

THE DOVERCOURT TWINE MILLS.

To dealers in twine, rope, netted goods, etc., an advertisement of Hutchinson, Shurley & Derrett, proprietors of the Dovercourt Twine Mills, 1078 Bloor street west, Toronto, on page 95, will be found of interest. This firm are large manufacturers of cotton ropes, jute ropes, clothes lines, plough lines, fish lines, skipping ropes, hammocks, tennis and fly nets, jute, hemp and flax twines, etc. Their factory is equipped with all the latest machinery, and they have for some time enjoyed a reputation for first-class manufacture.

UNINVENTED INVENTIONS.

Every home and workshop teems with profitable suggestions to the man with open eyes and mind, says Frank F. Coleman, in Everbody's Magazine.

The fortunes of Mr. Carnegie, the Rockefellers, the Armours and all their associates were founded on just such observations. The cost of refining kerosine oil is paid to date from the despised sludge acid which used to foul our rivers and harbors. The old waste of the slaughter-houses brings in as much to-day as the flesh of the animals killed.

Nature has waste products still waiting for use. Prairie wire grass was one of these. It is now made into handsome furniture and furnishings. Cornstalk pith is made into fillings for warships' hulls to close water-tight holes made by an enemy.

Find a substitute for the elastic Para rubber and your fortune is made. Celluloid and oxidized linseed oil are fair substitutes for some purposes, but nothing has yet been found that possesses the true elastic properties of rubber from Para. There is still "nothing like leather" for shoes, but the inventor may find a substitute to his profit

WHAT HE ALSO DID.

This was the ready-reckoning genius, says an exchange, who remembered having sold a screwdriver to some one of his ten charge customers who had been in during the day, but, for the life of him, he could not be sure which one it was. Finally a happy thought struck him. He would charge it to each one of them; nine would protest, and the tenth man, being the right one, would pay without a question.

"How did it work?" he was asked.

"Well, there were three of them who kicked, and I crossed it off. But the other seven of them ponied up without a question."

BUYING WHAT THEY MAKE.

It is a singular feature of the iron trade of the world that the best markets, with rare exceptions, are those of the countries that are themselves largely engaged in producing the very goods that they want to purchase and do purchase, on a large scale, declares The London Iron and Coal Trades Review. Continuing, the paper notes that until lately no market was so good as that of the United States, and, despite the high tariff policy of that country, it still imports iron and steel to the value of $12,000,000 a year. But the most singular feature of this manifestation is that the United Kingdom, which is the greatest exporter of iron and steel in nearly every form, is itself a larger importer of these metals than any other country in the world, and Great Britain is followed at not a very great distance by Germany, which is almost as large a producer of pig iron, and an even larger producer of steel France is a considerable way behind Germany, and Belgium is a long way behind France, as an importer of iron and steel goods, which again bears an approximate relation to the extent of the output of these several countries.

RELATION OF JOBBER AND RETAILER.

Importance of the one to the other.

THE question as to the relationship of the jobber and retailer has been again and again discussed, but it is one that never becomes old, and, what is more, is never likely to become so. At a recent convention of retail hardwaremen in Iowa, it was one of the subjects for discussion. The paper which introduced the subject, read in part as follows:

The manufacturer, the jobber, and the retailer are the three factors to be considered in the hardware business.

The manufacturer produces the goods, the jobber introduces the same in the market and the retailer has to dispose of the same by selling the goods to the consumer.

The retailer buys same goods direct of the manufacturer, but gets the greatest number of the hundreds of articles which make up a stock of hardware of the jobber. I have been requested to prepare a paper on the relation of jobber and retailer.

MUTUAL BENEFIT.

The relation is based on mutual benefit. When the jobber sends out his New Year letters to the retailer, he wishes you a splendid trade, and a year of prosperity, but winds up with the hope of a good share of your orders. This is but natural, as we appreciate a customer as long as we are benefited by his trade, so with the jobber. He is ready for business; sends out his agent to call upon you, makes you acquainted with the size and quality of his assortment, his facilities to fill your orders promptly, and gives you his prices. He assures you his prices are right.

MUTUAL RELATIONS.

The best selected wholesale stock is of no special value unless a good number of retailers enlist as regular customers. Likewise depends the retailer on the jobber to replenish his stock. He could not send to the factory for one-twelfth of a dozen of one article, or one-sixth and one-fourth of a dozen of another; he cannot foresee the exact amount of this or that article his trade will require. He depends on the warehouse of the nearest jobber to keep his stock complete. His selection of the wholesaler to buy from depends on distance, railroad connection, completeness of stock, personality of salesman, and, above all, on prices.

I remember the time when prices did not cut such a figure between jobber and retailer. To get the goods was the main object. But times have changed. Prices are the whole thing to-day. Well bought is half sold, is now the motto. A fair competition is wholesome and necessary to enliven trade, but to-day the severe law of nature, the survival of the fittest, seems to be the only rule.

PURCHASES FROM THE MANUFACTURERS.

Some retailers try to overcome the price question independent of the jobber. A few buy in large quantities direct of the manufacturer; others get their supply through the manufacturer's agent. For some goods, both ways are favorable to some extent. I know of a retailer who bought a carload of washing-machines. It took him three years to sell the lot. Another bought one gross of express wagons It will take at least two years to sell the wagons. Buying of the factory direct will tie up more money in the business, because you have to buy in large quantities and have to carry more stock than your trade demands. I could name a number of articles the retailer can get 10, 15 and 20 per cent. cheaper by buying direct of the manufacturer or through the manufacturer's agent, but the majority of retail dealers will depend on the jobber, to buy the goods when needed, and in quantities in proportion to sales.

COMBINATIONS.

A combination of 10 wholesale grocery houses in Iowa and some bordering States with the buyer located in Chicago is a success. The combination of the Steel Trust is a success. A number of retail hardware dealers in Chicago have combined to buy together and command better prices. The aim is the same. Secure better prices. The quantity will more or less dictate prices. Last year I bought over $5,000 worth of goods from one jobber only, and I know such a close relation to one jobber has made me better prices than I could get by buying of the 12 or 15 houses who send travelling men to Marshalltown. Suppose 400 or 500 retail dealers would arrange with one or not over two jobbers to give them all their trade; at an average of $2,000 a year, would give a wholesale trade of $800,000 to $1,000,000. One travelling man would be sufficient to call once in a great while on his friend to show and introduce new goods, new inventions, renew pleasant relations of jobber and retailer.

There was some talk of a jobbers' trust. A jobber with one sure business ought to be able to share his benefits with the retailer and protect himself against unfair competition.

THE QUESTION OF PRICES.

The question of prices is of vital importance to us all, and anyone who knows a remedy should get up and tell us of his ideas. The department store has come to stay, and the catalogue houses will keep on doing business, and the only salvation for the retailer is to meet the competition. A single dealer is powerless. If we spare no effort to help ourselves the other factors in the hardware trade, the jobber and the manufacturer, will be more willing to listen to our resolutions. The jobber is our natural allay. The relation of the jobber and retailer should be cultivated for mutual benefit."

A NEW PAINT FACTORY.

The new factory of Henderson & Potts, proprietors of the Nova Scotia Paint Works, which was opened up in Montreal at the first of the year, has been a very busy place ever since its commencement. The firm has had a warehouse in Montreal for several years, but the rapidly increasing business with Quebec, Ontario and the West necessitated a factory, in addition to that at Halifax, for this trade alone. The new place is at 56 Wellington street, and is one of the most complete factories in the Dominion. Here the very latest mills and machinery may be seen, and all, of course, are brand new. The building has five flats, every one of which is used, including the basement. Besides white lead, liquid paints, putty, etc., the firm manufactures its own dry colors, japans, varnishes and dryers.

A portion of the factory is given over to tinsmithing, for this firm makes all its own tin and sheet-iron cans for the paints, which is done by no other paint factory in Canada.

Henderson & Potts are making a specialty of liquid paints. The demand for these has grown to great proportions during the past few years, and every paint manufacturer who wishes to keep up with the times must go into the manufacture of them. Henderson & Potts claim they have something of an advantage over other manufacturers in the making of liquid paints, in that they alone ean use in the manufacture of them Brandram's Genuine B. B. white lead. It is generally conceded that this white lead is the world's standard of purity, and paint made from it can only be one of the best on the market. As this firm has the sole right in Canada to manufacture this lead it can only be obtained in its "Anchor" brand liquid paints, and the demand for these is likely to rapidly increase.

MONTREAL AND TORONTO, MARCH 22, 1902.

WHEN WRITING ADVERTISERS PLEASE MENTION THAT YOU SAW THEIR ADVERTISEMENT IN THIS PAPER

A LESSON TO EXPORTERS.

THE Canadian commercial agent in Australia, Mr. J. S. Larke, makes a serious complaint against a Canadian furniture manufacturing firm, the name of which, however, is withheld.

It appears that a firm in Sydney on Jannary 29, 1901, cabled an order to a furniture manufacturing company in Canada. It was not, however, till August 22 following that the shipment left New York, whereas under ordinary circumstances the goods should have been in the hands of the purchaser three or four months after the date of the order. One-fifth of the money for the goods was paid on or about the date of shipment, and a draft for the other four-fifths was duly honored by the Sydney firm before the furniture arrived at destination. By the time the shipment reached Sydney the new Customs tariff had come into force and the purchaser had to pay duty at the rate of 20 per cent. and 10 per cent. added to the invoice as well, all of which would have been avoided had the goods been shipped within the ordinary time.

But, this was not all, for when the shipment arrived it was found that the furniture was not such as the sample called for. The chairs, for example, were deficient in a cross-bar, and were, in consequence, weaker than the description called for in the order. This deficiency caused the people to whom the importer had sold the goods to refuse to accept them. This, of course, meant additional loss to the importer. And, naturally, he is not disposed to place any more orders with Canadian furniture mauufacturers

The furniture import trade of Australia is one that is growing rapidly, and, therefore, is worth cultivating. We have not the figures giving the imports into all the States of the Commonwealth, but those for New South Wales, Queensland and Victoria aggregated over $1,000,000 in 1900. This is an increase of over 100 per cent. in five years. The imports of these three States during the five years ending 1900 were as follows:

FURNITURE IMPORTS OF THREE STATES.

	1896.	1897.	1898.	1899.	1900.
New South Wales.....	$297,879	$350,979	$401,188	$493,636	$550,814
Queensland.....	108,011	136,461	181,648	233,298	250,599
Victoria	85,721	109,217	124,061	158,497	278,826
Total.....	$491,611	$596,657	$506,897	$885,431	$1,080,239

Canada exports a great deal more furniture to Australia than she did in 1896, when only $187 worth was shipped; but a perusal of the figures appertaining to the trade since then do not give one much cause for gratification, for the simple reason that the trade of 1901 was half that of 1900, and nearly $3,000 less than that of 1898 and 1899. And this dissatisfaction grows upon one when one compares these figures with those relating to the imports of furniture by the three States to which we have already referred.

The following are the exports of Canadian furniture to Australia during the last six years:

OUR FURNITURE EXPORTS TO AUSTRALIA.

1896.....	$ 187
1897.....	7,921
1898.....	23,069
1899.....	23,095
1900.....	44,065
1901.....	20,352

While the subject under discussion chiefly concerns the furniture manufacturers of this country, it does not wholly. Every manufacturer who exports to Australia or any other country is concerned, or at least should be.

Strict attention to instructions, faithful adherence to samples, no unnecessary delay in filling orders, and prompt answering of business communications are essential to the establishing of a successful export trade. It would be better for the general good if those who cannot or will not comply with these essentials were to refrain from trying to do an export trade.

THE MATTER OF DETAILS.

DETAILS are stumbling blocks to many businees men. Someone must look after the details if the business is to be made a success, but that someone is not he who has the ordering of them. A vessel is just as likely to reach its destination without a rudder as a business is to be prosperous while the details are ignored. There are a good many business men who so fully realize this that they can trust no one but themselves with the development of them. Where the business is a one-man business this is all right; but where it is not it is all wrong.

The larger the business the less time has the head of the firm or the head of a department for detail work. His duty is to direct, not to work out the details. His duty is to prepare plans, not to carry them out. The captain of a vessel does not obey his own commands. Neither does the successful captain of industry.

The demands of business to-day are such that there must be someone to think and plan. Those who undertake to develop the details, as well as to plan them, can do neither well. It is thus that they became stumbling blocks in the way of their own business.

The successful captains of industry are the men who plan enterprises and leave the working out of details to others. One has only to recall to mind the men who are to-day famous in the commercial world to be convinced of that. It is an art. And to practice it requires about as much thought and planning as does the devising of the schemes themselves.

CANADA'S IRON AND STEEL TRADE AS REFLECTED IN THE EXPORTS.

WHILE building our hopes for the future in regard to those industries which are covered by the general classification of "metals and minerals and manufactures of," the most of us probably forget the development which has taken place therein during the past few years.

As reflected in the export trade this development is something enormous, showing in the five years ending June 30, 1901, an increase of over 360 per cent. It is true that this increase is chiefly in the precious metals; but that does not alter the fact that it represents so much enhanced wealth. We do not give our gold and silver away. We sell them, just as we do our coal, our lumber and our wheat.

The grand total of the exports of "metals and minerals and manufacturesof," the product of the home industries alone, was, in 1901, $37,986,242, while in 1897 the total was only $8,996,734.

As we have already said, this increase was chiefly in the precious metals. For example, in 1897 we exported of "gold-bearing quartz, nuggets, etc.," $2,804,101 worth, while last year the figures had increased to $24,445,156.

It has time and again been said that the commercial greatness of a country is proportionate to the extent and value of its iron and steel trades. Whether we are all prepared to accept this dictum or not matters not. But we must all conclude that the export trade in "iron and steel and manufactures of" indicates, if we had no other source of information, that the iron and steel industry of this country is making substantial and satisfactory progress. At least, an increase of 183 per cent. in five years would seem to warrant our coming to that conclusion. In 1897 the value of the exports of "iron and steel and manufactures of," the product of the country, was $1,311,809. In 1901 it was $3,717,537.

Space would not allow us to give all the details of the export trade in "iron and steel and manufactures of," but the following table, giving the chief items in 1897 and 1901, will, no doubt, interest our readers:

	1897.	1901.
Agricultural implements	$761,842	$1,742,946
Bicycles	299,664	347,222
Hardware	101,115	109,860
Machines, all kinds, and machinery	181,222	476,262
Pig iron	65,255	117,456
Steel and manufactures of, not classified	38,522	481,868

But, extremely gratifying as are the figures for 1901, those for the present fiscal year are certain to be more so. In the first place, our capacity for turning out "iron and steel and manufactures of" is greater than it was at the beginning of the last fiscal year. The four pig iron furnaces and the four open-hearth steel furnaces of The Dominion Iron and Steel Co., Limited, are now in operation. The Nova Scotia Steel & Coal Co , Limited, is enormously increasing its capacity for the manufacture of iron and steel. At the Algoma Steel Co.'s works, Sault Ste. Marie, Ont., began a month ago the operation of the Bessemer steel plant, which Mr. Clergue a few weeks ago said would be turning out 700 tons of steel rails a day before the end of March. A year or two ago there was only one concern making steel in Canada. That one was the Nova Scotia Steel and Iron Co. Now, there are in addition, the Hamilton Iron and Steel Co., the Algoma Steel Co., and the Dominion Iron and Steel Co.

There are now in Canada 14 blast furnaces, without counting those in course of construction. When those being built are completed the aggregate capacity of the Canadian furnaces will be about 1,100,000 tons a year. The output in 1900 was less than 90,000 tons.

Already the export trade in pig iron is greatly in excess of that for the whole of the last fiscal year. In the latter year, which ended June 30 last, the quantity was 5,623 tons, and the value, as we have already pointed out, $117,456.

For the seven months of the fiscal year ending January 31 last, the quantity was 64,849 tons, and the value, $627,971.

In other words, the value of export trade in pig iron was 441 per cent. larger for the seven months of the present fiscal year than it was for the whole of the 12 months of the fiscal year 1901. This is certainly gratifying.

Substantial quantities of steel have also been exported since January last, the figures regarding which have not yet been made public.

In the beginning of this article it was pointed out that the grand total of the exports under the general classification of "metals and minerals and manufactures of" was $37,986,242 in 1901 against $8,996,734 in 1897, five years before. In the following table is briefly summarized the items which make up the grand total:

Copper, all kinds	$ 550,462	$ 2,659,261
Gold and silver	5,417,274	26,865,906
Iron and steel and manufactures of	1,311,809	3,343,173
Lead ore	524,181	2,517,084
Manufactures of tin	2,764	14,481
Asbestos	510,916	864,573
Nickle	498,515	958,365
Miscellaneous metals	180,813	763,399
Grand total	$8,996,734	$37,986 242

It is nearly 170 years since the first lot of iron was made in Canada. And after all these years the iron and steel industry of this country is at last beginning to assume respectable proportions.

IMPORTS OF RAILWAY MATERIAL.

A good deal of material for railway construction has been imported into Canada from Great Britain and Germany within the past 12 months. One of the reasons for this is, no doubt, the difficulty of getting delivery from the United States, whence the bulk of our importations in this line usually come.

We have not any recent data giving the figures on German account, but British official returns show that the exports of railroad material of all sorts to Canada during the six months ending December 31 last were in value nearly double those of the same period two years ago, the figures being $643,790 and $1,085,982 respectively.

The United States, on the other hand, have sent us a great deal less steel rails during the seven months ending January 31 than any corresponding period in the last three years. The figures from United States official sources are as follows: 1900, $1,651,115; 1901, $2,526,740; 1902, $910,829.

It is in rubbing against competition that the merchant becomes bright and enterprising.

Some Ideas and Devices for the Retail Store.

CARE AND DISPLAY OF RETAIL HARDWARE.*

By H. C. Scofield.

IN the subject assigned to me, "Care, Management and Display of Retail Hardware," I will not presume to tell you how it should be done, but, rather, describe our methods, trusting that some of our ideas may be useful to you, as we expect to carry home some of yours. We consider the opportunity afforded at these meetings of exchanging ideas and comparing experiences well worth all the time and expense attending them.

We will begin with the exterior front. In order to make the first impression a favorable one, the store front should present a neat appearance. We keep ours well painted with a dark greenish-black coach color, the ornamental parts touched with gold leaf, and the whole varnished with a good quality of spar varnish.

SHOW WINDOWS.

We endeavor at all times to keep our show windows attractively dressed, changing the display about once a week. In the arrangement we get valuable aid from the trade publications by cutting out the illustrations and descriptions of window displays. These we paste in a scrap album, using an old catalogue for this purpose, cutting out every other leaf to make room for the extra thickness of the cuts and clippings. We also paste in this book cuts and descriptions of any racks, display stands or devices that we think will ever be of use to us, in whole or in part.

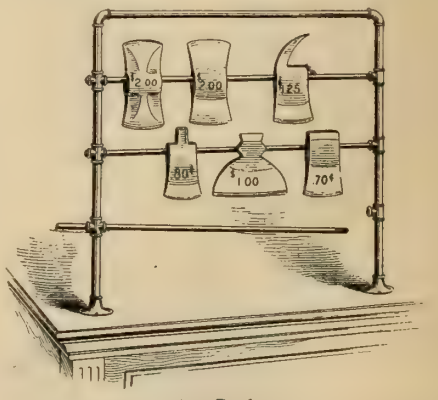
We have an electric plug and switch put in each window, and add to the effects by the use of lights, etc. A red 16-candle-power incandescent light inside of a coal stove gives it the appearance of being in operation. You will find that you can make as attractive displays as your neighbors in other lines. We would advise a distinct display of one class of goods in each window—that is, exclusive sporting goods in one, tinware in another, etc. Push the lines that afford the most profit. You will notice they begin to appear oftener on your want book, if you keep one, and every dealer should.

SHOWCASES.

These afford the best means for inside display. We use as many as we can find room for, aiming to have them all of uniform size, shape and material or style, keeping them clean and the contents in order, and, as far as possible, a distinct class of goods in each, displaying cutlery in one, small tools in another, etc., using one for brushes, laying them in loose without boxes, displaying cutlery in the same way, marking each knife or shear and laying them in rows, or heaped up on a plush tray. We think sales in these lines are increased by this manner of displaying them.

We had a local cabinetmaker make us two tall counter cases, using some plate glass that we had on hand for the fronts, ends and shelves. In one of these—2 ft. wide, 6 ft. long and 4 ft. high — we put swinging mirror doors at the back, carpeted it with plush and put a small electric light at the top. This case we use for silver and nickel ware. In the other case we put a case of drawers in the back, projecting into the same about 10 in., the back forming the back of the showcase. This we covered with red felt, and on this we tacked an exhibit of twist drills, taps, dies, screw plates, etc., showing the larger sets of taps and dies in the bottom, together with breast drills and similar goods, the drawers in the back holding the stock.

SHELVING.



Ours is a combination of wall cases and shelf boxes, with glass fronts and felt-covered sample-boards, and the increased sale of the lines that were prominently shown has been very noticeable. This has been especially true of guns, locks and builders' hardware. This latter line we display on felt-covered boards. The boards hang on pins in a wall case and in front of shelves. These shelves hold a supply of the goods shown on the board directly over them, or in front of them. We display one pattern of lock, front and inside, on a board, showing on the same board the window trim of the same pattern. A customer can see at a glance the trim for an entire house. Different boards show different patterns, one board showing all our cupboard catches, another our line of latches, another our line of fancy butts, etc. We sorted out and sold as job lots all odds and ends of this class, and only keep in stock what we show in samples. We have all our lock sets put up one set in a box, they being easier to handle and making a more attractive appearance on the shelves. Our shelving for tinware extends from the floor to the ceiling, and is reached by travelling ladders. This shelving is 2 ft. deep, and affords ample room for display and reserve stock.

CASES, RACKS AND CABINETS.

We keep our iron rivets in a cabinet on our bolt counter, with horse nails, calks, nuts and washers in this same counter and case. Our malleable irons, wrought irons, steam fittings, etc., are kept in pigeon-holes; our wire screen on a stand or rack by itself; our wire cloth measuring machine on a table, with room underneath for the full rolls; window glass in a case, with a cutting board at the end; hoes, rakes and forks on brackets, with handles in a rack underneath; hay knives and handled axes in a rack, and axes in boxes on a short counter, with samples of each style or kind of axe on a sample-rack. This rack we make of iron pipe standards, secured to the counter-top with flanges, and a tee in the standard through which we run smaller pipe at the proper distance to allow the rows of axes to be placed over each other. The rods being run through the eyes of the axes allows them to be examined without removing them. We mark the selling price on each axe. Our stoves we mount on individual platforms. These platforms are painted a bright vermilion, which forms an attractive contrast for the polished or nickel surfaces.

SECOND-HAND GOODS.

One room in our basement we devote to second-hand goods of every description that we take in on trades, etc., principally

Axe Rack.

stoves. These we polish up and make a few necessary repairs and arrange in rows as we would new goods. We find this a very profitable department. In this room we have a set of shelves where we keep all stove parts and castings that will accumulate in all stove stocks. We sort them in classes, backs, fronts, bottoms, dampers, etc., by themselves; also parts that we take from old stoves that are worthless for any-

thing but old iron, such as legs, bases, etc. In this way we use up many scraps at a good profit.

EACH CLASS BY ITSELF.

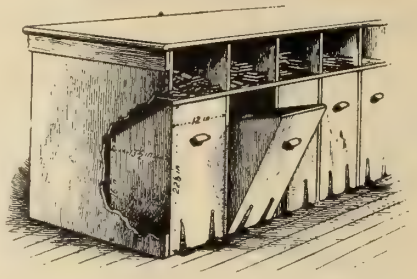
We aim to keep each class of goods together in departments. If a call is had for an article in the sporting goods line it will be found in that department, and not in the tinware, or mixed up with the grindstones.

MANAGEMENT OF THE STORE.

In buying we are conservative, selecting one or two good houses in each line and staying with them. By bunching your business your patronage is more desirable to them, and you will be well treated. If at any time you differ in opinion, give them a chance to square themselves. Be courteous in your correspondence and do not make unreasonable claims or be continually fault finding. Treat their representative with as much consideration as you would wish to be shown yourself. You will find that it is best to have the good-will of the travelling man. He will give you the best he has, and take good care of you. If you are given a special price, keep it to yourself, do not give it away or use it as a lever on someone else, thereby making all kinds of trouble.

PERSONAL ATTENTION TO BUSINESS.

Give your business your personal attention if you would succeed. It should be paramount to politics and lodges. Look carefully after details. Supplement this with a cordial manner, take an interest in your customers' affairs, ask after the welfare of their family, help them load up, bid them good-bye when they start for home. This costs nothing and returns a dividend. Have a system about your business, your prices, your sales, your purchases, your contracts, your quotations, your collections, especially the first. Have your stock so priced that any one in your employ can find the price of any article. This creates a feeling of confidence in you, your customer is not so liable to inquire concerning the prices elsewhere, to satisfy himself that you are right. A system of pricing is invaluable at inventory time.



ASSORTMENT.

Carry a good assortment, less of a kind and more kinds, study the new goods that come out, add side lines, but before adopting them be sure that they are right; investigate their claims, do not ask your trade to take an article on your recommendation unless you are certain it is right.

After selecting the line and make, advertise it, push it for all you can. Convince your trade that it is the best, prove it to them. Do not be spasmodic in your efforts, keep everlastingly at it.

A HANDY NAIL COUNTER.

The idea shown in the accompanying illustration for a counter for nails, butts and hinges is not original, but it is both simple and useful, and will, doubtless, interest some of our readers. The bins, which are attached to the floor by hinges, are 12 in. wide, 13½ in. deep, 22½ in. in front and 16 in. in the back. A handle, it will be noticed, is placed on the front of each bin in order to allow the clerk to pull the latter down and conveniently reach the nails or whatever it may contain.

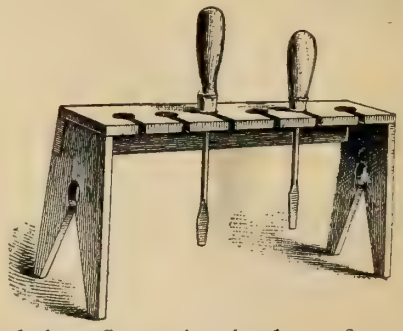
The spaces noticed above the bins in the illustration are for butts, hinges or any lines which can be conveniently placed there.

WRINKLES FOR HARDWAREMEN.

IN a recent issue of Ironmonger, London, England, a correspondent, signing himself "S.W.T.," gave what appears to us to be some practical hints for the retail trade, some of which may, possibly, prove of interest to hardwaremen in Canada.

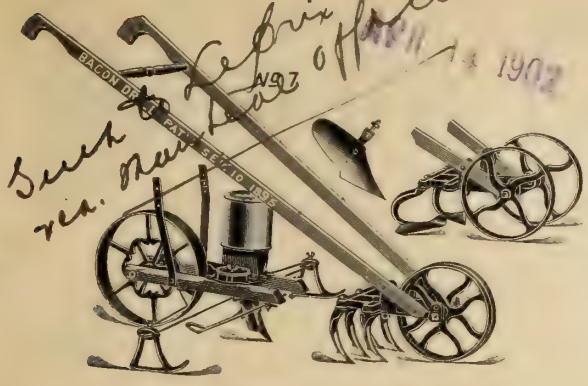
One, for example, of service when trying to put new wick into a burner which will not take it up in the usual way, as follows: Make a hole in the wick about ½ inch from the end, pass a piece of fine twine through the hole, bring both ends of the twine together and pass them up the wick-tube. Then insert the end of the wick into the tube and gently pull with the string and wind up at the same time. The probability is that when the wick is once in the burner it will wind up properly. If it does not wind up easily, and there is no indication of a thread being caught in the winder, a good plan is to get someone to hold the end of the wick firmly, then, holding the other end in the left hand, move the burner quickly up and down the wick, leaving the winder free to revolve. This will often put a burner into easy winding order.

While on the subject of burners and wicks, the following method will insure getting a new wick level. It is not always easy to cut new wick straight even with very sharp scissors, and circular wicks are worse than any to trim with scissors. The simplest and most effective way is to dip the top of a new wick into the oil, and then, before putting the other portion down into the oil-container, light the oiled top portion, having first turned it down so that only the uneven portion is above the wick-tube. It should be allowed to burn itself out to the last spark. Then the charred remains can be rubbed off and a level wick is in the burner, ready for lighting, when a good-shaped flame may reasonably be expected.



Time may be saved and the patience less tried by preparing a set of zinc templates of locks. It is not unusual for a customer to bring an old lock and ask for a new one with the holes for the key and handles to match the old one, so that it may be fixed without having to cut the door afresh. Such a request might mean the opening of a number of parcels to find a lock of the right pattern. To avoid this trouble an assistant, in his spare time, might open a parcel of each size and pattern lock kept in stock, and take paper tracings of the outside lines of the locks, and mark the exact positions of the key and handle holes, and also write on the paper the size, pattern, number, and price. Afterwards zinc plates, cut to the size of the paper tracings, with the holes for the key and spindle cut out and similarly marked might be prepared. Next slightly roughen the surface of the zinc with emery-cloth, and write on legibly the particulars of the lock of which it is an exact template. When an old lock is brought to be matched these zinc templates can be compared and the nearest pattern selected, then the parcel containing the lock required is at once indicated.

Turning to another line of goods, a suggestion is offered for a safe method of stacking opal shades, such as are used on incandescent gas burners. Get the tinman to make some tin tubes, of any length, according to the number of shades usually stocked. The diameter of the tubes should be about ¼ inch less than the diameter of the centre hole in the shades, so that a number of them may be passed over the tube in such a way that although they are resting one on the other it is impossible for them to fall. A firm base should be attached to each tube, and this should be made as large as the shades that are to be placed on it.



Another correspondent of the same paper wrote: "I have noticed on more than one occasion lately that the apprentice and junior assistant of to-day does not use a square paper for wrapping up stock-parcels. In the days of my own youth I was taught to make up a stock-parcel or to weigh up nails in square paper wrappers, folded across two corners. To my mind this method makes a more shapely parcel with a better face for marking or exposing a sample upon than does a rectangular piece of paper."

A RACK FOR SCREW DRIVERS.

The rack herewith shown, as will be readily seen, is for the displaying of screw drivers, chisels, etc., and was originally

made by a Connecticut hardware firm. It is made of ½-in. white pine, varnished. The rack is 12 in. long and 7½ in. high. The top board is 2-in. wide, and is, it will be noticed, notched to hold six tools.

Look! This is it. Just what you want. What you are looking for.

THE

BACON BEET, GARDEN DRILL AND CULTIVATOR.

☞ *In the Bacon Feed the flow of seed is varied without diminishing the diameter of the passage in use, which is always of such size as to give free passage to the most difficult seeds.*

The variation of feed being accomplished by a variation of position of certain parts of the passage. This gives better results in easily handled seeds, and is absolutely necessary in handling successfully such seeds as Parsnip, Beet, Carrot, Salsify, Spinach, etc.

This peculiar feed and combination gives a universal drill of unequalled excellence.

EUREKA WEEDING AND BLOCKING OUT BEET HOE.

Something new, just patented. Easy to operate, simple in construction. Blades can be adjusted to any width, which makes it specially adapted to the cultivation of the sugar beet and other garden vegetables. It is made of the best material, and worth its weight in gold.

Subjects for the Consideration of Clerks.

THE HARDWARE CLERK—HIS OPPORTUNITIES.

By One Interested.

RE the opportunities for the young man in the hardware business as good at the present time as they were some years ago? There is no reason why the demand for a live, active, young man should be less than in former years; indeed, there is every reason why it should be greater. The volume of business in the hardware line is larger in Canada to-day than ever, and it is most likely that all jobbers have had a large increase in business during the last five years and are looking forward to still greater possibilities. With the growth of trade and the necessity of larger stocks, the greater need of competent help is apparent.

What kind of young man is it desirable to obtain? First, one who has had a fair education, has set his mind definitely on learning the business, and with the determination to make the best use of his time. Second, one who is willing to start at the bottom, take instruction from those in authority, and move step by step until he has mastered each detail. Third, one who after some experience has a genuine liking for the line of business he has chosen.

How often a young man seeks employment, and before entering into a conversation with him one is favorably impressed with his address; but, having made known his wants, about the first questions are: "What are the hours?" and "Do you give Saturday afternoon as a half holiday?" One is led to think from questions like the foregoing that the young man is looking for a pastime, rather than an opportunity of learning the hardware business. It is better to let an applicant of this kind pass on to some employment where he can have more leisure.

Then, again, one engages a young man hoping that in a few years he will be a worthy acquisition to the staff, only to be met with disappointment. The reason here very often is that his mind is not centred on his work, but on something outside. He is generally waiting for the time of closing to come, and spends most of the last half hour of the afternoon in watching the clock to make sure the minute hand is not a quarter of a second past the hour before he is making his exit. One finds that this type of young man does not begin his duties in the morning with the same vim as the one who has his heart in his work. Sports and social pleasures of one kind or another take up most of his thoughts, and every spare moment he can get he is occupied in discussing the last hockey or football match, as the case may be, with a fellow clerk. Not that such pastimes are to be deprecated: they have their place, but the young man who wishes to succeed will pay attention to business first, pleasure afterwards.

Often a young man when he has secured employment, and has advanced to the stage when he can be put at filling orders, does not pay attention to the class of goods handled, but is simply reading the words on the orders and filling them like a machine. Such a one could learn a great deal by giving close attention to each line as it is laid out, and also in asking questions about the goods.

Another question arises: "What about the salary?" This may not be as large as he expects, and at first he is apt to be discouraged. But, young man seeking to rise, do not make this the chief aim in your chosen work. Show what you are worth and the salary will come in time. There is an old saying, "Water seeks its level," and if the young man of to-day shows himself thoroughly in earnest, fully competent to master the line he has chosen; in fact, puts the best that is in him into his employer's service, the remuneration will come in good time.

WITH BRAINS ONLY.

WHAT are the chances for the young man "with nothing but brains"? Let us see about that. It strikes me that the young man with nothing but brains has an immense advantage over the young man with nothing but money.

The late Philip D. Armour once told me, writes Truman A. De Weese in The Forum, that he did not give his sons a dollar's worth of stock in his immense business until they had satisfied him that they could "make sausage." This was the great packer's homely way of saying that he did not take his sons into the firm until they had shown business capacity and industry. But not many rich men in this country follow the example set by the founder of the great house of Armour. The young man with nothing but brains has nothing to lose. What to do with a patrimony of $100,000 does not bother him or keep him awake at night. The young man with $100,000 will soon realize that this is too small a sum to risk in business in an age of combines, when all productive and mercantile enterprises are conducted upon a scale of great magnitude Manufacturing is certainly out of the question; and if he wants to embark in a mercantile pursuit he must go to a small town that is not yet invaded by a mammoth department store selling everything from a tack-hammer to "store teeth."

But the young man with nothing but brains is not confronted by such perplexities. There is no "trust" in brains. It may be possible to corner the wheat crop or control the yearly output of cornstarch; but you cannot corner the crop of ideas. If the young man looks about him and studies the situation, he will quickly learn that the age of combinations is also the age of brains.

It is true that the learned professions, such as law, medicine and theology, are open to him; but these are overcrowded. There are not enough patients to go around. As for law, the Legislatures of the different States cannot grind out enough ambiguous statutes to keep the lawyers busy. The few laws now put upon the statute books are so clear and lucid that the ambitious young attorney has no chance whatever. Moreover, the tendency of the people is away from litigation. Men are more inclined to settle their differences out of court. Again, there is less demand for theologians. The people are coming to regard theology as a man-made substitute for simple, practical Christianity; a heritage of profound thinking and scholarship, it is true, but too deep for the common understanding. There is more practical, every-day Christianity than there ever was, but less theology.

Journalism, of the kind that does not completely efface the writer's personality and that encourages individuality of style and freedom of utterance, still offers an attractive field for the young man with nothing but brains. The journalism of the future must be a journalism in which the public may connect the statements of editors and reporters with some personality that stands for knowledge and common honesty. No other kind of journalism will attract the serious attention of ambitious men.

The federal service certainly offers no attractions to the young man with nothing but brains. Perhaps in no other depart-

ment of human activity can there be found such amazing mediocrity and inefficiency as here. Character and brains count for nothing.

Literary and clerical pursuits are being rapidly invaded by women. The time is past when a desk-man can hope to earn enough salary to support a family. In fact, desk-work of the purely clerical or routine kind can no longer satisfy the man of energy and ambition.

It ought to be very plain, it seems to me, that the greatest oportunity for the young man with nothing but brains lies in fitting himself for an important place in the great distributing machinery brought into existence by the era of combines. He must contribute something to the twentieth century crop of ideas. The era of expansion which the politicians are talking about carries with it an expansion of the market for ideas, an expansion beyond the dreams of the generations of yesterday. It is to be a battle of ideas; and the man who has none will have to "go way back and sit down" with the typewriter girl, or the telegraph operators, or some one else who does nothing but handle other people's ideas. The man with ideas will occupy the centre of the stage, and the lime-light of public interest and thought will be turned upon him more than ever before in our history.

For what are the objects of industrial combination? To cheapen the cost of production and distribution.

The other primary object of combination is to cheapen the cost of distribution. Costly and out-of-date methods of putting goods upon the market and finding purchasers for them are being abandoned. The most expensive wheel in the machinery of distribution and the first to be discarded has been the "drummer." In certain lines of production he is still employed to some extent; but it is a self-evident economic proposition that the consolidation of small plants into larger ones must cut into the ranks of the great army of travelling trade solicitors, and, that if the tendency toward concentration in all lines continues, the drummer will soon be as extinct as the dodo. He is a relic of the days of wasteful competition. Under the new system the producer will talk to thousands at a time instead of employing a drummer to talk to each person individually. How is he going to do it? Through the printed catalogue, the artistic booklet, the attractive poster, the pages of the magazines and weekly periodicals, the columns of the daily press, and the thousands of ingenious and unique devices for catching the public eye, designed by the brightest and cleverest minds in this country.

Who will furnish the ideas for this new and vast twentieth-century system of publicity? Surely here is the golden harvest for the young man with nothing but brains. Here is a field for anyone with original ideas. No compiler, collator or purveyor of other people's ideas can participate in this contest. The producer who is investing a million in advertising will scent a mildewed idea from afar. He will have none of it. What he buys must drop cleanmilled, new and bright from the mint of genius. It must have the ring of the pure metal, with no "dull thud" business about it.

It is true that the profession of advertising has always engaged the talent and energy of some of the brightest minds in the land; but the work of the past-masters in publicity will seem small and commonplace compared with what will be demanded by the era of industrial combination and trade expansion upon which we are now entering. Thousands of "good things" are slumbering in the intellects of men—mechanical inventions, chemical compounds, toys for children, foods for invalids, remedies for diseases, appliances for contributing to the luxuries and comforts of life.

Humanity will wear more shoes and farmers will use more wagons in 1902 than ever before in the history of the race; but the man who has a million invested in the manufacture of shoes or wagons can do little in the coming years without the genius of publicity. He must call to his aid the men of ideas, the men who are masters of the art of presenting forcefully and effectively to the millions of consumers the merits of a particular commodity.

A GOOD PLACE TO BUY.

Besides furnishing the trade with full standard quality of white lead, strictly pure, and other grades at association figures, McArthur, Corneille & Co., Montreal, are supplying their "Crown Diamond" brand at proportionate prices. This is warranted a genuine white lead, and for excellence of quality is claimed to be unequalled on this market. The trade would profit by giving attention to the fine English varnishes of Charles Turner & Sons, London, in which there is extremely good value. The well-known genuine Imperial French green of John Lucas & Co., Philadelphia, can also be obtained here. This article has been in even greater demand than ever this year. In glues and gelatines McArthur, Corneille & Co. have supply arrangements which enable them to compete successfully with all other furnishers. Samples of these, with prices, can be had by the trade for the asking.

It would be worth while to follow the example of many merchants and submit samples of the glues now being used to this firm for test, accompanied by an inquiry for prices on matches of same, with Canadian products, made by a first class American expert. A good many tests have shown that other glues have much less strength than that made by this house. In one case, when compared with another widely-known glue, it was found that 25 per cent. more water could be added to McArthur, Corneille & Co.'s brand and still have the same strength as the other.

A NEW PAINT FIRM.

The Ottawa Paint Works, of Ottawa, is a firm that has been in operation a little over a year and a half. It manufactures ready-mixed house paint, barn paint, bridge paint, floor paint, brick paint, white lead, shellac, putty, and deals in dry colors, varnish, linseed oil, turpentine, etc. J. M. Young, the head of the firm, has been connected with the paint business for the last 12 years, having been employed with William Howe, but on account of the latter's factory being burned and he discontinuing the manufacture of paints, Mr. Young resigned, and with Mr. E. A. Ripley and C. Hickman started the above paint works. Mr. Ripley and Mr. Hickman have also been in the paint business for the past 10 years, and have charge of the factory and shipping departments.

Since commencing business the Ottawa Paint Works has met with good success, and being the only paint manufacturer in Ottawa, and in fact the only paint factory between Montreal and Toronto, makes the prospect bright Its prices might interest you. Ask for quotations.

A NEW FOUNDRY.

The newly incorporated St. John Foundry Co., Limited, St. John, N.B., have completed their new premises on Brussels street and are installing the machinery. There will be a boiler and engine of 25 horse power, and a furnace of about three tons capacity in the foundry which extends 122 feet back from the street. It will be three storeys in height, one being above and two beneath the level of the street. The moulding shop is 40 x 65 feet and the engine and boiler rooms 35 x 40.

The stock of the new concern amounts to about $6,000, and the bulk of it is held by J. E. Wilson, Ald. Robt. Maxwell and a number of others.

The work of the new foundry will consist of general jobbing, including all kinds of stove repairing, and the moulding of building columns, crests, etc. Afterwards, stoves will be added to the lines manufactured. Eight men will be employed at the start and the number afterwards added to as the business inceeases.

DEALERS WILL BENEFIT.

The immense buying facilities of the United Factories, Limited, recently gave them an extraordinary opportunity of purchasing very favorably for spot cash a large quantity of black China bristles specially adapted for flat varnish, chiseled varnish, oval and flat paint brushes, etc. It is this well-known company's policy to always give their customers the benefit of such a deal, and they have, therefore, revised their prices, and will be pleased to quote accordingly. Such values as these are not to be met with frequently.

ESTABLISHED 1834

HEATING AND PLUMBING

THE SUPPLY HOUSE AND THE MASTER PLUMBER

By H. A. Knox, Ottawa.

As a mutual distributing agency it is unnecessary to dwell on the importance of their commercial relations. Equally as unnecessary as it is to show the relation between ice and frost, or heat and fire, or to go further and attempt to prove that earth, air, fire and water, with the addition of electricity, are not the elements of material nature. Sunshine shows the balmy influence of nature by magnetizing the frost-bound earth and installing therein its productive warmth. This action has been alternate since the beginning of time.

The alternation is due to the wisdom of the Creator, who ordains that each part of the universe shall be relatively equal, no matter what extreme may be reached. This then shows the exactitude, inflexibility and inexorability of the law of material nature through the instrumentality of the Being Supreme. If there is the least irregularity the earth cleaves or the sky is shaken; ominous proofs of anger at discord. Nature being so just and unchangeable, why is human law so inclined to be opposite? It is doubtless due to the option of humanity. Social and commercial differences arise from it. Man is truly the King of Discord and Inequality. These are truths we must recognize; to ignore them is to be foolish; to weep over them is folly. To put up with them and endeavor to make them tolerable is the only manly way.

This desire then is explanatory of many results, one of them being the existence of The National Association of Master Plumbers. It is thoroughly representative, though it has all the individual differences known, yet one feature that each of its members recognize as a self-preservative, and which puts them on one broad platform, is the exclusive right to derive from the supply house that protection which is his by virtue of his natural social and commercial distributing power.

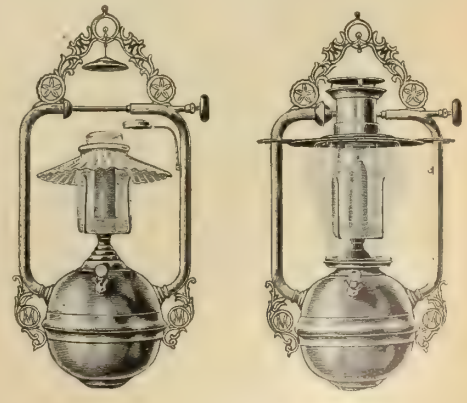
The only reason evident to the writer for the violation of that obligation is a geographical one. This country being so extensive is why the N. A. M. P. has not been able to ramify itself as well as it should be. There are frequent cases in the smaller towns throughout the Dominion of the supply house dealing direct with the consumer. The complainants regarding those violations have their own remedy. It ought to suggest itself without explanation. Every master plumber, even if his particular dealings with the supply house are extremely cordial, should ally himself with the N. A. M. P. through the Provincial association, or else communicate with the executive secretary. National solidarity will then assert itself. The supply house will then, too, respect the value of the trade of the master plumber who is allied to the national association. And if a purchase is attempted by a consumer he will be referred to the master plumber for his requirements. This arrangement could work in a reciprocal way. There are many cases where the Canadian house should and would get the preference over the American house did he actively assert the welfare of the master plumber. Harmony of trade with protection means paid up accounts. Without it, risks, bad debts and insolvency.

THE OTTAWA PLUMBING BY-LAW.

Mr. McVeity, the city solicitor of Ottawa, has written Mr. H. A. Knox, of the local Master Plumbers' Association, under date of March 12, stating that he has prepared two by-laws, one providing for the licensing and regulating of plumbers, and the other for the regulation of plumbing work.

The by-laws are made separate, because the objects are distinct, the council deriving its authority with respect to each from different sources.

The Municipal Act gives authority to license and regulate plumbers, and the Public Health Act gives authority to make regulations as to the quality of plumbing work. The finance committee has reported these by-laws to council for a first reading. The one then applying to licensing, etc., of plumbers will be referred to the finance committee, and the one as to the quality of plumbing will be referred to the board of health before final sanction of council.



SCIENCE AND PLUMBING.

At the annual meeting of the members of the North of England District of the National Registration of Plumbers held at Carlisle recently, a lecture on the application of scientific principles to plumbers' work and sanitary arrangements was given by Mr. Joseph Radcliffe, the instructor at the plumbers' classes in Manchester Technical College.

During the last 60 years, he said, the work of the plumber had undergone very great changes. The old plumber was easy going, well paid, and respected by those who employed him; he had many friends, and was looked up to by his neighbor. To-day, the plumber, taking into consideration the importance of his work, was overworked, underpaid, and, speaking generally, did not possess the confidence of the public except as regarded his ability to do his work in such a way that people would be sure to require his attention again in the near future. The reasons for the change between the plumber of the former days and the present were that the work had changed and the plumber had not changed to the same extent as the work had done. Sixty years ago there existed few of the fittings possessed by the modern residence in regard to hot and cold water supplies, lavatories, sinks, baths, soil waste and vent pipes, etc., and the plumber had time to make his own pipes and other appliances. To-day, these things were all made for the plumber by improved methods, but the field of his labors had been extended, and if he would only lift himself out of the old groove, and bring himself into line his position would be much improved and the public would benefit. Practical work was of increased value if based on right principles, and to understand these principles the plumber must have had a good elementary education, and some knowledge of chemistry, mechanics, and physics.

NEW IDEA IN STORE LAMPS

The lighting question is so important with merchants that any new idea is eagerly seized upon by all live dealers. Considerable interest will, therefore, be felt regarding the "M. and M." Arc Lamp, which has qualities that will fit it for use in many stores. The accompanying illustrations give a good idea of this handsome nickel-finished lamp, made both for interior use and outside the store door. The lamp

gives a brilliant light, is non-explosive, and emits neither smell nor smoke. One filling provides 12 to 15 hours of light, is a portable affair, yet made so solidly that it is guaranteed to last many years. The manufacturers are the Acorn Brass Works, 19 to 23 South Jefferson street, Chicago, and any Canadian dealer who wants further information can drop a card to the firm.

SANITATION.

"Non est vivere sed valere vita."
"Life is not merely to live but to have good health."
"Comment est votre sante."

EXCAVATIONS at Pompeii disclose the labrum, a huge vase of snowy marble, eight feet in diameter, from the centre of which projected a brass tube It is believed that this was one of the earliest steps towards "Sanitation," where the bather, after indulging therein, very often to the strains of soft music and perfumed water, sought still further pleasure in the heated and scented atmosphere of the Caldarium.

Sanitation, as we now understand the word, applies to whatever conduces to the securing of good health, and has its derivation in the French word sante, or health.

"The proper study of mankind is man," says Pope, and certainly, as far as the laws of health that conduce to his own well-being are concerned, this is perfectly true.

Dr. J. H. Kellogg, in his "General Health Hints," writes: "A man who has a perfectly healthy skin is almost certain to be healthy in other respects. In no way can the health of the skin be preserved but by frequent bathing."

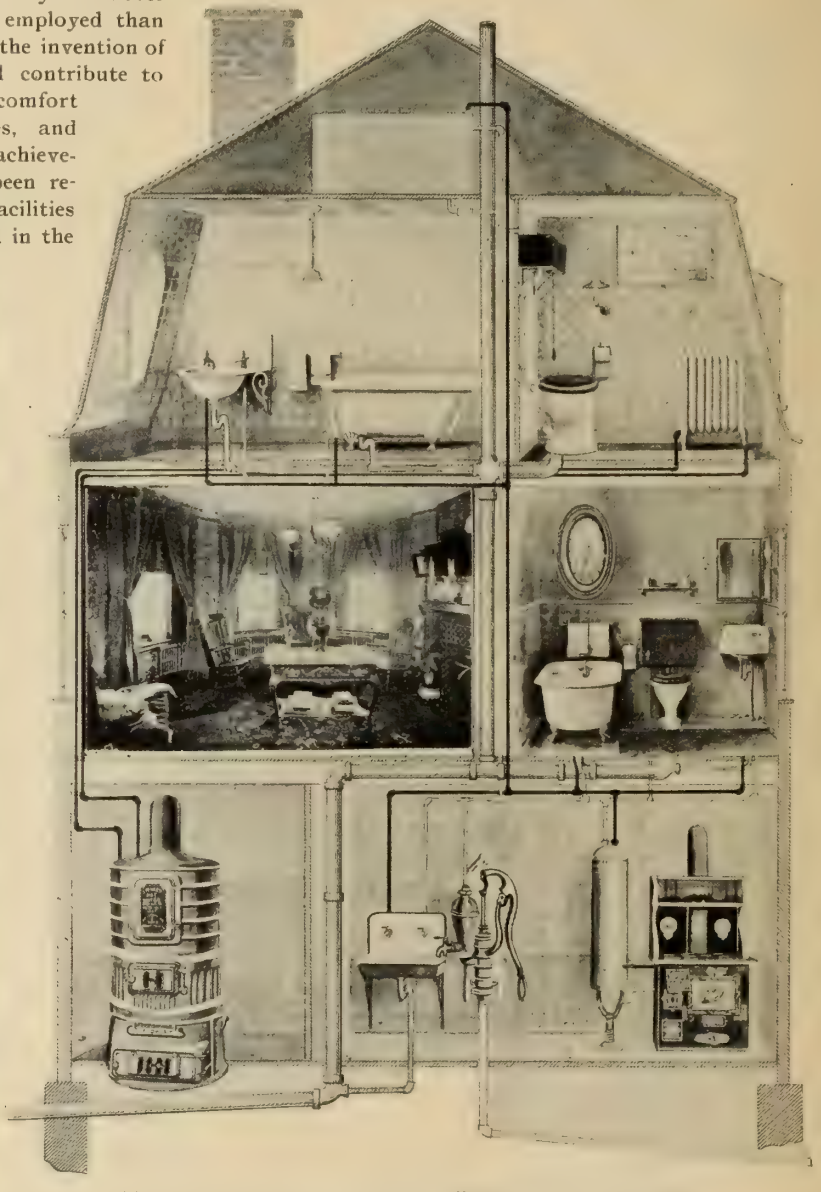
Marion Harland, in a noted work entitled "Talks upon Practical Subjects," has this significant paragraph: "The skin should receive special attention, and its care comes under the head of exercise and general tonic treatment—a potent factor in developing cutaneous activity is the bath." While another authority states: "If we were asked what was most needed for the health of the country, we should say, 'Baths—baths—baths.'"

The abodes where families seek repose, health and comfort should, therefore, be enriched as far as possible with whatever is calculated to add thereto, and it is of the utmost importance that one should be cognizant of such factors as tend to make the "home successful," which can be only truly so styled when they are replete with the modern improvements of plumbing, heating, electric lighting, etc.

Man's ingenuity was never more actively employed than at present in the invention of whatever will contribute to health and comfort in our homes, and while great achievements have been realized in the facilities for travel and in the uses of electricity, in no direction has greater advancement been made than in the methods and appliances used for heating and plumbing buildings.

Every person interested in this vital subject should be fully cognizant of all that appertains thereto. With this object in view, Mr. W. H. Wiggs, of The Mechanics Supply Co., Quebec, has written and published a very handsome booklet entitled "Sanitation" (copyrighted), which is beautifully illustrated throughout.

It is full of valuable information, and should be in the hands of every architect, doctor, sanitary engineer and plumber.



It is without exception the most handsome booklet ever published in Canada devoted to this subject, and The Mechanics Supply Co. are deserving of great praise for the placing of such an elegant piece of literature in the hands of the trade and the architects, to whom a copy will be sent free on application.

Nothing tends so much to the education of the public at large as the perusal of a work like this, and it shows to what a high state of perfection sanitation has reached in our day.

"Figures do not lie" is an everyday phrase, and recent statistics of the death rate in cities where sanitary laws are enforced show that it has been greatly reduced, and that frequently it is much healthier to live in a modern dwelling equipped with the best sanitary and heat-

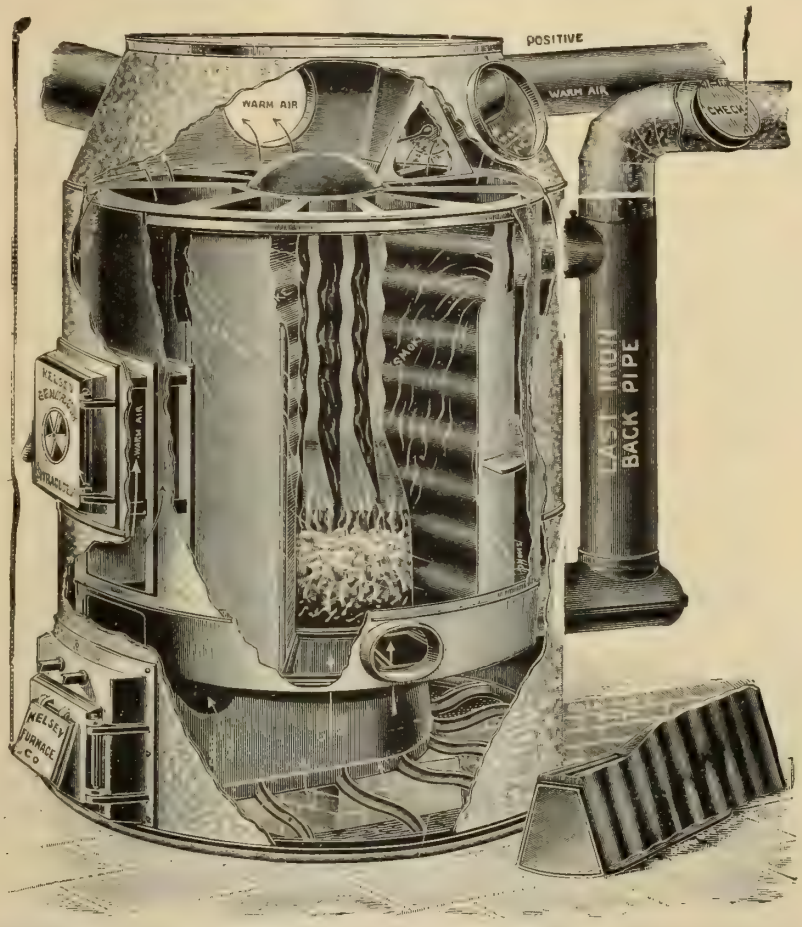
KELSEY CORRUGATED WARM-AIR GENERATORS

(PATENTED.)

Economical, Efficient and Sanitary Warming and Ventilation.

KELSEY heating is unlike any other method of heating.

KELSEYS furnish pure, mild, warm air.



KELSEYS are gas-tight, dustless and smoke-proof.

KELSEYS provide healthful and hygienic warming.

KELSEYS warm all rooms at all times.

KELSEYS are

Heat Makers
Fuel Savers

KELSEYS are very easily managed and controlled.

KELSEYS are not in the same class as the ordinary hot-air furnace.

KELSEYS perfectly warm and ventilate large residences, churches, schools, etc.

KELSEY construction and Kelsey principles of installation will give best possible results.

KELSEY fire-pots do not crack, warp or burn out.

KELSEYS are fully covered BY PATENTS.

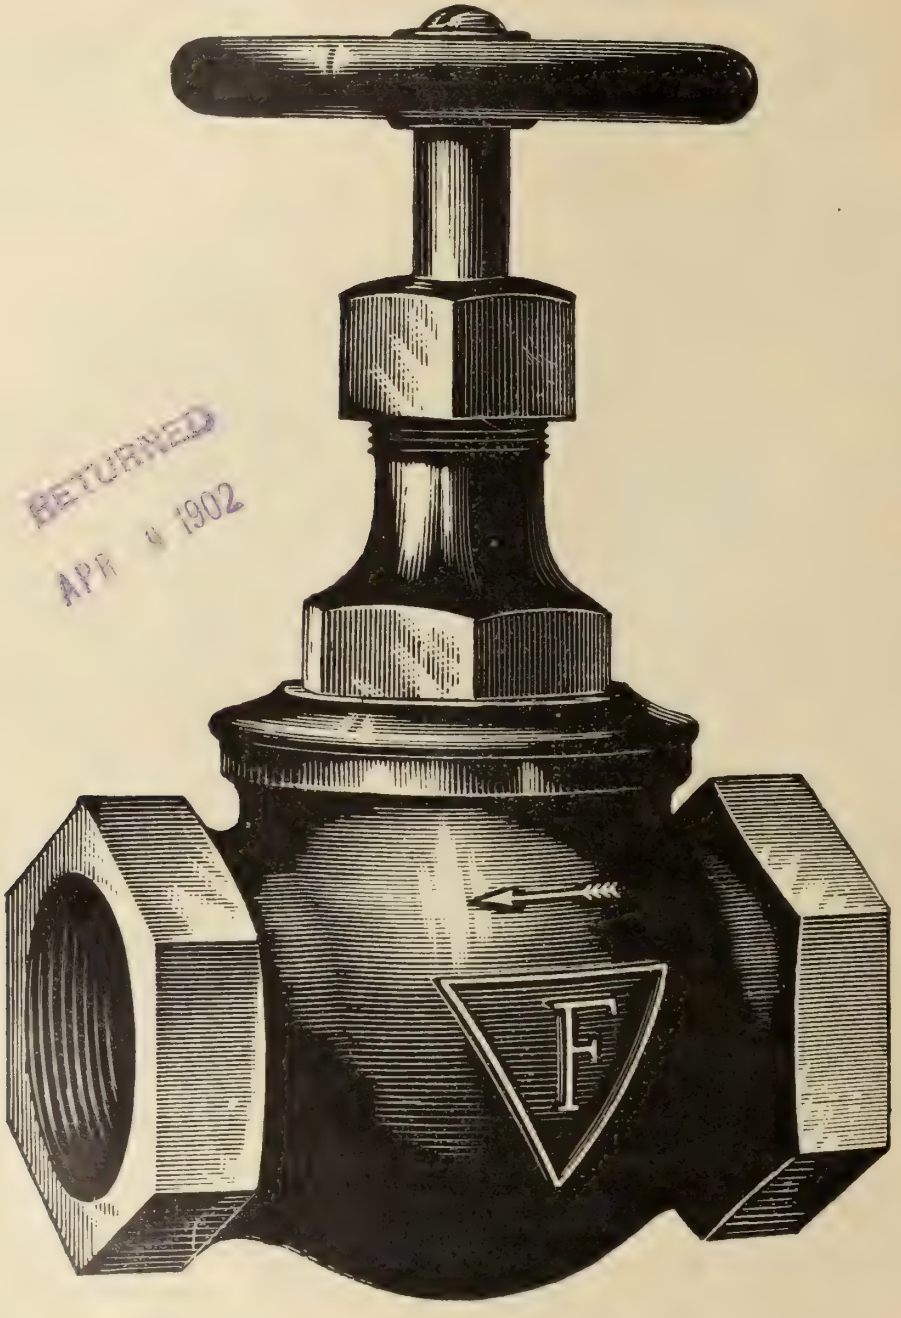
OVER 2,000 KELSEYS IN USE IN ITS HOME CITY (SYRACUSE, N.Y.)

KELSEY GENERATORS are now in successful operation from the Atlantic to the Pacific, and in about 250 different places in Canada.

KELSEY GENERATORS assure to the users:

MORE HEAT WITH LESS FUEL. BETTER QUALITY OF WARM AIR.
GOOD VENTILATION AND COOL CELLARS. FREEDOM FROM GAS AND DUST.
ALL ROOMS WARM AT ALL TIMES.

KELSEY GENERATORS have overcome all the many well-known defects so common to the hot-air furnace.



☞ Exclusive agencies given to reliable, pushing dealers, and practical, experienced experts furnished to assist in making estimates and closing contracts.

Dealers handling the KELSEY have something besides price to talk about. Printed matter for the asking.

CONTRACTS IN OTTAWA.

Knox Bros. have just completed the steam-heating contract of the new hall of The Knights of Columbus, Maria street, under the supervision of Architect G. M. Bayly.

The same firm have also secured the steam-heating contract in the proposed warehouse on Queen street, for H. H. Brennan, under the direction and supervision of Architect E. L. Horwood.

CONTRACTS IN TORONTO

Purdy, Mansell & Co., plumbers and steamfitters, Toronto, have secured the contract for the plumbing of the Physical and Biological Laboratory and Museum Building for the Ontario Agricultural College, Guelph.

Sim & Co., plumbers, Toronto, have obtained contracts for the reconstruction of drains at the Sherbourne Street Methodist Church; the plumbing and gasfitting of two houses on Shaw street for A. Willis; and the reconstruction of the bathroom of a house on Markham street.

A PROSPEROUS TOWN.

Leamington, Ont., is steadily growing. Some of the recent additions have been a large tobacco factory, six storeys in height, 60 x 160 ft., electric-lighted throughout, and has all modern improvements, making it up to date in every particular, and a new Anglican church, which will be finished during the coming season. Besides these, there are several other buildings, including stores and dwellings, which will be erected during the coming summer.

SUPPLIES FOR PLUMBERS.

A plumber or steamfitter who is not interested in a good boiler is a nonentity. The Toronto Hardware Manufacturing Co., the well-known plumbers' supply house at 1100 Queen street west, Toronto, are the manufacturers of the "Dominion" galvanized boiler which won the medal for excellence at the Industrial Exposition last year. It is, indeed, well planned and well constructed. The firm also carry a full line of plumbers' supplies, including soil pipe fittings, sinks, boiler-stands, etc.

In addition to their reputation as a plumbers' supply house, they are manufacturers of mantels, grates and tiles which are noted for their artistic design and finish. An advertisement of theirs on page 117 will be found of interest.

VISIT FROM A "SOO" PLUMBER.

John Culliton, of Culliton & Anstey, plumbers, etc., Sault Ste. Marie, Ont., was in Toronto the early part of this week purchasing his supplies for the summer and calling on his friends. Mr. Culliton was formerly with Purdy, Mansell & Co., plumbers and steamfitters, Toronto.

CONVENTION OF ONTARIO PLUMBERS.

OVER 250 master plumbers of Ontario are receiving circulars inviting them to attend a Provincial convention which will be held in Toronto, on Good Friday, March 28, in the Pythian Hall, at the corner of Queen and Victoria streets.

Delegates are expected from Ottawa, Brockville, Kingston, Belleville, Cobourg, Hamilton, St. Catharines, Guelph, Brantford, London, Windsor, Petrolia, St. Thomas, and various other centres where the master plumbers have been organized

The Iroquois Hotel will be the place where they will put up during the convention. The circular is as follows:

At the past convention meeting of the Dominion Master Plumbers and Steamfitters' Association held in Toronto, June, 1901, it was decided to organize Provincial Associations, for which the necessary constitution and by-laws were adopted.

Being honored with the office of vice-president for Ontario, I have been instructed by the Dominion Association President, John McKinley, of Ottawa, to issue invitations to a meeting to be held in Toronto, on Friday, March 28th, inst., that being Good Friday, and as special rates are granted by the railroads for Easter, it was thought that a business trip could be made by those attending the meeting without loss of time to business. You are cordially invited to attend this meeting.

As there are local Master Plumber Associations at present in most of the cities in Ontario, it is our intentions to thoroughly weld our trade interests together by having a perfect organization in every town and village in the Province, for the purpose of furthering sanitary laws, and to prevent as far as possible the evil of irresponsible parties from selecting, arranging and installing material relating to the hydraulic and sanitary condition of dwellings, public and private institutions. To create and maintain a sanitary code at as high a standard as the progress of science and mechanical knowledge teaches. To promote amicable and mutual trade associations with every master plumber in the Province. To combine the interests and influence of members, for the protection of the trade against encroachment or imposition. To secure for the members of the trade equitable treatment in their dealings with manufacturers and dealers in supplies. To regulate the system of apprenticeship, and prevent as far as possible the evil of deficient training, to encourage Provincial legislation in the improvement of our sanitary laws To encourage an interchange of thought and ideas between members.

As the motto of our Dominion Association is "All for One and One for All," it is to be hoped you will be in attendance on March 28, and with your shoulder to the wheel to elect a good executive at the helm. That motto will be instilled into the hearts of every master plumber in Ontario, and that the interests of one will be the concern of all.

If not possible for you to attend you will please reply and advise as to your thoughts on the above, or that you will become a member by connecting yourself with the Provincial Association, or with the nearest local association to you.

Hoping you will accept this invitation,

I am, respectfully yours,

WM. MANSELL,

46 Adelaide street west, Toronto.

BUILDING PERMITS IN TORONTO.

This week building permits in Toronto have been granted to the following: Thomas Holmes, for the erection of a two-storey and attic brick and stone dwelling on 108 Wells street, for $3,000; Louis Supo, for a two-storey brick dwelling on 82 Elm street, for $2,000; T. D. Taylor, for a one-storey addition to residence on 1086½ Queen street west, for oven and bake shop, to cost $600; W. H. Gibbs, for a pair of brick and roughcast semi-detached dwellings on Gerrard street east, for $3,000; T. B. Taylor, for a two-storey brick stable and driving shed in rear of 65 Parliament street, for $2,500; F. D. Capp, for a two-storey dwelling with a brick front and roughcast sides and back on 10 Ashport avenue, for $1,200; Mr. Perry, for an one-storey frame and roughcast dwelling on 27 Lewis street, for $300; B. H. Morehouse, for a pair of semi-detached two-storey and attic brick dwellings on 6 and 8 First avenue, for $4,500; Edward Sylvester, for a brick cellar under his dwelling on 222 Clinton street for $115; Wm. Dilworth, for a pair of two-storey detached brick dwellings on Margueretta street, for $3,300; Mr. St. John, for a brick cellar under dwelling on 246 Shaw street, for $200; W. J. Hewitt, for a pair of semi-detached two-storey and attic brick dwellings on 58 and 60 Langley avenue, for $4,000; Robert Corbett, for a pair of two-storey dwellings with brick fronts and roughcast sides and back on Brock avenue, for $3,000; Robert Corbett, for a pair of semi-detached two-storey brick dwellings on Brock avenue, for $4,000; J. W. Wardell, for a mansard roof on four sides of 295 College street, for $600; J. E. R. Roberts, for a two-storey and attic brick dwelling on corner of Roncesvalles avenue and High Park Road, for $4,500; J. T. Scott, for four two-storey detached brick and roughcast dwellings on Pendrith avenue, for $3,200; Henry Stevens, for a two-storey brick dwelling on 52 Pearson avenue, for $2,000; T. W. Dutton, for a two-storey brick dwelling on 54 Pearson avenue, for $2,000; W. H. Smith, for a four-storey brick warehouse on the northwest corner of Nelson and Simcoe streets, for $6,000; Henry Merrick, for a one-storey brick addition to his store on the northeast corner of McPherson avenue and Avenue Road, for $100; Children's Aid Society, for brick and stone alterations to a dwelling on 229 Simcoe street, for $7,000; E. L. McArthur, for a two-storey and attic brick residence on Maple avenue, for $3,500; John T. B. Rowell, for a two-storey brick horseshoeing and carriage shop on 161 Augusta avenue, for $900, and David Taylor, for brick and plaster alterations to dwelling on 348 George street, for $600.

TO INSPECT PLUMBING FIXTURES.

City Engineer Rust, of Toronto, in his last half-monthly report, made on March 13, urges that waste of water from taps, etc., be prevented. His remedy is to have all plumbing fixtures submitted to the department, tested and stamped before they are put into the buildings. The cost would be covered by a small fee.

SADDLERY AND CARRIAGE HARDWARE.

SOME HINTS FOR RETAIL DEALERS.

ALTHOUGH this is said to be an age of specialists, there are exceptions to this rule as there are to all others. Almost every country merchant has found it pays best to conduct a general business rather than a particular one. The man who carries something of everything reaches usually a wider class of customers, and, if he has any capital at all and has a reasonably complete stock, he finds it to his advantage to continue in the general business. In the departmental store this idea is amplified, and the ideal of such an establishment, in common with the store of the country cross roads, is the ability to supply everything wanted by the purchaser.

For hardware and general merchants a good line to carry is saddlery hardware. By this is meant such articles as harness, saddles, whips, brushes, curry combs, harness buckles and sleigh bells. It does not require any extra expense beyond the net cost of the goods to put in a stock such as the above, while, at the same time, a good trade may be worked up and much extra profit realized, so that the balance at the right side of the loss and gain account will be augmented. Also, by having people coming for these goods a merchant has a better chance of selling something from his other lines. By taking hold of these goods a good business man may make money.

In selecting a stock for retailing there should be used care and judgment. The requirements of the community should be carefully studied and the articles required for common use taken note of, so that nothing that cannot readilly be sold be put on the shelves.

A carefully selected though small stock of saddlery hardware will usually give better returns than a larger one that has not been so carefully bought. A depleted stock can soon be replenished, by sending an order to the wholesaler, but an unwieldy stock can only be gotten rid of at a sacrifice. It is better for the retailer if he lets the wholesale man carry the heavy stock.

The goods must be seasonable. In the fall the stock should be most complete in regard to sleigh-bells, horse clothing and blankets, and sleigh rugs. These are what are most required for the winter. In the spring light harness, carriage rugs and things of a similar nature always sell the best. An all-year-around stock should consist of polish for harness, bits, parts of harness, such as lines and buckles, brushes, bridles and curry combs. The wants of the customers catered to would determine the particular class of articles carried, and in selecting and ordering the goods, advantage should be taken of these facts.

When he has decided to add to business the retailing of saddlery hardware, the merchant should take the public into his confidence. People should know of his new addition and the best way to inform them is through the local press. An advertisement in a conspicuous corner of the paper with some close quotations is sure to be noticed by the readers. Many circulars advising the public of the new departure and soliciting their patronage should be sent out to various people that would be likely to buy. Close prices are best for building up a trade, as a man having once received good value in an article is anxious to call again when he wants something else.

A window display of saddles, horse blankets, bits, sleigh bells, whips, etc., is another advertising medium that always brings in good returns. Once people get in the habit of coming for these things, success ought to be assured.

IMPORTS OF SADDLERY HARDWARE

The imports of harness, saddlery, rugs for carriages, harness dressing, etc., harness leather, horse clothing and whips and material used in their manufacture, into Canada for the year 1901 amounted to $267,282 Of this, $113,907 was in carriage rugs, $87,598 being from Great Britain, $15,930 from the United States and $2,672 from Germany. The United States has the largest share of the balance of the imports.

In the $54,242 worth of saddlery and harness imported $44,624 came from the United States, $9,390 from Great Britain and $213 from France. There were $50,564 of harness dressings imported, including leather and shoe polish; and of these, $47,910 from the United States, $1,158 from Great Britain, $1,067 from Germany, and the remainder from France and Belgium. Harness leather amounting to $6,809 was imported from the United States. Horse clothing, including horse blankets valued at $6,986, were imported; $6,806 being from the United States and only $180 from Great Britain. Whips amounting to $4,085 were imported from the United States, $2,246 from Great Britain, and $30 from France and Germany, bringing their total value up to $6,361. In square or round reeds and raw hide centres, textile, leather, or rubber heads, thumbs and tips, and steel iron on nickle caps there was $29,414 worth imported by manufacturers for use in their own factories in the manufacture of whips, of which the United States contributed $28,413, and Great Britain $1,001.

Of the total imports enumerated above it will be seen that $154,276, or 57.72 per cent., were imported from the United States.

AN OLD AND SUCCESSFUL FIRM.

The late James Jolley, the founder of James Jolley & Sons, harness manufacturers, Hamilton, Ont., began manufacturing harness in 1843 at 51 and 53 John street south, the presest location of their factory. The business continued to grow, and 30 years after its commencement, in 1873, Mr. Jolley's two sons, C. J. and W. J. Jolley were admitted as partners into the business, which was thenceforth conducted under the style of James Jolley & Sons. And, after Mr. James Jolley's death in 1892, these two sons continued. Several years ago, when the younger Messrs. Jolley decided to branch out in the manufacture and jobbing of harness, saddlery, trunks, valises and kindred leather goods, they were rewarded with remarkable success. Last year they found themselves so cramped for room that they were unable to fill the orders which rolled in upon them from various portions of Canada, and it became necessary to extend their premises. A four-storey brick and stone addition to their building, having a floor space of 16,000 sq. ft., was erected and equipped with modern machinery. This new building has recently been completed, and it is worthy of note, that all the machinery now employed by the firm is operated by electrical power. The firm at present employs 60 men, but this number will be increased to 100 in the near future.

The firm of James Jolley & Sons now possesses the most complete manufactory of harness, saddles, horse collars and other leather goods in Western Ontario, and, in addition to these goods, carries an extensive line of saddlery hardware, horse blankets, etc. It is one of the oldest of its kind in all Canada, and the only industry of its nature in the vicinity of Hamilton. The members of the firm are progressive and entitled to much credit for the rapid progress they have made in their business undertakings.

They say that the year 1901 has been very prosperous for them, showing the greatest increase in 50 years, and announce that if this prosperity continues they will shortly be under the necessity of doubling their present capacity.

ADDITION TO A WHIP FACTORY.

The Hamilton Whip Co., Hamilton, have just completed a large addition to their already extensive factory building. The addition comprises a new department for braided leather work of every description The ranges in this line will include all styles of lashes, running in length from 1 to 20 ft., from common 4-platt to finest 16-platt calfskin, and buckskin Californian style lashes. All styles of leather-covered carriage, cart and team whips, drovers' quirt and dog whips.

The fine leathers used in the manufacture of these lines are manufactured under the same supervision. This department is taxed to its full capacity.

The Hamilton Whip Co. have recently put in an extensive plant solely for the production of horsehide, calfskin, buckskin, cordovan, and other fine leathers used in their business. Producing, as they do, the finished articles from raw stock, they are in a position to make the very lowest prices, and guarantee the excellence and quality of their lines.

In straight whips their well-known lines are the standard for quality throughout the Dominion.

ONLY WOMAN HARNESSMAKER IN THE WORLD.

What is said by the National Harness Review to be the only shop in the United States owned, run and operated entirely by a woman, is that belonging to Mrs. M. D. Lydick in a country town in Nebraska From making waxed threads and hamestraps she progressed to a full-fledged harnessmaker, and is said to be one of the most skillful "workmen" in the State.

AN OLD RELIABLE SADDLERY HOUSE.

One of the oldest and largest manufacturers of horses' clothing in Toronto is the firm of T. Woodbridge & Co., which was established in 1872, and possesses commodious warerooms at 49 Colborne street. This firm make a specialty of saddlery hardware, such as whips, sleigh bells, etc., doing a large business in this line throughout the Dominion. They are also large manufacturers of rubber rugs, plush robes, etc., in which for some years back there have been many improvements, both in comfort and elegance. They do a large business in Bishop's fur robes, fur coats, etc. They manufacture only fine goods, but in this line their warerooms are stocked with a large and handsome variety. Hardwaremen who are dealers in saddlery hardware of any sort will do well to communicate with this firm. They have an advertisment on page 77.

Don't maintain an obsolete and inefficient system of bookkeeping when the expenditure of a little money and the experience of a little inconvenience will secure one that is more modern.

MIXED PAINTS IN PASTE FORM.

THE Hollywood Paint Co., Limited, of Hamilton, is the latest addition to the list of paint manufacturers in Canada.

A visit to their factory reveals the fact that they are now actively engaged manufacturing and ready to secure their share of spring business. Their factory is equipped with the latest improved machinery, driven by electric-power, so that their methods of production are most economical, and place them on a par with their competitors. Their principal product is "Hollywood" mixed paint in a semi-paste form, in connection with which their manager, Mr. Norman S. Jones, says: "The painters throughout Canada have so often been induced to believe that the various brands of liquid paints submitted for their use were pure and made with the very best linseed oil only to find out later that they had been grossly deceived. Therefore, we decided to put on the market a semi-paste product of the very best lead and zinc, so that the buyer could purchase his own linseed oil and be satisfied that he was getting the very best. In this way the householder and practical painter knows beyond any question or doubt that he is getting the very best material for his money.

Their proposition to the consumer says "one gallon of pure linseed oil added to one gallon of 'Hollywood' mixed paint will give you two gallons of pure mixed paint." With their paints, The Hollywood PaintCo. give a five-year guarantee of durability and satisfaction, so that their offer to painters and consumers is certainly an attractive one. In addition to mixed paints, they will also manufacture colors in oil, driers, varnishes and everything that is used in the decoration of a house, except wall paper, glass and brushes.

Mr. Jones reports that he has secured from one of the principal producers of turpentine in the Southern States the Canadian agency for turpentine spirits, besides which their company has been appointed the exclusive agent for a number of European products greatly in demand by paint manufacturers

When paint dealers and others using paints consider the main points necessary to success in any undertaking at the beginning of the twentieth century—economy of production, high standard of quality, and a generous energy to do business, we feel sure that they will do well to communicate with The Hollywood Paint Co., Limited, for the sale of their products.

AN UP-TO-DATE HARDWARE STORE.

On page 13 of this number will be found cuts of the new hardware store of The Seybold & Sons Co. The old establishment was destroyed by the big fire of January, 1901. Their new store, which occupies the same place as the old one, is seven storeys in height, and contains all the latest and most approved facilities for handling the ever increasing trade of this up-to-date firm. Seybold, Son & Co. were established on March 17, 1870, and were incorporated under the style of The Seybold & Sons Co. on February 1, 1901.

Now that they are established in their new premises they are making a special effort to increase their trade, and are adding a number of new lines to their stock. The Seybold & Sons Co. extend a special invitation to all merchants interested in hardware to pay them a visit at their new warerooms and inspect their new stock and the improved arrangements for sample-rooms and the general working facilities to be found there.

A MANUFACTURERS' AGENT.

Mr. William Abbott, formerly of the Abbott & Co., rolling mills, Montreal, and latterly connected with the rolling mills in Belleville, has returned to Montreal and taken up the business of agent for manufacturers in those branches of iron and steel for which his long experience as a manufacturer has eminently fitted him. HARDWARE AND METAL wishes him every success.

WIDE DEMAND FOR STAUNTONS'.

Many dealers in wall papers are already running short in rich coloring effects because they did not forsee such a wide demand for these patterns. Stauntons Limited are daily having repeat orders come in for their richest shades and most effective designs, and are advising dealers who already have reduced stock to place orders at once while they are able to duplicate them. Stauntons' shipments are being made more promptly than ever this year—they are in first-class shape for making prompt delivery of all orders placed with them.

SHOULD READ TRADE PRESS.

At the recent meeting of the Kentucky Retail Hardware Association, the secretary in his annual report said: "With an increased membership and consequently a more satisfactory treasury, we think that much more can be accomplished in the future. I would particularly call attention to the advantages derived from reading one or the other of the really good trade papers published. The subscription amount is so small that any dealer can afford to subscribe. They contain much that is of value to the retail hardware dealer, and the labors can be lessened by the member being posted by such a medium."

In his annual address the president of the Iowa Hardware Association said:

"The trade journals we cannot commend too highly; they have a place to fill and serve their purpose well. No well-regulated store should be without them. They are an always welcome visitor, but they give us cold facts and figures in their application to our business."

Test the Quality with other brands

The "C" Brand Horse Nails are "hot forged" from the best material known or used in the world for making Horse Nails. It is a special quality of Swedish charcoal mild toughened steel made expressly for our Company. They are the best and most economical for the farrier to use. Order the "C" Brand—refuse substitutes said to be "just as good."

CANADA HORSE NAIL COMPANY, MONTREAL

HARDWARE AND METAL MEN DINE.

THE first annual dinner of the Montreal Metal and Hardware Association in connection with the Board of Trade was held at the Montreal Club on Thursday, March 13, and was a decided success. Mr. James W. Pyke, the popular president of the association, presided, with Mr. Wm. McMaster and Mr. George Caverhill in the vice chairs, and there were also present Messrs. Randolph Hersey, A. E. Hanna, H. M. Blaiklock, J. C. McCormick, J. B. Learmont, T. H. Newman, T. P. Bacon, Wm. Starke, J. R. Kinghorn, J. T. McCall, Fred Bacon, G. J. Crowdy, J. Stanley Cook, T. Chas. Davidson, A. H. Campbell, W. S. Leslie, T. L. Paton, R. Starke, and Mr. Peters, of Winnipeg.

After justice had been done to an excellent menu, the chairman made a few remarks and proposed the toast of "The King," which was loyally received. No formal list of toasts had been prepared and there were no set speeches, but in the course of the evening nearly everyone present was called upon either for a speech or a song, those contributing songs being Messrs. Blaiklock, Caverhill and Paton.

One of the chief features of the evening was the speech by Mr. William Starke in proposing the health of Mr. Newman, who is leaving on a well-earned holiday to Europe, via the Mediterranean. Mr. Starke, who is sometimes styled the "Nail Keg King," boasted of holding a unique position as a manufacturer, but his pride was punctured by Secretary Cook's explanation of the Latin derivation of the word "unique" signifying one-horse.

Mr. Randolph Hersey, the veteran among the manufacturers, but still hale and hearty, responded to the toast of "The Manufacturers."

Among other interesting items were Mr. Learmont's reminiscences of the early days of the old firm of Crathern & Caverhill, and general regret was felt at Mr. Crathern's inability to be present. Absent friends were not forgotten, and the announcement that Mr. W. W. Near, of the Pillow & Hersey Manufacturing Co., was soon expected home, fully restored to health, was received with pleasure.

A short time was spent in pleasant social intercourse before the gathering broke up and everyone agreed that a most enjoyable evening had been spent and that such occasions would foster greatly a fraternal spirit in the trade.

BORN TO THE HARDWARE TRADE.

D. H. Howden & Co., wholesale hardware, is the title of the new firm that opened out in London in January. The company comprises D. H. Howden, D. C. Johnston, J. A. Brown and J. V. Givins. They are thoroughly practical in the hardware lines, having been born into the business, so to speak, and are well known to hardware dealers in the west. They start in under most favorable auspices, with ample capital at their command, and their long and pleasant connection with the trade assures them success. They have secured admirable premises, large and spacious, and have a full and extensive stock of the latest and best lines on hand.

DEVELOPMENT OF THE ANCHOR.

IN the paper read before the Shipmasters' Society, at the London Chamber of Commerce, Eastcheap, recently, Capt. Anthony S. Thomson, C. B., dealt with certain stages in the development of the anchor, the object being to arrive at sound conclusions with regard to the functions of the different parts of an anchor, and the value of recent modifications. After dealing briefly with the earliest forms of anchors, grapnels, mushrooms, and the ordinary stocked anchor, the author went on to state that the ships' anchors in general use up to the beginning of last century consisted of a long, round iron shank, having two comparatively short straight arms or flukes, inclined to the shank at an angle of about 40 degrees, and meeting it in a somewhat sharp point at the crown. In large anchors the bulky wooden stock was built up of several pieces hooped together, the whole tapering outwards to the ends, especially on the after or cable side.

Continuing, the author said that about the commencement of last century a clerk in Plymouth naval yard, Pering by name, suggested certain improvements, the most important of which was making the arms curved instead of straight. At first sight, this simple change may seem of little value, but consideration will show that this is not the case. The holding power of an anchor depends on two principal conditions, namely, the extent of useful holding surface and the amount of vertical penetration. The latter quality is necessary on account of the nature of ordinary sea-bottoms, the surface layers of which are generally less tenacious and resisting than is the ground a short distance below. Now, the measure of penetration, and also, to a limited degree, that of useful holding surface, is the vertical distance from the lower portion of the shank to the pea, or extreme end of the arm, when fully buried. The distance evidently depends on the length and on the inclination of the arm. Some inclination the arm must have, in order to bring about penetration; yet, the more at right angles to the shank the greater the penetration.

These two opposing conditions are reconciled by curving the arm to the arc of a circle having its centre in such a position that the radius of the curve is about a third of the length of shank. Two minor advantages also accrue. During the process of tripping or breaking out the anchor, the buried arm continues its curved path in the ground until the shank is nearly vertical and the pea ready to emerge with the least possible resistance. The old-fashioned straight arm, on the other hand, retained a more or less horizontal direction in the ground, until the leverage derived from the effective length of shank became very much reduced. Again, with straight arms there exists considerable resistance to penetration, because the entire anchor must move longitudinally before the arm can bury itself; but with curved arms the weight alone of shank and upper arm suffice to bury the anchor in soft bottoms without longitudinal displacement. This last consideration, which has some bearing in the case of modern stockless anchors with two blades, was again referred to when dealing with the Martin's type of anchor.

In the year 1831 chain cables began to supersede the hempen ones, with the result that the long-shanked anchors hitherto in vogue were no longer necessary, and anchors with shorter shanks and with heavier and stronger crowns gradually came into use. In consequence of these changes, a commission was appointed in the year 1838 to inquire into the holding power of anchors, and a principal result of their labors was the adoption of the so-called Admiralty pattern anchor, which continued in the navy up to 1860. The invention of the steam hammer in 1842 made the welding of heavy masses of iron a comparatively easy and reliable process, so that from this time onwards the strength of anchors fully kept pace with that of the chain cables which had come into general use. A great number of patents for anchors were taken out prior to the great Exhibition of 1851, and public attention having been called to the models there shown, in the following year a committee was appointed by the Admiralty to report on the qualifications of anchors of the various kinds. Practical trials were then instituted, and, as a result, Trotman's anchor took the highest place out of eight competitors, Rodger's anchor being second on the list.

Some of the tests to which the anchors were submitted were of doubtful value, such, for instance, as "facility for sweeping." Nowadays, at all events for deep ships in shallow harbors, it is considered an advantage for an anchor to offer as little obstruction as possible above the ground. In this particular test, as also in some others of small importance, Trotman's anchor was handicapped as against those of ordinary form, yet it came out first owing to its undoubted superiority in holding power. The author then described the structure and qualities of the two anchors last referred to, which may be taken as types of the best stock dependent anchors. Hawse stowing anchors, the strength and weight of anchors, some experiences of tramp steamers dragging their anchors, and a sketch of recent developments of stockless anchors were also dealt with.

CANADA FOUNDRY CO.'S NEW WORKS.

FEW readers of HARDWARE AND METAL know that a large amount of money is being expended on a mammoth manufacturing plant situated at the head of Mackenzie avenue at the crossing of the C.P.R. and G.T.R. systems, in northwest Toronto. The property belongs to The Canada Foundry Co., Limited, and consists of 32 acres. It is bounded on one side by the northern branch of the G.T.R. to North Bay, and the main line of the C.P.R. crosses the southern part of the property. Sidings from both systems connect with the private tracks of the company, which include a mile and a quarter of line connecting the different buildings and erecting grounds. The company have their own locomotive, in order that manual labor in handling may be reduced to a minimum.

Before the plans for this important plant were completed, a party, consisting of the architect, chief engineers and executive officers of The Canada Foundry Co., Limited, visited the largest and best iron works in the United States, in order to obtain the latest ideas regarding the handling and working of structural steel in larger sizes and quantities than has ever been done in this country. The result of their investigations is now becoming apparent in the shape of numerous large buildings, showing their skeletons above the surroundings. These buildings are all fireproof, being constructed of concrete, brick and steel. The pattern vault is also provided with non-breakable glass windows set in metallic sashes, capable of resisting any fire. The accompanying cut shows the recently completed chimney, a magnificent piece of work standing 216 feet above the foundations. At the base is situated the power-house in which will be installed a large battery of boilers, steam engines, electric generators, etc. The motive power generally used throughout the building will be electricity, but hydraulic and compressed air lifts will be utilized for chipping, riveting, caulking, etc. Each building will be supplied with electric cranes and individual compressed air lifts will be installed wherever necessary. The buildings at present under construction are: Machine shop, foundry, structural iron works, blacksmith shop, power-house, pattern vault. To these will shortly be added an engineering and draughting building and pipe foundry.

The plant formerly operated by The Diamond Machine and Screw Co. has recently been purchased and is now being operated by The Canada Foundry Co., Limited, and during the summer will be moved and consolidated with all the other departments at the works on the completion of the new plant at Segeco, as the locality is to be called.

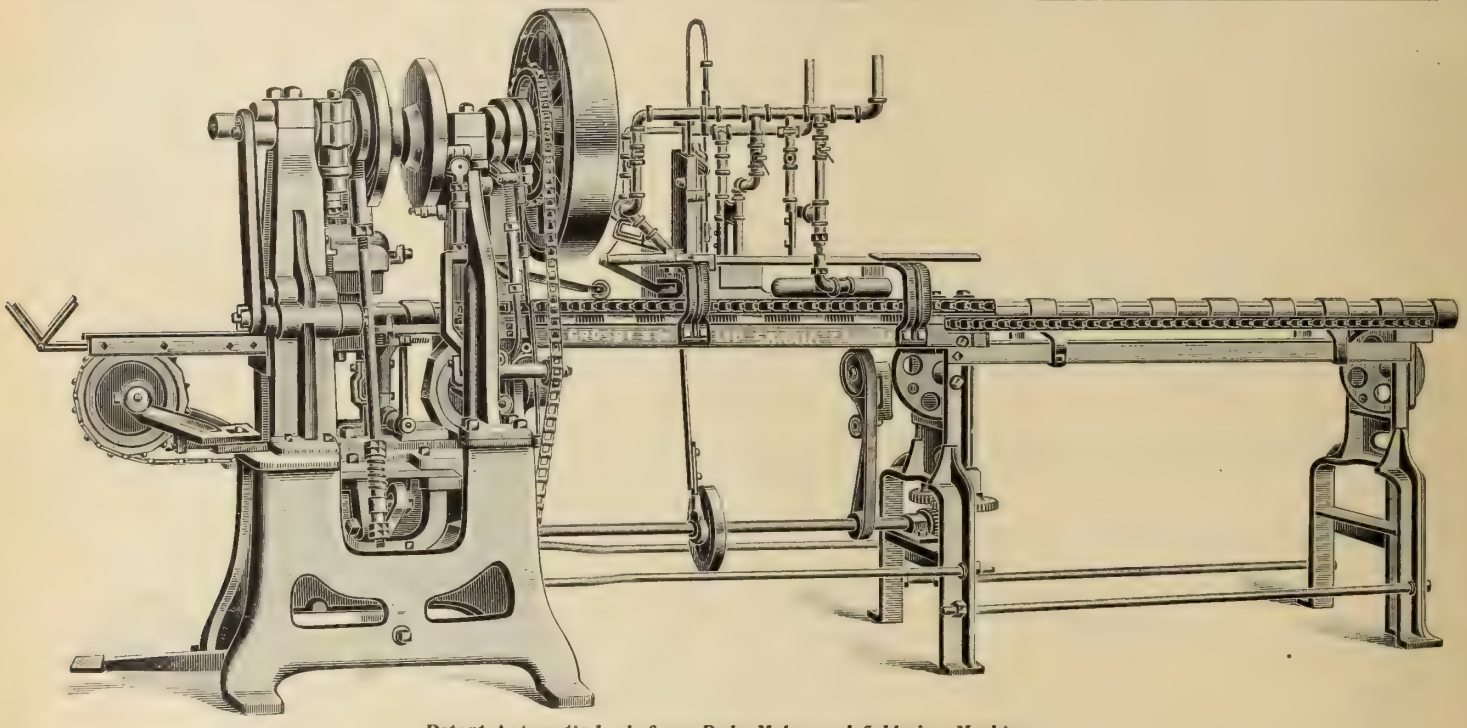
It is generally understood that The Canada Foundry Co., Limited, is controlled by The Canadian General Electric Co., Limited.

WHERE TO LEARN SHOP "KINKS."

To learn shops kinks, start a general repair shop with no capital, some ingenuity and a couple of second-hand machines, writes "The Mechanic" in Shop Talk. Take every job that comes along, and sit up nights figuring how spiral gears are to be cut in a lathe, how milling is to be done with a grinder, and various other things that will develop. Not only kinks, but tangles, will be among them.

When people come in and ask you if you can fix a sewing machine, a wringer, a baby carriage, an umbrella or a watch, tell them "yes," and take it, for if they are told a couple times that your shop is not just equipped for that particular job, they won't come with the next one, and the other fellow will get it. Do the work somehow, and you will find that the saying, "Necessity is the Mother of Invention," is true. Don't do the easy part of a job and turn the rest over to a shop with a larger equipment, for they will get the profit if you do, which is small enough on the whole thing anyway, and you will come out in the hole. By doing the hard part is just how to learn.

Start up a repair shop to find out how many impossible jobs are possible.



AN INGENIOUS MACHINE.

THE accompanying illustration shows the patent automatic lock seam body maker and soldering machine, which is manufactured by G. A. Crosby & Co., Limited, Sarnia, Ontario. It is one of the machines of their well-known automatic can making line, and which will produce from 30,000 to 36,000 can bodies, side seam locked and soldered, in a ten hours' run.

This machine is one of the greatest improvements of the age in can-making machinery. The body blanks are placed by an attendant on an automatic device which carries them into dies where hooks are formed in the ends of the bodies whence they are passing automatically to a forming horn where they are formed with hooks interlocked and seam-pressed down. They pass automatically to an automatic fluxing device, which places the flux (either liquid resin or acid as may be desired) on the seam in such quantities as may be needed and no more, so as to leave the body clean and neat after being soldered. The body is then passed forward to the soldering attachment, where a very ingenious device cuts from a wire of solder the exact amount required to make a perfect seam, applying the same into a crease. After receiving the solder the body is passed over a set of heating or sweating irons, causing the solder to sweat into the seam thoroughly, the same being wiped automatically, making it strong, clean and with less solder (all on the outside) than any other device yet invented.

The above company have for the past nine months been installing a plant at Point Edward, Ontario, which is strictly up to date in every particular. They are manufacturers of presses, dies and sheet-metal working machinery, especially machinery for manufacturing tin cans, either automatically or by hand.

Patent Automatic Lock Seam Body Maker and Soldering Machine.

AMERICAN VS. ENGLISH MACHINERY IN CHINA.

Apropos of the frequent announcements going the rounds of the newspaper press anent the capture of machinery orders by American firms in markets which the British manufacturer had dominated (certain identical reports being repeated "ad nauseam" in the same journals in different forms), it is refreshing to get a glimpse of other side of the question, and to find that one, at least, of the representatives of Great Britain's chief staple industry requires not the admonition to "wake up."

An old-established firm of English flour-mill engineers have just secured the contract for the supply and erection of a large flour mill on the most modern system in North China. More than one firm of American makers were competing for the work, and, although they claimed to produce by their process better qualities and higher percentages of flour, the English firm in question were able to satisfy the buyers as to the superiority of their machinery and its ability to produce qualities and percentages equal, or superior, to the Americans'.

This English house takes the contract at a price below any of the American houses, and has undertaken to ship the whole plant in 10 weeks from date of acceptance of order. The firm in question is Messrs. E. R. & F. Turner, Limited, of Ipswich, who, some months since, shipped a similar complete flour mill to China, the order for which was secured in competition with America.

ESTIMATES FOR INSTALLING MACHINERY.

WHEN the Canadian manufacturer is agitating for Canadians to patronize home industry by purchasing goods made in their own country, it might not be amiss if they would put their own theory into practice when contemplating any changes or improvements in their factory or new building, by employing a Canadian engineer. In this connection the Stanyon Engineering Co., McKinnon building, Toronto, is prepared to furnish designs and estimates for installing all kinds of steel works, rolling mills, etc. This is the firm who are at present entrusted with the installing of the plant of the big steel works of the Cramp Co. at Collingwood, Ont. They make a specialty of designing and installing steel works and rolling mills, rod mill plants, wire mill plants, galvanizing plants, nail factories, fence and barb factories; all mills built complete; hot rolled and cold rolled steel, power transmission outfits, elevating and conveying outfits, wire and wire products, furnace castings, etc.; special machinery designed and built for any purpose. Firms contemplating any changes along these lines will do well to write them. An advertisement appears on page 128.

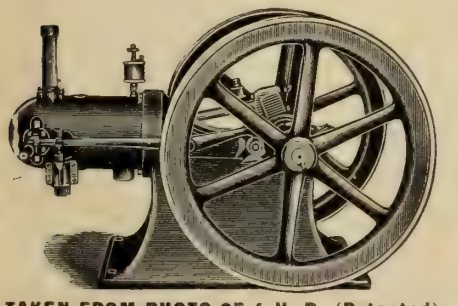
SUGGESTIONS TO ENGINE BUYERS.

A simple horizontal throttling slide-valve engine is to be recommended for low first cost, cheap fuel, small floor space, small operating skill required, medium or high speed.

A horizontal throttling compound slide-valve engine is to be recommended for medium first cost, fair economy, medium floor space, for pressures of 90 lb. and upward, small ability for operating, medium or high speed.—Shop Talk.

The New Departure in Iron Making in Great Britain.

From Iron and Coal Trades' Review.



IT is probably not too much to say that all the pig-iron makers in Great Britain are at the present moment looking forward with interest, not unmixed with anxiety, to the possibilities involved in the reconstruction of their existing plants, as typified by the fact that already one of the furnaces of the new order—that recently erected by the Millom & Askam Company—has approached the output of 300 tons per day, or at the rate of over 2,000 tons a week, against the hitherto general average of 800 tons per week, more or less, of furnaces using the same description of raw material. The reconstruction now being provided for by the Consett Iron Company, the Dowlais Iron Company, and Bolckow, Vaughan & Company—the largest concerns of their kind, and probably the most wealthy and influential in the United Kingdom—points to the conclusion that they have each and all satisfied themselves that this way safety lies—that they have discarded the old heresies as to the old system of having many furnaces in the place of a few, for the production of a given output, that were formerly inculcated at the meetings of the Iron and Steel Institute, and elsewhere, and have concluded that the "short life and the merry one" of the large-capacity furnace is the proper thing, after all. We hope shortly to be able to publish particulars of the new plants arranged for by these important firms. Meantime, we can but note that they will be on what are commonly known as American lines, with the typical American bosh, large blowing power, and mechanical arrangements suited to the conditions involved in handling an enormous volume of raw materials in a given period of time. We do not anticipate, of course, that the output of the new plants will ever reach the remarkably high levels of American records. It is not to be expected that British blast furnaces, using ores that range from 45 to 48 per cent. of iron, can ever be expected to reach the 700 tons per day, and upwards, which have been got from American furnaces using ores that assay 60 to 65 per cent. of iron in the dry state. But we do not doubt that furnaces can be, and will be, constructed in Great Britain that are able to produce from ores probably averaging about 47 per cent., quite 400 tons of pig per day, which is more than three times the average daily output of the present time; and we shall be surprised if the ambition of British ironmasters, and the guarantees given by their American advisers, stop much short of this record, while it is quite probable that it may be exceeded.

What, then, will be the relative competitive position of works that are content to go on "dragging their weary length along" with furnaces that produce 800 to 900 tons per week with hematite ores, and 450 to 650 tons per week with other ores? Will it not be found that the new furnaces are stronger to hold their own, in fair weather or in foul, than the older type? That is the problem that many of our leading furnace owners are anxiously seeking to solve at the moment. For these new furnaces involve a capital expenditure to which British ironmasters have hitherto been unaccustomed. The Millom Company's new furnace has cost that concern upwards of £65,000, whereas it has hitherto been considered that an expenditure of £30,000 per furnace was pretty liberal, and there are many furnaces now at work in Scotland and in the Midlands that have cost £20,000 per furnace, all elements of outlay included. One great question that the ironmasters are yet asking, and have been asking for many years past, is whether per unit of outlay the new furnaces will do any better than the old. Another is whether the new furnaces can reduce the labor cost at the furnaces much below its present figure at the best regulated plants of the older type? Both of these questions are likely before long to receive a much more definite and decisive reply than they have yet done in this country, where the only plants hitherto built with any pretensions to the adoption of American ideas are those of the Dowlais Iron Company, and one furnace at the Jarrow works of Palmer's Shipbuilding and Iron Company, both of which may now be regarded as getting obsolete from the American standpoint. It is clear, however, that whatever else may be in doubt the success of the new departure would be likely to mean the closing up, or the reconstruction, of many small plants that would find it difficult to compete under the new conditions. We would, therefore, strongly urge the owners of blast furnaces all over the United Kingdom to keep a watchful eye for the next few months on the movements and records of the firms we have named, and if the result of their policy should be—as it most likely will—to prove the necessity of a radical change, then to face the necessities of the situation with all the energy and enterprise that have made British industry what it has been, is still, and must remain in the future.

TESTING STRENGTH OF GLUE.

In making tests of the quality of glue, and the adhesive strength of joints made with the glue at different states of fluidity, a good test is to take two pieces of the wood being worked, 1x4 in. in size, and glue them together with a lap of 4 in. When "set" and dry, stand the block on end, and try to break the joint by striking with a heavy hammer, says The Wood-Worker. The fracture produced will determine if it is the glue or the wood that has let go, and will give a fairly correct idea of the strength of the glue used.

A by-law is to be submitted to the ratepayers to raise $100,000 for a waterworks and sewerage system at Edmonton, N.W.T.

THE ADVERTISING ARENA.

Illustrated Advertising.

IT is pretty generally conceded that illustrations are essential to the business of advertising, remarks an exchange. An illustration when used in accordance with the meaning of the word conveys an idea to the mind of the prospective purchaser much quicker than would a simple type argument But the trouble with much of our illustrated advertising of the present time is that it does not illustrate.

The meaning of the word "illustrate" is to make plain—to simplify, and unless the illustration embodies this meaning, it would be far better for the advertiser to depend altogether on plain type.

The main purpose of the illustration is to convince the reader that the article offered possesses merit. This is the main purpose. However, there are advertisers who think that pictures are used solely to attract attention, and believing this, they write their copy to fit the picture, whereas the picture should always be made to illustrate the copy. The copy is of primary importance. The picture is always secondary.

The best illustration is a picture of the article advertised. A man may be in need of a pair of shoes, and yet, when he picks up his paper to read the news, it's quite probable that he does not think of shoes at all. However, in reading the paper his attention is attracted by the picture of a shoe, which instantly brings to his mind the fact that he is in need of shoes, and as a consequence he reads the ad. and perhaps buys.

The text of the ad. and the illustration should have a close connection. It's quite impossible to do full justice to one's advertising when the cut used bears no relation whatever to the text. The illustration and the text should be very similar. The text should describe the article. The illustration should picture the description.

In the way of illustrations of the articles advertised the department stores are the most striking examples of the practice, but they are by no means as unique in this particular as they were.

A retail hardwareman who has for sometime been paying a good deal of attention to this kind of advertising is Russill, whose place of business is near the St. Lawrence market, Toronto. His advertisements appear in one of the evening papers, and Mr. Russill has found the results satisfactory. He gives time and thought to the preparation of his advertisements, and men with ideas who do this usually succeed. The accompanying cut is a reproduction of one of Mr. Russill's reduced one-half its original size.

The Advertisement as an Investment.

The advertiser who considers his money spent in advertising as an investment, usually succeeds in making it pay, because he treats this expense as an investment, conservatively and shrewdly, remarks The Mail Order Journal. He does not expect that every dollar spent in printers' ink will bring him back two, by the time the ink on the paper becomes dry. He is satisfied if at the end of the year a certain amount spent in advertising has increased the business over a year ago by 20 per cent., while if he has been so fortunate as to double his business, then he congratulates himself upon his good fortune. Among the successful advertisers to-day there are to be found few who have reached this point by a chance gamble in advertising. They have slowly climbed the ladder of success, round by round, by conservative advertising and increasing this investment each year, proportionately, as the investment has made their business grow.

A Retailer's Advertising Scheme.

Humphries' hardware store was established at Parkhill, Ont., in 1884, and is "still here in 1902." These facts are stated in the first number of the first volume of "Humphries' Hardware News: An Aid to Profitable Buying," which has been issued under date of March 1. On page 2 "The Man in The Sun" has something to say regarding mixed paints. The rest of the paper is taken up with advertisements and illustrations of the various lines of goods offered to the trade, all the way from axehandles and pig rings up to cream separators, bicycles and stoves. This is a unique way of advertising, and ought to bring good results.

Keep Right On.

The first few advertisements may not bring many inquiries, says an exchange, but, like the foundations of a building, they are fulfilling their purpose, even if they don't make much of a showing. Keep right on building and you will have an edifice of more or less value, according to the building done. Keep right on advertising. Don't be discouraged because the foundations don't show up very much compared to what you expect the ultimate result to be. If the advertising is well done and in the right medium you are just as sure of having a well-built business as the builder is sure of having his house completed when the necessary expense and work are put into it.

Don't Be Unduly Strenuous.

While there is no particular virtue in writing an advertisement on a milk-and-water plan, neither is there anything gained by giving it so much enthusiasm that it will fairly consume itself, says an exchange. Folks rather like to supply some of the information themselves. It is human nature for the average reader to give a fact, plainly put, a coating of extra strength in his own mind. When a man reads an advertisement that strains and does its level best to convince him, that man generally takes it with a pinch of salt, He would not be human if he were otherwise. But, if the advertisement is laid along dispassionate lines, giving its arguments calmly and truthfully, without undue agitation, the reader does not feel called upon to argue against it, because the feeling does not lay hold of him that that advertisement is working to win him over in spite of himself.

It pays to buy the best.

In soliciting your business for the season of 1902 we would again draw your attention to the high position attained by the "Plymouth" Binder Twine.

As the Plymouth Co. exercise great care in the selection of fibre, and use none but the best, their brands of twine are **unexcelled for quality, length, evenness and strength.**

It is manufactured under a most thorough system of inspection and by the best machinery in **the world.**

Every ball of their Twine guaranteed to be just what we say it is.

PLYMOUTH BINDER TWINE AGENCY

Aberdeen Chambers, Toronto, Canada.

AN UP-TO-DATE BUILDING.

IN JUNE, 1898, The Fairbanks Company, of New York, decided to open a branch house in Montreal to handle their Canadian trade. Mr. Henry J. Fuller was appointed manager of the Canadian business. This gentleman was ably fitted to fill this position, having been assistant superintendent of the scale works in St. Johnsbury, afterwards connected with the Albany house, and finally holding a responsible position in the New York office.

They opened a warehouse in Montreal at 749 Craig street, four flats and a basement. In 1900, these premises proving insufficient for the large stock, a larger warehouse on St. Peter street was taken to be used as a scale warehouse and repair shop. Again, in January, more room was required, and a large warehouse next to the Craig street place was secured. The two buildings were turned into one, and to-day make one of the finest and most roomy supply houses in Canada. The accompanying illustration shows the premises as they are to-day. The lower floor is occupied by the showrooms, general offices, and the manager's office; the fittings in each being most modern and handsome, antique oak, plate glass and wrought iron playing a prominent part in the fixtures.

The other floors are given up to scales of every description, trucks and barrows. The valves, pipes and fittings occupy two entire floors.

This enlargement gives something over 24,000 square feet of floor space.

The large stock of iron pipe is stored in separate sheds, apart from the main buildings.

The showrooms are most complete, showing a full selection of the large and varied line carried by this company. We can safely promise the trade a warm welcome if they drop into The Fairbanks new quarters any time they may be in Montreal.

EMERY STONE IN GREECE AND TURKEY.

THE Island of Naxos, embraced in the Greek Archipelago, is situated about 100 miles southeast of the Piræus. Its inhabitants are supported almost entirely by working the emery mines, of which there are two. The Greek Government is the owner and proprietor of these mines, but they are worked exclusively by the natives of the island. The Government, according to an United States consular report, has entire charge of the sale of the ore and buys the crude product from the Naxos miners at 2½ francs (48 cents) per cwt. of 112 lb. The ore is transported to the neighboring Island of Syra at Government expense, and is there sold on the wharf at 106½ francs ($20.55) per French ton of 1,000 kilograms (2,204.6 lb). Two years ago an American company attempted to secure a monopoly of the industry and made an offer to the Greek Government to buy 7,000 tons per year for 10 years at 106½ francs ($20.55) per ton, but for some reason the arrangement fell through. The total annual consumption of Naxos emery is from 5,000 to 6,500 tons. Of this, the United States takes 1,500 to 2,000 tons, and Europe from 4,000 to 5,000 tons. The Naxos mines have never been leased.

Turkey has many emery mines scattered along the coast of the Mediterranean and nearby islands. Those of importance in the neighborhood of Smyrna are at Baltizik, Azizieh, Cosbounar, and Kuluk. Some of the Turkish mines are the property of the Turkish Government, but many of them are owned and operated by local companies and by single individuals. The total annual exports of Smyrna emery stone range from 17,000 to 20,000 tons, of which 10,000 tons go to America and the balance to Europe. The corundum found in the Turkish emery stone varies from 40 to 57 per cent., with the exception of Kuluk stone, which is said to contain about 37 per cent. Corundum in the Naxos stone is reputed to run as high as 60 per cent. The prices of Smyrna stone vary with the quality from $14 to $20 per ton f. o. b. Smyrna I am creditably informed that no emery can be produced f. o. b. Smyrna for less than $12.50. The Kuluk stone is shipped from the port of Kuluk, and is brought down from the neighboring mountains by camels. This stone is quoted f. o. b. Kuluk at $10 to $12 per ton. Turkish stone is not "treated" after leaving the mine, except by hand picking; it is never washed or crushed.

KILLS 75,000 ELEPHANTS YEARLY.

Antwerp has within the past 14 years developed into the most important ivory market in the world. A few years ago only 12 tons of ivory were imported into Antwerp from the Congo Free State, but to-day the trade has grown so greatly that over 200 tons are yearly disposed of in the ivory market.

About one-half of this comes from East and West Africa, in nearly equal proportions, the rest being divided between South Africa, Egypt, India, and the fossil ivory, which comes from Siberia, the tusks of extinct mammoths.

This increase in supply has not prevented a still larger increase in prices, and at the last Antwerp sale teeth which were valued at £30 per cwt. brought £54, an increase of about one-half; and all grades rose correspondingly.

A famine price for ivory is tolerably certain before long. The present supply destroys from 30,000 to 40,000 elephants in Central Africa, and about 75,000 the world over.—Answers.

INCORRECT ADDRESSES.

Amongst the signatures to the Imperial Varnish and Color Co.'s testimonial on page 65 of this issue, there are a few incorrect addresses to which attention should be drawn. Thomas Beattie is a well-known merchant in Norwich, Ont., not Napanee. G. A. Binns does business in Newmarket and not in Norwich, while William Clark and Madole & Wilson are in Navan and Napanee, respectively.

AGAIN RUNNING FULL BLAST.

IF any have become possessed of the idea that the Menzie Manufacturing Co.'s business is at a standstill by reason of the recent disastrous fire, which wiped out their big factory, let them go out to what was formerly their warehouse and there they will find a factory running full blast. Then let them go up to the corner of Hayter and Teraulay streets, Toronto, where they will see the factory formerly occupied by the Cobban Company equally busy turning out goods for the Menzie Manufacturing Co. The warerooms will in future be in the big four-storey and basement building at 61 and 63 Front street west, formerly occupied by the Gutta Percha and Rubber Co. This is a permanent move. The offices will also be moved there in a few days from Bay street.

The occupation of the Front street building for warerooms will be advantageous in many ways, especially to the firm's customers. The company is reaching out more than ever for business, and is getting it, too. After the fire, not only were all the travelling salesmen kept on their routes, but all who were in the city were at once sent out, and the business is going on without interruption. Eight days after the fire manfacturing was being carried on as usual. As may be imagined, this entailed a stupendous amount of work, and only serves to show the resources and energy of this concern.

The factory at the corner of Hayter and Teraulay streets is turning out art furniture, woodenware, etc., while the manufacture of cloth is going on at the other factory. This arrangement will continue until the completion of the new factory, which will occupy the site of the burned building.

The new factory will be larger and in every way superior to the old one. There will be an additional floor space of 25,000 ft., bringing the total up to 85,000 ft., or about two acres, covering more space than any two blocks in the city.

The foregoing will serve to show that even a fire of the proportions of that of several weeks ago cannot check a business so strongly organized and well conducted as that of the Menzie Manufacturing Company. It is a concern which this city may well pride itself upon being able to claim amongst its various industrial concerns.

THE DEATH OF MRS. BIRKETT.

After a long illness, Mrs. Birkett, wife of Thomas Birkett, M.P., of Thomas Birkett & Son Co., Limited, wholesale and retail hardware merchants, Ottawa, died on Thursday, March 13. Owing to her illness, the deceased's death was not unexpected. Besides her husband, Mrs. Birkett leaves two sons, Dr. F. W. Birkett and T. M. Birkett, all of whom live in Ottawa. HARDWARE AND METAL extends its sympathy to the mourners.

The Carberry Acetylene Gas Co., Carberry, Man., were burned out.

SKATES IN ENGLAND.

Opportunities for skating being much more frequent in Holland than in England, writes "Vulcan" in Ironmonger, it is not surprising to be told that blade-skates were introduced into this country from the Netherlands. Evelyn, in his diary, under date December 1, 1662, mentions that "divers gentlemen performed before their Majesties on the new canal in St. James' Park with 'scheets' after the manner of the Hollanders." Twenty years previously, however, a skating-club had been started in Edinburgh, so that even in this small matter the progressive Scot seems to have shown the way to the less adventurous Southron.

HOW TO MAKE FOOT-WARMERS.

Notwithstanding the advances made in the method of heating buildings from the time of Benjamin Franklin's open stove, the foot-warmers of his day are still in demand by those who have occasion to drive teams during the severe winter weather. Having seen a suggestion in The Metal Worker a few years ago that a tin vessel, arranged with a can screw for filling and emptying, and of a suitable shape to be used in a wagon, could still be sold by the enterprising tinsmith as a foot-warmer, I decided to make up some of these articles last fall, and am pleased to report that they have met with a good sale. Hot water for filling them can be had not only at the start of the journey, but, in case of necessity, at any house along the road, and if the foot-warmer is made to hold a sufficient quantity, and is wrapped up in a blanket, the heat given off will add substantially to the comfort of the driver for a long time. I have made these foot-warmers of one and two cross tin, according to their size, and in size 10 in. wide on the bottom, and from 14 in. to 2 ft. long. I formed them slanting on the top, so that they would be 1½ in. high on the front, and as much as 5 in. on the back. I was careful to secure large can screws, so that they could be readily filled from a teakettle. In the larger and longer sizes I soldered braces on the inside before putting on the ends, which were double seamed on. — B. Woods in Metal Worker.

Special Notice to Advertisers.

ON account of Friday, March 28th, being a Statutory Holiday, HARDWARE AND METAL will be issued one day earlier than usual. Will advertisers kindly note that all advertising copy, instructions for change of matter, etc., must reach us on

TUESDAY, MARCH 25th,

in order to take effect?

THE PUBLISHERS.

THE TRADE JOURNAL.

Individuality in journalism has attained its most surprising results in trade papers. People are seeking more technical information, and while they skim hurriedly over the great dailies for the news of the world, they study the technical paper for more vital references to their own immediate business and concerns.—Charles H. Bergstresser, Wall Street Journal.

DECORATION IN METALS.

"One of the most noticeable tendencies in interior decoration just now," said an architect to the representative of an exchange, "is to introduce the metals, especially copper, to take the place of wood and plaster. Closets, doors, panels, jambs between ranges of small windows, ceilings and cornices are more and more being made of copper and compositions in which copper is used, and, with the constantly-increasing means of cheap production and working of metals, this practice is likely to extend still further.

"Frequently, now, metal is being used as the outer casing for woodwork, and the the result is both original and highly decorative. Besides this, the metals are used in grills in and about fireplaces and in moldings to enclose marble and tile linings.

"The extension of the electric light first created a demand for light hand-wrought fittings in metal, and from that the use of that material extended quickly to fire screens, stands, trays, flower and lamp standards, and to all the hundred-and-one small objects that crowd the modern drawing-room. From these to the room itself was an easy transition.

"But the demand that everything about a modern high-class dwelling shall be fireproof is a factor which has helped to push metalwork along to take the place of wood. The time is coming when the use of the latter will be reduced to a minimum in a fine house."

HE WANTED A DOG'S MUZZLE.

"I want to get a muzzle," said the crabbed man, entering a hardware store.

"Like this one, sir?" said the clerk, exhibiting a certain pattern.

"Oh, my, no! That would hold the mouth too tightly shut."

"I just sold one of them to a woman, sir."

"Well, it would be all right for a woman, young man; but I want mine for a dog."

"WHAT'S IN A NAME?"

"I believe that I may say that I was the first person to employ a chemist in connection with a blast furnace. He had to be made in Germany, too. We paid him the enormous sum of $1,500 a year. Our competitor firm ridiculed our chemist. But we got a rich revenge. For one thing, there was the matter of ore. Ore was classified by name. If you have got a good name you can do almost anything and nobody will suspect you. Young men, bear that in mind. If you are in the hat business, for instance, and your hat has got a good name you can charge a dollar for the hat and a dollar for the name."—Andrew Carnegie.

Remember that advertising will accomplish wonders, but it won't create a continuous demand for a poor article.—Salt Lake Tribune.

MANITOBA MARKETS.

Winnipeg, March 17.

THE week has witnessed very active trade in almost all lines of hardware and all the jobbing houses are very busy getting out spring shipments.

The only change in hardware prices has been the advance on harvest tools. The discount is now 60, 10 and 10 per cent., as against 70 per cent. Higher prices are looked for in metals in the near future.

Price list for the week is as follows :

Barbed wire, 100 lb	$3 30
Plain twist	3 40
Staples	3 95
Oiled annealed wire No. 10	3 85

WINDOW-GLASS MANUFACTURE IN JAPAN.

After some discussion in the Japanese Diet in regard to the promotion of window-glass manufacture in Japan, the Government has decided to establish at the industrial experiment station a model factory, or technical school, for training workers in window-glass manufacture. Japan, according to the United States Minister at Tokyo, affords the necessary materials for this industry and the cheap labor, but lacks the skilled artisans necessary to make it a success. All of the window glass now used in Japan is imported and the market is an increasing one, since it is used for buildings of both foreign and Japanese style. The importation of window glass in 1899 was valued at 1,250,000 yen ($625,000). Belgium furnishes the greater part of this import. It is estimated that a box of glass which now costs, imported, 7 to 10 yen ($3.49 to $4.98), would, if made in Japan, cost about 5½ yen ($2.75). It is expected that the factory, for which money will probably be appropriated at the next session of the Diet, will be working in a year, and in the course of two or three years will be able to supply enough skilled Japanese artisans to carry on the work in private factories. In the meantime, one or two Japanese have been sent to Germany to study the art; but it is probable that foreigners will be employed to teach methods, assist in the selection of machines, and in other arrangements for the plant.

VICTORY FOR THE S.W.P. TEAM.

An interesting hockey match took place in the Victoria rink, Montreal, on March 14 last between teams representing the Canada Paint Co. and the Sherwin-Williams Co. The game, which was well contested, resulted in a second victory for "S.W.P." by three goals to one. In view of the successful season their rivals have just closed, this win speaks well for the hockey club of the Sherwin-Williams Co.

INCANDESCENT GAS LIGHTS.

The United Incandescent Light Co., Toronto, manufacturers and dealers in incandescent light supplies of all descriptions, make a specialty of lighting churches They have just fitted out the schoolroom of the Westminster Presbyterian church, Bloor street east, Toronto. Among the other churches in Toronto which this company has fitted out with its "Gloria" light are the following: College street, Dovercourt Road, First Avenue, Baptist; St. Stephen's, St. Ann's, St. Luke's, St. John's, Church of the Epiphany, Anglican; Euclid Avenue, Methodist; Erskine, Bonar, Presbyterian; and Church of God.

Plumbers and hardwaremen in towns and cities where gas is used might find it to their advantage to place themselves in communication with the United Incandescent Light Co., 7 Yonge street arcade, Toronto.

THE PROPRIETOR'S STORY.

ALABASTINE we have been selling nigh on to twenty years, and know it to be reliable.

We dealers also know that Alabastine is what is in demand, and that to sell anything else for coating walls, we would have to do so on the recommendation that it was the same thing, or just as good as **ALABASTINE.** Would not offer a substitute when Alabastine is called for; no necessity to do that, as it is easier to sell Alabastine, and in handling it we do not incur any risk on account of infringement of patents.

Alabastine is ready for use by the addition of Cold Water, made so by the inventor, Mr. M. B. Church, who was the first to produce a cold water preparation that is thoroughly practical, that has superseded all hot water mixtures, and forced other manufacturers to **UNDERTAKE** the use of the cold water process. Then, again, Alabastine is made in Canada, by Canadian labor and from Canadian materials. It satisfies my customers.

The trade supplied by Wholesale Hardware and Paint Dealers. Also by

The Nova Scotia Steel & Coal Company.

A Brief Sketch of a Great Enterprise.

IN the rapid development that is taking place in the iron and steel industry of Canada, the new enterprises are by no means absorbing all the attention. During the last 12 months or more the Nova Scotia Steel & Coal Co., Limited, has been very much in the public eye.

What is to-day known so well as the Nova Scotia Steel & Coal Co., Limited, had its origin 30 years ago in the Hope Iron Works, afterwards the Nova Scotia Forge Company The Hope Iron Works began business in New Glasgow in 1872 and employed less than a dozen workmen. The business of the company was the manufacture of railway and marine forgings, and the works were located in the centre of the town.

As the business continued to expand, it was found advisable, owing to the lack of water and the difficulty of securing room for the needed extensions, to remove the works to their present location. The change was made in 1878, and during the next few years considerable extension took place. The raw material used during the first 10 years consisted entirely of wrought and scrap iron. But a change was going on in steel production, and mild steel began largely to replace wrought iron for car axles and general forge work. This suggested the advisability of making steel from imported scrap steel and pig iron, and after a careful survey of the situation, the managers decided to embark in the new enterprise. The Nova Scotia Steel Company, Limited, was organized in April, 1882, with a capital of $160,000, for the purpose of manufacturing steel by the Siemens-Martin open-hearth process. Upwards of a year was spent in the construction of the works and the first steel ingots were cast in August, 1883. The original forge company became a large buyer of steel ingots and billets from the new concern, which was in turn dependent on the forge company for repairs, machine work, and the important parts of its general plant. The natural dependence and community of interests led to the amalgamation of the companies, which was accomplished in 1889, the joint enterprise being known as the Nova Scotia Steel and Forge Company, Limited.

It was not long before the amalgamated concern came to the conclusion that it was not advisable to be dependent on foreign producers for scrap steel and pig iron. There was an opening for a new enterprise in the substitution of pig iron for scrap steel as the basis of the raw material. The construction of blast furnaces for the production of pig iron on a sufficiently-large scale would involve the expenditure of $500,000, exclusive of mining properties and the operation of iron mines, and a section of the directorate was unwilling to assume the risk involved in undertaking so extensive a project. A new company was formed, known as The New Glasgow Iron, Coal and Railway Co., Limited, with an authorized capital of $1,000,000. This company acquired, by purchase and lease, control over sufficient iron deposits to warrant the establishment of a modern blast furnace of large capacity, and proceeded to build railway connections between the iron and lime deposits and the Intercolonial Railway at Ferrona, about six miles south of New Glasgow. The construction of the blast furnace and the coal-washing and coking plant was carried forward at the same time, and the whole was finished with a thoroughly modern equipment and ready for operation in 1892. The first blast was blown in on August 6 of that year, and the furnace and other plant were operated under the management of the new company until December, 1894.

The old amalgamated company was the chief consumer of the pig iron produced by the new company, and the obvious community of interests suggested the advisability of another consolidation. The change

BOECKH'S STANDARD BRUSHES

BRYAN'S LONDON BRUSHES

CANE'S NEWMARKET WOODENWARE

Hold the highest reputation in the Canadian market to-day. They are the sort that sell—the best materials put together by people who know how. Goods that give the widest margin of profit to the dealer and greatest amount of satisfaction to the purchaser, well illustrating the fact that quality is the true test of cheapness.

BRUSHES. Artists' Brushes; Painters', Varnishers' and Kalsominers' Brushes; Toilet Brushes; Household, Machinery and Factory Brushes; Horse and Carriage Brushes, etc. Ten thousand different sizes and styles—a brush for every known use and each one fully guaranteed.

BROOMS AND WHISKS. All corn for Boeckh's Brooms and Whisks is specially selected. Buying direct from the growers enables us to quote lowest market prices consistent with high-grade quality and best workmanship.

BOECKH'S BAMBOO-HANDLED BROOMS. Labor-Lighteners—none can equal them as trade-winners—they please those who want the best.

STABLE BROOMS. Bass, Extra Bass, Rattan, Cane, Split Cane, etc.—quality clear through—special brooms made to order for street sweepers, Breweries, etc.

FEATHER DUSTERS. Turkey Feather Dusters, Hemp Dusters, Wool Dusters, Barbers' Dusters, Hearth Dusters, etc.—a large variety and the best of each kind.

PAILS AND TUBS. Made from the best materials and stock obtainable—noted for their wonderful durability—a triumph of worthy goods and ready sellers.

WASHBOARDS. All the latest improved styles—best quality of zinc used—boards that will last and give satisfaction.

CLOTHES PINS. Loose or in 4 or 6 doz. packages—all selected, perfect pins—guaranteed full count—most value for least money.

SCREEN DOORS AND WINDOWS. Cane's Window and Door Screens have long proved their leadership as the most complete on the market.

BUTTERWARE. Barrel Churns, Ash-Dash Churns, Butter Dishes, Bowls, Paper, Spades, Ladles, Moulds, Prints, Stamps, etc.—a wide range that keeps to the front.

KITCHENWARE. Washers, Wringers, Self-wringing Mops, Bake Boards, Rolling Pins, Picnic Plates, Spoons, etc. Extra good values in this line—a wide variety.

STEP LADDERS. Made of clear Norway Pine—as light as consistent with safety and durability—the right kind to handle.

COCOA MATS. Extra Brush Edge, Skeleton, Fancy, Wool Border, Plain, Reversible, Rush and Corn Mats, etc. A peerless line of ready sellers. Special Mats made to order for Churches, Public Buildings, etc.

BASKETS. Butter Baskets, Market, Hampers, Clothes, Linen Hampers, Grocers' Delivery, Waste Paper, etc. Values that will answer every purpose.

CORDAGE and TWINE. Clothes Lines, Halters, Plough Lines, Ropes, Twines, etc. Goods that pay the manufacturer to make, the dealer to handle and the purchaser to ask for.

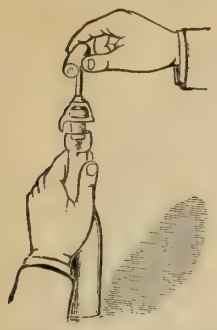
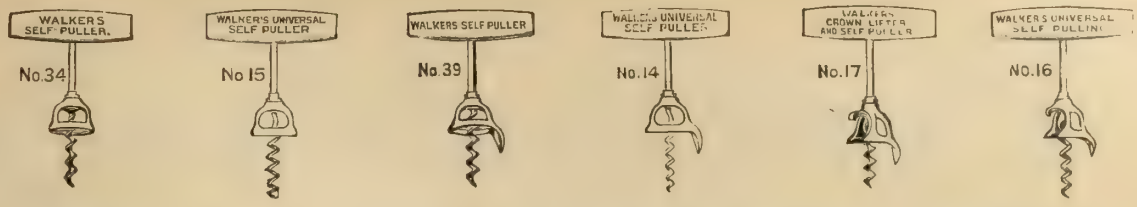
was along the natural course of producing, instead of buying, another line of raw material, and getting one step nearer to nature's bounty as a source of supply. From purchasing scrap iron the managers had turned to digging ore, coal and limestone from quarries and mines. The amalgamation of the two companies was effected in January, 1895, by the organization of The Nova Scotia Steel Co., Limited, which purchased outright the entire interests of both. Thus the old concerns, under a new name and a single directorate, continued to operate the varied and extensive enterprises that had been established, making important additions and improvements from year to year. The new company continued to operate the iron mines at Bridgeville, Pictou County, which, with the lime deposits, have a standard gauge railway connection with the smelter site and the Intercolonial line, also the steel works at New Glasgow, comprising three Siemens open-hearth melting furnaces with a total capacity of 70 tons per day, together with mills, forges and plant necessary for the working of the product of these furnaces. There was also operated by the company a coking plant of 54 retort coke ovens, capable of producing from 115 to 120 tons of first-class coke per day, the output being all used in the blast furnace of the company. An important feature of the enterprise was the coal-washing plant, put in operation in 1892, the first of its kind in America. The coal as mined contains from 17 to 25 per cent. of ash and 2 per cent. of sulphur, and it is desirable to reduce these to the lowest possible ratio. The washing process brings down the proportion of ash to 10 per cent., and reduces the sulphur to 1.35 per cent. According to a statement issued in January, 1897, the cash employed in the undertaking was $1,564,116, and it was necessary to make large expenditures on the plant every year, to keep abreast of the times in every department. The amount expended on new plant during the previous year (1896) was $159,097. The quantity of raw material of all kinds used during that year had grown to 181,778 tons, with a total cash value of $345,580, while the wage bill had grown to $227,669.59. The present wage bill of the company in all branches is $430,000. The total freight bill paid by the company during 1896 was $132,663, of which the Intercolonial received $90,000. The present freight bill is $160,000 per year, of which the Government road receives about $140,000.



This does not complete the history of the company's growth by consolidation. The greatest achievement of all was accomplished in 1900, when it bought out and took over the property of the General Mining Association, which has itself a most interesting history. The new corporation thus brought into existence is The Nova Scotia Steel & Coal Co., Limited, whose shares have lately been attracting so much attention on the market. The General Mining Association, which has ceased to exist as a body corporate, was organized in 1825, and at that time took over the lease of extensive coal areas in Nova Scotia, held by the Duke of York, brother of George IV.



After taking over the property of the General Mining Association, began the construction of important mechanical works at Sydney mines. The first of these was the erection of one of the most modern coal washing and coking plants in the world. The coal washing plant consists of crushing house, 30 feet x 50 feet, containing shaking screen, one coarse and one fine crusher; two steel bins, 41 feet in diameter, lined with extra hard-burned brick and cement mortar and having a storage capacity of 3,000 tons of coal. The coal washer proper is 30 feet x 140 feet, and contains one 150-h.p. rope drive engine, steel shaking screens, scraping conveyors, elevators, jigs and

cement tanks. There is also a special bin into which the washed coal may be elevated and loaded directly into railway cars for shipment to Ferrona, for use in connection with the battery of 54 Bernard retort ovens.

The coking plant consists of 30 ovens, 40 ft. long x 7 ft. high, with an average width of 20½ in., having a capacity of 12 to 14 tons pressed coal per oven, or about 375 tons of coal per day, and from 250 to 275 tons of coke when working on the 24-hour system. The oven is known as the Bauer patent, which is the latest invention and most recent design in retort coke ovens. This is the first plant of the kind in America.

At a meeting in New Glasgow two weeks ago between Mr. Graham Fraser, the managing director of the Nova Scotia Steel & Coal Co., Limited, and representatives of North Sydney, it was decided to locate the new blast furnaces of the company at Sydney mines. The company will proceed at once with the erection of one furnace, the others to be added as soon as practical.

At the annual meeting of the directors of the Nova Scotia Steel & Coal Co., Limited, in Montreal a few days ago, it was shown that the profits of the company last year were $508,936. A dividend of 8 per cent. was paid on the preferred shares, and of 4 per cent. on the common shares.

CATALOGUES, BOOKLETS, ETC.

AN ATTRACTIVE HANGER.

HANGERS advertising the Oxford Economy gas range are being sent out by the Gurney Foundry Co., Limited, Toronto. These are neatly illustrated with a cut of the range, and on either side are appropriate mottoes in colored type: "The World's Best," "No Back-Breaking Contortions Necessary," "Up to the Minute." In green letters the name of the range appears above.

SPORTING GOODS CATALOGUE.

Two new catalogues and price lists have been recently issued by John Millen & Sons, which should be in the hands of every retailer. They are both well printed and handsomely gotten up. In the first of these catalogues it will be seen that several new lines have been added to the stock, while specialties are made of firearms, fishing tackle, etc. Keys are illustrated in a very great variety of shapes, sizes and prices. But perhaps the chief interest in the catalogues centres in the bicycles and bicycle parts and materials. This is a line of goods in which it would be hard to excel this firm, either in the quality of their wares or the variety. They have long made it a specialty and have brought it about as near to perfection as possible. The very latest devices and improvements in every part of the machines may be seen here, and all at prices that, to say the least, are very reasonable. These are two of the finest sporting goods catalogues issued in Canada and will be appreciated by the trade. There is no better place for selecting a line of sporting goods for the season than from these catalogues, and now is the time to do it.

A VALUABLE PRICE LIST.

From Warden King & Son, Limited, Montreal, comes a most complete little catalogue of soil pipes, fittings, etc. Some 35 pages are devoted to illustrations and prices of their soil pipe fittings, all grades and sizes being fully described. The miscellaneous goods following include steam heaters, bath heaters, hot-water heaters, stable fittings, circular stairs, ventilators, grates, sinks, etc., covering a range of articles in a more complete form than usually can be done by one house. An index at the back renders it easy to find any desired article. This catalogue will be valuable to hardware merchants for several reasons, and were it only for the price list it is worth dropping a card to the firm for.

Tenders are being invited for the erection of an eight-roomed stone and brick school, Smead-Dowd system, at Carman, Man. Particulars may be obtained from T. Bruce, Carman.

Special diameters, 20 per cent. advance over nearest standard size.

Special gauges, 20 per cent. advance for each gauge thinner than standard.

The discount is 33⅓ to 35 per cent.

MACHINE SHOP AMALGAMATION.

There has been a good deal of competition and cutting of prices between various machine shops at Vancouver, B.C., which has caused money to be lost that might otherwise have been gained. So there is a plan on foot providing for the amalgamation of the Albion Iron Works, the Vancouver Engineering Works and several other machine shops of Vancouver into one corporation. R. Seabrook, of the Albion Iron Works, is endeavoring to bring this about.

A FRESH SCHOOL OF WORKMEN.

Mr. Willis Mitchell, of Jas. Cartland & Son, Limited, Birmingham, Eng., is visiting Canada again in the exclusive interests of his firm. His many friends in the Dominion are glad to see him and give him a hearty welcome after an absence of two years, during which Mr. Mitchell has made his usual visit throughout Australia, New Zealand, etc., and many other places in Europe.

He is much opposed to the idea expressed by the opponents of British trade that English-made goods are not wanted in this market. He insists that during the past few years English makers, as a rule, have grown a "fresh school" of workmen, who are up to date as to the altered styles and requirements demanded by the colonial markets.

Mr. Mitchell considers that increased enterprise on the part of English manufacturers generally, coupled with the hearty cooperation of their workmen, and assisted by representatives who are thoroughly and practically acquainted with the various methods and costs of manufacturing the goods they offer, will enable them to uphold the old-time saying, "By test our goods are best."

Mr. Mitchell is at present staying at The Queen's Hotel, Toronto.

PERSONAL MENTION.

Mr. G. H. Karstedt, of Georgetown, Ont., was in Toronto this week.

Mr. J. J. Medcalfe, hardware and tinware merchant, Shelburne, Ont., was among the outside merchants who visited Toronto this week.

Col. Gartshore, vice-president and manager of The McClary Manufacturing Co., Limited, London, was in Toronto on Thursday.

Mr. Thomas Davidson, of The Thomas Davidson Manufacturing Co., Limited, Montreal, spent a day or so in Toronto this week.

Mr. Robt. Belfit, son of the managing-director of George Butler & Co., Trinity Works, Sheffield, is in Toronto this week. It is not many months since this gentleman called on his firm's customers, as Mr. Belfit travelled this territory during the fall of last year.

Mr. Harry Martin, of Aberdeen, Scotland, representing The Aberdeen Horn Comb Co., Limited, is making a tour of Canada in the interests of his firm. He carries a great many new samples of their varied manufactures, which are now known world-wide. He is at present staying at the Queen's Hotel, Toronto.

NEW PLOUGH FACTORY.

As a result of negotiations between the Council and Board of Trade of Paris, Ont., and F. Wraid, of Syracuse, N.Y., a large factory for the manufacture of ploughs, drills, etc., will soon be in operation at that town. A company with a capital of $250,000 is in course of formation, which will take over The Hilborn Plough Works, Ayr, Ont., and operate them until their plant at Paris has been erected. They will employ about 100 men. The site of the factory in Paris has not yet been located, but it will probably be a portion of South Dumfries, adjoining the town, and a movement is on foot to have it annexed to Paris.

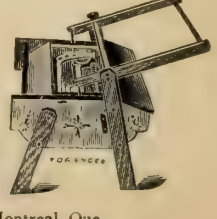
TIRES

Nothing but good wear can come from Dunlop Tires, because nothing but good rubber goes into them. Dunlop Tires are made for Autos and Bicycles.

Dunlop Tire Co., Limited, Toronto.

PAGE METAL GATES are so low in price no one can afford to use wooden ones. Light, and yet strong enough to support a heavy man on the end while he swings around the circle without causing them to sag. They are neat in appearance, will last a lifetime. Will not sag nor get rickety. They are supplied with latches which allow them to be opened either way and are self acting. The only good metal gate that is low enough in price for general farm purposes. We also make Farm and Ornamental Fence, Poultry Netting, Nails and Staples. The Page Wire Fence Co., Limited, Walkerville, Ont.



"DAISY" CHURN

Has tempered steel cased bicycle ball bearings, strongest, neatest and most convenient frame. Only two bolts to adjust in setting up. Steel Bow Levers, suitable for either a standing or sitting posture. Has four wheels and adjustable feet to hold stand steady while churning. When churn is locked to stand the bow can be used as handles to move it about on the front wheels as handy as a baby carriage. Open on both sides to centre, giving free space for pail. Made with wood or steel stands, with Cranks only, or Bow Levers as desired.

Vollmar Perfect Washer

Has a most enviable record. A perfection of its kind—will wash more clothes in less time, do it better and easier, with less wear and tear, than any other machine.

to Canada Paint Co Montreal

"HIS ONLY PAIR"

The Painter who uses the Paints manufactured by **The Canada Paint Company** shows good judgment, and employs as his agents the best that money will produce.

The Paint that **stands** on a house is the Paint the people want. The people insist upon getting good Paints. They are looking for Paint that goes on easy, that is true to color, a paint that will retain its brilliancy, that stands up against the weather and puts off the necessity for repainting.

The Canada Paint Company's Paints are made on that principle. They are Pure Paints, made as Paints should be made, and there are none better. Always insist upon getting

THE

CANADA PAINT COMPANY'S

Paints, and then you have the best that money can buy.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, March 21, 1902.

HARDWARE.

A CHANGE for the better has come over the hardware business during the past week, and the demand is gradually improving as the spring advances. Heavy goods are moving better than other lines, but there is also a good demand for shelf goods and cutlery. Barb wire and fence staples have commenced to move more freely, and a fair inquiry for spring is experienced at present. Since the new discount on bolts came into force, the business in this line has dropped off somewhat. Several small import orders are beginning to come in for skates for next year, which is rather earlier than usual. It is expected, though, that there will not be as good a demand for skates next year as there was this, and that toboggans and snowshoes will sell better. A few inquiries for horseshoes and horse nails mark the opening up of spring business in this line. Some sizes of Norway iron appear to be scarce, and it is very hard to obtain an assortment of all sizes. Kitchen utensils are selling well, and in churns, washing machines, wringers and egg crates there is a good demand springing up. Prices on the great majority of hardware lines are well maintained, and show, if anything, a tendency to stiffen.

BARB WIRE—There is a noticeable improvement in this, several orders being booked for the spring trade. No quotable change, however, can be reported. The price per 100 lb. is $3 f.o.b. Montreal.

GALVANIZED WIRE—There is a steady call for galvanized wire, but orders are, as a rule, small and the volume of business is not large. We quote: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

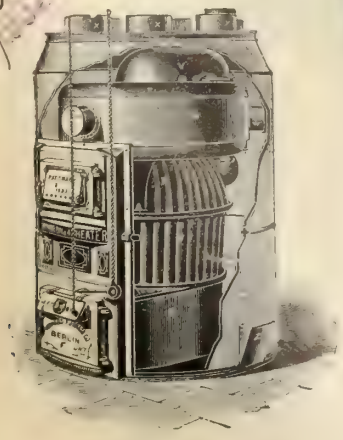
SMOOTH STEEL WIRE—A fair amount of business is being done. We quote: Bright iron and annealed on a base of $2.60 per 100 lb., f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras, per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE—There is a quiet market. The discount on fine wire is 22½ per cent.

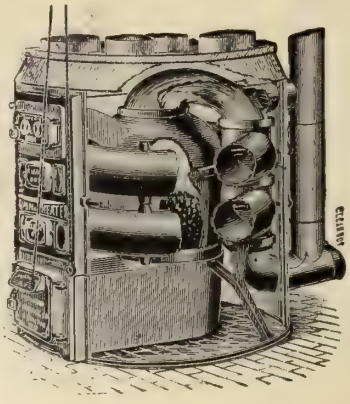
BRASS AND COPPER WIRE—Brass and copper wire are to be discounted at 60 per cent. There is not much doing.

FENCE STAPLES—Business in fence staples has much improved, and a gradually growing demand is looked for from now out. We quote: $2.90 per 100 lb. keg for bright, and $3.25 for galvanized.

WIRE NAILS—There is some business doing, but a quiet market continues. Prices are unchanged. We quote: $2.25 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.



CUT NAILS—There is not much doing. The price per keg, in small lots, is $2.35, and in carlots, $2.27½. Coopers' and flour barrel nails are both discounted at 40 per cent.



HORSENAILS—A number of small orders have been booked for spring, and the market is in a much better condition than a week ago. We quote: "C" brand at 50 and 7½ per cent. off and "M" brand at 60 per cent. off on oval and new city heads and 66⅔ per cent. off for new countersunk heads.

The Robin Hood Powder Company
If you want the best Trap or Game load in the world, buy "Robin Hood Smokeless," in "Robin Hood" Shells. It is quick, safe, and reliable. Try it for pattern and penetration from forty to seventy yards against any powder on the market. We make the powder, we make the shells, and we load them. Write for our booklet, "Powder Facts."
The Robin Hood Powder Company
SWANTON, VT.

HORSESHOES—These also are in considerably better demand. Prices have not changed. We quote as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS—The demand for screws is still light, there being little, if any, change for the better since our last report. No change in discounts has occurred. They are as follows: Flat head bright, 87½ and 10 per cent. off list; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.

BOLTS—Since the change in discounts of last week there has not been as satisfactory a business done in bolts or nuts. Most of the trade became pretty well stocked before the changes occurred, and they can afford to wait some time before buying under the new figures. The discounts are as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66⅔ per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3½c. per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount. of ¼c. per lb. is allowed.

BUILDING PAPER—A brisk demand continues for building paper, and prices are steady, though fairly firm. We quote as follows: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 30c. per roll; tar sheathing, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c per roll.

CORDAGE—Trade is improving gradually, and the number of orders for spring delivery is increasing. There have been no changes in prices. We quote: Manila, 16c.; British manila, 14c.; sisal, 12½c.; lathyarn, 11c. Prices on binder twine are as follows: Blue ribbon, 650 feet to the pound, 14½c.; Redcat, 600 feet to the pound, 13½c.; Tiger, 550 feet to the pound, 12½c.; Standard, 500 feet to the pound, 11c.; sisal, 500 feet to the pound, 11c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS—Trade is taking on a little more activity, and there is a bright outlook for spring business. The discounts are as follows: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes

They are made to stand rough usage, such as scrubbing, walking, weather, etc.

They are like iron and dry over night with a nice finish.

THE FRANCIS-FROST CO. Limited
TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, 35 and 5 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH — The market is steady, with a fair trade doing at $1.25 per 100 sq. ft.

POULTRY NETTING—There is a fair inquiry, and a somewhat better business done than last week. Discounts for Canadian or English are: 60 per cent. off 2 x 2 mesh, 19 wire, and 55 per cent. off 2 x 2 mesh, heavier, Canadian list.

HARVEST TOOLS—Since the change in the discount of last week, there has been a quiet market in harvest tools, as compared with the past two or three weeks. A moderate amount of business, however, is doing. The discount is 60 and 10 and 10 per cent.

FIREBRICKS—The prices in this line remain the same, and nothing new is likely to occur until the opening of navigation. The demand has improved this week. We quote: Scotch, $19 to $23.50; English, $18.50 to $22.50 per 1,000.

CEMENT—There is a fairly active inquiry at steady and unchanged prices. We quote as follows: German cement, $2.30 to $2.40; English, $2.25 to $2.35; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.20 to $2.30 ex-cars.

METALS.

The firm feeling in the foreign market has not been relieved, and, instead, several small advances have been made in different lines. Iron continues firm, and there is an active trade doing at quoted prices. Most of the orders are for small amounts, but, being large in numbers, they swell the total up to a very good volume of business. The pig iron market shows something of a firmer tone, and in some quarters an advance is looked for. Toe-calk and tire steel are both in good demand at present, and the prices are firm. As yet, quotations on most metals remain at last week's figures, but on iron pipe, black and galvanized, a slight reduction will be noted in some sizes.

PIG IRON—There still exists a difficulty in securing prompt shipments. It is expected that higher prices will be asked before long. We quote: Summerlee, $21 to $21.50; Canadian, $18.50 to $19.

BAR IRON—This is an active market and prices are firm. We quote: Merchant bar, in small lots, $1.95; horseshoe iron, $2.15 to $2.20.

BLACK SHEETS—There is a steady demand for black sheets at unchanged prices. The market, however, is not active. Our quotations are: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50; 8 to 20 gauge, $2.50.

GALVANIZED IRON—The demand for this article has not improved, and trade remains quiet, at steady prices. We quote: No. 28, Queen's Head, $4.40; Apollo, 10¾ oz., $4.40; Comet, $4.25, with 10c. extra, for less than case lots.

INGOT COPPER—There is not much doing, and the price remains steady at 14c.

INGOT TIN—There is a moderate inquiry, but the market is featureless. Straits are worth 29c.

PIG LEAD—Some improvement is reported, but the market is still quiet at $3.25.

LEAD PIPE—In this there is little doing, and prices are unchanged. Composition, 7½c.; ordinary, 7c. The discount is 35 per cent.

IRON PIPE—The demand is fair. In black standard pipe, ¼ and ⅜ sizes, and in galvanized, ⅜ size, there has been a reduction of 10c. per 100 feet. We quote standard pipe, per 100 feet, screwed and coupled, in lengths under 19 feet, as follows: Black pipe, ⅛, $3; ¼, $2.40; ⅜, $2.65; ½, $3; ¾, $3 70; 1-inch, $5.25; 1¼, $7.40; 1½, $8.90; 2-inch, $12.40. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $4; ¾, $5.05; 1-inch, $7.25; 1¼, $10.10; 1½, $12.15; 2-inch, $16.70. Extra heavy pipe, plain ends, are quoted, per 100 feet, as follows: Black, ½, $4.35; ¾, $5.30; 1-inch, $7.60; 1¼, $10.60; 1½, $12.70; 2-inch, $17.45. Galvanized, ½, $5.35; ¾, $6.70; 1-inch, $9.60; 1¼, $13.30; 1½, $15.95; 2-inch, $21.75. For threads and couplings, 5 per cent. is added.

TINPLATES—The market is not very active, but both locally and on the primary markets there is a continued firm feeling. We quote: Cokes, $4.25 to $4.50 per box; charcoal, $4.75 to $5.25 per box.

CANADA PLATE—There is no change. The market is as firm as ever. We quote as follows: 52's, $2.65 to $2 70; 60's, $2.75 to $2.80; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35.

STEEL—An active trade continues. Toecalk and tire steel are in particularly good demand, and the prices all round are very firm. We quote: Sleighshoe, $2.10, tire, $2.15; bar, $2.05; spring, $2.85; reeled machinery, $3; toecalk, $2.60.

SHEET STEEL—There is still a very quiet market. We quote: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL—There is a noticeable improvement this week and prices are steady. "Diamond" sells for 8c.; Jessop's for 13c.

TERNE PLATES—The market is dull. The price is $7.75 to $8.

COIL CHAIN—This market continues to improve, and a good number of orders are being booked for spring. The prices, generally speaking, are firm. Our quotations are: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-in., 7¼c. per lb.; 5-16, $4.80; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.85; 9-16, $3.75; ⅝, $3.55; ¾, $3.50; ⅞, $3.45, and 1-in., $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC—Trade is quiet. The price is $5.75 to $6.25.

ANTIMONY—Wholesale houses were notified that prices on antimony were withdrawn, but nothing new has transpired, and the retail trade can still obtain this article at 10c. This figure is for small lots. It was expected by some of the jobbing trade that an advance would have been asked, but nothing of the kind has occurred as yet.

ZINC SPELTER—The market remains very quiet, and the price is unchanged from 5c.

SOLDER—Both wire and bar solder are moving out very well, and prices are well maintained. We quote: Bar solder, 18c.; and wire solder, 20c.

PAINTS AND OILS.

The only noticeable feature of the paint and oil market for the past two weeks has been the marked increase in the volume of business as compared with the corresponding weeks of last year. The general prosperity of the country has, no doubt, had much to do with the increase in consumption, and the mild weather prevailing has led to earlier operations than usual, so that the present season is, perhaps, a little ahead of time as regards paints and oils. At any rate, the unusual condition exists of the factories being almost as busy as in the height of the season. Prices on all lines are the same as last week. Linseed oil shows a somewhat easier feeling on the English market. Turpentine, on the other hand, is as firm as ever, and an advance may take place almost any time. We quote:

WHITE LEAD.—Best brands, Government standard, $5.87½; No. 1, $5.50; No. 2 $5.12½; No. 3, $4.75; No. 4, $4.37½ all f.o.b. Montreal.

DRY WHITE LEAD—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC — Pure dry, 6¼c.; No. 1, 5¼c.; in oil, pure, 7¼c.; No. 1, 6¼c.; No. 2, 5¼c.

PUTTY — We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200 lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL—Casks, 7c.; 100 lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD — Genuine red lead in casks, $4.50; in 100-lb. kegs, $4.75; less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE—Ground, casks, 5c.; less, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 80c.; boiled, 83c. In 5 to 9 bbls., 1c. less; 10 to 20 bbl. lots open, net cash, plus 2c. for four months. Delivered anywhere in Ontario between Montreal and Oshawa at 2c. per gal. advance and freight allowed.

TURPENTINE.—Single bbls., 67c.; 2 to 4 bbls., 66c.; 5 bbls. and over, open terms.

SHELLAC VARNISH — Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS—$1.20 to $1.45 per gal.

CASTOR OIL—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—47½ to 49c.

COD OIL—32½ to 35c.

PARIS GREEN — Petroleum barrels, 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

Business in scrap metals is as active as usual at this season of the year, and the scarcity which has existed on some lines has not been relieved. Prices on wrought iron show some signs of falling off, due to the fact that the mills do not seem as anxious to buy. There is, however, still very little iron to be obtained. Steel is in good demand. Lead is weaker, and a shade lower in price. Quotations are: Heavy copper and wire, 11c. per lb.;

light copper, 8c.; heavy red brass, 11c.; heavy yellow, 9c.; light brass, 5c.; lead, 2⅜ to 2⅝c.; zinc, 2 to 2¼c.; iron, No. 1 wrought, $17; machinery scrap, $15; stove plate, $9 to $11; light iron, No. 2, $7 per ton; malleable and steel, $4; rags, country, 60 to 70c. per 100 lb.; old rubbers, 6c. per lb.

GLASS.

The market for glass has not perceptibly altered since our last report. Nearly all the retail orders have been booked, and the trade is quiet at steady prices. Our quotations are now as follows: First break, 50 feet, $2.10; second, $2.20 for 50 feet; first break, 100 feet, $4.00; second break, $4.20; third break, $4.70; fourth break, $4.95.

HIDES.

The hide market is rather quiet. The bad condition of the country roads has been the cause of light receipts, and although there is little doing, yet the stocks have been brought down pretty low on this account. We quote: No. 1 hides, 7c.; No. 2, 6c.; No. 3, 5c.; No. 1 calfskins, 10c.; sheepskins, 65c.

MONTREAL NOTES.

Black standard pipe, in ¼ and ⅜ sizes, is 10c. per 100 ft. lower.

Galvanized standard pipe has been reduced in price 10c. per 100 ft., in ⅜ size.

It will be worth the while of the retail hardware trade to look up The Canada Hardware Co.'s offer on "Magnolia Metal." They have a large quantity of this which they are willing to dispose of at an exceptionally low figure for the purpose of clearing it out.

ONTARIO MARKETS.

Toronto, March 21, 1902.

HARDWARE.

TRADE conditions remain much about the same as a week ago. While a good business is being done, the bad condition of the country roads is undoubtedly preventing business from being as active as it otherwise would be. A good deal of fence wire is being shipped. The demand for wire nails shows more activity and a good many retailers who placed orders for delivery in April are now asking that shipment be made at once. There is quite a little rope going out. Inquiries are now beginning to come in for gas and oil stoves. Some ice-cream freezers are going out and dealers are stocking up with refrigerators. Churns are moving out well. A good many orders are being booked in tinware and enamelled ware. Barn door hinges are 25c. dearer. The manufacturers of chain have notified the trade of an advance of $2 per ton.

BARB WIRE.—Orders booked some time ago for barb wire and plain twist are now being delivered with a good deal of freedom. We quote as follows: F.o.b. Cleveland, $2.77½ for less than carlots, and $2.65 for carlots. From stock Toronto, $3.

GALVANIZED WIRE.—A good many shipments are being made this week. Quotations are as follows: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15. No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15, $4.60 to $5.50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—The movement is light in both oiled and annealed and hay-baling wire. Base price: $2.60 per 100 lb. Oiling, 10c.; coppering, 60c.; and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—Trade is only moderate. Discount 22½ per cent.

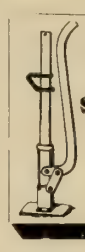
WIRE NAILS.—Business has improved and the demand is quite active. Dealers who ordered for April delivery are, in many instances, asking for immediate shipment. Our quotations are as follows: $2.55 for less than carlots and $2.50 for carlots. Delivery points, Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—These continue dull. We quote base price $2.35 per keg, with 7½c. allowance on carlots.

HORSE NAILS.—Trade is quiet, and the discounts are as follows: "C" brand, oval head, 50 and 7½ per cent., and on "M" and other brands, 50, 10 and 5 per cent. Countersunk head 60 per cent.

HORSESHOES.—Very little doing. We quote f.o.b. Toronto as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.60; snow shoes, $3.85; light steel shoes, $3.70; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85; snow shoes, $4; light steel shoes, $3.95; featherweight (all sizes), $4.95.

SCREWS.—A nice business is still the feature of the screw trade. Discounts are as follows: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze 70 per cent.



RIVETS AND BURRS.—Business is fairly good in rivets. The machinery and boiler manufacturers are gradually becoming more busily employed. We quote as follows: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 and 10 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—Trade in this line is decidedly brisk with prices firm at the recent advance. We quote: Carriage bolts, common ($1 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent.; machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66 2-3 per cent.

CAST IRON AND MALLEABLE FITTINGS.—There has been a change in the discounts of cast iron and malleable fittings in the shape of a small advance and these are now quoted at a discount of 40 and 60 per cent. respectively for all excepting plugs, brushings, unions and nippers in cast-iron fittings, which are still subject to a discount of 65 per cent. This advance is in sympathy with the rise in the United States, where the manufacturers have been taxed to their limit to fill all their orders and thus have been induced to put up the prices.

ROPE.—There is quite a good demand for rope. The statistical position of the hemp market remains firm. We quote:

CLELAND BROS & CO.,
MEAFORD, ONT. (12)

Pure manila, 16c.; British manila, 14c.; sisal, 12½c.; lathyarn, 11c.; sisal bed cord, 3 cord, 48 ft., 65c.; 60 ft., 80c.; 72 ft., 95c. per doz.

BINDER TWINE.—A fair business is being done. We quote: "Blue Ribbon," 650 ft., 14½c.; "Red Cap," 600 ft., 13½c.; "Tiger," 580 ft., 12½c.; sisal, 500 ft., 11 cents.

BARN DOOR HINGES.—Prices are 25c. higher. We now quote: 6 to 10 inch at $4.50, and 12-inch and up, $3.50. Business is fairly good.

WASHERS.—Iron and steel-plate washers are now quoted at a discount of 33 1-3 to 35 per cent., and a revised list of prices has been issued. This list is given in full on another page.

CHAIN.—The manufacturers of chain have notified the wholesale trade of an advance of $2 per ton, and the latter may be expected to mark up their figures.

MILK-CAN TRIMMINGS.—Not many orders are being placed. Early orders have been delivered, and until these have been worked up, which will probably not be for amonth or six weeks' hence, not much of a sorting-up trade is, of course, expected. Discount 25 per cent.

SAP BUCKETS.—Very little is being done. The recent cold snap naturally stopped the sap from flowing. Discount 40 and 10 per cent.

EAVETROUGH.—Some business is being done. We quote $3.10 per 100 ft.

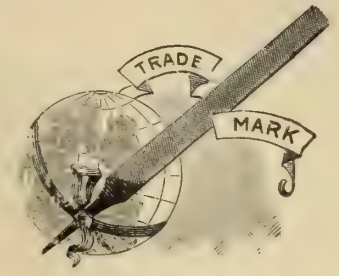
ENAMELLED WARE AND TINWARE.—A good many orders have been booked for shipment April 1, but at present very few shipments are being made.

GAS AND OIL STOVES.—Inquiries are beginning to come in for both gas and oil stoves.

SCREEN DOORS AND WINDOWS.—Nothing is yet being done in the way of forward shipment. Common doors, 2 or 3 panel, are quoted f. o. b. factory points as follows: Walnut, stained, 3-in. style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-in. style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2.50 per dozen.

GREEN WIRE CLOTH.—Little or nothing is going forward yet. We quote $1.25 per 100 square feet.

SPADES AND SHOVELS.—Quite a quantity of spades and shovels is being shipped. Discount 40 and 5 per cent.



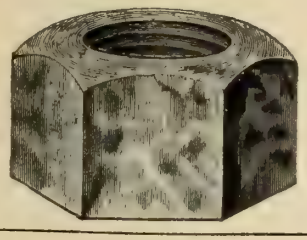
HARVEST TOOLS.—Quite a lot of harvest tools are being shipped. There are some lines which have not yet been taken into stock by the jobbers, but they are such, at any rate, which will not be required till later in the season. Discount 60, 10 and 10 per cent.

BUILDING PAPER.—Business keeps fair. Quotations are as follows: Dry sheathing, grey or straw, 30c. per roll; tar sheathing, grey or straw, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c per roll.

LAWN MOWERS.—Some business is being done. We quote: Discount on high-wheel mowers, 50 per cent.; "Star" mowers, 9-in. wheels, $2.50 to $3; "Daisy" mowers, 17-in. wheels, $2.25 to $2.50.

CEMENT.—Trade continues quiet, but there are numerous inquiries for quotations, indicating that there will shortly be a good demand. Prices are firm. We quote: Canadian Portland, $1.90 to $2.75; Canadian hydraulic, $1.25 to $1.50; German cement, $3; English, $3 to $3.15; Belgian, $2.50 to $2.75 per barrel

GLOBE BRAND
Files and Rasps



ALL SIZES,
ALL SHAPES,
ALL CUTS,
FOR ALL PURPOSES.

Are now manufactured by the NICHOLSON FILE CO. at their DOMINION WORKS, Port Hope, CANADA.

Made from first quality Cast Steel, by experienced workmen.
Every File carefully inspected, thoroughly tested and fully warranted.
For sale by all prominent Hardware Merchants throughout the Dominion.

INGERSOLL, ONT.

METALS.

The position of iron and steel is still strong and in both lines the demand exceeds the supply. In sheet metals there is a good trade being done and prices, as a rule, are firm.

PIG IRON.—The Canadian market is very strong and all the furnaces appear to be oversold. Some of the furnaces are quoting extravagant prices, evidently for the purpose of keeping buyers off. To good buyers the ruling idea for No. 2 foundry seems to be around $18.50.

BAR IRON.—The demand is good and at least some of the mills are a long distance behind with their orders. Prices are firm. We now quote $1.95 to $2.05. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

STEEL.—The scarcity of steel in Canada as in the United States, is most pronounced and in some instances orders cannot be accepted. Letters to this effect are being received by the wholesale trade. We quote as follows: Merchantable cast steel, 9 to 15c. per lb.; drill steel, 8 to 10c. per lb.; "B C" and "Black Diamond" tool steel, 10 to 11c.; Jessop's, Morton's and Firth's tool steel, 14c.; toe-calk steel, $2.85 to $3; tire steel, $2.30 to $2.50; sleighshoe steel, $2.10 to $2.25; reeled machinery steel, $3; hoop steel, $2.90.

BLACK SHEETS.—The demand is active with stocks light. We quote: Common, $3.15 for 28 gauge; and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—Although the bulk of the import orders have been placed there is still some business being done on that account. There is a moderate demand from stock. We quote: All dull, $3; half polished, $3.10; all bright, $3.75.

GALVANIZED SHEETS.—A fair number of import orders are being booked, and there is a steady demand from stock. Stocks are light. We quote: "Queen's Head" brand at $4.50 in case lots, and $4.65 in less quantities.

TIN.—Business has been quiet during the past week, buyers holding off on account of the high prices. The London, Eng., market is firm with prices slightly higher, but spot tin is slightly weaker in New York. Prices are unchanged here at $29 to $30 per 100 lb.

TINPLATES.—The demand is good. Although some shipments are coming to hand stocks locally are becoming much reduced. Some houses are practically cleaned out, while others report they are very close to being so. I C is still quoted at $4.25.

TINNED SHEETS.—The demand is fair. We quote: 72 x 30, up to 24 gauge, 7½c.; ditto, up to 26 gauge, 8c.

TERNE PLATES.—There has been an active demand during the week for terne plates. This article again appears to be coming into more general use for roofing purposes. We quote I C, 20 x 28, at $8.50.

COPPER.—Business is active in ingot copper. The recent decline in prices appears to have greatly stimulated the consumptive demand. Business in sheet copper is fair. The London market is slightly lower and the New York market is

dull. We quote ingot unchanged at $15 per 100 lb.

BRASS.—Business is quiet. Discount 15 per cent.

PIG LEAD. There is more inquiry for pig lead, but the orders are small. We quote: Pig lead at $3.50 to $3.75, and bar lead at $5.

IRON PIPE. Business is fairly active and quotations are as given last week. We quote per 100 ft.: ⅜ in., $3; ¼ in., $2.50; ½ in., $2.70; ¾ in., $3; ¾ in., $3.70; 1 in., $5.25; 1¼ in., $7.10; 1½ in., $8.90; 2 in., $12.40. Galvanized, 1 in., $7.25. Trade discount 4 per cent.

ZINC SPELTER. Some business in a jobbing way has been done during the past week. We quote $5.50 to $6 per 100 lb.

ZINC SHEET. Orders, while numerous, are for small lots. We quote: $6 to $6.25 in casks and $6.25 to $6.50 in part casks.

SOLDER. The demand is fairly active. We quote: Half-and-half, guaranteed, 19c.; do. commercial, 18½c.; refined, 18c.; wiping, 17½c.

ANTIMONY.—Trade is fair. We quote 10c. per lb. for Cookson's.

PAINTS AND OILS.

The market for turpentine is strong with an upward tendency, owing to the recent advance in the Southern States, but prices in Toronto have not yet been changed. The demand is fair for raw and boiled linseed oil and the prices are steady. White leads, ground in oil, continue active. About three quarters of the trade is being done in the pure white leads and the balance in the inferior grades. Dry colors are selling more freely. Jobbers this week are busy shipping orders they received during the winter and report that this year business is ahead of the same time last year. We quote:

WHITE LEAD.—Ex-Toronto, pure white lead, $5.87½; No. 1, $5.50; No. 2, $5.12½; No. 3, $4.75; No. 4, $4.37½ in pkgs. of 25-lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.12½.

RED LEAD.—Genuine, in casks of 560 lb., $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

LITHARGE.—Genuine, 6 to 6½c.

ORANGE MINERAL.—Genuine, 7½ to 8c.

WHITE ZINC.—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.00.

BENZINE.—In barrel lots, 16½c. per gal.; less quantities, 25c. per gal.

PARIS WHITE.—90c. to $1 per 100 lb.

WHITING.—65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC.—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC.—Pure orange, in bbls., $2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities 10c. extra.

PUTTY.—Bladders, in bbls., $2.25; bladders, in 100-lb. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS.—New Brunswick, $1.90 per bbl.

PUMICE STONE.—Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS.—Pure, $1.20 to $1.30 per gal.

CASTOR OIL.—English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL.—Raw, 1 to 4 bbls, 82c.; boiled, 85c.; 5 to 9 bbls., raw 81c.; boiled, 84c.; delivered. To Toronto, Hamilton and London, 2c. less.

TURPENTINE.—Single bbls., 68c.; 2 to 4 bbls., 67c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

There is a good import demand and the market is steady. The local trade is improving. Our quotations are now as follows: Under 26 in., $4.25; 26 to 40 in., $4.65; 41 to 50 in., $5.; 51 to 60 in., $5.35; 61 to 70 in., $5.75; 71 to 80 in., $6.25; 81 to 85 in., $7; 86 to 90 in., $7.75. Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33 1-3 per cent.

PETROLEUM.

The demand is moderate and prices are firm. We quote: Pratt's astral, 16½ to 17c. in bulk (barrels, extra); American water white, 17 to 17½c. in bbls; Photogene, 16½ to 17c.; Sarnia water white, 16 to 16½c. in bbls.; Sarnia prime white, 14½ to 15c. in bbls.

NOTES.

Barn door hinges are 25c. dearer.

The chain manufacturers have advanced their prices $2 per ton.

NOVA SCOTIA MARKETS.

Halifax, March 18, 1902.

THE general state of trade in hardware is considered by the dealers to be good, and spring activity has commenced much earlier than usual, there being every sign that a large amount of business will be done during the next few months. The orders coming in, and the general reports from the various sections of the Province are encouraging in all lines of the trade.

* * *

Prices remain practically unchanged, but a feeling prevails that such firmness will be followed by advances in many directions. The manufacturers are rushed to fill orders. In fact, some of the manufacturers are said to have so many orders booked that they refuse to accept more for any definite period of delivery. The same trouble was experienced by the dealers here last season to some extent, which seriously interfered with their trade. An easier feeling in the iron and steel markets would be hailed with delight.

* * *

Linseed oil and turpentine remain firm at the late advances, and the reports from the source of supply do not encourage any early reduction in either commodity this season. The cotton market also being very high has had an effect on canvas, cordage and twines, which are very firm with some late advances. Last week twines advanced ½c., and British manila cordage, which lately advanced slightly, has had another advance, and is now quoted at 14½c.

* * *

In most lines the hardware stocks are fully equipped, and are being augumented by arrivals by every incoming steamer.

* * *

The fire at Messrs Crowell Bros., though only lasting a few minutes, did a tremendous amount of damage. The stock was valued in the vicinity of $40,000 with $25,000 insurance. The insurance adjusters were at work last week and awarded the firm $17,500, which is divided among twelve insnrance companies, as follows: Insurance Co. of North America, $2,240; British American and Aetna, $2,100 each; S. U. & National, Quebec, and Anglo-American, $1,750 each; Phoenix, of Brooklyn, $1,540; Acadia, $1,400; Western, $840; Phoenix, of Hartford, and N. B. Mercantile, $700 each; L. L. and Globe, $630. With the assistance of other firms Crowell Bros. were able to fill all their orders promptly. No doubt a large part of their stock will have to be disposed of at auction, being damaged by water.

CURRENT MARKET QUOTATIONS.

March 21, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list as the desire is to make it perfectly accurate.

SHOULD A BUSINESS MAN RETIRE AT SIXTY?

THE newspapers discuss many subjects that are of more or less public or individual interest. Recently, quite a number of comments have been observed upon the question, "When a man is 60 years old, should he withdraw from business?"

The opinions of different individuals upon this subject have been sought. Among these is Mr. Henry Clews, the oldest broker in Wall Street, and who is the only man remaining in the street who has done business under his own sign for 43 years.

Mr. Clews, in a signed interview, says: "I think a man ought to retain an active interest in his business as long as his vitality holds out, no matter how old he is or how much money he has accumulated. It is dangerous to have nothing but time on your hands. My business is in such shape that I need not come to the office once a week, but I am here every day anyway, and I haven't the slightest intention of retiring."

Mr. Clews is considerably over 60, and, in a reminiscent way, he refers to several well-known men who have passed the 60 mile post.

Andrew Carnegie is one of these. He made the greatest success of his life after he was 60 years old, Mr. Clews says, and, in fact, after that time, as in less than two years he cleaned up $150,000,000, though, of course, he had laid the foundation for what resulted during many years prior to the time of his last great deal.

J. P. Morgan is another man instanced who is making the greatest of his successes just now, and he is a man more than 60, and it does not seem likely that he has any thought of retiring.

Russell Sage is another veteran business man who comes to his office every day and attends personally to every detail in his business,

Mr. Clews refers to these men as examples, very likely because they belong to his own business set, but their careers illustrate that a man is only in his prime ordinarily when he has reached the age of 60. As for Mr. Clews, he says: "I come to my office every day and can attend personally, if I wish, to the orders of more than 4,700 customers that I have on my books."

That although over 60 years of age, Mr. Clewes attributes the fact that he possesses this degree of vigor to his habit of life in having never indulged in violent physical exercise. This kind of exercise, "athletic" is the popular term for it, he regards as extremely harmful, believing that it is more injurious than beneficial, as almost always it is attended with over exertion, resulting in harmful results which, if not before, are shown late in life. The only exercise this man says that he has ever been known to take is walking, and that with a gentle pace, and not for a great distance. The result is that he is perfectly well and has always been so.

There are two rather interesting and significant features in the views above expressed, remarks a contemporary. On one hand there is sufficient confirmation of the fact that a man is, or ought to be, at his best when he has arrived at 60 years of age. In the next place, the views entertained in regard to the violent physical exercises that are thought necessary to the training of the coming man and the college man of to-day, the views expressed in the highest degree possess practical common sense. If a man is to live out his days retaining the vigor of his faculties, it is certain that he cannot afford to burn the candle at both ends.

IF THEY DID.

If some merchants appreciated the value of advertising as much as some politicians do, their business would prosper accordingly.—St. Louis Ad-Writer.

FILES MADE IN SHEFFIELD.

J. H. Bramwell & Co., file manufacturers, of Sheffield, England, are one of the oldest houses of that line in England, and have the reputation of being among the best manufacturers of files, butchers' carvers and table steels in the world.

The practical experience of the senior partner, Mr. J. H. Bramwell, gained by close application and perseverance during a period of over 40 years, enables him to discern and employ the skill possessed by workmen in the various branches of the trade, and combine it in the finished article.

This firm is looking for a first-class house in Canada to handle its lines, and is open to make liberal terms.

FOR BEGINNERS.

Don't engage in the mail-order business unless you intend to devote the proper amount of time and thought to it. In order to succeed you will have to always be ready to fill orders at any time in order that your customers may not be disappointed. Then there are the numberless little details of advertising, ordering stock, answering inquiries, etc., all of which take time and work. The mail-order business is no place for drones, and those who go into it thinking it an "easy snap" where they have only to do a little advertising and take money easily had better stick to their present job. In no business is prompt, honest activity in filling orders and attending to general details more important than in the mail-order business.—White's Sayings.

BLAST FURNACE CAPACITY IN THE UNITED STATES.

THE Iron Age says: "The many troubles which beset the blast furnace managers during the past month have considerably cut down the output of iron and have also delayed the starting of additional stacks which would otherwise have been added to the active list. On the other hand, however, consumption has also been checked from practically the same causes.

"The weekly capacity of the furnaces in blast on March 1 compares as follows with that of the preceding periods:

	Total capacity per week. Gross tons.	Coke capacity per week.	Charcoal capacity per week.
March 1, 1902	330,710	323,721	6,989
February 1	310,612	334,007	6,605
January 1	298,460	291,992	6,468
December 1, 1901	324,761	3 7,358	7,403
November 1	320,824	313,775	7,049
October 1	307,982	300,538	7,444
September 1	299,861	293,256	6,605
August 1	303,847	297,269	6,578
July 1	310,950	303,793	7,157
June 1	314,505	306,991	7,514
May 1	301,125	293,915	7,210
April 1	296,676	288,766	7,910
March 1	292,899	284,815	8,074

FURNACE STOCKS.

"The position of furnace stocks, sold and unsold, was as below on March 1, as compared with the five preceding months, the same furnaces being represented as in former months. This does not include the holdings of the steel works producing their own iron:

	Oct. 1.	Jan. 1.	Feb. 1.	March 1.
Anthracite and coke	299,824	179,993	121,762	96,315
Charcoal	61,769	38,091	32,438	29,030
Total	361,593	218,084	154,200	125,345

SHEEP SHEARS AND GARDEN SHEARS.

Burgon & Ball, of Sheffield, have just received word from a Mr. C. E. L—s, of Ahtanum, Washington, Yakima County, U.S.A., that he has shorn 3,654 sheep with one pair of their hand sheep shears.

This is indeed a remarkable record, of which any firm might well be proud. Our representative recently paid a visit to this firm and was shown over their extensive works, and a large place it was. Some 300 men were at work in the various departments turning out sheep shears, garden shears, shearing machines, farriers' knives, sickles and horse clippers.

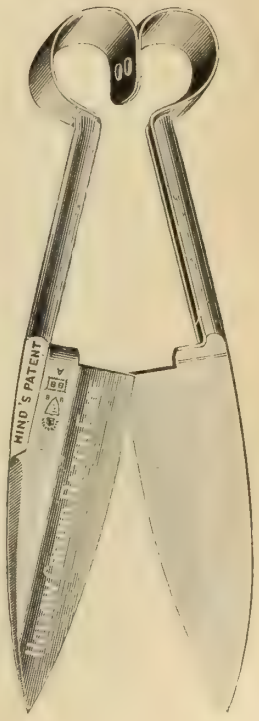
This house was originally established in 1730, having now a reputation of the highest standing, which controls the shear market of Australia. Decatur, Bull & Co., Hospital street, Montreal, are the Canadian representatives.

BURGON & BALL, Ltd.

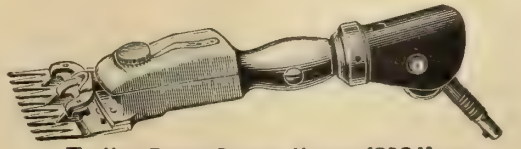
With whom is incorporated Burgon & Wilkinson, Ltd., late Wm. Wilkinson & Sons, Grimesthorpe.

ESTABLISHED 1730.

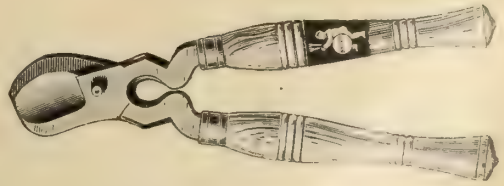
MANUFACTURERS OF



Sheep Shears, Garden Shears, Shearing Machines, Farriers' Knives, Sickles, Tinmen's Snips, Horse Clippers, Etc.



Our hand Sheep Shears to-day hold the World's Record. Mr. C. E. L——s, of Ahtanum, Wash., Yakima Co., U.S.A., has shorn 3,654 sheep with one pair of our Hollow-Ground Razor-Edge Shears.



Our various lines are all manufactured from the finest quality of steel, and, therefore, give the greatest satisfaction in the matter of clean work and long wear.

In Australia we have thousands of our Shearing Machines at work, giving the best results of any machine on the market.

THE NEW BURGON SHEARIN MACHINE. 1899 MODEL.

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

The Evolution of the Radiator

Like all other inventions, the radiator of to-day is quite a different thing to what it was fifteen years ago. The "SAFFORD" marks the highest point yet attained. It combines in construction and decoration all useful and necessary points.

It is built without bolts or packing, the connection being made by screwed nipples. "SAFFORD" for hot water and steam heating.

THE PROPRIETOR'S STORY.

ALABASTINE we have been selling nigh on to twenty years, and know it to be reliable.

We dealers also know that Alabastine is what is in demand, and that to sell anything else for coating walls, we would have to do so on the recommendation that it was the same thing, or just as good as **ALABASTINE.** Would not offer a substitute when Alabastine is called for; no necessity to do that, as it is easier to sell Alabastine, and in handling it we do not incur any risk on account of infringement of patents.

Alabastine is ready for use by the addition of Cold Water, made so by the inventor, Mr. M. B. Church, who was the first to produce a cold water preparation that is thoroughly practical, that has superseded all hot water mixtures, and forced other manufacturers to **UNDERTAKE** the use of the cold water process. Then, again, Alabastine is made in Canada, by Canadian labor and from Canadian materials. It satisfies my customers.

The trade supplied by Wholesale Hardware and Paint Dealers. Also by

ONE REASON WHY

Kemp's Broad Hoop Factory Milk Cans

are popular with the trade is on account of their durability. They are made by experienced workmen and are all supplied with our Roll Rim Bottom, which has a smooth edge and prevents the tearing of floors and wagons, so common with the ordinary bottom.

Our New Railroad MILK CANS

are well finished, heavy, and made to stand the rough usage which these cans are usually subjected to. We supply these in either the Roll Rim or the ordinary Hoop Bottom.

IS SIR RICHARD AWAKE TO HIS DUTY?

THE speech of Sir Richard Cartwright the other day on the budget has attracted a great deal of attention throughout the country. It could scarcely have done otherwise. In point of ability it was one of the best speeches that has been delivered in the House for some time.

But what possibly attracted more attention to it than anything else was the energy and zeal that characterized it. "Richard is himself again," remarked one of the daily papers. And he certainly was.

We are certainly glad to see Sir Richard himself again. Since he took possession of the Trade and Commerce Department in 1896 he has seldom been his old active self. Instead of being a man of action, as was his normal condition prior to that year, he became a man of inaction. And the Department of which he is the head became almost a sinecure. Its chief duty appears to be the payment of subsidies and bonuses. As a trade-creating force it is certainly a sinecure.

The Department, in salaries, stationery and sundries, costs the country about $21,500, and it expends something like $670,000 besides, of which only $7,604 is for the maintenance of commercial agencies. It surely costs enough to do something tangible for the commercial interests of the country. Because it has not done something, a strong opinion has developed among the uncommercial classes of Canada that the Trade and Commerce Department should be abolished.

As we have pointed out before, the fault is not with the Department itself. It is with those who administer it. It is not, therefore, the Department that should be abolished.

In commercial affairs it is not customary for shareholders to wipe out an important department because the head thereof has been incapable. They remove the head and endeavor to put new life into the department. This is what should be done in regard to the Trade and Commerce Department.

It is possible it may not be necessary to remove Sir Richard. He may have woke up at last to a sense of his duty. Candidly, however, we must confess that our faith is weak. We fear that his recently awakened energy and zeal are due to concern for his economical tenets and that he is still dead to the importance of the Trade and Commerce Department as a force in developing the commercial interests of the Dominion.

The success of a business depends upon the ability and enterprise that succor it.

SHARP ADVANCES IN TURPENTINE.

THE turpentine market has been attracting more than usual attention during the past week or ten days. This is due to the sharp advances in Savannah, where prices have been going up nearly 1c. per day.

Up to Wednesday, the Savannah market was 6c. higher than seven or eight days before.

The Oil, Paint and Drug Review, Chicogo, in its issue of March 19, when quotations were 6c. lower than now, declared that the advance, which had already then taken place, was "based on conditions which made higher prices inevitable." The New York Journal of Commerce, of March 27 last, says, however, that the market is also being manipulated by a couple of strong interests and that sales are actually being made in Savannah at figures considerably below the public quotations.

In sympathy with the primary market, prices have been advanced 8c. per gallon in Montreal and Toronto, and a further advance is expected before this issue is in the hands of our readers.

OUR TRADE RELATIONS WITH GERMANY.

IT is to be hoped that the efforts of the Dominion Government to secure better trade relations with Germany will not prove abortive.

Canada, in inducing the British Government to give notice of the abrogation of the commercial treaty with Germany, was actuated by no antipathy towards that country. Canada wanted to give the products of Great Britain preferential tariff treatment. This, with the treaty with Germany and Belgium in existence, she could not do, although the treaty was created before the Dominion had an existence. This was simply intolerable to Canada, and had been for several years.

Possessing self government and the right —which we took advantage of—to place an import duty on the products of the Mother Country, we could not, nevertheless, give her products preferential treatment.

The price we have had to pay for this is the maximum tariff of Germany ; and while this has in some respects adversely affected our trade with that country, there are few, if any, Canadians who would be prepared to recall the past, with its restrictions, in order that the tariff conditions as they were before 1897 might be brought into existence again.

However, it is possible we may be able to successfully negotiate a commercial treaty with Germany, as we did eight years ago with France.

The British Government came in for some severe criticism from a number of British newspapers for not insisting, when negotiating the treaty with Germany that succeeded that abrogated in 1897, that the maximum tariff should not be applied to Canada. We do not know whether or not the British Government made any representations to Germany in the matter. But, no doubt, Canada would have its good offices and influence in negotiating a treaty with the German Empire.

In spite, however, of a tariff that militates against Canadian products, our export trade with Germany has not, on the whole, suffered to the extent one might have expected, for, whereas in 1897 it was valued at $764,589, in 1901 it was $1,374,716.

The following table gives the course of the export trade in home products with Germany in each alternate year since 1897, in the different branches of industry :

	1897.	1899.	1901.
Mine	$ 69,373	$ 15,074	$300,516
Fisheries	22,758	42,442	75,038
Forest	8,584	32,604	16,999
Animals and their produce	21,521	80,437	8,452
Agricult'l products	494,822	829,817	300,285
Manufactures	147,531	309,999	673,426
	$764,589	$1,310,373	$1,374,716

It will be noticed at a glance that where the trade has been adverse is in products of the farm. The following table shows how the trade stood in 1897 and 1901 in the chief lines of agricultural products :

EXPORTS OF AGRICULTURAL PRODUCTS TO GERMANY.

	1897. Bush.	1901. Bush.
Buckwheat	283,087	100,722
Oats	344,544	.....
Peas, whole	78,692	60,351
" split	.....	11,773
Rye	17,158	23,791
Wheat	20,559	28,369
Clover seed	5,848	9,071

The large increase in the exports of mine products is chiefly in metallic lead, in which in 1897 the trade was nil. The chief exports in mine products during the two years were as follows :

EXPORTS OF THE MINE TO GERMANY.

	1897. Tons.	1901. Tons.
Asbestos, 3rd class	672	1,574
Coal	460	854
Lead, metallic, contained in ore, etc	....	5,308,700
Mica	....	700

The most satisfactory feature of our export trade with Germany is that in manufactured goods. In almost every line there has been a steady growth since 1897. This will be seen on glancing over the following table :

VALUE OF MANUFACTURED EXPORTS TO GERMANY.

	1897.	1901.
Agricultural implements	$67,815	$474,249
Bicycles	14,287	.....
Drugs and chemicals	17	8,836
Cotton waste	.....	23,309
India rubber manufactures	350	2,015
Castings	23,787	33,589
Pig iron	640	7,500
Machinery	2,059	2,917
Hardware	612	355
Steel, and manufactures of	525	51,618
Sole and upper leather	10,428	15,773
Musical instruments	21,176	17,080
Manufactures of tin	60	281
Cigars and cigarettes	5	310
Tobacco—stems and cuttings	922	1,251
Matches and match splints	.....	480
Wood pulp	1 000	18,736
Other manufactures of wood	343	2,971
Miscellaneous man'f'd articles	1,169	7,246

Our imports from far exceed our exports to the German Empire, the former last year being $7,021,405, while the latter, as already shown, was $1,374,716, or about 401 per cent. less. In negotiating a treaty, therefore, with Germany we have a good case to present. Germany must know that in seeking the abrogation of the objectionable treaties we were actuated by no animosity against her, and it ought not to be difficult to convince her that our trade is worth looking after.

It is to be hoped that the Canadian Government will open negotiations through the proper channel without delay, for while our export trade with Germany is growing, it is in spite of the difficulties which the maximum tariff create.

THE MEN WHO SUCCEED.

Successful business men are not those who follow. They are those who lead.

No matter what their competitors are doing, they keep forging ahead, laying their own plans, devising their own schemes.

They are not ignorant of what their competitors are doing. They endeavor to keep informed as to modern business methods and as to the course of the various markets. But they also act and think for themselves.

The man of thought and of action is the man who is original. And the man who is original stands out among his fellows, is seen and does the business.

COMBINATION ON OIL STOVES.

Blue-flame oil stove manufacturers in the United States are this season doing business under a combination. One result of this combination is an advance of 10 per cent. in prices to the wholesale trade.

While importers in Canada have no advanced their prices to the same extent, they are naturally getting higher figures than they did last season, their discount being 15 per cent. instead of 20 per cent.

DROPS FROM THE EDITOR'S PEN.

A little "ad." often causes large additions to business.

Hard work is the nightmare of drones and the hobby-horse of the industrious.

When a man goes into business who by nature was designed for a farmer there is danger of his cultivating crops that are not profitable.

THE PULP INDUSTRY IN CANADA.

A Paper Read by Mr. D. Lorne McGibbon, Manager of the Laurentide Pulp Co., Before the Canadian Forestry Association.

AS you are all probably aware, pulp, whilst being a manufactured article from pulp wood, is still only a basis of raw material for the manufacture of paper. The two principal grades of pulp in use to-day are mechanical or ground wood pulp, and chemical or sulphite pulp. Mechanical or ground wood pulp is almost explained by its name, as the process of manufacture is very simple, consisting principally of grinding wood into pulp. Chemical or sulphite pulp is a much more intricate process of manufacture, and consists in treating the wood by chemical process, and thus separating the fibres of the wood by the extraction of resinous material. In the manufacture of paper 70 to 75 per cent. of the pulp used is mechanical, and the balance, 25 to 30 per cent., is chemical. Paper made altogether from mechanical pulp would not be satisfactory for newspaper or any of the finer grades, as the fibres of the pulp are too short to give the paper sufficient strength, so that it is necessary to use a proportion of sulphite pulp, which, by its process of manufacture, retains the long fibres of the wood, and thus gives the strength to the paper.

THE FIRST CONSIDERATION.

The first consideration, therefore, to the manufacturer of pulp is his raw material and power. An enormous quantity of water-power, on account of its cheapness, is necessary for the manufacture of mechanical pulp, and, therefore, it is usual for a pulp manufacturer to locate his mill at a point where there is good water-power and where his source of supply of pulp wood is close at hand. A pulp manufacturer, having his water-power assured and his source of supply of pulp wood for his raw material located, then figures on the quantity of raw material he will require for a season's operations. For the manufacture of a ton of mechanical pulp it takes a trifle over a cord of spruce wood. If, therefore, the pulp manufacturer has a capacity of so many tons of each kind of pulp per day, it is very easy for him to figure the exact amount of pulp wood he will require for the operation of his mills for a year. If he should have his own limits, his first step in procuring his pulp wood is to know exactly what his limits consist of and the amount of available spruce logs that are contained in same. As the Government regulate the size of a tree to be cut, he must, therefore, only figure on cutting trees in accordance with these regulations. In the case of The Laurentide Pulp Co., owning such a large area of timber timits, we have found it more practicable to divide these limits into three districts, having a superintendent over each district. We have also found it much more practicable for each of these superintendents, by giving his whole time and attention to his district, to become thoroughly acquainted with all rivers, streams and lakes in same, and where the best points are to procure logs to advantage, rather than have one or two men for the entire limits, which, by their large area, would only permit them, to say the least, to have a superficial knowledge of it all.

CONTRACT SYSTEM BAD.

Having, then, determined the quantity of pulp wood to get out in a season, and having your limits divided into districts, with a man thoroughly familiar with the conditions of each district, you determine the quantity you will get from each district. As a pulp manufacturer wants to insure a uniform cost of his raw material for years, it is, therefore, bad policy for him to attempt to pick out the easiest spots to get pulp wood one year, and leave the hardest and more expensive places for a following year. Under the circumstances it is necessary for him to average this up, taking some of the expensive wood each year, so as not to leave it all for future operations. It is the policy of most pulp manufacturers to procure their pulp wood, or, at least, a large portion of it, by letting contracts to jobbers or contractors. This to my mind is a very cheap way to procure pulp wood, but from my experience the results of this method are but temporary. It has been the practice in the past to allot a certain territory to a contractor, and give him a contract for a certain number of logs. As far as I can learn, the territory allotted to a jobber in the past has been much too large for the quantity of logs that his contract calls for. As a natural consequence this jobber, who has only one aim, viz.: to make money out of his contract, picks out the easiest spots in his territory, and no matter whether there are some large fine spruce logs in his territory that should be cut, but which would cost him a trifle more to get out, he will leave these standing. The following year, therefore, when a contract is let in the same territory a higher price is demanded, owing to the timber being scattered and only the hard places left to lumber in, and it usually ends up with the result that no contractor will go into this territory except at an exorbitant price, and it, therefore, falls to the lot of the pulp manufacturer to establish his own camps, and get out the remaining available logs at a very high cost.

CHEAPER IN THE END.

This point I wish to emphasize more particularly, and that is, when a contract is let for a certain quantity of logs the area of territory should be limited, and so thoroughly explored that it can be cleared systematically of the logs that should be cut. As contractors for logs are more or less of moderate means, and who, if a bad season sets in and a possible loss in fulfilling their contract stares them in the face, either fall far short of their contract or abandon it, it is, therefore, necessary for a pulp manufacturer, in order to be safe regarding his raw material, to establish some of his own camps which will get the logs out no matter what the set-backs are. It has been amply demonstrated that a camp, or camps, operated by a company cannot get logs out as cheaply as a jobber or contractor, at least in the Province of Quebec, where the timber is scattered and the country very mountainous, but the result obtained by operating camps direct are in the long run very much more beneficial than from contractors. The Laurentide Pulp Company, as mentioned before, having such a large territory, and who require such an enormous quantity of pulp wood for the operation of their mills, have found it advisable to employ two inspectors, one for the jobbers or contractors and the other for its own camps. It is the duty of the former inspector to inspect regularly and frequently all jobbers' camps, and to see that these jobbers do not waste the timber nor break the Government regulations. He also sees that

all logs are stamped and properly culled, and when he finds anything out of the way, he reports it direct to the management of the company. The inspector of the camps acts in a similar capacity, but reports on the general conditions of the camps in addition to the above.

ANOTHER BAD FEATURE.

Another bad feature of giving contracts to jobbers for logs is that it is usual to give a contract for a certain quantity of logs to be of a uniform length. Suppose, for example, that a contract has been let for 50,000 spruce logs 13 ft. in length, 7 in. at the small end and up. A contractor, if he cuts down a tree, will only make from this tree logs of 13 ft. in length, and I have found from personal experience that a large proportion of these trees would permit of another log being cut from 8 to 10 ft. in length, and still not be under 7 in. in diameter at the small end. This part of the tree is just as good for making pulp as anything else, but, as you know, the cost of handling and driving a small log is almost as great as that of a large log, and, if a manufacturer only considers his immediate circumstances and his immediate cost of raw material, he will not bother with these ends of a tree, but, if he considers the fact that his raw material is worth money, and that by leaving these ends of the trees in the woods he is simply throwing away a part of his assets, and in addition to this is enhancing the danger of forest fires, he will, even at a slight extra cost, have them taken to his mills with the larger logs. In the case of a company operating its own camps, this should be done in any case. In the case of the logs being cut for export to the United States, these ends of trees are not considered of any value.

HANDLING OF LOGS.

The next step in the cost of raw material is the handling and driving of these logs to the pulp mills, and this is a point I wish to emphasize very particularly. The cost of pulp is determined largely by the quantity produced, as the fixed charges of a pulp manufacturing concern are almost the same, whether a large or smaller quantity of pulp is manufactured. It, therefore, is apparent that a large pulp mill has an advantage over a smaller one, and this refers more particularly to the cost of handling and driving the logs to the mill. As you are all no doubt aware, it costs very little more to drive a larger quantity of logs than a smaller quantity, and therefore if a pulp manufacturer has a larger quantity of logs to handle, it pays him to make permanent improvements on his streams, lakes and rivers, so as to lessen the cost of driving operations as well as to insure the safety of the logs.

The cost of manufacturing pulp is determined largely by the cost of the raw material, viz., pulp wood, and it is natural therefore for a pulp manufacturer to endeavor to obtain his supply of raw material at the very lowest possible cost. In doing this, however, it seems to me that in the past, at least, it was being done at the expense of his prime asset, viz., his pulp wood limits, and he will find that each year his cost will grow greater; whereas, by systematically getting a proportion of expensive wood each year with the cheap wood, and eliminating all source of wastefulness in the cutting of logs, and by making improvements so as to lessen the expense of driving operations, he will, in the long run, make more money and be better off than the manufacturer who simply looks one year ahead.

The raw material, or pulp wood logs, having arrived at the booms in front of the mills, their conversion into pulp is an entirely different business from the logging operations. I do not intend to go into the details of manufacturing pulp wood into pulp, except to say that so far as the pulp wood is concerned, it should be as carefully watched as coal or any article that costs money. I fear, however, that a great deal of waste is incurred in preparing the pulp wood for manufacturing. In the case of the Laurentide Pulp Company, we allow nothing to go to waste, and even if a block of wood should come along with a certain amount of rot in it, instead, as is the usual custom of using it for firewood, the rot or imperfections in the wood are extracted, and the balance used for manufacturing pulp. In Canada there are more mills manufacturing mechanical pulp than anything else, and as this is a comparatively easy matter, and requiring less capital, it is bound to grow considerably. The manufacture of chemical pulp is very much more intricate, entailing more expert labor, and therefore has not grown to the extent of mechanical pulp mills.

EXPORT OF PULP WOOD.

As stated previously, the manufacture of pulp is only a step in the manufacture of paper, and the object of my paper is more for the purpose of showing what Canada is losing by not manufacturing this pulp into the finished product of paper than anything else. As an example of what this means to Canada, we will commence with a cord of wood. We will say, for convenience sake, that a cord of wood is worth $3.50. When this is exported out of the country all the benefit Canada derives from it is the amount of labor expended in cutting this cord of wood, and the stumpage, if any, which is paid the Government.

By converting this cord of wood into mechanical or ground wood pulp, it means an expenditure in Canada of at least $7.00 per cord, for both labor and material, and all of which can be obtained and produced by Canada. By converting a cord of wood into chemical or sulphite pulp it means that an expenditure of at least $15.00 per cord is made for both material and labor. All of this, with the exception of the sulphur, which has to be imported from Sicily, can be produced in Canada. In the conversion of these pulps into paper, it means that a cord of wood, originally costing $3.50, is manufactured into a finished product worth about $40.00 per cord, all of which is for material and labor, the most of which could be produced and manufactured in Canada if the business were sufficiently large. At the present time there are over 1,000,000 cords of pulpwood exported to the United States annually, worth, we will say, for convenience sake, $3,500,000 to $4,000,000. If this quantity of 1,000,000 cords of pulpwood was converted into pulp and then into paper in Canada, it would mean that an expenditure for labor and material in Canada would take place of over $30,000,000 annually. For the manufacture of this large quantity of pulp and paper it would require, however, several times this amount for permanent investments in the limits, water power, mills and machinery, and this in itself would mean a huge thing for Canada.

HOW TO ACCOMPLISH IT.

It therefore seems to me that the principal question before the Dominion and Provincial Governments is, first, how to accomplish the manufacture of this large quantity of paper in Canada, and, secondly, how to dispose of it after it is manufactured. At the present time the United States exacts a duty of $1.67 per ton for mechanical or ground wood pulp and $3.33 per ton for chemical or sulphite pulp, and have a duty on news paper that is prohibitive. The effect of this policy is apparent on the surface, as it provides the manufacturers in

HAMILTON, ONT.

the United States with their raw material in a partly-manufactured state at a low cost, and prohibits the competition of foreign paper. In addition to this, Canada seems to be the ally and friend of the United States manufacturers, as she allows them to come to Canada and procure their raw material, in the shape of pulp wood, with little, if any, charge, and the United States Government allows it to enter into the United States free of any duty. The effect of this policy on Canadian manufacturers is, to say the least, very unfair. The Canadian manufacturer of both kinds of pulp has to compete with the American manufacturer of both kinds of pulp at a disadvantage by the amount of duty imposed by the United States Government on the pulp. This competition at certain times has been ruinous to the Canadian manufacturer. As an example, during the summer of 1901, the paper market was very dull, and, as a consequence, the amount of pulp consumed by paper manufacturers diminished considerably. The overproduction of pulp in Canada and the United States was very large, and the prices dropped until they reached a point where a loss was incurred. The overproduction was caused absolutely by the American pulp mills that procured their supply of pulp wood from Canada, and, as a consequence, owing to the protective duty the United States pulp manufacturers had, the Canadian pulp manufacturers were obliged to curtail their manufacturing operations until such time as prices reasserted themselves. This state of affairs would not have happened had not Canada allowed her pulp wood to go out of the country for a mere song. As I mentioned before, the over-production of pulp was caused by the pulp manufacturers in the United States, who procured their supply of wood in Canada. If these mills had been out of the market it would not have been necessary for Canadian manufacturers to have curtailed their operations last summer. It is true people say Canada has the world for its markets in pulp and paper, but I am afraid too many people hazard this opinion without giving it the consideration it demands. In England, where our principal market at present for both pulp and paper lies, we have the serious competition of Norway and Sweden, and it is no mean competition. Whilst I do not believe that either Norway or Sweden has as good wood for manufactnring pulp or paper as Canada has, still they have many advantages that we have not, and, as a consequence, they are able to sell their pulp and paper in England at a very low cost, and which Canada is obliged to meet in order to procure business.

SOME FURTHER DIFFICULTIES.

It certainly seems absurd that Canada should allow her pulp wood to be exported from the country for a very slight charge, and that the American manufacturers, who use this wood, do not have any competition in the finished product, paper, from Canada to the United States—but when Canada exports her paper to England or any other foreign country, she not only has to compete against paper and pulp manufactured in Norway and Sweden, but also comes into competition with paper and pulp manufactured in the United States from Canadian wood obtained from Canada almost for nothing. In addition to all this, the Canadian manufacturer to day labors under great difficulties. He has to import from the United States the greater portion of his machinery and the clothing of his paper machines—consisting of felts and wires—which amount to many thousand dollars a year; he has to use coal that is protected by the Canadian Government to the extent of 60c. per ton; he has to import his china clay from England, and the best grindstones also from the same place; he has to bring his sulphur from Sicily, and his chemicals from various countries of the world; he has to employ his expert labor from the United States, and which is controlled by a union which curtails his production, and which union while enforcing this rigidly on Canadian manufacturers, makes exceptions in the United States. We are also handicapped in our export trade during the winter months by the long haul to our winter ports.

WOULD COME TO CANADA.

To sum up the whole matter, it appears very much as if the Canadian Government did not want to increase the manufacture of pulp and paper in Canada, but rather would prefer to supply American manufacturers with their raw material, and be satisfied with a small revenue derived from the same. In conversation with a capitalist in New York two or three weeks ago, and who is largely interested in Canadian timber limits, I used the argument that if Canada prohibited the exportation of pulp wood until such time as the American Government abolished or diminished its duty on pulp and paper, the American manufacturers would in a very short while remove their mills to Canada. This gentlemen, after arguing this point for a long time, said:

"I believe that what you say is correct, but I cannot understand why you, representing a large manufacturing concern should wish to make this fact prominent, as it would only invite competition for the company you represent." My answer to this was, that we would prefer all the competition that would take place, and having

the United States market open so us, rather than have less competition and our present markets. In conversation with another United States manufacturer within the last few days, he made the same statement, and from my own personal knowledge I feel quite certain that it would not be long before a certain proportion of the United States manufacturers would be obliged to remove their mills to Canada if they wished to compete with Canadian manufacturers when the United States market was open to them.

It is true that the United States is not wholly dependent upon Canada for its supply of pulp wood, as is evident from ex Governor Powers' remarks at the Paper Trade banquet in New York two or three weeks ago. Ex-Governor Powers made the statement that in Maine alone they had 12,000 square miles of territory, containing 500,000,000 ft. of spruce, and which, in his judgment, if properly handled, would be an inexhaustible supply for American paper manufacturers. I do not agree with ex-Governor Powers in this statement, as 500,000,000 ft. of spruce is a mere bagatelle to United States manufacturers of pulp and paper.

FREE TRADE IN PAPER.

In addition to this, the Canadian Government saw fit, a short time ago, to reduce the duty on news paper entering into Canada. The Canadian market is so small that this only interferes with the smaller mills, who are dependent on the Canadian trade for their existence, but it certainly seems unfair that the Canadian Government should do this, as it will enable the United States paper mills, when their production is greater than the demand, to dump their surplus in Canada. As long as the United States have a prohibitive duty on paper, Canada should do the same, but an abolishment of both would be the best.

I ask you also, why is it that American capitalists have to-day invested in Canadian timber limits and Canadian water powers without developing the powers and cutting the limits? Why is it, I say, but to prepare for the time when Canada will come to her senses, and they will be obliged to manufacture in Canada, or otherwise get out of business. These men are not short-sighted, and although they did procure a promise from the Quebec Government that no extra stumpage over and above 25c. per cord would be charged by them for the next ten years, they still feel that it is necessary to look still further ahead than this. I ask you also why is it that the Quebec Government a short while ago raised the stumpage on pulpwood cut from Crown timber limits for export into the United States to $1.90 a cord, thus giving a preference to the Cana-

LONDON FENCE MACHINES

Are so light, durable and practical, and so easily and rapidly operated, that farmers cannot help seeing that they are unlike any of the big, clumsy and costly machines which have been on the market.

The LONDON builds the highest standard of coiled spring woven wire fence, and as it will more than pay for itself the first year, our machines find quick sales and fast friends.

The agency for the LONDON will pay the dealer, and never fails to draw custom and please the purchaser.

Our Spring Catalogue will be out shortly and a copy will be forwarded on request. Write for our trade prices on coiled spring wire.

dian manufacturer of $1.50 per cord, without any advance notice of what their intentions were? Why is it that they reduced this to 65c. per cord, thus reducing the preference in favor of Canadian manufacturers to 25c. per cord? Would it not be better for the Quebec Government, instead of selling its timber limits with a guarantee of this kind, to assist in building up Canadian manufacturers of pulp and paper, and which would necessitate their purchasing further timber limits from the Quebec Government, and in the development of these, the stumpage to the Quebec Government would increase, and be a regular source of revenue, rather than to continue its present policy?

THE GRAND MERE CONCERN.

The Laurentide Pulp Co. to-day manufacture about 100 tons of paper and cardboard per day, 125 tons of ground wood pulp per day, 70 tons of sulphite pulp per day, and cut 10,000,000 or 15,000,000 feet of pine lumber each year. To do this, it has required an investment of nearly $4,000,000, the annual payment in wages of about $1,000,000, and, as a result of this, the town of Grand Mere, wholly and absolutely dependent upon the Laurentide Pulp Co., has sprung into existence, and to-day has a population close on to 5,000. In addition to this, the viliages adjacent to Grand Mere have all grown, and the rural population in the vicinity of Grand Mere is thriving and doing well. Canada could have 20 such mills as these in a short time if she would come to her senses and adopt the proper policy. Would it not be better for Canadians to have a permenent advancement of this kind, even though it did take a few years to obtain?

THE CANADIAN FARMER.

Possibly the question might arise as to the Canadian farmers who dispose of their pulp wood at the present time. These farmers would have a better market with just as good prices as they have at present, if their purchasers were Canadian manufacturers instead of American manufacturers. Whilst on this subject I might make mention of the fact that the so-called farmers of Canada who dispose of their pulp wood to American manufacturers do not deserve all the sympathy and support that one would think. In our own district, I know several instances where these men obtained lots from the Government presumably for settling purposes, but who, when the timber was cleared off, obtained another lot in somebody else's name. These men are doing more to damage Canadian forestry than any one else, and it is the duty of the present Government to give this special attention and see that it is stopped as soon as possible.

Canada has an opportunity to-day to show her wisdom and her foresight. If the Government would take up this question as seriously and as vigorously as the Department of Public Works has taken up the question of river and harbor improvements, we might hope in the near future to see the paper industry of the world centred in Canada. At present Canada is floundering in the dark, and her wideawake competitors are taking advantage of this. Nothing in this world is gained without a struggle, and a struggle cannot take place unless the parties are determined. Canada should be determined to get the most out of her timber assets, and should not fear to take a decided step in this connection. The trouble is that Canadian politicians do not study the question sufficiently, and are too easily swayed by outside influence. I do not say that it would be a wise thing for Canada to always have an export duty on her pulp wood, but I do say that there should be a sufficiently high export duty on pulp wood so as to make it practically prohibitive until such time as the United States Government open their market for the finished product to Canadian manufacturers. This is only fair and just, and I cannot see why any hesitation should take place in adopting it. Canada has an opportunity now which should be taken advantage of. If she does not do so quickly, it simply means that she is not only losing an opportunity, but is losing time that cannot be recalled.

ALLEGED FRAUD AND THEFT.

W. J. DENNIS is a general merchant of Roseneath and Hastings, Ont., who became insolvent a short time ago. Should the allegations of several Toronto houses prove true, he is guilty of both fraud and theft. Charged with these crimes, he was arrested last week and is now waiting his trial in Toronto.

It is charged that on November 1, 1901, a statement was sent out by Dennis showing that he had a balance of $8,700 on hand. He stated he had $6,300 in stock, $2,000 in real estate, $1,800 in book debts and $100 in cash. All that he owed was $1,500, and, he claimed, there was no chattel mortgage on the goods. A week afterwards he assigned, and it was shown that he had only $2,604 worth of goods in his two stores, $834 in book debts and no real estate. It also transpired that a chattel mortgage on his goods had been given in May.

After the assignment $1,000 worth of the goods were stolen while the man in charge was asleep. The thieves are claimed to be W. J. Dennis, Margaret Dennis and James Lasher, jr. The last named has since taken up his residence in the United States.

Daniel O'Leary, a partner of Dennis, also charges Dennis with the theft. He had formed a partnership with Dennis shortly before the assignment, understanding by his statements that he (Dennis) only owed $500.

O'Leary advanced $600, and shortly afterwards $1,541 more, all the money being taken to pay off debts of which he knew nothing. He had sold his farm for $3,000 to raise this money, and now he is working in a Toronto factory—none of his money being left.

Among the Toronto creditors are The Wyld-Darling Co., The Ames-Holden Co., The Eby, Blain Co., Warren Bros. & Co., and F. J. Westbrook & Sons. They are represented by A. J. R. Snow, of Beatty, Snow & Smith.

CHANGE IN THE LAURIE ENGINE CO.

THE Laurie Engine Company, of Montreal, which has for years been well known as the principal builder of large engines in Canada, has just had an important change made in its control. The majority of the old board of directors having retired, the company's affairs are now under the direction of a new board, consisting of C. E. L. Porteous, Wm. Yuille, F. L. Wanklyn, C. W. Davis, W. G. Ross, Walter H. Laurie and John Laurie. Mr. Porteous has been chosen president and Mr. Yuille as vice-president. The change will, without doubt, result in a large extension of the business, as, on account of the extensive connections of the new members of the board, it will bring the company into touch with a much larger field. The increased financial facilities afforded will also enable the company to undertake much larger work than before, although it now holds the record for the biggest engine in the Dominion.

The change will also add greatly to the strength of the company. The intimate connection of Mr. Porteous, who is president of the Montreal and St. Lawrence Light, Heat and Power Company, and a director of several of the leading companies in Montreal; and Mr. Yuille, who is president of the Diamond Glass Company, with a large number of Canada's principal financial interests, will lead to a large increase in the financial resources of the company. Mr. Wanklyn, general manager of the Montreal Street Railway Company, and Mr. Davis, who is general manager of one of the largest manufacturing concerns in the city, will take an active interest in the mechanical side of the business. There is no change in the other offices, the position of managing-director being retained by Mr. Walter H. Laurie, known to be an expert as a steam and mechanical engineer, thus assuring the continued success of the company in engineering matters.

PRIZE WON AT EUCHRE.

A euchre match took place at the comfortable clubroom recently opened by the employes of The Thos. Davidson Manufacturing Co., between teams representing The Thos. Davidson Manufacturing Co. and The Canada Paint Co. for the handsome

cup shown in the accompanying illustration. The lead men upset the tin men by a good score and carried home the cup amidst great rejoicing. Captain of The Thos. Davidson Manufacturing Co.'s team, H. J. Chalmer; captain of The Canada Paint Co.'s team, P. Lamarche.

DEATH OF MR. JAMES SCOTT.

A man prominent in lumber circles passed away in the person of ex-Ald. James Scott, who, after an illness of about a year, died at his residence, 173 Jameson avenue, Toronto, on March 23, with pernicious anemia.

Mr. Scott had for years been connected with the Georgian Bay Lumber Company, as manager and general secretary. He was widely known through his relations with that firm. A native of Ireland, he came to Canada when quite young and settled in Brockville. He taught school for many years, afterwards entering the lumber business as a clerk in the office of the late Hon. W. E. Dodge, of New York, who formed the Georgian Bay Lumber Company out of a number of smaller concerns started by his son, A. J. R. Dodge, at different points on the Georgian Bay. When Mr. Dodge, sr., retired from business, Mr. Scott became manager, and that position he held until his retirement from active business some years ago. He was also head of the Georgian Bay Navigation Company for a considerable time. That company has recently been amalgamated with several other lines, forming the Northern Navigation Company.

Mr. Scott was an alderman for the years 1895, '96 and '97 in the Toronto City Council, representing ward six, and it was contrary to the wishes of his constituents that he retired at the end of the third year.

INQUIRIES ABOUT CANADIAN TRADE.

THE following were among the recent inquiries relating to Canadian trade received at the Canadian Government Office in London:

1. A German importer asks to be furnished with the names of some Canadian shippers of molybdenite.

2. A Liverpool firm of provision merchants who have a large sale for bacon (wholesale only) are open to sell on commission for any reliable Canadian firm requiring representation.

3. A Dublin house ask to be referred to Canadian manufacturers of mouldings suitable for picture frames, etc.

4. A correspondent asks for the names of manufacturers in Canada of motor cars and motor car parts.

5. The names of leading importers of cotton and woollen goods, and of some first-class booksellers and stationers in Canada, are required by a correspondent in the north of England.

6. A firm in the Midlands are desirous of arranging for direct consignments of Canadian apples, either on commission or at so much per barrel advanced against bill of lading.

Inquiries received by the Canadian section of the Imperial Institute:

1. A London firm of merchants would like to hear from Canadian manufacturers of doors and mouldings in quantity. They are in a position to contract for the total output of one or more factories.

2. A Liverpool firm ask to be placed in touch with the leading Canadian mining companies who use cyanide of potassium.

3. A London house wish to be placed in correspondence with Canadian sawmills which can supply packing case shooks on a large scale.

4. A firm in Brussels desire names of Canadian shippers of feldspar of good quality.

[Names of the firms making the above inquiries can be obtained on application to the editorof HARDWARE AND METAL.]

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, March 27, 1902.

HARDWARE.

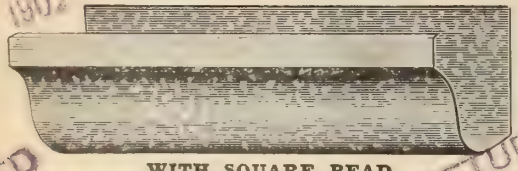
THE spring business has commenced with a rush, and all houses report an unusually active trade. This does not apply to only a few seasonable lines, but to the general list of hardware dealers' requirements. Some houses have been forced to work two or three nights in the week to keep up with the demand; and, although, in the case of the heavier goods, many shipments will be delayed until the opening of navigation, when it is expected that the freight charges will be lowered; still, merchants are asking for their smaller goods now, and the shipping departments in the wholesale houses are very active. The week, however, in some regards, will be a short one; as Good Friday is a holiday, travellers will have to close their week on Thursday night, and this will have some effect, though the increased trade of Thursday will doubtless make up for whatever is lost. Importers have a good deal of difficulty in obtaining goods from either England or the United States, and it looks as though those who cannot get what they want now will be almost unable to get it later on. The wholesale houses are buying much earlier than usual. One firm has bought a good many thousands of dollars worth of goods which ordinarily they do not buy till July. Under such circumstances it can readily be seen that the market for hardware generally is firm. Though a few changes in prices have occurred, nothing very startling is to be reported. Several lines of pipe fittings, nipples, plugs and bushings, have advanced. Heavy screw hooks and hinges are about 25c. per 100 higher. From 12-inch sizes up the price is now $3.25; and 6, 8 and 10-inch sizes are $4.25. There has been a change in fence staples, in that 25 and 50-lb. packages are 25c. extra. This was doubtless made to encourage small buyers to take the full keg. Canadian manufacturers of white enamelled ware have dropped the price about 10 per cent. on some lines. This, it is said, was done to meet German competition on this market.

BARB WIRE.—There is a good demand for barb wire. Prices have not changed, but they are firm. We quote $3 per 100 lb. f.o.b. Montreal.

GALVANIZED WIRE.—This is in better demand than a week ago. Quotations are: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—The market is far from active, but some business is being done at the current quotations. We now quote as follows: Bright iron and annealed on a base of $2.60 per 100 lb., f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras, per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

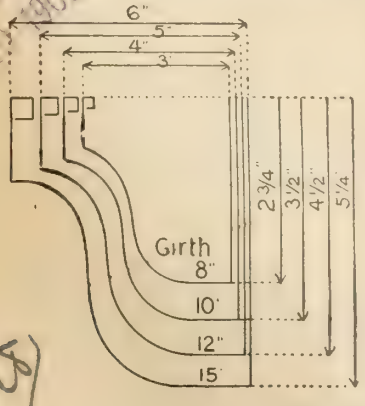
FINE WIRE.—Some improvement is noted but the inquiry is still on the light side. The discount is unchanged from 22½ per cent.



BRASS AND COPPER WIRE.—A moderate trade is being done this week at steady prices. The discount on both brass and copper wire is 60 per cent.

FENCE STAPLES.—The demand for these is brisk. The price remains at $2.90 per 100-lb. keg for bright, and $3.25 for galvanized, but there is an extra of 25c. for 25 or 50-lb. packages. This would be at the rate of $3.15 per 100 lb. for bright, and $3.50 per 100 lb. for galvanized.

WIRE NAILS.—Business is more active this week, but the movement is still unsatisfactory. Our quotations follow: $2.55 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.



CUT NAILS.—The demand for these has also improved, and is growing as the

The Robin Hood Powder Company

SWANTON, VT.

season advances. The price per keg, in small lots, is $2.35, and in carlots, $2.27½. Coopers' and flour barrel nails are discounted at 40 per cent.

HORSE NAILS.—The spring demand for horse nails has begun and an active market is reported this week. Our quotations are as follows: "C" brand at 50 and 7½ per cent. off and "M" brand at 60 per cent. off on oval and new city heads and 66 2-3 per cent. off for new countersunk heads.

HORSESHOES.—The inquiry for horseshoes is quite active, and a rapid improvement may be expected. There has been no change made in prices, and our quotations are as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS.—The market is in a much better condition than last week. Several large orders have been received, and shipments are now going forward. The discounts are unchanged. We quote: Flat head bright, 87½ and 10 per cent. off list; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.

BOLTS.—Business in bolts is still quiet since the change in discounts, and it is not expected to improve greatly for a little while yet. The discounts are as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3½c. per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—There is a good demand for building paper, especially for spring delivery. Several shipments, however, are going forward now. The prices are the same. Quotations follow: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 30c. per roll; tar sheathing, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE.—There is an active but steady market for cordage. Prices are unchanged from our last quotations. We quote as follows: Manila, 16c.; British manila, 14c.; sisal, 12½c.; lathyarn, 11c. Prices on binder twine are as follows: Blue ribbon, 650 feet to the pound, 14½c.; Redcat, 600 feet to the pound, 13½c.; Tiger, 550 feet to the pound, 12½c.; Standard, 500 feet to the pound, 11c.; sisal, 500 feet to the pound, 11c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—There is a very good demand for these this week, and a growing increase in the trade is reported. The discounts are as follows: Best iron rivets, section, carriage, and

wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, 35 and 5 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH.—The demand is active. The price is $1.25 per 100 square feet.

POULTRY NETTING.—Trade is good. We quote the discounts on Canadian or English at 60 per cent. off 2 x 2 mesh, 19 wire, and 55 per cent. off 2 x 2 mesh, heavier, Canadian list.

HARVEST TOOLS.—In these there has been during the past week a great improvement. Dealers report a lively business at unchanged prices. The discount is 60 and 10 and 10 per cent. off.

FIREBRICKS.—The market is featureless. We quote: Scotch, $19 to $23.50; English, $18.50 to $22.50 per 1,000.

CEMENT.—There is no change to report. Business is fair and prices unchanged, and our quotations are as follows: German cement, $2.30 to $2.40; English, $2.25 to $2.35; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.20 to $2.30 ex-cars.

METALS.

There has been no change in the situation of the metal market either here or abroad. The firm feeling continues, and in some lines the difficulty of procuring supplies is making itself felt. Locally, there is an active inquiry at current quotations. On all lines quotations can still be given at our last week's figures.

PIG IRON.—Prices on pig iron are very firm and there is an active inquiry. Summerlee sells for $21 to $21.50 and Canadian, $18.50 to $19.

BAR IRON.—It is expected that there will be some difficulty in obtaining all the supplies required, for two or three weeks, owing to the closing down of some mills. It is presumed that, on account of the continued heavy demand for some time past, they have not had much opportunity to get ahead with a stock to last over this time. We quote: Merchants' bar, small lots, $1.95; horseshoe iron, $2.15 to $2.20.

BLACK SHEETS.—The market is steady under a good demand. Prices are firm. We quote as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—There is a quiet market, though business shows some improvement over the previous week. Our quotations are as follows: No. 28, Queen's Head, $4.40; Apollo, 10¾ oz., $4.40; Comet, $4.25, with 10c. extra for less than case lots.

INGOT COPPER.—We quote 14c.

INGOT TIN.—A rather better trade has been done this week, but the demand is still very light. Straits are still quoted at 29c.

PIG LEAD.—The market is uninteresting. We quote $3.25.

LEAD PIPE.—Trade is quiet at steady and unchanged prices. Composition waste is quoted at 7½c.; ordinary, 7c. The discount remains at 35 per cent.

IRON PIPE.—Since the reductions in prices last week nothing new has transpired in iron pipe. The demand is only moderate, but improves. We quote standard pipe, per 100 ft., screwed and coupled, in lengths under 19 feet, as follows: Black pipe, ⅛, $3; ¼, $2.40, ⅜, $2.65; ½, $3; ¾, $3.70; 1-in., $5.25; 1¼, $7.40; 1½, $8.90; 2-in., $12.40. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $4; ¾, $5.05; 1-in., $7.25; 1¼, $10.10; 1½, $12.15; 2-in., $16.70. Extra heavy pipe, plain ends, are quoted, per 100 feet, as follows: Black, ½, $4.35; ¾, $5.30; 1-in., $7.60; 1¼, $10.60; 1½, $12.70; 2-in., $17.45. Galvanized, ½, $5.35; ¾, $6.70; 1-in., $9.60; 1¼, $13.30; 1½, $15.95; 2-in., $21.75. For threads and couplings 5 per cent. is added.

TINPLATES.—Prices are firm on tinplates, but the movement is light, and is little, if at all, improved. Cokes sell for $4.25 per box; charcoal for $4.75 to $5.25 per box.

CANADA PLATE.—Quite a few inquiries have been received for Canada plate for immediate delivery. Prices are firm. Our quotations are now as follows: 52's, $2.65 to $2.70; 60's, $2.75 to $2.80; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35.

STEEL.—There is a good demand and the market is inclined to strengthen. We quote: Sleighshoe, $2.10; tire, $2.15; bar, $2.05; spring, $2.85; reeled machinery, $3; toecalk, $2.60.

SHEET STEEL.—A small amount of business is doing at the following prices: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—A fair and growing demand is noticed this week. "Diamond" is still quoted at 8c. and Jessop's at 13c.

TERNE PLATES.—There is still very little doing, and the price is unchanged. from $7.75 to $8.

COIL CHAIN.—A brisk business is doing in almost all chains. A difficulty is still experienced in obtaining some

sizes. Quotations are as follows : No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-in., 7½c. per lb.; 5-16, $4.80 ; 5-16 exact, $5.25 ; ⅜, $4.25 ; 7-16, $4.05 ; ½, $3.85 ; 9-16, $3.75 ; ⅝, $3.55 ; ¾, $3.50 ; ⅞, $3.45 ; 1-in., $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—There is nothing doing. We quote $5.75 to $6.25.

ANTIMONY.—We quote 10c.

ZINC SPELTER.—This is unchanged. Spelter sells for 5c.

SOLDER.—A good demand continues. Bar solder is worth 18c., and wire solder 20 cents.

PAINTS AND OILS.

The feature of the paint and oil market is the sharp advance in turpentine of 8c., the price, for single barrels, now being at 75c. In the opinion of several of the operators, the price will gradually stiffen until the arrival of the new crop in June. While there is no complaint as to the scarcity of stock, the demand is so lively for this essential article that it is at present one of the best paying commodities which it is possible to hold. The lively trend on trade still continues, and the chief point with the makers of paint, especially of liquid paints, is not how to get in orders, but how to get them out. Paris green shows some slight firmness. There has been no change in quotations, but there is certainly now no disposition to shade prices. White lead is in a little better demand, but there is still room for improvement in the turnover. English vermilion is scarce, and is held at firm figures in a few hands. There has been a fair movement in red lead and litharge, which easily maintain their prices in view of the fact that stocks will be getting light before the spring fleet arrives. The factories have more orders for liquid paints than they can conveniently handle, and one has been running till eight and ten o'clock at night and has now arranged to double its hands and run night and day. We quote :

WHITE LEAD.—Best brands, Government standard, $5.87½; No. 1, $5.50 ; No. 2 $5.12½ ; No. 3, $4.75 ; No. 4, $4.37½ all f.o.b. Montreal.

DRY WHITE LEAD—$5.25 in casks ; kegs, $5.50.

DRY WHITE ZINC — Pure dry, 6½c. ; No. 1, 5½c. ; in oil, pure, 7½c. ; No. 1, 6½c. ; No. 2, 5½c.

PUTTY — We quote : Bulk, in bbls., $1.90 per 100 lb. ; bulk, in less quantity, $2.05 ; bladders, in bbls., $2.25 ; bladders, in 100 or 200 lb. kegs or boxes, $2.40 ; in tins, $2.55 to $2.65 ; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL—Casks, 7c. ; 100 lb. kegs, 7½c. ; smaller quantities, 8½c.

RED LEAD — Genuine red lead in casks, $4.50 ; in 100-lb. kegs, $4.75 ; less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25 ; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE—Ground, casks, 5c. ; less, 5½c. ; flake litharge, casks, $5.25 ; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 80c.; boiled, 83c. In 5 to 9 bbls., 1c. less ; 10 to 20 bbl. lots open, net cash, plus 2c. for four months. Delivered anywhere in Ontario between Montreal and Oshawa at 2c. per gal. advance and freight allowed.

TURPENTINE.—Single bbls., 75c. ; 2 to 4 bbls., 74c. ; 5 bbls. and over, open terms.

SHELLAC VARNISH — Pure white, $2.35 to $2.45 ; orange, $2.25 to $2.35.

MIXED PAINTS—$1.20 to $1.45 per gal.

CASTOR OIL—8¾ to 9¼c. in wholesale lots, and ¼c. additional for small lots.

SEAL OIL.—47½ to 49c.

COD OIL—32½ to 35c.

PARIS GREEN — Petroleum barrels, 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c. ; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms : 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

The trade in scrap metals is quite active this week. The price of wrought iron remains firm and will likely remain so until supplies from abroad arrive. This, with the opening of navigation, will create a much different situation in the market. Nos. 1 and 2 wrought iron are quoted at $1 higher this week. Zinc and stove plate are also a shade higher. We quote : Heavy copper and wire, 11c. per lb.; light copper, 8c.; heavy red brass, 11c.; heavy yellow, 9c.; light brass, 5c.; lead, 2¾ to 2¾c.; zinc, 2½c.; iron, No. 1, wrought, $18 ; No. 2, $8 per ton ; machinery scrap, $15 ; stove plate, $10 to $11 ; malleable and steel, $5 ; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6c. per lb.

GLASS.

Business among the wholesalers is quiet now. Practically all the trade have received their supplies. We quote as follows : First break, 50 ft., $2.10 ; second, $2.20 for 50 ft.; first break, 100 ft., $4 ; second break, $4.20 ; third break, $4.70 ; fourth break, $4.95.

HIDES.

There has been no change whatever in the hide market since our last report. Deliveries continue very light, and stocks are becoming lower. The demand, however, is not large. We quote : No. 1 hides, 7c.; No. 2, 6c.; No. 3, 5c.; No. 1 calfskins, 10c.; sheepskins, 65c.

MONTREAL NOTES.

Heavy screw hooks and hinges are about 25c. per 100 higher.

Turpentine has advanced 8c., and is now quoted at 75c. in single barrels.

White enamelled ware has been reduced in price, and is about 10 per cent. lower.

Twenty-five cents extra is now charged for 25 and 50-lb. packages of fence staples.

ONTARIO MARKETS.

Toronto, March 27, 1902.

HARDWARE.

SPRING trade is gradually becoming more pronounced. The wholesale houses are this week about as busy as they want to be. The demand for spring goods is active, and such lines as manure and digging forks, gas and oil stoves, rope, enamelled ware, eavetrough and conductor pipe, and churns are being rapidly shipped. There is a fairly good business in wire nails, bolts, rivets and screws. Fence wire is beginning to move a little better. Prices are much about the same as they were a week ago.

BARB WIRE.—The movement is fair this week. Quotations are as follows :

F.o.b. Cleveland, $2.77½ for less than carlots, and $2.65 for carlots. From stock Toronto, $3.

GALVANIZED WIRE.—The movement is also fair in this line, and our quotations are as follows : Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity ; No. 9, $2.85 to $3.15 ; No. 10, $3.60 to $3.95 ; No. 11, $3.70 to $4.10 ; No. 12, $3 to $3.30 ; No. 13, $3.10 to $3.40 ; No. 14, $4.10 to $4.50 ; No. 15, $4.60 to $5.50 ; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—The demand for oiled and annealed wire continues to improve. Practically nothing is being done in hay-baling wire. Base price, $2.60 per 100 lb. Oiling, 10c.; coppering, 60c.;and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—Business is only moderate. Discount is 22½ per cent.

WIRE NAILS.—The movement is, if anything, a little better than it was a week ago. Our quotations are as follows : $2.55 for less than carlots and $2.50 for carlots. Delivery points, Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—Still quiet and featureless. Base price is $2.35 per keg, with 7½c. allowance on carlots.

HORSE NAILS.—Business is only moderate. Discounts are as follows : "C" brand, oval head, 50 and 7½ per cent., and on "M" and other brands, 50, 10 and 5 per cent. Countersunk head 60 per cent.

HORSESHOES.—Very little doing. We quote f.o.b. Toronto as follows : Iron shoes, No. 2 and larger, light, medium and heavy, $3.60 ; snow shoes, $3.85 ; light steel shoes, $3.70 ; featherweight (all sizes), $4.95 ; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85 ; snow shoes, $4 ; light steel shoes, $3.95 ; featherweight (all sizes), $4.95.

SCREWS.—Business appears to be rather brisker than it was even a week ago. The manufacturers, however, complain of the low prices that are ruling, due, in turn, to the fact that the manufacturers in the United States are also low in their quotations. The discounts are as follows: Flat head bright, 87½ and 10 per cent; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze 70 per cent.

RIVETS AND BURRS.—A good trade is still the feature of this line. We quote as follows: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 and 10 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—Trade is still good. Quotations are as follows: Carriage bolts, common (81 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent.; machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66 2-3 per cent.

ROPE.—A good seasonable trade is being done and prices rule firm. We quote: Pure manila, 16c.; British manila, 14c.; sisal, 12½c.; lathyarn, 11c.; sisal bed cord, 3 cord, 48 ft., 65c.; 60 ft., 80c.; 72 ft., 95c. per doz.

BINDER TWINE.—There is not a great deal doing this week, and although quite a number of orders have been booked for the season's requirements it is the opinion that they are not as numerous as last season's. People appear to be inclined to await developments. Quotations are as follows: "Blue Ribbon," 650 ft., 14½c.; "Red Cap," 600 ft., 13½c.; "Tiger," 580 ft., 12½c.; sisal, 500 ft., 11 cents.

BARN DOOR HINGES.—The demand is fair at the recent advance, and quotations are as follows: 6 to 10 inch at $4.50, and 12-inch and up, $3.50. Business is fairly good.

MILK CAN TRIMMINGS.—Business is just moderate, there being no large orders. Discount 25 per cent.

SAP BUCKETS.—Just an occasional order being received, the season being about over. Discount 40 and 10 per cent.

EAVETROUGH, ETC.—There is a good movement in eavetrough and conductor pipe. Eavetrough is quoted at $3.10 per 100 feet for 10-inch, and conductor pipe at $1 for 3-inch, and $5.25 for 4-inch.

ENAMELLED WARE.—There is a fair demand and quite a number of orders have been taken for shipment April 1.

TINWARE.—There is not a great deal being done.

GAS AND OIL STOVES.—The demand this week is good both for oil and gas stoves. More inquiry is heard for gasoline stoves than for some years. Owing to a combination among the blue-flame oil stove manufacturers in the United States local wholesale dealers are quoting higher prices, the discount now being 15 per cent. instead of 20 per cent.

SCREEN DOORS AND WINDOWS.—Only an occasional order is being received. Common doors, 2 or 3 panel, are quoted f.o.b. factory points: Walnut, stained, 3-in. style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-in. style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2.50 per dozen.

SPADES AND SHOVELS.—Trade is fairly good. Discount 40 and 5 per cent.

HARVEST TOOLS.—There is quite an active demand for manure forks and other similar lines. Discount 60, 10 and 10 per cent.

BUILDING PAPER.—Trade is fair. Our quotations are as follows: Dry sheathing, grey or straw, 30c. per roll; tar sheathing, grey or straw, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c per roll.

LAWN MOWERS.—A few orders are being placed. We quote: Discount on high-wheel mowers, 50 per cent.; "Star" mowers, 9-in. wheels, $2.50 to $3; "Daisy" mowers, 17-in. wheels, $2.25 to $2.50.

CEMENT.—Trade is improving and a number of orders have been shipped. We quote: Canadian Portland, $1.90 to $2.75; Canadian hydraulic, $1.25 to $1.50; German cement, $3; English, $3 to $3.15; Belgian, $2.50 to $2.75 per bbl., and American, $2.20 to $2.30 ex-cars.

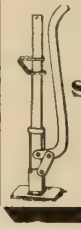
METALS.

The market is fairly active, with prices firm, as a rule.

PIG IRON—The demand is good and prices firm. It is still very difficult to get delivery from the furnaces. The idea for No. 2 foundry Canadian iron is $19.50 on track Toronto.

BAR IRON—The market is still active and prices firm. Some of the mills are still unable to supply the demand. We quote price at $1.95 to $2.05. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

STEEL—The market is still strong, and private advices from the United States say that an advance in price is looked for on April 1. We quote as follows: Merchantable cast steel, 9 to 15c. per lb.; drill steel, 8 to 10c. per lb.; "B C" and "Black Diamond" tool steel, 10 to 11c.; Jessop's, Morton's and Firth's tool steel, 14c.; toe-calk steel, $2.85 to $3; tire steel, $2.30 to $2.50; sleighshoe steel, $2.10 to $2.25; reeled machinery steel, $3, hoop steel, $2.90.



BLACK SHEETS—The demand continues good. We quote: Common, $3.15 for 28 gauge; and dead flat, $2.50 for 26 gauge.

CANADA PLATES—There is not much doing. We quote: All dull, $3; half polished, $3.10; all bright, $3.75.

GALVANIZED SHEETS—The early spring is naturally reflected in the demand for galvanized sheets, and trade during the week has been fairly active. We quote as follows: "Queen's Head" brand at $4.50 in case lots, and $4.65 in less quantities.

TIN—A good business has been done during the past week in both small and large lots. The outside markets are quiet. Locally, prices are unchanged at $29 to $30 per 100 lb.

MEAFORD, ONT. (12)

TINPLATES — The demand continues good, but deliveries are coming forward very slowly and this is causing a great deal of inconvenience. One firm that was expecting four carloads of tinplates from England received a shipment this week that was not equal to one carload. We still quote IC at $4.25.

TINNED SHEETS—This is between the seasons, and orders are only of a sorting nature. We quote: 72 x 30, up to 24 gauge, 7½c.; ditto, up to 26 gauge, 8c.

TERNE PLATES—Business is quiet this week. We quote I C, 20 x 28, at $8.50.

COPPER — The demand is fair both in ingot and sheet copper. We quote ingot unchanged at $15 per 100 lb.

BRASS—Trade is quiet. Discount 15 per cent.

PIG LEAD—Trade is quiet. We quote: Pig lead at $3.50 to $3.75, and bar lead at $5.

IRON PIPE — Trade keeps fairly good. We quote per 100 ft.: ⅛ in., $3; ¼ in., $2.50; ⅜ in., $2 75; ½ in., $3; ¾ in., $3 70; 1 in., $5.25; 1¼ in., $7.40; 1½ in., $8 90; 2 in., $12.40; galvanized, 1 in., $7.25. Trade discount 4 per cent.

ZINC SPELTER—There is a light movement. We quote $5.50 to $6 per 100 lb.

ZINC SHEET—Orders are still numerous but for small quantities. We quote $6 to $6.25 in casks and $6.25 to $6 50 in part casks.

SOLDER—The demand continues good. We quote: Half-and-half, guaranteed, 19c.; do. commercial, 18½c.; refined, 18c.; wiping, 17½c.

ANTIMONY—Some business is being done in small lots. We quote 10c. per lb. for Cookson's.

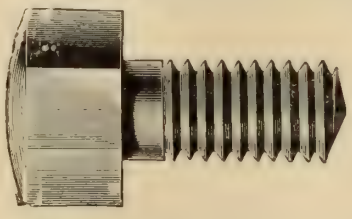
PAINTS AND OILS.

There has been a jump of 8c. per gal. in turpentine since last week, and the indications are that prices may go higher. The stock of turpentine in the Southern States is reported to be small, and prices there have been steadily advancing. The supply of turpentine on hand locally is also small. Raw and boiled oils continue firm, and they have recently become quite active, the sales being mostly for local consumption. Ochres and dry colors generally are beginning to move freely. White leads in oil continue in good demand. Wholesale paint merchants report that outside customers are buying in larger quantities this year than formerly. Also, there are a good number of sales being made to people never heard of before, and this is taken as a good omen for the future expansion of trade. Beyond the advance in turpentine above mentioned, there has been no other change in prices. We quote:

WHITE LEAD—Ex Toronto, pure white lead, $5.87½; No. 1, $5.50; No. 2. $5.12½; No. 3, $4.75; No. 4, $4.37½ in pkgs. of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.12½.

GLOBE BRAND

Files and Rasps



ALL SIZES,

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.

BENZINE—In barrel lots, 16½c. per gal.; less quantities, 25c. per gal.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING — 65c. per 100 lb.; Gilders whiting, 80c.

GUM SHELLAC — In cases, 35c.; in less han cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY—Bladders, in bbls., $2.25; bladders, in 100 lb. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

PUMICE STONE — Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS—Pure, $1.20 to $1.30 per gal.

CASTOR OIL — English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL—Raw, 1 to 4 barrels, 82c.; boiled, 85c.; 5 to 9 barrels, raw, 81c.; boiled, 84c., delivered. To Toronto, Hamilton and London, 2c. less.

TURPENTINE—Single barrels, 76c.; 2 to 4 barrels, 75c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

A good demand is springing up, and locally the movement from stock is quite brisk. We quote: Under 26 in., $4.25; 26 to 40 in., $4.65; 41 to 50 in., $5.10; 51 to 60 in., $5 35; 61 to 70 in., $5.75; 71 to 80, $6.25; 81 to 85, $7; 86 to 90, $7 75; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33⅓ per cent.

OLD MATERIAL.

There is a good demand for all scrap metals. We quote as follows: Agricultural, 60 to 65c. per cwt.; machinery cast, 60 to 70c.; heavy copper, 10½c. per lb.; stove cast, 40 to 50c.; No. 1 wrought, 60 to 70c. per 100 lb.; new light scrap copper, 7½ to 9½c. per lb.; bottoms, 8½ to 9c.; coil wire, 10 to 10½c.; light brass, 5 to 6c.; heavy yellow brass, 7½ to 8c.; heavy red brass, 8½ to 10c.; scrap lead, 2¼c.; zinc, 2 to 2½c.; scrap rubber, 6c.; good country mixed rags, 50 to 60c.; clean dry bones, 40 to 45c. per 100 lb. The higher prices are what is paid in car lots f.o.b. Toronto, and lower are for less than car lots.

PETROLEUM.

The demand is steady at unchanged

prices. We quote: Pratt's Astral, 16½ to 17c. in bulk (barrels, extra); American water white, 17 to 17½c. barrels; Photogene, 16½ to 17c.; Sarnia water white, 16 to 16½c. in barrels; Sarnia prime white, 14½ to 15c. in barrels.

COAL.

There is some improvement in the coal situation and dealers here are not finding so much difficulty in filling their orders. The prices are unchanged. We quote at international bridges as follows: Grate, $4.75 per gross ton; egg, stove and nut, $5 per gross ton; soft coal, $2.50 to $3.25 in bond, according to grade.

MARKET NOTES.

Turpentine has advanced 8c. per gal.

NOVA SCOTIA MARKETS.

HALIFAX, March 25, 1902.

THE wholesale hardware trade has been very active during the last week, as during the preceeding two or three weeks, and large spring orders continue to come in rapidly, and the various firms are kept busy filling them. The same difficulty experienced last year has appeared, that of procuring goods promptly from first hands. However, the city dealers have been carrying large stocks, and are able to work off their orders very promptly.

* * *

The retail trade has only been fairly active, and will, no doubt, suffer somewhat during the next few weeks by the sale of Crowell Bros.' stock damaged by the fire. This firm has now advertised at auction, to commence this week, "what was $40,000 worth." Much depends on whether the sales are made in large or small quantities, and whether the purchases are made in or out of the city.

* * *

Considerable advances have been made during the last 10 days in carriage bolts, bar iron and iron used by pipe manufacturers. Foreign iron and steel markets are firm, and advances all along the line are anticipated to take effect at any time. The orders coming in from various points in the Province indicate that there will be much greater activity in the building trade this season than last. Payments are made very promptly, and a healthy state of the country is apparent, indicating the prospects of a good year's business ahead.

* * *

The business in fishing supplies for the last two or three weeks has been very active, and the fishermen are now pretty well fitted out for the season's work. Prices for nets, lines and twines are firm at late advances, owing to the firmness of the cotton market. Further advances are also anticipated in sisal and manila cordage, which has been very firm for some time and has been subject to advances.

* * *

It is reported that the manufacture of barb wire, wire fencing, etc., has increased 25 per cent. over a year ago, and that the product will then not even meet the demand. The largest manufacturers in this line in the Province are the firm of Munro Bros., New Glasgow. This firm is now being incorporated by the Legislature as a joint stock company, and the capital will be increased, looking to a larger output. This firm commenced in a very small way some years ago to manufacture spring beds, and have gradually developed to a large manufacturing concern, manufacturing many lines of wire goods.

R. C. H.

BUILDING AT NORTH SYDNEY, C.B.

Vooght Bros.' departmental store at North Sydney, C.B., when finished, will be four storeys high, with a frontage of 118 feet on Commercial street, and extending back 92 feet. There will be a basement to the building, and two entrances. The structure will be built of brick and stone.

A large fire and burglar-proof building is to be erected on Commercial street for the Bank of Nova Scotia. It will be entirely constructed of brick and stone and will have the most up-to-date improvements.

A large two-storey structure of brick and stone will furnish accommodation for the Union Bank of Halifax on Commercial street, when completed. Its interior will also be handsomely furnished.

BUILDING IN LEAMINGTON.

Quite a building boom will be going on at Leamington during the coming summer. Residences are now being built for L. J. Wright, Wesley Coulson, Mrs. Coultis, Harry Turner, John Hutchinson and L. S. Moore. A two-storey brick block will be built for Wesley Coulson, a two-storey brick block for J. B. Wynne, and the block of Jackson, Foster & Harrison that was partially destroyed by fire some time ago will be rebuilt. Repairs will be made to the residences of Hugh Lindsay, E. Foster, Ed. Smith, M. Ryall and to the block of W. Hepinstall.

FIRE IN POLSON'S WORKS.

On Monday night, March 24, The Polson Iron Works on Esplanade east, Toronto, were damaged by fire to the extent of $7,000 or $8,000. The place was completed gutted. Electric wires are supposed to have caused the fire.

In the building were stored some expensive patterns; a quantity of planing machinery was on the ground floor, and there was some valuable lumber being planed for a yacht that is being built for Charles Macdonald, of New York. Some of the patterns were for the new Government dredge for Montreal harbor.

There was insurance on the building of a considerable amount. The loss is divided as follows: About $5,000 to $7,000 on the patterns; $2,000 on the planing machinery, and $400 on the building.

CAUGHT RED-HANDED.

A man named John McInnis was caught stealing some sewer pipe from the rear of the premises of Purdy & Mansell, plumbers, on Adelaide street, Toronto, on Tuesday, March 25, by some employes of the firm. The man had an express wagon, on which he was loading the pipe. When caught, he declared that he had been sent there by The Bennett & Wright Plumbing and Heating Co., but his statement, upon investigation, was found to be untrue. McInnis was handed over to Detective Black and locked up to await a trial on a charge of theft. The accused lives at 49 Richmond street east.

He was before the Police Magistrate on Wednesday and was remanded for a week.

HEATING AND PLUMBING

THE THREATENED STRIKE OF TORONTO PLUMBERS.

THE Plumbers, Steam and Gas Fitters' Union, Toronto, are demanding 37½c. per hour. At present they are receiving 32½c. per hour under an agreement entered into last spring and which was to have remained in force until 1904. They cannot, therefore, ask for an increase without breaking this contract. But at a meeting of the Union on March 21 it was suggested that the proposed advance be asked for, and a committee was appointed to confer with their employers concerning it.

"Hardware and Metal" interviewed several of the leading master plumbers of Toronto to ascertain their views on the matter, and, although, not caring to have their names mentioned, the general opinion seemed to be that the demands of the journeymen were preposterous.

The existence of the present contract is held to be a bar to an advance, and it is felt that at least the men ought to live up to their bargain which was considered quite a concession to them at the time it was made. Should they go on strike it is believed that the sympathies of the public will be against them.

It is urged by some of the members of the Union that the master plumbers have not yet fulfilled this agreement, but it is stated against this that there was a grievance committee appointed at the time the contract was made to heal all complaints. Nothing has yet been brought before this committee and so it is held the allegations of the men are unfounded.

It is also claimed that should the plumbers strike, the law would be against them, as they could not do so without breaking their agreement. The Hon. Wm. Mulock, the Dominion Minister of Labor, it is stated, if appealed to, would only tell them to observe their contract.

A leading master plumber informed "Hardware and Metal" that the Supreme Court of Great Britain holds that in case of a strike in violation of a contract entered into by the men with their masters, the men should be held liable for any damage committed by them through their lockout. It is held that this ruling would apply here.

VANCOUVER PLUMBERS WANT HIGHER WAGES.

The Vancouver, B.C., plumbers are out for more wages and shorter hours. At a recent meeting a list of demands was drawn up to be presented to the master plumbers, with a request that they go into effect on April 1.

The principal features are: Eight hours to constitute a day's work; journeymen to receive $3.60 per day, and juniors, $2.50; overtime, price and a half up to 10 p.m., and double after that; double time to be allowed for work done Sundays and holidays; the boys now employed to be retained and no new ones to be taken on till the present supply is exhausted; only one to be employed in each shop; he must work four years as a helper and two years as a junior; no more than one junior to be employed in a shop until there are three journeymen; if any are to be discharged, juniors are to go first; no laborer, driver, or office help to be employed on a plumbing job; boss to pay travelling expenses when work done out of the city; no more than one master plumber to work on a job; fine for violation of agreement to be from $5 to $25; Saturday afternoon to be a legal holiday; but men to work if it be absolutely necessary; journeymen and juniors to be paid within one hour after quitting work on Saturdays.

PLUMBING AND HEATING CONTRACTS.

OWEN & PRESTO, plumbers and gasfitters, Toronto, have secured the contract for the plumbing and gasfitting of a residence for J. Kelso, at 18 St. Vincent street.

Guest & Co., plumbers, Toronto, have secured contracts for the plumbing of two houses at Kew Beach for Wm. Charlton; the plumbing of a house at Kew Beach for Hunter Brown; the gasfitting of a residence at Kew Beach for Wm. Harvey; the plumbing and gasfitting of houses at Kew Beach for Kew Williams, for Mr. Holman and for Mr. Gates; the plumbing of a boathouse for R. S. Williams at Kew Beach; the plumbing of a residence at Kew Beach for ———. Sellers, and also the waterworks on about 20 houses at that place; The plumbing of Thos. Walmsley's house, Deer Park; the installation of a heating apparatus and system for Dr. Wilberforce Aikens, Church street; the installation of hydraulic water motors in St. Jerome's College, Berlin; in a church in connection with the above college at Waterloo, in a residence of Edmond Brown, Brantford, and a residence of F. W. Lyonde, Toronto.

BUILDING PERMITS IN HAMILTON

Building permits at Hamilton have recently been granted to Frank Taulty, for a brick cottage on Catharine street, between Ferrie and Simcoe streets, to cost $650; to George White, for a brick stable in rear of 163 East Main street, to cost $200; to T. Tribute, for alterations and additions to a house at the corner of York and Inchbury streets, to cost $600; and to W. A. Edwards, for brick additions to the premises of The B. Greening Wire Co., to cost $4,000; to John Hummel, for a brick addition to 95 South Bay street, for C. H. Bampfylde, to cost $2 E; to Thomas Allen, for three brick dwellings on Augusta street, between Catharine and Walnut streets, to cost $3,600; to George H. Milne, for a brick dwelling on Earl street, between Barton and Princess streets, for Albert Marks, to cost $1,200; to Thomas Lovejoy, for a brick stable on East King street, between Walnut street and Ferguson ave., for R. B. Spera, to cost $150; and E. Kenrick, for a brick addition to 13 East Main street, to cost $250.

BUILDING PERMITS IN TORONTO.

THE building permits taken out in Toronto for the week are as follows: P. Maher, for a two-storey brick stable in rear of 16 Hayden street, for $8,000; Jno. Patterson, for a pair of two-and-a-half storey brick dwellings, semi-detached, with stables, at 17 and 19 McCaul street, for $6,500; Gideon Henderson, for a two-and-a-half storey brick dwelling on Glen Road, for $7,000; S. T. Aberdeen, for a two-storey and attic brick dwelling on Gladstone avenue, for $2,800; Wm. Ryan, for a new shop front to building at 178 Queen street east, for $150; G. Guest, for a brick foundation under dwelling at No. 1 Broadview ave., for $150; Mr. Bowerman, for a two-storey brick addition to dwelling at 52 Fallis ave., for $300; Rutherford, Marshall & Co., for the construction of egg vats at 68 Front street east, for $500; J. H. Renyhart, for a brick and cement cellar under dwelling at the corner of Elm street and Centre ave., for $100; B. Pressley, for a new wood and glass shop front under dwelling at 353 Queen street east, for $100; T. Roden, for a one-and-a-half storey roughcast stable in rear of 257 Rusholme Road, for $250; Richard Parson, for a one-and-a-half storey frame and roughcast dwelling at 83 Westmorland ave., for $600; Wm. Reid, for a pair of two-storey detached frame and roughcast dwellings on Preston ave., for $1,000; Arthur Wells, for a pair of semi-detached two-storey brick-clad dwellings at 47 and 49 Osler ave., for $1,700; R. Dack, for a two-storey brick addition to factory in rear of 75 King street west, for $3,500; E. and S. Currie, for a two-storey brick addition to warehouse at 62 and 64 Wellington street west, for $8,000; John J. O'Leary, for a two-storey brick livery stable on a stone foundation on Spadina Crescent, for $4,000; Delaney & Pettit, for a two-storey brick factory on Jefferson ave., for $7,000; Dr. Harrington, for a two-storey and attic brick residence on Bathurst street, for $6,500; Mrs. Ida Thompson, for a two-storey and attic brick residence on Crescent Road, for $3,500; H. H. Halls, for a two-storey brick dwelling at 28 Harvard street, for $1,800; John F. Hillock, for a pair of two-storey semi-detached roughcast dwellings on Shawley street, for $1,200; Geo. Evans, for a two-storey brick and roughcast addition to dwelling at 39 De Grassi street, for $450; James Edwards & Co., for a two-storey brick addition and alterations to factory at 126 Garden ave., for $1,800.

PLUMBING AND HEATING NOTES.

Charles Doughty, of Maxwell, Doughty & Johnson, plumbers, etc., Bay street, Toronto, has retired from that firm to take a position as foreman with W. J. McGuire & Co., plumbers, etc., Toronto. F. Maxwell and H. Johnson will continue the business under the style of Maxwell & Johnson.

Ham & Edwards, plumbers, tinsmiths, etc., Hamilton, Ont., have dissolved; R. Edwards continues.

M. A. Dube & Cie., plumbers, have registered at Montreal.

When you lay in your stock of house paints, don't forget the roof paints, the barn paints, the fence paints, the "outside" paints. It's not every man can afford to put high-grade house paints on his barns and he does'nt need to if he knows it. Every dealer can make money with

RAMSAYS
OUTSIDE PAINTS

which he can sell at $1.00 per gallon, and the man with outhouses and fences gets to work and paints up places he never painted before, because he can do it reasonably.

That means **new** business for you, does'nt it?

We can send you a color card of **"Ramsays Outside Paints"** if you want it.

SOME BUILDING NOTES.

A new town hall is being built at Waterford, Ont.

James Walker intends building a residence at Perth, Ont.

A new Anglican church will be built at Rosser, Man., during the spring.

A new brick schoolhouse is being erected at Dunblane, Ont., costing $900.

A three-storey brick block will be built at Smith's Falls, Ont., for D. F. Wood.

R. C. Williams is getting ready for the erection of a new dwelling at Thorold, Ont.

A new $2,000 cheese factory is being built at Brewer's Mills, Ont., for Robert Anglin.

A. Horn is preparing for the erection of a brick house at Kingsley, Man., during the summer.

The C. P. R. is having a chalet, containing 16 sleeping rooms, constructed at Emerald Lake, B.C.

A large factory will be erected on Vine street, Hamilton, by The Howell Lithographing Company.

There is a movement for the erection of a new Methodist church at Calgary, Northwest Territory.

A 50 x 100 foot addition is being made to the factory of The Fowlers' Canadian Company at Hamilton.

A brick and stone warehouse, 36 x 165 feet, will be erected at Aylmer, Ont., for The Aylmer Canning Co.

The Ontario Lantern Company, Hamilton, is building an addition to its factory on East Cannon street.

Three new stores are being built at Tamworth, Ont., by D. E. Rose, in place of those recently destroyed by fire.

A new elevator is being constructed at Atwood, Ont., for Hay Bros., to have a capacity of 25,900 bushels of grain.

A new Baptist church will be erected at the corner of Dorchester and Guy streets, Montreal, during the coming summer.

The Waterous Engine Works, Limited, will erect a brick and stone office building, 45 x 80 feet, at Winnipeg, at a cost of about $8,000 in about three months.

THE ONTARIO CONVENTION.

Mr. Wm. Mansell has been busy preparing for the convention of Master Plumbers' of Ontario which is now being held in Toronto. Delegates from nearly every association in the Province are on hand, and the strong associations of London, and of Windsor, Ont., are being represented by proxy. The convention opened at 10 a.m. on Good Friday, and everything points to the formation of a strong Provincial Association. Full particulars of the proceedings of the convention will be given in next week's issue of "Hardware and Metal."

HAS RESIGNED THE MANAGEMENT.

Mr. John M. Taylor, general manager of The Dominion Radiator Company, Limited, Toronto, and his brother, Adam Taylor, assistant manager, have resigned their positions after April 1. They go into the foundry business with The A. R. Woodyatt Company, Limited, manufacturers of lawn mowers, etc., Guelph, Ont., of which firm Mr. J. M. Taylor becomes president.

Mr. Joseph Wright, the president of The Radiator Company will fill the office of general manager until a successor is appointed.

CANADIAN ADVERTISING is best done by THE E. DESBARATS ADVERTISING AGENCY MONTREAL.

THE NEVER-LOST SCYTHE WRENCH.

A simple device that every tiller of the soil will buy on sight was patented by me in 1900. I will sell the patent outright to someone who is prepared to manufacture and sell same. Circulars and full particulars sent to all who write. Desirable for mail-order houses—canvassers and hardware dealers generally. Terms reasonable and fair. Address, **H. O. KRUSCHKE,** inventor and patentee, Dexterville, Wis., U.S.A. (11)

GALVANIZING

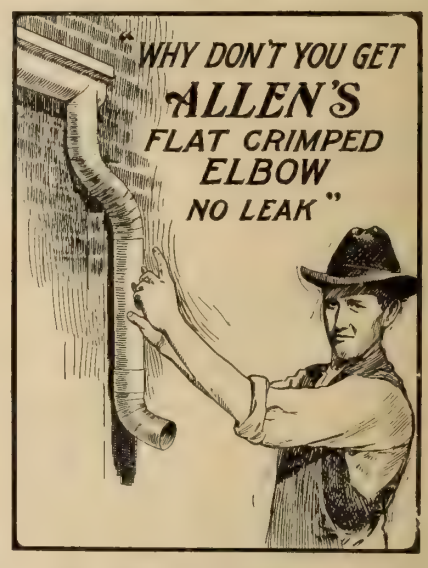
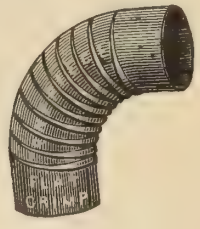
Ontario Wind Engine & Pump Co, Limited, 505 Atlantic Ave., Toronto.

CARRIAGE BUYERS should demand



DUNLOP TIRES

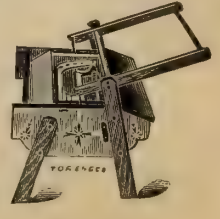


Nothing but good wear can come from Dunlop Tires, because nothing but good rubber goes into them. Dunlop Tires are made for Autos and Bicycles.

Dunlop Tire Co., Limited, Toronto.

2, 3, and 4-in. Tin and Galvanized Conductor Elbows, for sale by all leading jobbing houses.

Made by GEO. ALLEN, BURLINGTON, ONT.



"DAISY" CHURN

Has tempered steel cased bicycle ball bearings, strongest, neatest and most convenient frame. Only two bolts to adjust in setting up. Steel Bow Levers, suitable for either a standing or sitting posture. Has four wheels and adjustable feet to hold stand steady while churning. When churn is locked to stand the bow can be used as handles to move it about on the front wheels as handy as a baby carriage. Open on both sides to centre, giving free space for pail. Made with wood or steel stands, with Cranks only, or Bow Levers as desired.

Vollmar Perfect Washer

Has a most enviable record. A perfection of its kind—will wash more clothes in less time, do it better and easier, with less wear and tear, than any other machine.

THE

Wortman & Ward Mfg. Co., Limited

LONDON, ONT.

Eastern Branch, 60 McGill Street, Montreal, Que.

Messrs. Imperial Varnish & Color Co., Limited,

TORONTO, ONTARIO, CANADA.

GENTLEMEN,

We, the undersigned Hardware Merchants and Paint and Varnish Dealers, who are handling your Elastilite Varnish, have pleasure in testifying that it has given our customers and ourselves splendid satisfaction, and has proven to be all you claim for both inside and outside uses. It produces a high-grade finish, equal in durability to the best outside wearing varnishes.

The price being moderate, and it being peculiarly adapted for both inside and outside work, or in other words suiting all purposes, it does away with the necessity of stocking so many different lines of varnish. The packages are neat, attractive and handy. The large Cabinet Show Can provides not only a compact way of carrying a stock of the varnish, but is a very attractive ad. in our store or window.

LEADER CHURN

New Century Improvements

FOUR DIFFERENT STYLES:

A—Steel Frame with double reversible Steel Lever.
B—Wood Frame with double reversible Steel Lever.
C—Steel Frame with Crank.
D—Wood Frame with Crank.

Styles **A** *and* **B** *may be operated from a sitting or standing position.*

Steel Frames and Hoops beautifully ALUMINIZED.

All LEADER CHURNS are equipped with BICYCLE BALL BEARINGS and PATENTED CREAM BREAKERS.

Stands are so constructed that they are particularly strong and rigid, and there is nothing to interfere with the placing of pail in the most convenient position for draining off buttermilk.

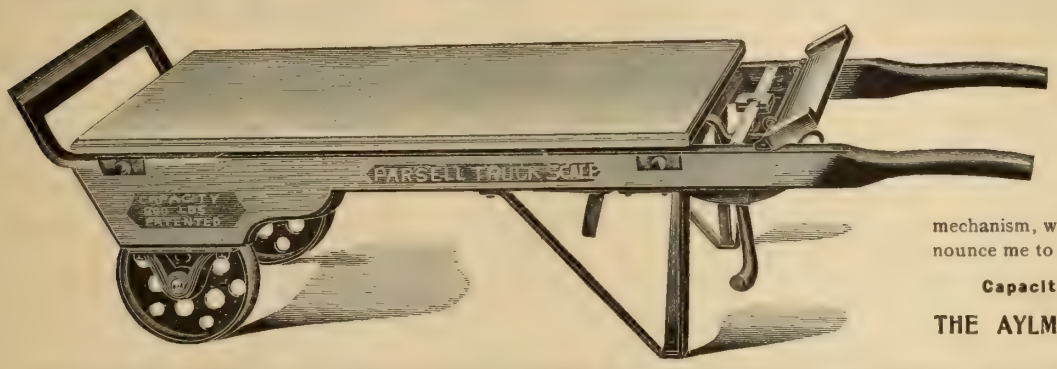
It Pays to Have the Best. None are Better Than the Leader.

THE DOWSWELL MANUFACTURING CO.,
HAMILTON, ONT. Limited.

Eastern Agents: W. L. Haldimand & Son, Montreal, Que.

The New Century Washing Machine

IT LOOKS EASY
IT IS EASY.



Steel Ball Bearings, same as used in High-Grade Bicycles, and strong tempered steel spiral springs render it so. No machine on the market approaches it in simplicity, ease, quickness, or thoroughness.

Equally well adapted for use in Public Institutions, Hotels, Laundries, or the Home.

The operator does most effective work while seated. Splashing impossible.

Quick Seller. **Once Inspected, Soon Selected.**

I AM THE PARCELL DROP LEVER TRUCK SCALE.

I HAVE no connection or relationship with any other Truck Scale. Do not condemn me because some other Truck Scale was not right, but give me a chance to prove to you that I am the most convenient scale made, and that I am perfectly correct and a first-class piece of mechanism, which I must be, as good inspectors pronounce me to be a first-class article.

MANITOBA MARKETS.

Winnipeg, March 24, 1902.

OWING to the heavy storm of last week, business has been quiet and dull, though all houses are working steadily on getting out spring orders.

No change of price has occurred in any line mentioned in the price list furnished last week. It is rumored, however, that advances in some lines may be looked for before the week is out.

The price list is as follows :

Barbed wire, 100 lb	$3 30

Coiled Spring and Other Fence Wires, Fence Supplies.

CANADIAN AND WEST-INDIAN TRADE DISCUSSED.

THE Georgetown, Demerara, Argosy, of March 5, contains a report of a meeting of the Chamber of Commerce of that place on March 3, when the possibilities of developing Canadian and West-Indian trade with that colony were discussed. Mr. Robert Munro, president of the Canadian Manufacturers' Association; J. F. M. Stewart, assistant secretary of the Association; G. J. Morrison, J. C. Archibald, Thomas Patterson, H. Thompson, J. S. Billman and Hon. Thomas Kickham were present in the interest of Canadian trade.

In the course of his remarks, Mr. Robert Munro stated that 900 firms were represented in the association to which he belonged, and their invested capital exceeded $200,000,000. The combined imports and exports of the Dominion for the year 1901 exceeded $400,000,000. These figures had been doubled within the last 12 years. But, of all the $400,000,000 imports and exports of last year, only $3,000,000 was with the West Indies. With a population of less than 250,000, Newfoundland took six times as much flour as the West Indies with their 2,000,000 souls. Lumber, including doors and sashes, organs, pianos, wagons, iron, steel and other metals, textiles, cotton fabrics, woollens, leather goods, and electrical machinery were some of the articles the Dominion could export to these islands. The Association had now on hand a number of projects for the furtherance of Canadian trade, such as the establishment of a line of steamships to the Cape of Good Hope, the appointment of a Canadian consular service and the advocacy of a preferential tariff between British possessions. He touched on the object of this visit to the West Indies, which was to seek their trade, and offered the merchants there and elsewhere the cooperation of the Association, as far as it would be reasonable for them to give, in any measures that would have a tendency to promote a reciprocal trade with the Dominion.

Mr. Stewart said he had found out that the people of these colonies were only going to buy what they wanted and not what the manufacturers wished to sell them. When he went back he would take with him samples of what was required in these colonies and the prices paid for them at the place of their origin. He alluded to the sugar troubles, and said that with proper tariff arrangements Canada was in a position to consume their surplus products of that article.

A member of the Chamber, the Hon. J. H. De Jonge, on the invitation of the chairman, President E. M. Sanderson, expressed his views. He said that like the preferential tariff, the speed of the steamers going to that colony was a trifle under the requirements. The United States had treated them well, but that should not prevent them going to other markets where they could receive better treatment. Canada could supply many articles to that colony, but should take its produce in return.

The chairman, E. M. Sanderson, hoped that in a reasonable time there would be a considerable increase in their business with the Dominion.

CATALOGUES, BOOKLETS, ETC.

HOME INDUSTRY.

"HOME INDUSTRY" is the title of an illustrated book issued by the Canada Portland Cement Co., Limited, Deseronto, Ont., containing much useful information about Portland cement. First comes a story of Portland cement from 1756, when the first discoveries were made in the modern methods of manufacture, until the present day.

Two articles, one being extracts from the report of the board of engineers of the United States army on the properties and testing of hydraulic cement, and the other, an extract from a paper on cement, read before the Engineering Society of the School of Practical Science, Toronto, in February 1898, by M. J. Butler, M.C.S.C.E., M.I.C.E., etc., make it valuable to those engaged in building and other allied trades. These articles give directions for the mixing, laying and use of cement, both in mild and frosty weather, and also instructions on how it may be used under water in wells, etc. At the back are five tests of Rathbun's "Star" brand, some made recently, and others some years ago.

Many attractive illustrations, including half-tone engravings of many public buildings, elevators, bridges, canals, which have all had Rathbun's cement used in their construction, add to the beauty of this book and make it worth looking at. Amongst these may be seen the new City Hall, Toronto; the Ottawa-Hull Interprovincial bridge and lock walls in course of construction, Soulanges Canal. Altogether the book contains a good deal about Portland cement and many half-tone engravings that make it worth reading.

GAS COOKING APPARATUS.

The Gurney Foundry Co., Limited, Toronto, makers of the "Imperial Oxford" range, are manufacturing a line of gas cooking apparatus for summer use. They are making a variety of sizes and patterns, low-down or upright, having four, six or eight burners and from one to four ovens, for family use. They also are offering a large-size range having four ovens, ten top burners, four oven burners, etc., suitable for hotels. Hot-plate gas stoves, nursery burners, sad-iron heaters, radiators and gas heaters are also specialties of this firm. The advantages, prices, etc., of these ranges are set forth in an 18-page catalogue handsomely printed and profusely illustrated with cuts and descriptions of each style.

A good galvanized-iron worker knows the different makes of his stock, and uses the one that pays him best.

CURRENT MARKET QUOTATIONS.

March 27, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

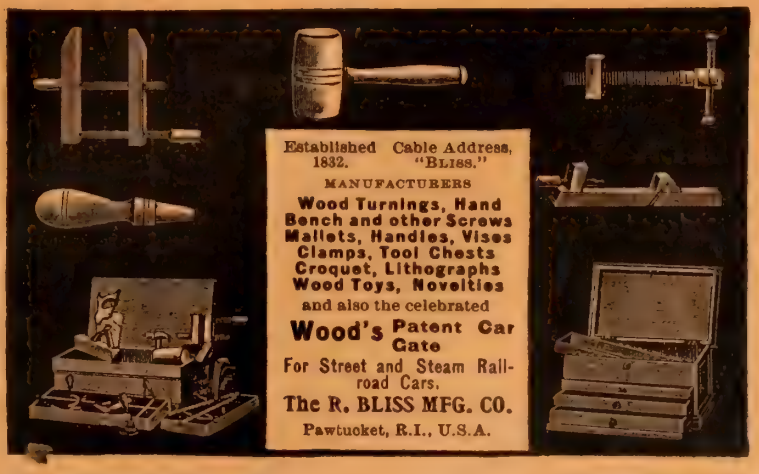
BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.



THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

OPPORTUNITY TO SHOW CANADIAN GOODS.

AN industrial exhibition is to be held at Osaka, Japan, from March 1 to July 31, 1903. It will be under the authority of the Government of Japan, and one of the features of the exhibition will be a building for the display of samples of foreign goods. The conditions under which exhibits may be made in this building are liberal. Electric power for working machines will, for instance, be supplied free.

Japan is among the world's most progressive countries. In the East, she is easily first in this respect. And it seems to us that Canada should take advantage of the opportunity to bring before the Japanese the products we grow and manufacture.

We do not know whether the Dominion Government has yet interested itself in the matter, or whether it intends to do so; but we think that it should do so. Certainly, this is the only way by which an exhibit representative of Canada and her industries can be secured.

If anything is to be done it must be done at once, for application for space must be in the Department of Agriculture and Commerce at Tokyo not later than June 30, 1902. The Trade and Commerce Department should at once take the matter up and induce the representative manufacturers of food products, furniture, textiles, machinery, etc., to exhibit, the Government, as a further inducement, agreeing to provide transportation to Osaka. In this way, and in no other way, is an exhibit representative of Canada probable.

At present, our export trade with Japan is small, being last year only $188,683. This, however, was an increase over 1900, when the figures were $112,308. The following table gives an abstract of the chief exports to Japan during the two years:

CANADIAN EXPORTS TO JAPAN.

	1900.	1901.
Mine	$ 9,556	8,228
Fisheries	47,773	97,047
Forest	18,527	22,791
Agricultural	6,545	8,410
Manufactures	25,305	49,657

Although our export trade with Japan is small, the above figures show that it is growing, and growing in nearly every department of industrial activity.

METALS ON BOARD THE WRECKED LAKE SUPERIOR.

SEVERAL wholesale houses in Canada have shipments of tinplate on the Lake Superior, now stranded near the harbor of St. John, N.B. As stocks are light, with some of them it is likely quite a little inconvenience will be occasioned should the shipment be delayed for any length of time.

One large manufacturing firm in Canada is particularly anxious about a six months' supply of sheet steel of special make which is on board the Lake Superior, especially as it is a duplicate order for a similar quantity which was on board the steamer which went ashore some weeks ago near New York, and whose cargo was sold at auction by the insurance companies.

When the latter steamer was wrecked the firm cabled the duplicate order referred to, and it is now wondering if the steel sheets on the Lake Superior are also not to reach its factory. If they do not the firm is certain to be greatly inconvenienced in manufacturing the line of goods of which sheet steel is the base article.

DROPS FROM THE EDITOR'S PEN.

One can already scent a strong disapproval of the perfumery combination.

With the advent of spring there is usually a jump in trade.

The average politician swallows principle in order that he may the more easily digest the actions of his political friends.

When a miner goes on strike it can scarcely be said that he "struck it rich."

ONTARIO PLUMBERS ORGANIZE.

FOR some years the master plumbers and steamfitters of Ontario have felt the need of a Provincial Association. As will be noticed from our report of the proceedings printed in another part of the paper, the desired association was formed on Friday last at a representative meeting held in Toronto.

At the convention of the National Association in Ottawa in 1899 the question of a Provincial Association was the subject of a good deal of discussion, led by the then retiring president, Mr. W. Smith, of London, Ont., who is generally recognized as the father of the idea. Very little, however, was done to crystallize the idea until 1901. At the National convention held that year in Toronto, Mr. W. Mansell, of that city, was specially delegated to organize an association in Ontario. Friday's convention was the result of his labors.

Our report of the proceedings is rather meagre. We are sure our readers, especially those engaged in the plumbing and heating trades, will regret this. But the fault is not ours. A representative of HARDWARE AND METAL has always been present at the annual convention and been allowed to take notes of such matters as would be of interest to the plumbing and heating trades. The reports published were always highly commended, as the special resolutions of the National Association amply prove. However, at the meeting of the Provincial Association on Tuesday last, the representative of HARDWARE AND METAL, afrer the meeting was opened, was told that he could not be permitted to be present.

We regret exceedingly this action on the part of the gentleman who had the meeting in charge, especially when it is so contrary to the practice of the National organization. If the objects of the Provincial Association are worthy, they will certainly receive strength from publicity, while attempts to suppress publicity of them will weaken them and cause the finger of suspicion to be pointed at them.

We refer to this matter here with the kindliest intentions, hoping that at the next Provincial convention the practice of the National Association will be followed.

A SHARP DECLINE IN TURPENTINE.

LAST week the turpentine market at Savannah was characterized by its strong bullish features; this week it is just as strongly characterized by its bearish features.

What is known as the naval stores year Savannah closed on Saturday last. On that day the price in that city was 53c. But on Monday the market opened at 45c., a decline of 8c. per gallon, or $4 per barrel. The drop was not gradual; it was sudden. We are told, however, by the despatches from Savannah that "operators were convinced that the market was under manipulation and kept out of it." The despatches also tell us that "no surprise was caused by the phenomenal loss of value shown by quotations in so short a time."

The statement that the market is being manipulated is evidently well founded, for the statistical position is not of a bearish character.

The Paint, Oil and Drug Review, Chicago, in its issue of March 26, in explaining the strong character of the market which then existed, said: "Circumstances have combined to keep back shipments from the stills, the weather conditions being unfavorable, roads impassable, etc. At the same time, the prospect of an enormous consumption of turpentine during the coming season has stimulated the demand and put buyers on the watch for supplies to meet both present and future needs. Even the fear of still further floods in the forests has been a bull factor in the market. Shrewd buyers do not propose to be caught empty-handed in case difficulty in marketing the new crop is encountered.

"High prices for spirits are certain to rule throughout the coming season. The box cut will be greatly reduced, per agreement, and the great activity in the paint and kindred trades will require a larger supply of turpentine than last year. How the supply is decreasing and the price advancing is seen in the figures of the Savannah market, which show that from March 1 to 21 there were only 2,538 casks received, against 4,330 for the same time last year, 3,089 in 1900 and 3,583 in 1899. This decreasing supply has been accompanied by a rapidly advancing market, prices going already to 50c., with 51c. or over predicted before the first of April."

Since then a despatch from Savannah says that the receipts of turpentine at that port for the year just closed were 314,346 casks, a decrease of 23,106 casks for the year. This decrease, however, is relatively smaller than the decrease shown by the total crop, as indicated in the reports of all the naval stores markets. The crop of the year not only has been smaller than that of last year, but prices have averaged lower.

According to our latest information the price of turpentine at Savannah is steady at 45c., while the movement of new crop spirits is, so far, light.

Owing to the decline in Savannah the tone in the Canadian market is naturally weak, although no change has so far been made in quotations.

SCARCITY OF SPRING GOODS.

HARDWARE AND METAL some time ago suggested, in consequence of the promising outlook for spring business, that those in the trade should place their orders early in order to protect themselves against a possible scarcity when the goods would be required.

With the opening of April, spring goods are being shipped. During the past week the quantities have been large; and already in many lines, such as rakes, hoes, manure forks, spring hinges, and poultry netting, there is a scarcity. The shortage is particularly pronounced in harvest tools.

The demand for iron and steel is still in excess of the supply, and appears likely to remain so for some time. In view of these conditions, it is only to be expected that the manufacturers of finished products should be handicapped in making delivery, especially when their orders are even more than usually heavy.

Spring trade in Canada is about a month earlier than usual, and manufacturers and wholesalers are this week being pressed, in many instances, for delivery of goods that were booked for shipment May 1.

As far as we can learn, the wholesale hardware trade for March was much larger than usual during that month.

IRON, AND ITS METHOD OF MANUFACTURE.*

By Mr. Charles Fox, Superintendent of the Hamilton Steel and Iron Co.

THE term iron, as used in a general sense, includes all those products obtained originally from iron ore by smelting with fuel. Under the general term iron we have pig iron, which is iron made from ores in a blast furnace and cast in the form of pigs. The fuel used may be coke, charcoal, anthracite coal, or mixtures of these, and the pig iron is named according to the fuel used in smelting, as coke pig, charcoal pig, or anthracite pig.

Then, under each of these, are other classifications according to the purpose the pig is applied to, viz.: Basic, Bessemer, malleable, mill, and foundry.

BASIC PIG IRON

is iron intended for conversion into steel in a basic open-hearth furnace. To be suitable for this work the silicon and sulphur must be low—the former less than one per cent., and the latter not over five one-hundredths of one per cent.

BESSEMER IRON

has its use in a Bessemer converter where the silicon and carbon are burnt out by blowing air through the molten metal. As it is impossible in the Bessemer converter to remove phosphorus and sulphur, there must be a low percentage in the pig iron, as in the requirements for finished steel the phosphorus must be below one-tenth per cent. and the sulphur below five-one-hundredths.

MALLEABLE PIG

is remelted into castings which are afterwards put in annealing ovens where the carbon, silicon and maganese are gradually removed by oxidation. Since the object is to get a casting with as little impurity as possible it is desirable to have pig iron to begin with which is low in the impurities; hence, malleable pig should have low carbon, low silicon, and low maganese. It should be similar in composition to basic pig.

MILL IRON

is used in rolling mills where it is put in puddling furnaces and where all the impurities, such as silicon, carbon, sulphur, etc., are worked out of it, making wrought iron. Sometimes wrought iron is made direct from ore without first making pig iron. This is really the process by which iron was first made. It takes a very high temperature to melt wrought iron, but it may be readily brought to a welding heat in a heating furnace, and then rolled into bars. A peculiarity of wrought iron is its fibre. When broken it presents a fracture like wood. A piece of steel in breaking shows no such fibre, only a clear uniform break. The wrought iron has slag disseminated all through it and when rolled out these lines of slag break the continuity of the metal and make the fibre.

FOUNDRY IRON

chemically speaking, is the most impure of all iron. It has in it a greater per cent. of foreign material than any other class of iron. A typical foundry iron, for making soft castings, has only about 93 per cent. of its substance iron. The remaining 7 per cent. is made up of about 3.50 per cent. carbon, 2.50 per cent. silicon, .50 per cent. maganese, and .50 per cent. phosphorus.

It is these impurities in cast iron which make it weak by comparison with wrought iron and steel, and account for its lack of ductility, but since the application of chemistry to foundry work a great deal has been done in the way of adjusting the elements which mainly influence the strength and softness of cast iron, so that castings can be made with much better adjustment of the material to the work it is intended for.

GRADING OF PIG IRON.

All foundry iron was formerly graded by fracture and color. This was done as carefully as possible, but it is a difficult matter to draw the line between a close No. 1 and an open No. 2. No matter how carefully grading by fracture and color is done there is always a considerable personal factor in this work, so that in some cases, a carload which one man would grade No. 1, another man with equal experience would grade as No 2 at another time. And even if at all times the grading by fracture were well done, it is no reliable indication of what the iron contains or the purpose it is best suited for. The grain of iron is determined partly by chemical composition and partly by the condition of the blast furnace at the time it was made. All that can de deduced from the fracture of iron is that open-grained iron is generally low in sulphur and close-grained iron is generally high in sulphur. Careful chemical analysis is the only trustworthy means of finding out what an iron contains, and what class of castings it is best suited for making.

SILICON IS THE BEST KNOWN

of all constituents of pig iron. It increases the fusibility of iron, lessens the formation of blow holes, and reduces the chance of shrinkage. The strongest castings are obtained from iron that will produce stund castings with the least amount of silicon. Pig iron, with excessive silicon, has a characteristic fracture. The grain is often close and flat, and the color light. The most important action of silicon in iron is to convert combined or hardening carbon into graphitic or softening carbon.

CARBON EXERTS

the most vital influence upon the character of pig iron. It affects the color, strength, hardness and fusibility of cast iron. It exists in pig iron in two distinct forms, the combined and the graphitic. Upon the relative proportions of each, in a great measure, depends the character of the metal.

The tendency of phosphorus is to prevent blow holes and render the metal very limpid so that it will give an extremely fine or sharp casting. The percentage of phosphorus varies in the pig iron from a trace to several per cent.

MANGANESE

assists in the prevention of blow holes. It has a great affiinity for sulphur. When iron is melted with fuel containing a high percentage of sulphur, the manganese seizes upon the sulphur and carries it off in the slag. It also strengthens the castings.

THE INFLUENCE OF SULPHUR.

Sulphur is without doubt the most deleterious substance found in pig iron. It makes iron red short, i.e., brittle when hot, also hard and white, sluggish and thick, thus causing blow holes during its soldification. Limestone is generally used for removing sulphur. When iron is melted in a cupola it loses some silicon, carbon, and managanese. These elements being oxidized by the air blown into the cupola, it follows, since these softening elements are reduced by smelting iron in a cupola, that castings are harder than the pig iron from which they are made. Each successive smelting removes still more of the softening elements, carbon and silicon. The only element absorbed by iron in the cupola is sulphur, which it takes from the coke. As the affiinity of sulphur for iron is greater at low temperature than at high temperature, more sulphur will be taken up when castings are made with iron just above melting heat than if they are made with very hot metal. Coke, for foundry use, should be of the highest grade obtainable, because the impurities in the coke are taken up to a very high extent by the iron in melting. Good coke has a bright lustre and a metallic ring. It should be strong and light, and low in sulphur. The only ac-

*Paper read before the Canadian Association of Stationary Engineers at Hamilton, Ont.

curate way to determine the amount of sulphur in coke is to have it analyzed by a reputable chemist.

THE BLAST FURNACE.

Coming now to the blast furnace. If we had merely to melt the iron, as in a cupola, the operation would be comparatively simple, it being only necessary to maintain the proper temperature. But in the blast furnace we have to take away oxygen from the iron it is combined with in which combination it is known as ore. After separating the iron from it it has to be melted, and has to be impregnated with carbon and silicon. It is probable that these three reactions take place in some degree, simultaneously.

REMOVING THE OXYGEN.

To take oxygen away from iron and silicon heat is not enough : we must have the combined action of white hot carbon and heat of special intensity. This heat is obtained by blowing a strong blast of air into the bottom of the furnace through tuyeres. This air has been previously heated in firebrick stoves to a temperature of about 1,200 degrees F. and when it enters the tuyeres it meets a layer of coke which has already been made white hot, by descending from the top of the furnace through ascending gas. When the highly heated air meets the white hot carbon, rapid combustion takes place, and an extreme high temperature is developed.

In a furnace working regularly the temperature is highest at tuyeres and gradually decreases to the throat. It has been proved by chemical and physical laws that this method of working is the most economical of fuel, besides giving a better and more uniform grade of iron.

Several causes may produce

IMPROPER DISTRIBUTION OF HEAT

in a furnace. The affinity of carbon for oxygen is greatest at high temperature, and when the temperature of the blast is raised combustion is more rapid, and, as a result, the zone of combustion and greatest heat contracts. Now, if the initial temperature of the blast is lowered the zone widens and the heat extends higher up in the furnace, causing fusion above. The partly reduced oxides coming in contact with the silicia of the gangue form a fusible silicate and pass into the hearth unreduced, making scouring cinder. In a furnace working in good condition the ore is reduced mainly in the upper part of the furnace by the ascending gas. The impurities in the ore and stone combine to form the slag. Refractory slag has an excess of lime and a deficiency of silicia. It requires a high temperature for its formation, and the reduced iron in dropping through it will be exposed a long time to the intense heat of the tuyeres before passing into the liquid state at the bottom of the hearth. When the temperature at the zone of fusion is low, caused either by low temperature of blast, or a large amount of moisture in the air, or by unreduced ore coming down into the hearth, the amount of silica taken from the slag will be small and the slag, on account of this excess, will be too fusible and the iron, not being retained long enough at a high temperature, will not become carbonized sufficiently and an inferior grade of iron is the result. Blast furnaces capable of making 300 or 400 tons of iron a day are now the rule, and in some cases as much as 600 tons are obtained. This large increase in output, from what prevailed several years ago, has been brought about mainly by fast driving, i.e., blowing more air into the furnace. A furnace making 300 tons a day will require 33,000 cubic feet of air per minute, and from 300 to 350 tons of coke will be required, according to the kind of iron made.

DEATH OF EX-SENATOR OGILVIE.

A MAN who took no mean part in the development of Canada has passed away in the person of ex-Senator A. W. Ogilvie, who died at Montreal on March 31, with pneumonia.

For over half a century his life was connected with the history of this country, which owes him much for his services in extending its commerce. He, with the assistance of his younger brothers, built up The Ogilvie Milling Company, a concern that has now huge mills in Montreal, Seaforth, Goderich and Winnipeg, and elevators in every part of the great West. Several of the largest financial concerns of Montreal number him among their organizers and directors. He was president of The Western Loan and Trust Co., vice-president of The Sun Life Assurance Co. of Canada, vice-president of The Montreal Loan and Mortgage Co., vice-president of The Dominion Burglary and Guarantee Co., vice-president and chairman of The Montreal Board of Directors of The London (Eng.,) Guarantee Co., and a trustee of the Mount Royal Cemetery. He was also a member of St. James Club, and manager of the John Ogilvie estate.

He took part in the political affairs of this country for many years and his personal popularity and genial qualities made him a man hard to beat in the political field. The party to which he belonged was rendered valuable assistance by his great administrative powers. He was a Conservative and was a member of the Senate from 1881 until last year, when he resigned.

Alexander Walker Ogilvie was a native of St. Michel, Que., being born on May 7, 1829. His father was the late Alexander Ogilvie, who came with his parents from Stirlingshire, Scotland, to Canada in 1800, settling on the Chateauguay river, and afterwards at Point St. Charles, in the Province of Quebec. He was educated at the local schools and in 1852 formed a partnership with his uncle, the late James Goudie, in the flour business. Two years later Mr. Goudie retired and A. W. Ogilvie & Co. was formed to engage in business as grain merchants and proprietors of the Glenora Mills at the Lachine canal. He later on took in with him as partners his younger brothers John and the late Wm. W. Ogilvie, and retired from the firm in 1874. He first entered public life as alderman in the Montreal City Council and was a member of the Provincial Legislature from 1867 to 1878, excepting for the period between 1871 and 1875. He was afterwards appointed a Senator in 1881.

The deceased is survived by a widow, who is a daughter of the late William Leney, one son, Mr. Shirley Ogilvie, of Ottawa, and three daughters, Mrs. Playfair, of Midland, Ont.; Mrs. Gemmell, of Ottawa, and Mrs. S. A. McMurtry, of Montreal.

SAILS VS. LOCOMOTIVES.

IN an address at the recent dinner given by The Baldwin Locomotive Works, to celebrate the completion of its twenty-thousandth engine and the seventieth year of continuous operation, J. H. Converse, of the firm, recalled interesting facts of the early days of locomotive building. He said : "When Mr. Baldwin took his first order for a locomotive there were 95 miles of railroad in the United States. Those few miles of railroad existed along a strip adjoining the Atlantic Coast. The Germantown Railroad had been built and was operated by horse power. The Baltimore & Ohio Railroad had been built as far as Ellicott's Mills, and the problem was still confronting its management whether it was practicable to operate it by steam or whether horse power should continue to be the motor.

"The idea of propelling cars by sail was one of the schemes which the Baltimore & Ohio management at that time seriously considered. The Philadelphia & Columbia Railroad, which made its exit from Philadelphia by an incline plane to Fairmount Park, was just beginning its construction, and in a short time, in connection with the canal system of Pennsylvania and the Portage Railroad, was brought forth and formed the great highway across the State of Pennsylvania. Mr. Baldwin's first locomotive took one year nearly in completing. It was ordered in 1831 and was placed on the Germantown Railroad in 1832. A controversy arose with the management of the Germantown Railroad as to the price, and it was necessary to submit the matter to arbitrators, and they decided, after a prolonged consideration of the problem, that Mr. Baldwin was entitled to receive $3,500 for his first locomotive, and he is credited with having said : 'This is my last locomotive.' He was mistaken, because within one year he had received an order from the South Carolina Railroad and another from the Philadelphia & Columbia Railroad. Those first locomotives of 70 years ago weighed from 10 to 12 tons each."

HAMILTON, ONT.

INDUSTRIAL GOSSIP.

NEW FOUNDRY COMPANY. In The Canada Gazette of March 29 notice is given of the application of Thomas J. Drummond, Edgar Mill McDougall, and George Drummond, manufacturers; John Dyer, manager; and T. Brosseau, advocate; all of the city and district of Montreal, in the Province of Quebec, for incorporation as a limited liability company, to be known as The Canadian Foundry and Iron Company, Limited.

The provisional directors of the company are Thomas J. Drummond, Edgar Mill McDougall and George Drummond, and its chief place of business is to be Montreal. The amount of capital stock is placed at $150,000, divided into 1,500 shares of $100 each.

The stated objects for seeking incorporation are as follows: To carry on throughout the Dominion of Canada the business of manufacturing and dealing in car wheels, iron and steel castings, railway supplies and general foundry and machine work and other business of a like nature or incidental thereto, with the right to acquire the goodwill, rights, property, business, assets or liabilities, or any part thereof, of any person, firm, association or corporation, now or hereafter engaged, wholly or in part, in the same business; to purchase, lease, exchange or otherwise acquire any and all rights, privileges, permits or franchises suitable or convenient for any of the purposes of the business.

A NEW HARVEST TOOL CO. The Maple Leaf Harvest Tool Co., Limited, is applying for incorporation. The names of the incorporators are as follows: Cosmos John Shurly, manufacturer; Jerome Colwell Dietrich, manufacturer; Fred Douglas Palmer, bookkeeper; William Warden Janney, mechanic; Oscar Herman Vogt, traveller; Charles Derrick Lansing, mechanic, all of Galt, Ont.

The place of business will be Tilsonburg, Ont.; the capital stock is $100,000, divided into 1,000 shares each of a value of $100. The objects of incorporation are for the manufacture of harvest and edge tools, saws, shovels and agricultural implements.

THE DUTY ON CAST STEEL FOR SCISSORS.

A recent issue of The Canada Gazette contains a notice of the amendment of the order of the Governor-General-in-Council of February 15, 1902, respecting the free entry of steel castings in the rough for the manufacture of scissors and hand shears. The amendment is as follows: "That under the provisions of the Customs Act the following articles be transferred to the list of goods which may be imported into Canada free of duty, viz:

"Malleable iron or steel castings in the rough for the manufacture of scissors and hand shears, when imported by the manufacturers of scissors and hand shears to be used in making such articles in their own factories."

The Men Who Succeed

in business are the men who do things in a careful, systematic way. A business man without method is like a ship without a rudder.

THE SHERWIN-WILLIAMS PAINTS

are successful paints, because there are system and good methods back of them. There are no paints that are pushed with such forceful selling methods. The minute the goods get on the dealer's shelves the selling campaign begins. Every argument and every means that can be employed are employed to force the paints into the consumer's hands. But this is not done in a "spurt" fashion that soon loses its force and energy. It's a persistent, carefully-thought out, and fully developed campaign. We are pushing and working with the dealer all the time. There is no let up. That's the kind of method that wins business.

We have a booklet, the B-13, "PAINTS AND METHODS THAT BRING SUCCESS." It illustrates most of our paints and our paint selling helps. It tells in a brief convincing way why most money can be made by selling The Sherwin-Williams Paints. It's a booklet you ought to have. Write for it to-day.

THE SHERWIN-WILLIAMS CO.
PAINT AND VARNISH MAKERS.
CLEVELAND.
CHICAGO, NEW YORK, NEWARK, MONTREAL, BOSTON, TORONTO, SAN FRANCISCO, KANSAS CITY.

HE ANSWERED THEM ALL.

A Connecticut merchant who applied to a New York house for goods on credit, says The Wall Street News, was met by the reply that he had failed, and paid only 10 cents on the dollar.

"Very true," he replied, "but I am the only merchant in the town who ever paid over six."

"Didn't you allow your paper to go to protest last winter?"

"Yes, but the doctors said I couldn't live 24 hours just then, and I wasn't thinking of earthly things."

"Haven't you put all your property in your wife's name?"

"Well, yes, but she knows more about business in five minutes than I do in half a day."

He was given credit for $200.

REFLECTIONS OF A TRAVELLER.

Never take the train to the next station while you are doing business where you are.

There is nothing so difficult to oppose in argument as statistics in the hands of the other fellow.

It is not good policy to be always explaining why. Try not to have anything to explain.

If you want to earn a man's regard, induce him to perform some slight service for you. He will think more of you than if you had loaded him with favors.

Never criticize another man's goods. You create a prejudice against your own in the minds of your customers.

The most agreeable man is not always the best salesman. The best story teller usually sells the fewest goods.—Interstate Grocer.

GOOD CLERKS.

Dull seasons come to all stores—seasons when more energy and push and good, hard work is required to make sales and keep up the business. Here is where the trained and permanent clerk shows his value.

Then another thing, a merchant can put his confidence in the doings of a good man, and sleep easy nights. He need not keep his eye continually on the conduct of such a clerk. He need not feel that the customer is being handled improperly. He may rest assured that the sale will be made if honest and capable salesmanship can make it a all.—Good Advertising.

INQUIRIES ABOUT CANADIAN GOODS.

THE following were among the recent inquiries relating to Canadian trade received at the Canadian Government Office in London :

1. The agent in London for French colored roans (sheepskins colored in various shades) and bends (stout sole leather) asks to be referred to Canadian importers of such goods.

2. A Lancashire firm manufacturing cotton main driving ropes, cotton bandings, cotton twines, etc., desire to get into communication with Canadian users and dealers in these goods.

3. Inquiry is made by an Irish house for all classes of timber, spruce sheetings, floorings, mouldings, etc.

4. A first-class house in Leith, Scotland, is desirous of getting in touch with a reliable firm in Canada exporting grain, pease, wheat, barley, etc.

5. A London agent has a demand for birch, maple, oak and pitch pine wood blocks for flooring, c.i.f. any port in the United Kingdom ; also for furniture wood and coffins and caskets in shook.

6. A correspondent at Castellanza, Italy, inquires for Canadian manufacturers and exporters of acetate of lime.

7. A Glasgow firm asks to be referred to makers of casein or lactarine in Canada.

8. Inquiry is made by a wholesale stationery firm for Canadian mills turning out large quantities of manila folding box boards.

9. A Birmingham firm of carriage-lamp makers are desirous of doing a business with Canada in this line, and request to be placed in communication with suitable firms.

10. The names of Canadian fishing-rod makers are asked for by an English importer.

11. A firm in the Midlands is desirous of arranging for direct consignments of Canadian apples, either on commission or at so much per bbl. advanced against bill of lading.

12. A London firm of wholesale and export cabinetmakers ask to be referred to Canadian shippers of chair stock, seats, backs, legs, etc.

13. Inquiry is made for the names of one or two parties in Canada open to represent an exporter of groceries—jams, pickles, sauces, etc.

14. An Irish exporter of sponge cloths which can be woven to any pattern and used where cotton waste is employed, at less cost, and of Irish moss, is desirous of finding a market for these goods in Canada and of being referred to buyers in the Dominion.

15. A commission agent at Newcastle, with good connection, wishes to hear from Canadian manufacturers desiring representation in that quarter.

16. The manufacturers of certain table dainties are desirous of doing a business in Canada in these goods.

17. A North of England house manufacturing quilts and towels make inquiry respecting the opening that exists for their goods in the Dominion.

18. The agency for a Canadian exporter of wood pulp is desired by a Brussels firm who could take up the representation for Belgium and Holland.

[Names of the firms making the above inquiries can be obtained on application to the editor of THE HARDWARE AND METAL. When inquiring, kindly give date of issue and number of paragraph.]

NOVA SCOTIA MARKETS.

Halifax, N.S., March 31, 1902.

THE spring hardware business which opened up so well still continues extremely active, a large business being done in the special lines, and a good all-round business in general lines. The various travellers, some of whom have lately returned from very successful trips, report the prospects for business very encouraging throughout the whole of the Maritime Provinces.

* * *

The spring season having opened up much earlier than usual, the orders for this season are required by the country jobbers and retailers at least a month earlier than expected, and the wholesalers are, in some lines, somewhat handicapped, on account of the rush of work at the manufacturing centres and the difficulty in procuring goods any earlier than the requirements of the trade anticipated. In fact, the manufacturers are only able to be behind dates, rather than ahead. However, the city firms were well stocked in most lines and are able to give their customers fair satisfaction.

* * *

Though prices remain practically unchanged—with the few advances recently noted—the iron and steel markets remain firm with an advancing tendency, and changes in many lines would not be surprising at any time. Dealers are now expecting an advance in wire and wire nails, as the general demand has been great and the market is very firm.

* * *

Prices of all kinds of harvesting implements have advanced from 5 to 7½ per cent. However, this advance is not excessive as there had been a considerable break in prices last fall, and this is simply a return to old prices. There is now so much competition between Canadian and American manufacturers that there is not any probability of a further advance in this line unless induced by a general advance in all lines of iron and steel.

* * *

So much has the use of iron and steel increased of late years—through the building of steel bridges and the great activity in the building of railroads, for example—that to follow the trade in steel and iron is a study. The Dominion Iron and Steel Co., at Sydney, is now shipping steel billets regularly to the United States—five cars went through by rail a few days ago to Troy, N.Y. They have shipped considerable quantities of pig iron to England and Scotland. So great is the demand for steel rails that the large orders, which could not be filled in either the United States or in England, have gone to Germany—the C.P.R. having placed an order for 20,000 tons, and the G.T.R. is reported as ordering the same quantity. These are very much like cases of carrying coals to Newcastle.

* * *

The demand for linseed oil is good at this season of the year, and jobbers are putting in their spring stocks. Prices remain unchanged at the late advances. Raw, in barrels, 85c.; smaller quantities, 90c. Boiled, in barrels, 88c.; smaller quantities, 93c. Turpentine has been subject to quite an advance and is now quoted at 77c. in barrels; 5c. higher for smaller quantities. Dealers have a good quantity of both on hand and are not looking for further advances. The cordage situation remains about the same. There is a good demand, and the market is firm. Manila is quoted at 16c. base; sisal at 12½c. base. The demand for building paper and other builders' material is good and considerable is going out. Building paper is now quoted at 30c. for dry—a reduction of 5c., and tarred at $1.80 per 100 lb.

* * *

The large demand for fishing supplies is fairly well over, the fishermen in most instances being now fitted out for the season's work. The future demand will depend largely on the weather and the amount of wear and tear on the vessels and fishing gear.

R. C. H.

LOCKOUT OF PAINTERS.

A lockout of the journeymen painters of Toronto is on this week. The men demand an increase from 25c. to 30c. per hour and an eight-hour day.

Several months ago the new schedule was drafted by the men and submitted to the employers, who refused the advance, saying that the demands were unreasonable.

The Master Painters' Association afterwards agreed to compromise at 27½c. per hour and an eight-hour day at a conference between them and their men, but this compromise was refused by the Painters and Decorators' Union, and a large number were locked out on April 1.

Several meetings have been held since, both of the master painters and the painters' union, but nothing has been settled. But, on Thursday night, April 3, the men finally decided that if 30c. an hour were refused them, those at present working would join the men now out.

There are 522 men employed in 240 shops in Toronto. The largest of these shops are Elliott & Co. and J. B. McCausland & Co.

It is claimed by the men that a number of bosses have agreed to their demands.

EARNINGS OF THE STEEL TRUST.

The New York Journal of Commerce, April 2, says: "The directors of the United States Steel Corporation at a meeting ratified the plan of the Finance Committee for a new issue of bonds, to retire part of the preferred stock and to provide additional capital. Details of the bond issue were withheld, but a special meeting of the stockholders was called for May 19 to act on the proposition.

"Yesterday's meeting was the first since the company completed its first fiscal year. A statement of earnings for the full year (the returns for March being estimated) was given out. The showing was a favorable one, showing a total of over $111,000,000, as follows:

April, 1901		$7,356,744
May, "		9,612,349
June, "		9,394,747
July, "		9,580,151
August, "		9,810,880
September, "		9,272,812
October, "		12,205,774
November, "		9,795,841
December, "		7,758,298
January, 1902		8,901,016
February, "		7,678,583
March, 1902 (estimated)		9,700,000
Net earnings		$111,067,195
Sinking funds	$3,059,913	
*Depreciation and reserve funds	12,339,782	
		$15,399,695
Balance		$95,667,500
Interest		15,200,000
Balance		$80,467,500

Dividends for the year on stocks of United States Steel Corporation, viz:

Pref'd, 7 per cent.	$35,682,832	
Com., 4 per cent.	20,309,601	
		$55,992,433
Dividends on outstanding stocks of subsidiary companies	25,350	
		56,017,783

*Undivided earnings for the year applicable to increase "depreciation and reserve fund" accounts, new construction or surplus $24,449,717

FIRST HOLIDAY FOR 17 YEARS.

Mr. W. B. Clifton, hardware merchant, tinsmith and plumber, Alliston, Ont., was in Toronto this week accompanied by Miss Clifton. He is taking a holiday trip, the first in 17 years, or, in other words, the first since he began business. His trip will extend over a period of three weeks.

"Business last year," he said, in reply to a question, "was better than I ever experienced it. Compared with the previous year it was double. The farmers in our neighborhood are in a prosperous condition. They have gone extensively into stock-raising, and this spring a number of them are building new barns or improving old ones. The same can also be said of their dwellings, although not to the same extent. All of this, of course, makes it better for the hardwareman."

Mr. Clifton spoke highly of HARDWARE AND METAL. "I would not like to be without it," he said. "It has saved me many a dollar. Last December, from what I read, I concluded it would be a good time to place my order for rope. I did so, and, of course, you know what rope isnow and what it was then."

DIRECTNESS AS A BUSINESS QUALIFICATION.

IRECTNESS is a cardinal virtue of the man who succeeds. He does not go over a thing, or around it, but to it and through it. If he calls to see you on business, he does not spend 15 minutes in introducing his subject; he strikes directly to the heart of it; he does not waste your time on preliminaries or non-essentials, but proceeds to attend to the business in hand, and, as soon as he finishes—stops.

If there is anything that a successful business or professional man dislikes, it is a man who gets into his private office by "hook or crook," and proceeds to talk about all sorts of things except the one thing for which he called. He inquires after one's health, and the health of one's family, and asks various other questions not pertaining to the business, but does not arrive at his own errand until he has entirely exhausted the patience of his auditor.

Many a man has failed to get a hearing on a worthy and commendable proposition merely because he has bored some capitalist, or impressed him, by his indirection, as being impracticable.

The quality of directness is characteristic of all men of great executive ability, because they value time too much to squander it in useless and meaningless conversation; it is an indispensable quality of the leader or manager of all large enterprises.

Many a man has gone down to failure because he lacked ability to arrive quickly and effectively at a conclusion. While he was deliberating and balancing and "beating about the bush," the opportunity to save himself passed and the crisis ruined him.

EVERY QUESTION DOES NOT NEED AN ANSWER.

Indirectness has ruined many a rising lawyer. The justices of the Supreme Court of the United States say that it is one of the most difficult things with which they have to contend. Young lawyers, too much impressed with the importance of a Supreme Court appearance, give long introductions, spin out oratory, explain self-evident points, and send forth copias verborum until they weary the court and hurt their own causes. It is not oratorical display, not verbiage, not well-rounded periods, but direct, clean-cut English, that judges want—facts, clearly, briefly, and decisively stated.

It does not matter how much ability, education, influence, or cleverness you may have; if you lack the art of coming to the point quickly and decisively, of focusing yourself immediately, you can never be very successful.

We know many young men who were graduated with honors from college, and who have always impressed us as youths of great possibilities and great promise; yet, somehow, they never focus, they never get anywhere; they are always about to do something; they are usually just going to come to the point, but fall a little short of it. Men who are well bred, well educated, and superbly equipped, have often disappointed their relatives, their friends, and themselves, simply because they lacked directness or the faculty of focusing their ability upon one point until they burned a hole in it.

A thimbleful of powder, packed behind a ball in a cartridge and fired from a rifle, may penetrate iron or steel and perform great execution; but a wagonful of powder burned without confinement would hardly stir a feather 20 feet from it. Indirect people flash all their powder in the pan, and never fire the charge or start the ball.

In selecting a boy from a score of applicants, a screwd employer will take the one who gets to his subject directly, states it concisely, with the fewest words, outlines his position briefly and stands or falls by it, and does not bore him by telling of the great things he has accomplished or of what he can do.

Writers, when afflicted with the disease of indirectness, grow redundant. They tire readers with useless description and meaningless verbiage, making them impatient at wading through pages and chapters for the kernel, the point, the purpose. They fail to make their writings direct and compact by concentrating expression, but are diffuse. They have not learned the Napoleonic art of massing their forces.

Some of the most meritorious books ever written remain unread on dusty shelves because of their long, tedious, meaningless introductions and treatment. The writer made his point so late in the book that the reader was tired before he reached it and threw the book aside with disgust, and advised other people not to read it. If an introduction is long, verbose, "dry," or uninteresting, readers take it for granted that the rest of the book is similarly objectionable, and stamp it as "poor reading," and a "waste of time," thus condemning it to their friends. The book may be of great value, but, in these days of rush, with good books plentiful, people do not wish to spend valuable time reading pages and pages of uninteresting and verbose writings.

INTEGRITY WILL BAFFLE TRICKERY.

A large number of the articles received by editors lack directness. Many are really useful works, but the writers waste space in useless introductions and meaningless preliminaries before they reach their real stories or arguments, and the editor gets disgusted before he understands the gist of the article, and so he returns it with his usual thanks. An efficient editor abhors indirectness, and hates to examine the manuscripts of writers who use these pleonastic, ambiguous introductions or never reach their messages until near the close of their articles. Not long ago, the writer saw a manuscript whose introduction occupied nearly three-quarters of the available space.

Reporting on great dailies is a splendid drill for writers who never arrive anywhere. Reporters soon abandon meaningless introductions; they learn to tell a story directly and tersely—to give it pith, point and purpose, for nothing else will be received by competent managing editors.

Everybody dislikes indirectness, ambiguity, circumlocution, because they waste valuable time and clog all progress; the direct method is the winning one in every vocation.

Cultivate, then, this great secret of focusing effort, coming to the point, and striking at the heart of the subject, for therein lies a great secret of success.—Success.

HOME PRODUCTS.

The Canadian Manufacturers' Association wish to educate the general public to use, as far as it can, goods only of Canadian manufacture. With this end in view it is proposed to raise a fund for the purpose of providing lectures, exhibits and conducting a general educational campaign laying before the people that it is to their advantage to buy, when possible, only Canadian-made goods, thereby keeping a large number of employes at work in this country. It will be pointed out that the imports of goods from the United States are rapidly increasing and that these same imports chiefly consist of articles that can be readily manufactured in Canada.

BUSINESS MEN'S LEAGUE.

THE Business Men's League, of Montreal, held their annual meeting on March 26, and elected officers. The officers for 1902 are as follows :

President—Henry Miles.
Vice-President—Charles Chaput.
Treasurer—J. C. Holden.
Executive Committee—Henry Miles, F. W. Evans, Charles Chaput, George E. Drummond and J. C. Holden.

The following comprise the ordinary committee : G. T. Bell, general passenger agent Grand Trunk Railway ; C. E. E. Usher, general passenger agent Canadian Pacific Railway ; H. A. Price, general passenger agent Intercolonial Railway ; T. L. Paton ; N. E. Hamilton ; A. Lalonde, Boston and Maine Railway ; Walter Paul ; W. Birks, of Henry Birks & Sons ; E. H. Botterell, of John Henderson & Co.; Hon. Louis Beaubien ; Hon. J. D. Rolland ; Ald. Ames ; W. D. Lighthall ; George Hague and C. S. J. Phillips.

President Miles, in his annual report, referred to the incorporation of the league by the Legislature of Quebec.

This year the efforts of the league towards street improvements had resulted in the making of better provisions for the looking after the streets, and it is hoped that things will appear much better within a reasonable time.

The committee had also been successful in securing several conventions for Montreal, but, owing to the deficiency of hotel accommodation, it was difficult to arrange for larger gatherings.

It was suggested that an information bureau be established for the benefit of strangers, by way of informing them of the accommodations and attractions of the city and Province. The incoming executive were advised to apply to the Quebec Provincial Government for their annual grant, and the Montreal City Council should also be approached with a similar appeal.

A PARTNER ADMITTED.

William A. Hillhouse, hardware merchant, Shelburne, Ont., had admitted as partner Jas. H. Nichol, of Toronto. Mr. Nichol is a practical tinsmith, and an up-to-date hardwareman. The business will be conducted in future under the style of W. A. Hillhouse & Co.

Tenders are being advertised for for the erection of a new church at Burford, Ont.

CURIOUS INDUSTRIES THAT YIELD INCOMES.

(From Answers.)

TWO thousand eight hundred live frogs were recently sent by one steamer from Hull to Cleveland, Ohio. They were packed in grass, and most of them arrived at their destination safe and well. They were collected in the Fen district, where about a dozen families live for some months in the year by frogs. Although the large bullfrogs are not native to England, yet the smaller varieties are found to be perfectly eatable; and a number are also sold for fish-bait. They are shipped to France as well as to America; and a family of five persons

EMPLOYED IN FROG-COLLECTING

can add from 15 to 25s. a week to their income in this fashion.

Around Nottingham some 300 people live on worms. The soil is particularly suitable for these creatures, which are sent all over the country for fishing purposes. The yearly income from Nottingham worms is about £12,000. The work is not difficult, but entails very early rising during the summer months, in order to gather the worms when they come to the surface at early dawn. They must also be protected from hungry birds.

Norwich and its neighborhood sends 50,000 canaries away yearly to all parts of the world, and receives back from £10,000 to £11,000 in payment. Very few families depend entirely upon canary-breeding as a means of livelihood. The women look after the birds, while the men pursue other employments. But, as Sir S. Hoare said recently, when opening the All-England Cagebird Show at Norwich, "canaries pay the rent of some hundreds of small homes in and around the city."

Many acres in the West of England and the Midlands are devoted to ash-beds, planted for the growth of walking sticks. For this purpose the young plants are set not vertically,

AS THEY ARE IN

plantations for hop and pea sticks, but are laid horizontally. Many of these plantations belong to small farmers, or are leased by men employed in other work. The only work necessary is to keep the ground well hoed, and clean from weeds; and in four years the sticks are ready for cutting. An acre will then yield from £30 to £50 worth of sticks, which are cut, tied in faggots, and sent to a stick-factory. The rent of land suitable for stick-growing is about 30 shillings an acre; the outlay is small, as there is no need of enriching the soil; and the work is done by the lessee or his children. A large number of families add £10 to £120 a year to their incomes in this fashion

Ladies who have a taste for cooking are finding that sweet-making is a most profitable occupation for spare hours at home. Some are clever enough to work out recipes unaided; but, as a rule, a course of training at about £5 is necessary. The necessary implements will cost

A COUPLE OF POUNDS

and for cooking a gas or ordinary kitchen stove is sufficient. A thermometer, a marble slab, a copper saucepan, moulds and a caramel-cutter are all the implements needed. As a rule, home-working sweetmakers get up a private connection, and find no difficulty in getting eighteenpence a pound for their wares. Many make as much as a sovereign a week profit in this way.

Amateur photography is all very well if the amateur is a first-class worker, and sells his or her pictures to the illustrated papers. But an enterprising girl in Leeds has lately discovered photographic work which pays her far better. This is cleaning old photographs. Almost everyone has old and valued photographs yellowed by age. These, this young woman collects, and renovates. It is quicker and cleaner work than photography, pure and simple, and, according to her experience, pays far better. In one month recently her accounts show that she cleaned 187 photographs, and got £7 10s. for the work. Material cost only five shillings, so her profits were some 35 shillings a week.

Women, indeed, seem far more clever than men at finding new and paying industries at which they are able to employ themselves at home. There is a London lady who spends every morning of her life scanning the advertisement columns of the daily papers. Any of her friends who want a house, a servant, rooms in town, old oak furniture—anything, indeed, that can be chosen by a third person—have only to let her know,

AND SHE WILL EITHER

choose the article for them, or send them such advertisements as she may deem suitable. Of course, she charges a small commission; but, small as it is, it is a bad year that she clears less than £200.

Another lady, who also lives in London, makes a specialty of disposing of, by sale or exchange, duplicate wedding presents. She will also choose wedding presents for those who reside at a distance. This enterprising woman also makes a sufficient income in this manner.

Brass—the soft kind known as French metal—costs about 1s. 3d. a pound. Ladies with artistic tastes can get a few months' teaching in repousse work, and then, by the aid of a few punches and hammers, convert these plain sheets of metal into trays or platters, worth five to ten times the cost of the material. A Bournemouth lady has prospered so greatly at this brasswork that she has always more work on hand than she can do unaided, and has been forced to obtain help. She has, therefore, trained several others to assist her, and all find this a most

PAYING HOME INDUSTRY.

Copying medals or casts is found profitable by a family of Irish ladies ruined by the land agitation. The prime cost of the necessary materials for this work is very small, being simply oil, cardboard, sealing-wax, and fine plaster-of-paris. Paraffin, too, and some sulphur, may be found useful.

Many collectors, unable to afford rare originals, are yet glad to have copies for their collections; and the ladies in question have a large private connection who take their wares. One of the sisters also makes brackets of plaster, taking castings from real fruit and flowers. There are four sisters, and between them they make some £250 a year, all out of easy, pleasant homework.

A BIG IRON AND STEEL PLANT.

IN The Illustrated Buffalo Express of a date of some time ago, is a description of the huge steel plant being built by The Lackawanna Steel Co., at Buffalo, N.Y. These works, when finished, are expected to have a capacity of 1,250,000 tons of steel per year, about one-twentieth of the annual output of the world. The plant will cost about $40,000,000.

These works are located at the western end of the city and occupy a rectangular space one mile wide and three miles long, washed on its west and southwest sides by Lake Ontario.

At the northern end of the grounds is a row of brick buildings, a storehouse, 50 x 150 feet, a duplicate machinery building, 40 x 200 feet, a carpenter shop, 50 x 150 feet, and a locomotive boiler house, 34 x 75 feet. A second row is back of this, consisting of a roll shop, 40 x 550 feet, a pipe shop and tool house, 50 x 300 feet, a pattern shop, and a pattern-storage shop, each 50 x 125 feet, and power house No. 2, 34 x 100 feet. There is another row back of these two in which there is a forge shop, 70 x 250 feet, a machine shop, 85 x 200 feet, and a foundry shop, 90 x 550 feet. These buildings have been completed. There are others in course of erection.

Towards the lake, from these structures are blast furnaces Nos. 1 and 2, with a blowing engine house, 70 x 75 feet, and a boiler house, 68 x 100 feet. Their capacity will be 300 tons apiece. Back of these will be two other blast furnaces, having a capacity of 800 tons each; and also two others of a large capacity, which have not yet been commenced.

There will also be a large open-hearth plant for the open-hearth process of steel manufacture. A ship canal, about three-quarters of a mile long, 200 feet wide, and 20 to 25 feet deep, is being built into the grounds. There will be a coke plant with 940 retort ovens, the largest in the world.

G. V. White, wagonmaker, Trenton, Ont., is dead.

James C. Malone, of Poupore & Malone, contractors, Montreal, is dead.

A. Lounsbury, of G. A. Lounsbury & Co., agricultural implement agents, Newcastle, N.B., is dead.

TO BRING GERMAN STEEL.

A new concern called The Canadian Forwarding and Exporting Company has been organized in Montreal for the purpose of running a direct line of steamships between that city and Rotterdam. Four modern vessels, of an average of 4,500 tons each, will be employed, the first trips to be made early in May. The capacity of the boats is from 10,000 to 12,000 tons each, which is greater than that of most of the vessels coming to the port of Montreal.

It is understood that the chief business of the new line will be the bringing of steel from Germany, and the return cargoes are expected to be made up of Canadian produce, principally grain.

Their first cargoes of steel have been assured them by Mr. Gerald Lomer, a Montreal dealer in railroad supplies, etc., who has been spending some time in Europe, where he has placed enough orders to make up cargoes for the vessels.

BUSINESS FOR SALE.

HARDWARE BUSINESS, IN A GROWING town. Prosperous farming section. Good location and premises. Opening for plumbing in connection. Business established thirty years. Owner has other interests. Address, Box 74, HARDWARE AND METAL, Montreal or Toronto. (8-tf.)

Has tempered steel cased bicycle ball bearings, strongest, neatest and most convenient frame. Only two bolts to adjust in setting up. Steel Bow Levers, suitable for either a standing or sitting posture. Has four wheels and adjustable feet to hold stand steady while churning. When churn is locked to stand the bow can be used as handles to move it about on the front wheels as handy as a baby carriage. Open on both sides to centre, giving free space for pail. Made with wood or steel stands, with Cranks only, or Bow Levers as desired.

Vollmar Perfect Washer

Has a most enviable record. A perfection of its kind—will wash more clothes in less time, do it better and easier, with less wear and tear, than any other machine.

SHOULD A BUSINESS MAN RETIRE AT SIXTY?

THE newspapers discuss many subjects that are of more or less public or individual interest. Recently, quite a number of comments have been observed upon the question, "When a man is 60 years old, should he withdraw from business?"

The opinions of different individuals upon this subject have been sought. Among these is Mr. Henry Clews, the oldest broker in Wall Street, and who is the only man remaining in the street who has done business under his own sign for 43 years.

Mr. Clews, in a signed interview, says: "I think a man ought to retain an active interest in his business as long as his vitality holds out, no matter how old he is or how much money he has accumulated. It is dangerous to have nothing but time on your hands. My business is in such shape that I need not come to the office once a week, but I am here every day anyway, and I haven't the slightest intention of retiring."

Mr. Clews is considerably over 60, and, in a reminiscent way, he refers to several well-known men who have passed the 60 mile post.

Andrew Carnegie is one of these. He made the greatest success of his life after he was 60 years old, Mr. Clews says, and, in fact, after that time, as in less than two years he cleaned up $150,000,000, though, of course, he had laid the foundation for what resulted during many years prior to the time of his last great deal.

J. P. Morgan is another man instanced who is making the greatest of his successes just now, and he is a man more than 60, and it does not seem likely that he has any thought of retiring.

Russell Sage is another veteran business man who comes to his office every day and attends personally to every detail in his business,

Mr. Clews refers to these men as examples, very likely because they belong to his own business set, but their careers illustrate that a man is only in his prime ordinarily when he has reached the age of 60. As for Mr. Clews, he says: "I come to my office every day and can attend personally, if I wish, to the orders of more than 4,700 customers that I have on my books."

That although over 60 years of age, Mr. Clewes attributes the fact that he possesses this degree of vigor to his habit of life in having never indulged in violent physical exercise. This kind of exercise, "athletic" is the popular term for it, he regards as extremely harmful, believing that it is more injurious than beneficial, as almost always it is attended with over exertion, resulting in harmful results which, if not before, are shown late in life. The only exercise this man says that he has ever been known to take is walking, and that with a gentle pace, and not for a great distance. The result is that he is perfectly well and has always been so.

There are two rather interesting and significant features in the views above expressed, remarks a contemporary. On one hand there is sufficient confirmation of the fact that a man is, or ought to be, at his best when he has arrived at 60 years of age. In the next place, the views entertained in regard to the violent physical exercises that are thought necessary to the training of the coming man and the college man of to-day, the views expressed in the highest degree possess practical common sense. If a man is to live out his days retaining the vigor of his faculties, it is certain that he cannot afford to burn the candle at both ends.

IT PAYS TO STOCK THE BEST.

In the selection of paint brushes, a dealer needs to be more careful than in almost any other article, because a poor brush is the most useless thing manufactured. It costs not only the price paid for it by the purchaser, but loss of material, loss of time and perhaps loss of a job; and it frequently costs the dealer the loss of a customer. The largest and most complete line of brushes, brooms and woodenware manufactured upon this continent is that of the United Factories. These goods illustrate the very best that money, skill and immense manufacturing facilities can produce—facilities that enable them to be placed upon the market at the same figure that second or third-rate foreign goods can be purchased at, and at a wider margin of profit to the dealer.

EARLY CLOSING IN HALIFAX.

Halifax Chronicle.

The nights named in the Bill for closing are Tuesday, Wednesday and Thursday, and in order to make the Act become effective in any branch of trade, a petition signed by two thirds of the people in that particular line must be presented to the city council. A meeting of the Retail Merchants' Association will be held on Wednesday evening to arrange for the petition. In the Bill presented to the House the number of nights were left open, as some of the merchants thought three nights would suit their lines of business better than four; and the nights adopted were suggested to the House by merchants. Those, however, who had previously signed an agreement to close four nights will stick to that agreement.

The clause exempting grocery stores assessed for less than $400 from closing may lead to some of the grocery stores being kept open, as larger stores find they would be placed at a great disadvantage. Many of them, however, will continue to close and some favor four nights instead sf three.

The Retail Clerks' Association at a meeting appointed representatives to confer with the merchants and give all the assistance they can to the early-closing movement.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, April 1, 1902.

HARDWARE.

THE reductions in freight rates took place on the first day of the month, and with the new tariff business has become very active. Wholesalers have had orders on hand for a month or more back for shipment under the low rates, and now all the houses are exceedingly busy delivering the goods. A good deal of impatience is being shown by the retail trade, all wanting their goods immediately, and apparently overlooking the immense number of orders to be filled. There is also an increase in the number of orders now coming in for immediate delivery, and mail orders are unusually heavy. The volume of business is greater than at the same period a year ago. The market, for the most part, has been steady.

BARB WIRE. The market is very active this week, spring business having opened up most satisfactorily. The price continues firm, but no quotable change has been made. We quote per 100 lb. f.o.b. Montreal, $3.

GALVANIZED WIRE.—There is a much better movement in galvanized wire, and trade is on the increase. Quotations are: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—The market for all kinds of smooth steel wire is as yet not as active as it might be, but conditions are improving and a good demand is looked for shortly. We quote: Bright iron and annealed on a base of $2.60 per 100 lb., f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras, per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—The movement is still light. Discount, 22½ per cent.

BRASS AND COPPER WIRE.—The discount on both these wires remains at 60 per cent. Business is picking up.

FENCE STAPLES.—There is an active inquiry for both bright and galvanized fence staples, but no change has taken place in prices. We quote $2.90 per 100 lb. keg, for bright, and $3.25 for galvanized. 25 and 50-lb. packages, 25c. extra.

WIRE NAILS.—There is now a good demand for wire nails. A meeting was held in Montreal with a view toward fixing the price of nails. It was expected by some that an advance of 10c. per keg would be made. This was the wish of some manufacturers, at any rate, but as there were a number to be consulted nothing resulted of the meeting in the way of advanced prices. The demand is rather greater than the supply, and at the present high price of the raw material there is not much profit on nails. Our quotations are now as follows: $2.55 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—There is a good business doing in cut nails. We quote $2.35 per keg, in small lots, and $2.27½ in carlots. Flour barrel and coopers' nails are discounted at 40 per cent.

HORSE NAILS.—Trade is brisk and wholesalers are making many shipments, besides receiving a good number of orders for immediate delivery. Our quotations are as follows: "C" brand at 50 and 7½ per cent. off and "M" brand at 60 per cent. off on oval and new city heads and 66 2-3 per cent. off for new countersunk heads.

HORSESHOES.—Business in horseshoes is also active, and prices remain unchanged. We quote as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60;

The "Model" Refrigerator.

Equal to the highest grade but sold at a moderate price.

The "Model" is built of the best quality of thoroughly kiln-dried lumber and pannelled all round, which makes it extra strong, and prevents any possibility of warping.

Its beautiful golden oak finish gives it a much better appearance than many of the higher-priced refrigerators.

Has strong, perfectly fitting, and self-retaining casters—they never fall out.

The ice-rack and shelves are made of galvanized steel, are removable and easily cleaned.

Zinc lining in the "Model" keeps the Refrigerator dry, adds to its insulating qualities, and saves ice.

We also have the well-known **"Leonard" Cleanable Refrigerators.**

Place a sample of these lines in your showroom. They are good sellers.

The Robin Hood Powder Company

If you want the best Trap or Game load in the world, buy "Robin Hood Smokeless," in "Robin Hood" Shells. It is quick, safe, and reliable. Try it for pattern and penetration from forty to seventy yards against any powder on the market. We make the powder, we make the shells, and we load them. Write for our booklet, "Powder Facts."

The Robin Hood Powder Company

SWANTON, VT.

No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS.—There is a good demand for screws this week and the jobbing houses are sending out a great many shipments. The discounts are as follows: Flat head bright, 87½ and 10 per cent. off list; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.

BOLTS.—There is nothing new to report in this line. The market remains quiet as the trade is pretty well supplied. We quote: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent,; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3½c. per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—Deliveries of building paper have now begun and this is one of the most active lines in the hardware trade. A number of large orders have been received this week for immediate shipment. Quotations follow: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 30c. per roll; tar sheathing, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE.—Orders are arriving freely, and under the new freight rates business is picking up rapidly. There have been no changes in prices, and our quotations are as follows: Manila, 16c.; British manila, 14c.; sisal, 12½c.; lathyarn, 11c. Prices on binder twine are as follows: Blue ribbon, 650 feet to the pound, 14½c.; Redcat, 600 feet to the pound, 13½c.; Tiger, 550 feet to the pound, 12½c.; Standard, 500 feet to the pound, 11c.; sisal, 500 feet to the pound, 11c. Prices are subject to a rebate of ½c. in carload lots.

RIVETS AND BURRS.—The demand for rivets and burrs is active this week and prices are unchanged. Discounts are: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, 35 and 5 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH.—There is an active inquiry, and quotations are unchanged at $1.25 per 100 square feet.

POULTRY NETTING.—Business is brisk and many spring orders are now being filled. The discount on Canadian or English is 60 per cent. off 2 x 2 mesh, 19 wire, and 55 per cent. off 2 x 2 mesh, heavier, Canadian list.

HARVEST TOOLS.—A number of large orders have been placed this week, and the market is in a good condition. The discount is 60 and 10 and 10 per cent.

FIREBRICKS.—Business is still quiet, but the opening of the St. Lawrence

route will have a beneficial effect in the near future. As yet, no quotable change has occurred, and Scotch sells for $19 to $23.50; English, $18.50 to $22.50 per 1,000.

CEMENT.—There is a moderate demand but dealers are waiting for cheaper shipping routes to open up, and for a few weeks there is not likely to be any improvement in the market. We quote: German cement, $2.30 to $2.40; English, $2.25 to $2.35; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.20 to $2.30 ex-cars.

METALS.

The metal market retains its firmness. There is a good demand for iron, and some difficulty has been experienced in obtaining bar iron. Galvanized iron is in particularly good demand. Billets are very scarce in the United States and here, and a great deal of German billets are being imported into the former country. The accident to the steamer Lake Superior, at St. John, caused a number of dealers in this market some uneasiness, as a good deal of her cargo was composed of metals and general hardware articles for this market and points west of here.

PIG IRON.—The market is still very firm, but prices have not advanced. Summerlee is quoted at $21 to $21.50, and Canadian at $18.50 to $19.

BAR IRON.—There is some scarcity of bar iron which has had the effect of stiffening prices, but this is likely to be only a temporary condition. We quote: Merchants' bar, small lots, $1.95; horseshoe iron, $2.15 to $2.20.

BLACK SHEETS.—Trade is quite active and the market retains its firmness. Our quotations are as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—A very great improvement is reported in the demand for galvanized iron. The market now is active and prices steady. We quote: No. 28, Queen's Head, $4.40; Apollo, 10¾ oz., $4.40; Comet, $4.25, with 10c. extra for less than case lots.

INGOT COPPER.—The market is featureless and the price remains at 14c.

INGOT TIN.—A number of orders have been received, and there is a better feeling in the market. Straits sell for 29c.

PIG LEAD.—The price is $3.25, with not much doing.

LEAD PIPE.—Business has improved. Composition waste is worth 7½c., and ordinary, 7c. Discount, 35 per cent.

IRON PIPE.—There is this week a good movement, and prices are firm. We quote standard pipe, per 100 ft., screwed and coupled, in lengths under 19 feet, as follows: Black pipe, ⅛, $3; ¼, $2.40, ⅜, $2.65; ½, $3; ¾, $3.70; 1-in., $5.25; 1¼, $7.40; 1½, $8.90; 2-in., $12.40. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $4; ¾, $5.05; 1-in., $7.25; 1¼, $10.10; 1½, $12.15; 2-in., $16.70. Extra heavy pipe, plain ends, are quoted, per 100 feet, as follows: Black, ½, $4.35; ¾, $5.30; 1-in., $7.60; 1¼, $10.60; 1½, $12.70; 2-in., $17.45. Galvanized, ½, $5.35; ¾, $6.70; 1-in., $9.60; 1¼, $13.30; 1½, $15.95; 2-in., $21.75. For threads and couplings 5 per cent. is added.

TINPLATES.—Trade is fair and prices unchanged. We quote: Cokes, $4.25 per box, and charcoal, $4.75 to $5.25 per box.

CANADA PLATE.—The inquiry for Canada plate is active, and as it is not easy to obtain supplies, the market is very firm. Our quotations are as follows: 52's, $2.65 to $2.70; 60's, $2.75 to $2.80; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35.

STEEL.—An active market continues. There is no quotable change, but prices are well maintained, and are, if anything, firmer. We quote: Sleighshoe, $2.10; tire, $2.15; bar, $2.05; spring, $2.85; reeled machinery, $3; toecalk, $2.60.

SHEET STEEL.—The demand is better, but trade is still on the quiet side. Our quotations are now as follows: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—The market is in a more satisfactory condition, and trade is picking up. Diamond is worth 8c., and Jessop's, 13c.

TERNE PLATES.—A few orders have been received this week, but there is little doing. The price is $7.75 to $8.

COIL CHAIN.—The big demand for chain is over and trade has again become quiet. Notwithstanding this, there is a firmer feeling in the market and an advance in price is by no means unlikely. The advance of $3 per ton in the raw material a couple of weeks ago has created this stronger position of chain. Our quotations are as follows: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-in., 7¼c. per lb.; 5-16, $4.80; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.85; 9-16, $3.75; ⅝, $3.55;

¾, $3.50 ; ⅞, $3.45 ; 1-in., $3.45. In carload lots an allowance of 10c. is made

SHEET ZINC.—The market is without feature, and the price remains at $5.75 to $6.25.

ANTIMONY.—There is a light demand at 10c.

ZINC SPELTER.—Trade is still quiet. The price is 5c.

SOLDER.—The market for solder is active. This week a large number of orders were received. Bar solder is quoted at 18c., and wire solder at 20c.

PAINTS AND OILS.

The active state of the market continues. An overwhelming number of orders have been received for immediate shipment. The fine weather of last week had doubtless something to do with this lively state of things, but stocks must be exceedingly light throughout the country, to judge by the urgency with which the goods were required. It might here be mentioned that though a little interest may be saved by the policy of getting manufacturers to carry the stock until the very last moment, yet, it is doubtful if this practice cannot be carried too far. Hardware merchants who have waited until April before ordering on shipments are now in the position that it may be May before those orders can be reached, owing to the uncommonly large demand all over the Dominion.

The feature of the market this week is the further advance in turpentine, confirming our previous reports as to the great demand and scarcity of this article, conditions that will probably continue for a couple of months. White lead is also firm, and the trade has received quite an impetus with the opening of spring. There are no other special changes to note, and in view of the feeling of buoyancy which prevails everywhere it is not likely that any recession in quotations will take place for some time. We quote :

WHITE LEAD.—Best brands, Government standard, $5.87½; No. 1, $5.50 ; No. 2 $5.12½ ; No. 3, $4.75 ; No. 4, $4.37½ all f.o.b. Montreal.

DRY WHITE LEAD—$5.25 in casks ; kegs, $5.50.

DRY WHITE ZINC — Pure dry, 6¼c. ; No. 1, 5¾c. ; in oil, pure, 7¼c. ; No. 1, 6¼c. ; No. 2, 5¾c.

PUTTY — We quote : Bulk, in bbls., $1.90 per 100 lb. ; bulk, in less quantity, $2.05 ; bladders, in bbls., $2.25 ; bladders, in 100 or 200 lb. kegs or boxes, $2.40 ; in tins, $2.55 to $2.65 ; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL—Casks, 7c. ; 100 lb. kegs, 7¼c. ; smaller quantities, 8¼c.

RED LEAD — Genuine red lead in casks, $4.50 ; in 100-lb. kegs, $4.75 ; less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25 ; kegs, $4.50. and smaller quantities, $5.50.

LITHARGE—Ground, casks, 5c. ; less, 5½c. ; flake litharge, casks, $5.25 ; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 80c.; boiled, 83c. In 5 to 9 bbls., 1c. less ; 10 to 20 bbl. lots open, net cash, plus 2c. for four months. Delivered anywhere in Ontario between Montreal and Oshawa at 2c. per gal. advance and freight allowed.

TURPENTINE.—Single bbls., 78c. ; 2 to 4 bbls., 77c.; 5 bbls. and over, open terms.

SHELLAC VARNISH — Pure white, $2.35 to $2.45 ; orange, $2.25 to $2.35.

MIXED PAINTS—$1.20 to $1.45 per gal.

CASTOR OIL—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—47½ to 49c.

COD OIL—32½ to 35c.

PARIS GREEN — Petroleum barrels, 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c. ; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms : 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

There are no quotable changes to report this week. The market has been fairly steady, but has shown little or no improvement. The scarcity of iron and consequent feeling of firmness still continues. Our quotations are now as follows: Heavy copper and wire, 11c. per lb.; light copper, 8c.; heavy red brass, 11c.; heavy yellow, 9c.; light brass, 5c.; lead, 2⅞ to 2⅝c.; zinc, 2¼c.; iron, No. 1, wrought, $18 ; No. 2, $8 per ton ; machinery scrap, $15 ; stove plate, $10 to $11 ; malleable and steel, $5 ; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6c. per lb.

GLASS.

The glass market is unchanged, and as the trade have been nearly all supplied, but few orders are being received and little business done. We quote as follows : First break, 50 ft., $2.10 ; second, $2.20 for 50 ft.; first break, 100 ft., $4 ; second break, $4.20 ; third break, $4.70 ; fourth break, $4.95.

HIDES.

There is little inquiry for hides and the market remains quiet at unchanged quotations. There is some improvement in the number of offerings, but receipts are still light. We quote : No. 1 hides, 7c.; No. 2, 6c.; No. 3, 5c.; No. 1 calfskins, 10c.; sheepskins, 65c.

MONTREAL NOTES.

Turpentine has advanced 3c., now being worth 78c. in single barrels.

ONTARIO MARKETS.

Toronto, April 4, 1902.

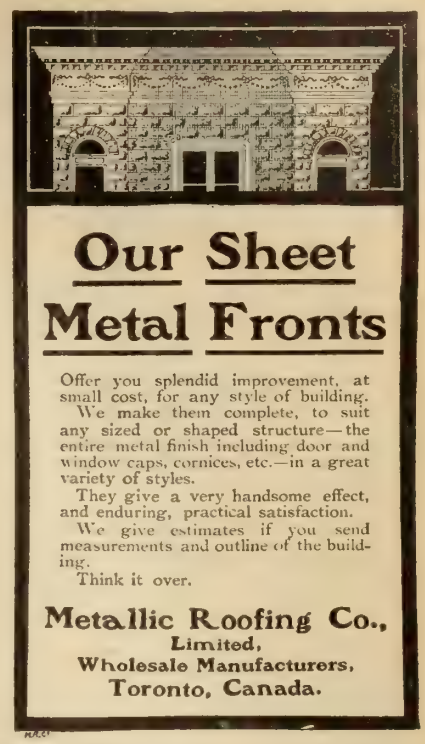
HARDWARE.

THE first week in April has witnessed quite an increase in the shipments of wholesale hardware. Of course, these shipments are goods that were ordered for shipment in April, but the shipments appear to be larger than usual, and already a shortage is being experienced in a number of lines. A good many country merchants who ordered goods for May shipment are asking for immediate shipment. Business during March appears to have been an immensely heavy one in the wholesale hardware trade of Toronto. The manufacturers are holding their quarterly meetings in Montreal this week, but so far no changes have been made in the prices of any goods they control. There have only been a few changes in the other lines. Scale beams, for instance, are higher, while nickle-plated copper kettles are lower.

BARB WIRE.—Orders that were booked for April shipment are now being delivered, and they are going forward in good quantities. Not many new orders are being received this week. We quote : F.o.b. Cleveland, $2.77½ for less than carlots, and $2.65 for carlots. From stock Toronto, $3.

GALVANIZED WIRE.—Some good shipments are being made of goods ordered for April shipment. Our quotations are as follows : Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity ; No. 9, $2.85 to $3.15 ; No. 10, $3.60 to $3.95 ; No. 11, $3.70 to $4.10 ; No. 12, $3 to $3.30 ; No. 13, $3.10 to $3.40 ; No. 14, $4.10 to $4.50 ; No. 15, $4.60 to $5.50 ; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—Some shipments of oiled and annealed wire are being made this week. Base price, $2.60 per 100 lb. Oiling, 10c.; coppering, 60c.;and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.



FINE STEEL WIRE.—Business is moderate. Discount is 22½ per cent.

WIRE NAILS.—The manufacturers met in Montreal early in the week, but decided to make no change in prices. It was expected, however, that they would have advanced prices slightly. The nail makers of the United States held a meeting last week and also decided to make no change, although it was considered that the increased cost of raw material warranted them advancing their figures. We quote: $2.55 for less than carlots and $2.50 for carlots. Delivery points, Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—Dull and unchanged. The base price is $2.35 per keg, with 7½c. allowance on carlots.

HORSE NAILS.—Business is just moderate. Discounts are as follows : "C" brand, oval head, 50 and 7½ per cent., and on "M" and other brands, 50, 10 and 5 per cent. Countersunk head 60 per cent.

HORSESHOES.—The movement is only light. We quote f.o.b. Toronto as follows :

Iron shoes, No. 2 and larger, light, medium and heavy, $3.60; snow shoes, $3.85; light steel shoes, $3.70; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85; snow shoes, $4; light steel shoes, $3.95; featherweight (all sizes), $4.95.

SCREWS.—Trade is still good. The discounts are: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze 70 per cent.

RIVETS AND BURRS.—Trade is fair. We quote as follows: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 and 10 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—Business continues active. We quote as follows: Carriage bolts, common ($1 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent.; machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66 2-3 per cent.

ROPE.—There is a fair demand for rope and quite a number of shipments are being made this week. Prices are steady and unchanged. We quote as follows: Pure manila, 16c.; British manila, 14c.; sisal, 12½c.; lathyarn, 11c.; sisal bed cord, 3 cord, 48 ft., 65c.; 60 ft., 80c.; 72 ft., 95c. per doz.

BINDER TWINE.—Prices are steady and the demand is fair. Quotations are as follows: "Blue Ribbon," 650 ft., 14½c.; "Red Cap," 600 ft., 13½c.; "Tiger," 580 ft., 12½c.; sisal, 500 ft., 11 cents.

BARN DOOR HINGES.—Trade is fairly good. We quote as follows: 6 to 10-in. at $4.50, and 12-inch and up, $3.50. Business is fairly good.

MILK CAN TRIMMINGS.—There are still some shipments going out, but not many new orders are coming in. The discount is 25 per cent.

EAVETROUGH, ETC.—The demand for eavetrough and for conductor pipe is active this week and some good shipments are being made. Eavetrough is quoted at $3.10 per 100 feet for 10-in., and conductor pipe at $4 for 3-in., and $5.25 for 4-in.

ENAMELLED WARE AND TINWARE.—Some good shipments are being made in both lines.

GAS AND OIL STOVES.—There is a decided activity to be noted this week in oil stoves, and in gas stoves there is a fair trade being done. The discount on blue-flame oil stoves is 15 per cent.

REFRIGERATORS AND FREEZERS.—Business is opening up a good deal earlier than last year, and during the week the demand for both refrigerators and ice-cream freezers has been active.

SCREEN DOORS AND WINDOWS.—But very few shipments are now being made. Common doors, 2 or 3 panel, are quoted f.o.b. factory points: Walnut, stained, 3-in. style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-in. style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2.50 per dozen.

SPADES AND SHOVELS.—There is a good movement this week in spades and shovels. The discount is 40 and 5 per cent.

HARVEST TOOLS.—Large quantities of these are going out, and in some lines there is already a scarcity. The discount is 60, 10 and 10 per cent.

BUILDING PAPER.—Large quantities of building paper are being shipped this week. Quotations are as follows: Dry sheathing, grey or straw, 30c. per roll; tar sheathing, grey or straw, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c per roll.

LAWN MOWERS.—There are a few of these going out. The discount on high-wheel mowers, 50 per cent.; "Star" mowers, 9-in. wheels, $2.50 to $3; "Daisy" mowers, 17-in. wheels, $2.25 to $2.50.

POULTRY NETTING.—Shipments of poultry netting during the week have been large and some difficulty is already being experienced in supplying all assortments wanted. We quote: 2-in. mesh, 19 w.g., discount, 60 per cent.; 2-in. mesh, 18 w.g. and heavier, 50 and 10 per cent.

GREEN WIRE CLOTH.—The demand is brisk and some good orders are going out. We quote $1.25 per 100 square feet.

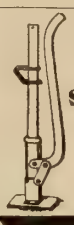
SCALE BEAMS.—The manufacturers have advanced prices, and the discount, which was formerly 45 per cent., has been reduced to 35 per cent.

COPPER KETTLES.—The price on nickle-plated copper kettles has been reduced about 20 per cent. in order to meet United States competition. The discount is now 50, 10 and 10 per cent.

CEMENT.—Trade is recovering. The market, however, is weak, owing to competition with the United States article, and among Canadian manufacturers. We quote: Canadian Portland, $1.90 to $2.75; Canadian hydraulic, $1.25 to $1.50; German cement, $3; English, $3 to $3.15; Belgian, $2.50 to $2.75 per bbl., and American, $2.20 to $2.30 ex-cars.

METALS.

The position of the metal market is strong and there is a good demand for most lines.



PIG IRON—Most of the buyers appear to have placed orders for their requirements for this year. And, while the demand both here and across the border is now quiet, there is still a scarcity of iron, and prices are steady. The idea as to price for Canadian iron is still about $19.50 on track Toronto.

BAR IRON — The demand is fair and prices firm and unchanged. We quote price at $1.95 to $2.05. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

STEEL—There does not yet appear to be any relief to the situation, the demand still exceeding the supply in most lines of steel. We quote as follows: Merchantable cast steel, 9 to 15c. per lb.; drill steel, 8 to 10c. per lb.; "B C" and "Black Diamond" tool steel, 10 to 11c.; Jessop's, Morton's and Firth's tool steel, 14c.; toe-calk steel, $2.85 to $3; tire steel, $2.30 to $2.50; sleighshoe steel, $2.10 to $2.25; reeled machinery steel, $3, hoop steel, $2.90.

BLACK SHEETS—The demand is good and stocks light. We quote: Common, $3.15 for 28 gauge; and dead flat, $2.50 for 26 gauge.

CANADA PLATES—Orders are only for small quantities. We quote: All dull, $3; half polished, $3 10; all bright, $3.75.

GALVANIZED SHEETS — The demand is active and prices are firm in both the British and United States markets. We still quote case lots at $4.50, and less quantities at $4.65.

TIN—There is a fair demand for small lots. The European markets are decidedly strong, and on Wednesday last both spot and futures closed £1 10s. higher in London, as a result of confident buying on the part of the bulls. Locally, prices are unchanged at $29 to $30 per 100 lb.

TINPLATES—While the demand is good, it is perhaps not as brisk as it was. Stocks are light. There are shipments of tinplates on the Lake Superior, now ashore near St. John, N.B., for importers here. We still quote IC at $4 25.

TINNED SHEETS — The demand is improving, but the movement is not yet large. We quote: 72 x 30, up to 24 gauge, 7½c.; ditto, up to 26 gauge, 8c.

TERNE PLATES—Very little doing. We quote I C, 20 x 28, at $8 50.

COPPER — Business is good in ingot copper, and there is some improvement in the demand for sheet copper. We quote ingot at $15 per 100 lb., and sheet $22 to $23.

BRASS—Trade is quiet. Discount 15 per cent.

PIG LEAD—There is some improvement and business is now fair. We quote: Pig lead at $3.50 to $3.75, and bar lead at $5.

IRON PIPE — There are no particular features to note, the demand being moderate. We quote per 100 ft.: ⅛ in., $3; ¼ in., $2.50; ⅜ in., $2.75; ½ in., $3; ¾ in., $3 70; 1 in., $5.25; 1¼ in., $7.40; 1½ in., $8 90; 2 in., $12.40; galvanized, 1 in., $7.25. Trade discount 4 per cent.

ZINC SPELTER—Trade is quiet. The outside markets are strong. We quote $5.50 to $6 per 100 lb.

ZINC SHEET—A fair business is being done. We quote $6 to $6.25 in casks and $6.25 to $6 50 in part casks.

SOLDER — The demand is good. We quote: Half-and-half, guaranteed, 19c.; do. commercial, 18½c.; refined, 18c.; wiping, 17½c.

ANTIMONY—Shipments are small. We quote 10c. per lb. for Cookson's.

PAINTS AND OILS.

Holders of turpentine were surprised by a sudden drop in that article in Savannah, Florida, early in the week, but up to the time of going to press the prices are not changed here. Benzine has advanced ½c. and is more active. Paint houses are busy on their orders that were booked for shipment on the first of the month, and also on a number of orders just received requiring immediate attention. Dry colors and zinc whites are moving freely. White leads and mixed paints are still in good demand. The paris green market is weak, and sales are slow. Both liquid and gum shellacs are high, and the demand for them is quiet. Red lead is quiet, and the market is weaker. The prices of orange mineral have widened. Castor oil is weaker, but the demand is improving. Recent advices from Great Britain state that raw and boiled linseed oils there are firm. The strike of the painters has made the local trade quiet. We quote:

WHITE LEAD—Ex Toronto, pure white lead, $5.87½; No. 1, $5.50; No. 2. $5.12½; No. 3, $4.75; No. 4, $4.37½ in pkgs. of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb. $5 to $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

LITHARGE—Genuine, 6 to 6½c.

ORANGE MINERAL—Genuine, 7½ to 8c.

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.

BENZINE—In barrel lots, 17c. per gal.; less quantities, 25c. per gal.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING — 65c. per 100 lb.; Gilders whiting, 80c.

GUM SHELLAC — In cases, 35c.; in less han cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY—Bladders, in bbls., $2.25; bladders, in 100 lb. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

PUMICE STONE — Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS—Pure, $1.20 to $1.40 per gal.; No. 1, $1.10 per gal.

CASTOR OIL — English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL—Raw, 1 to 4 barrels, 82c.; boiled, 85c.; 5 to 9 barrels, raw, 81c.; boiled, 84c., delivered. To Toronto, Hamilton and London, 2c. less.

TURPENTINE—Single barrels, 76c.; 2 to 4 barrels, 75c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

The demand for local consumption is brisk. Owing to an advance in Europe the prices here will be firm all summer, it is expected. We quote as follows: Under 26 in., $4.25; 26 to 40 in., $4.65; 41 to 50 in., $5.10; 51 to 60 in., $5 35; 61 to 70 in., $5.75; 71 to 80, $6.25; 81 to 85, $7; 86 to 90, $7.75; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33⅓ per cent.

MARKET NOTES.

Scrap rubber is down ½c. per lb.

Nickle-plated copper kettles are lower.

Benzine has advanced ½c. per gallon.

Beam scales are higher, the discount being 35 per cent.

Recent advices from Europe report a considerable advance in the glass market there.

THE FARRIER'S FRIEND

Horse Rasps

K. & F. and Arcade Brand

The above Rasps are standard, and are in demand by all expert horseshoers as being the most reliable.

Set and Cap Screws, Special Milled Work, Engine Studs, Etc. Cold Punched Nuts of every variety of finish.

INGERSOLL, ONT.

MANITOBA MARKETS.

Winnipeg, April 1, 1902.

HARDWARE.

THE business of the week has been good, despite bad weather and bad roads throughout the country, and the only complaint offered by the trade is the difficulty in getting goods from the factories fast enough for their requirements.

The trade in paints, oils and glass is active and satisfactory. Glass is holding firm at the same prices as have been quoted for the past few weeks.

Binder twine is selling well, and there seems to be some apprehension that the supply is likely to be below requirements. This seems a long looking-ahead, but dealers evidently have in mind the trouble of last year, when the harvest came in two weeks before the usual time and twine was called for all over the country almost simultaneously, and it was impossible to fill orders except by express.

There is a very good demand for hand drills and similar garden tools—more so than for some years past.

The price list is as follows :

Barbed wire, 100 lb	$3 30
Plain twist	3 40
Staples	3 95

NOTES.

Mr. Williamson has just opened a new hardware store at Fairfax, Man.

Mr. J. H. Ashdown is calling for tenders for an extensive addition to his wholesale warehouse on Bannatyne street east. The present structure, which was considered enormous when erected a few years ago, is proving entirely too small for the growing trade of the firm.

BOUNTY ASKED ON ARSENIC.

Those interested in the production of arsenic in the Dominion formed a deputation and waited on Hon. Messrs. Fielding, Mulock and Fitzpatrick on April 2, and asked for a bounty on the output of arsenic ore in Canada.

The deputation included Messrs. E. W. Rathbun, E. D. O'Flynn, C. T. Aylesworth, sr., B. O. Lott, C. W. Craigal, A. W. Carscallen, M.P., P. Kirkegaard, Geo. Collins, D. G. Kerr, E. G. Porter, M.P., P. P. Clarke, Jos. James, C. E. James, H. H. Dewart, E. S. Leitham and John McLaren.

The Dominion Government is requested to furnish two-thirds of the bounty money, and the other third is to be secured from the Ontario Government.

The demand is made on the basis of a sliding scale, that is to say, that the Government is asked to give a bounty of $15 a ton for the first three years, of $10 for the next two years, and of $5 for two additional years. It is hoped that in seven years the industry will be on a foundation so as to do without Government aid. The matter will receive the consideration of the Government. The delegation was introduced by Sir Mackenzie Bowell.

PERSONAL MENTION.

Mr. Taylor Webb, Toronto, representative of the Thomas Davidson Manufacturing Co., Limited, Montreal, in Manitoba and the West, has just returned from a three-months' trip over his territory.

Master Plumbers of Ontario Organize.

MASTER plumbers, steam and gas fitters from many parts of Ontario attended a meeting held in Pythian Hall, Toronto, on Friday, March 28, for the purpose of organizing a Provincial Association.

Although the attendance could have been larger, yet it was representative, and those who were there were pleased with the way the work of organizing was grappled with and completed. Several places were unable to send delegates, but sent messages instead by way of expressing their approval of the new organization.

President W. Mansell.

The delegates present were as follows:

Wm. Mansell, Toronto.
W. H. Meredith, "
E. Larter, "
K. J. Allison, "
J. McKittrick, "
H. Hogarth, "
R. Ross, "
W. G. Adam, "
D. Cooper, "
J. H. Wilson, "
A. Purdy, "
J. Sherlock, "
G. Clapperton, "
R. Harrison, "
G. B. Fitzsimons, "
J. McKinley, Ottawa.
H. A. Knox, "
A. Rogers, Hamilton.
W. Clark, "
J. Stewart, "
W. J. Walsh, "
A. Chadfield, St. Catharines.
A. Riddell, "
C. Hoopell, "
S. P. Gourlay, "
R. G. Sturgeon, Peterboro'.
J. H. Neelands, Barrie.
H. Mahoney, Guelph.
R. W. Phillips, "
P. Bull, St. Thomas.
J. Williams, "
Charles Taylor, Brantford.
Philip Gies, Berlin.

Letters were received from the local associations in Kingston, Cobourg, Port Hope, Simcoe, London, Windsor, Sarnia and a number of other places stating their inability of having representatives present, but expressing their wishes for the organization of a strong Provincial Association.

The proceedings opened at Pythian Hall about 11 o'clock on Friday, March 28, with Mr. Wm. Mansell in the chair, and Mr. H. A. Knox, of Ottawa, acting as secretary pro tem. A programme committee was appointed before the adjournment for luncheon.

Secretary W. H. Meredith.

At the afternoon session the election of officers was proceeded with, during which time John McKinley, president of the National Association, occupied the chair.

The officers elected were as follows:

President—Wm. Mansell.
Vice-President—Wm. Clark.
Secretary—W. H. Meredith.
Treasurer—J. H. Wilson.
Past President—S. P. Gourlay.

Executive Committee — Philip Gies and H. Mahoney.

The following were appointed chairmen of committees:

Legislative—T. H. Neelands.
Sanitary—A. Rogers.
Apprenticeship—Charles Taylor.
Essay—Robert Ross.

The members of each committee will be appointed by the respective chairmen.

The standing committee will be appointed at the next Provincial convention on Thanksgiving Day.

After the election Mr. Wm. Mansell, the newly-elected president, took the chair.

The meeting then proceeded to the consideration of the constitution and by-laws. These had been drawn up at the last annual meeting of the National Master Plumbers', Gas and Steam Fitters' Association, held in Toronto last July, but before being approved of by the new association, they had to be considerably amended. It took the whole afternoon to come to a final decision in the matter.

The question of appointing a permanent secretary, who should have a stated salary for his services, came up for consideration, and, as the opinion of the meeting seemed to be in favor of this step, it was left to the executive to decide.

The evening session was more social in its character, and there was no business of much importance transacted beyond a few minor matters. It was 11 o'clock before the convention was over.

The next meeting of this Provincial Association will be held in Toronto on Thanksgiving Day, and that there will be a large attendance at it is the hope of those interested.

Treasurer J. H. Wilson.

When you lay in your stock of house paints, don't forget the roof paints, the barn paints, the fence paints, the "outside" paints. It's not every man can afford to put high-grade house paints on his barns and he does'nt need to if he knows it. Every dealer can make money with

RAMSAYS OUTSIDE PAINTS

which he can sell at $1.00 per gallon, and the man with out-houses and fences gets to work and paints up places he never painted before, because he can do it reasonably.

That means **new** business for you, does'nt it?

We can send you a color card of **"Ramsays Outside Paints"** if you want it.

BUILDING PERMITS IN TORONTO.

DURING the week building permits have been granted from the Toronto city commissioner's office as follows: W. J. Tracy, for a two-storey brick dwelling on Victor avenue, for $1,000; Wm. Murray, for two pairs of two-storey brick dwellings on Huron street, for $12,000; L. Crowley, for a pair of two-storey brick and roughcast dwellings on 84 and 86 Claremont street, for $2,000; D. B. Kissock, for a two storey brick dwelling on 478 Ontario street, for $2,000; George Richardson, for a two-storey brick and roughcast dwelling on Shaw street, for $1,300; J. Morton, for a pair of two-storey brick dwellings on the corner of Brock avenue and Moutray street, for $3,600; Mrs. F. J. Armstrong, for repairs of brickwork and plumbing of 262 and 264 George street, for $700; Geo. H. Hees, Son & Co., for an iron storehouse for unfinished woodenware in rear of annex on Bedford Road, for $900; J. S. V. May, for a two-storey dwelling on 81 Delaware avenue, for $3,500; L. G. Sisterson, for a two-storey brick dwelling on 3 Simpson avenue, for $1 400; J. Wheeler, for a two-storey brick dwelling at 507 Dovercourt Road, for $3,000; J. E. Hane, for a pair of two-storey brick stores on the east side of Albany Avenue, for $6,000; M. Rawlinson, for a two-storey brick dwelling on the north side of Maple Avenue, for $4,500; The Toronto Hotel Company, for two additional storeys of brick and terra cotta to hotel on King street east, for $150,000; W. H. Gibbs, for two pairs of two storey brick and roughcast dwellings at 309 to 315 Gerrard street east, for $6,000; G. E. Genereaux, for a one and-a half-storey brick dwelling on Vermont street, for $800; James Armstrong, for a roughcast addition to store at 72 Lansdowne Avenue, for $400; G. A. Thorpe, for brick alterations to factory at 88 York street, for $1,500; H. M. Death, for a pair of two storey brick dwellings at 240 and 242 Dovercourt Road, for $4,000; and J. Wheeler, for a two-storey brick residence at 507 Dovercourt Road, for $3,000.

PLUMBING AND HEATING CONTRACTS.

Fiddes & Hogarth, plumbers and gasfitters, Toronto, have secured contracts for the plumbing and gasfitting of a residence on Jarvis street for Dr. Charles Sheard, and for the installation of additional bathrooms in the clubhouse of the Toronto Hunt, Limited, East Toronto.

Guest & Co., plumbers, Toronto, have secured contracts for the heating of a residence on 23 Rolyat street, for Thos. Bloodworth; the plumbing and installation of a water motor in a Methodist church at Waterloo, Ont., and the plumbing and installation of a water motor in Colborne Street Methodist Church, Brantford, Out.

HE GOT THREE MONTHS.

John Donnelly was the man who was caught stealing sewer pipes from Purdy & Mansell, plumbers, on Adelaide street, Toronto, one day last week. He appeared in the police court on April 1 and it was further proved that he had also stolen from S. P. Kent. The stolen goods were taken to Mehr's junk shop and sold. He said his fall was owing to strong drink. He was sentenced to three months' imprisonment.

John Innis and William Russel were in the express wagon with Donnelly when he took the pipes, but it could not be proved that they knew the pipes were being stolen. They were discharged.

SOME BUILDING NOTES.

George Everett will build a house at Brookbury, Que., this spring.

R. J. Wales is preparing for the erection of a two-storey brick store at Napanee, Ont.

S. Pierce is building a dwelling at Aylmer, Ont.

A new Baptist church is being erected at St. Marys, Ont.

A. J. Creighton is building a two-storey brick block at Owen Sound, Ont.

Dr. Sandford is building a store and bakery, and E. P. Ainsworth, a new house, at Brighton, Ont.

John Waller is building a house on the corner of Maud and Front streets, Petrolea, Ont.

The James McCready Manufacturing Company is erecting a boot and shoe factory at Montreal at a cost of about $75,000.

St. Mary's church, Montreal, recently burned, will be rebuilt in May at a cost of $80,000.

Dr. G. Reid Simpson is erecting six brick dwellings on the corner of Spring and Jackson streets, Hamilton, to cost $7,057.

W. W. Carter, general merchant, Fesserton, Ont., is remodelling and enlarging his store.

At Durham, Ont., Jas. Redford is preparing to erect a new house; James Lanahan is working on a new residence; Albert Algue will erect a blacksmith shop, and the Baptists are going to build a new church.

During the month of March 70 new building permits were issued in Montreal, representing a total value of $500,000. Amongst these was the permit for the new Board of Trade, that will cost $300,000.

BUILDING IN TORONTO.

Building operations in Toronto for March show an increase over the same month last year. Last month, building permits were issued representing a value of $225,665, as compared with $176,845 for March, 1901. For the three months ending March, 1901, the total amount of the building permits was $359,855, while for the same period in 1902 building permits were issued totalling $384,340.

LUNENBURG'S ELECTRIC PLANT.

Lunenburg, N.S., has decided to purchase the property, rights and franchise of The Lunenburg Water and Electric Light, Heating and Power Co., Limited. The sum paid for the plant is not to exceed $90,000. The property will be handed over to the town after the company has installed 48 fire hydrants.

INVENTOR OF THE LUCIFER MATCH.

There have been many claimants to the honor of being the maker of the first lucifer match. But a recent discovery of some old account books at Stockton on-Tees, Eng., affords, according to an exchange, documentary evidence which proves beyond question that one John Walker, a Durham chemist, was the original inventor and maker of the match. According to a diary in which Walker carefully noted all his business transactions, the first box of matches was sold for 35c., in April, 1827. It appears that they at once became popular, and people travelled from the adjacent towns to purchase them. Walker employed the poor of Stockton to split the wood, but dipped them in the phosphoros mixture himself, to insure their perfection. The inventor was pressed by his friends to patent the process; he refused, however, affirming that he had ample means to satisfy his simple wants.

PARRY SOUND BOARD OF TRADE.

The following were elected officers at the annual meeting of the Parry Sound Board of Trade:

President—John A. Johnson.
Vice-President—W. R. Foot.
Secretary-Treasurer—W. L. Haight.
Executive Council—H. Y. Complin, D. W. Ross, J. H. Knifton, John Galna, A. B. Begg, C. A. Phillips, S. Armstrong, Wm. Ireland.
Mining Section—Alex. Dick, M.E., John Moffatt, C. A. Phillips, A. B. Begg, P. J. Dwyer, P. Weller.
Auditors—Major Knifton, Wm. Ireland.

The chief subjects for consideration were the settlement of the water frontage dispute and the procuring of assistance in dock construction. The officers and members of the council will assist in the final arrangements.

LEADER CHURN

New Century Improvements

FOUR DIFFERENT STYLES:

A—Steel Frame with double reversible Steel Lever.
B—Wood Frame with double reversible Steel Lever.
C—Steel Frame with Crank.
D—Wood Frame with Crank.

☛ *Styles* **A** *and* **B** *may be operated from a sitting or standing position.*

Steel Frames and Hoops beautifully ALUMINIZED.

All LEADER CHURNS are equipped with BICYCLE BALL BEARINGS and PATENTED CREAM BREAKERS.

Stands are so constructed that they are particularly strong and rigid, and there is nothing to interfere with the placing of pail in the most convenient position for draining off buttermilk.

It Pays to Have the Best. None are Better Than the Leader.

ABOUT

Horse Nails.

There is one brand of horse shoe nails that you can do all your business with—the old reliable "**C**" brand. If you keep your stock of this one brand, you will satisfy any farrier you sell to, in the matter of quality, pattern or finish.

If you want cheap nails the "**C**" brand is the cheapest to buy, though not the lowest price. Best quality and lowest price never go together. Low price—low quality. Best price—best quality, is the rule.

Many buyers are tempted to purchase low-priced nails, thinking they are saving the difference in price between the "**C**" brand and low-priced horse nails. We wish to inform such buyers that twenty-five cents a box less than our price, only reduces the cost of the nails used in a full set of shoes, **one third of one cent**; and fifty cents a box less, two-thirds of one cent; it requires, therefore, seventy-five cents a box below our price to reduce the cost **one cent** in the nails used in shoeing a horse. We base above on the average size nail No. 8, and the statement is absolutely correct.

No intelligent farrier who values his reputation for good work, but can afford, and willingly pay a little more for the best nails, when the difference in quality and price, as above stated, are fairly presented to him.

Our works (which are the oldest and largest in Canada) have been employed in making horse nails, only, since the year 1865. You have the benefit of this long experience in purchasing our "**C**" brand. You get the best that are made in Canada.

We want your trade, and will appreciate your orders through any dealer, or direct if they cannot supply you.

CANADA HORSE NAIL CO.
MONTREAL.

OVERBUYING AND FAILURES.

OVERBUYING is responsible for a great many business losses. The merchant who buys in haste and too largely will repent at leisure, says an exchange. No buyer can gauge exactly the possible demand in any line of goods, consequently it is almost inevitable that towards the end of the season he will be entirely out of merchandise on which there is still some sale at a good profit, or will be so overloaded that he will have to sell well below cost in order to sell at all, thus sacrificing a good part of the profits made earlier in the season, or taking the other alternative of carrying over the goods, having money locked up in them which might be invested in salable goods. The price concessions that are to be had through large buying are very tempting; they often enable a merchant to undersell a competitor and yet realize as large a profit, or to sell at the same price and make a larger profit. This temptation too often blinds him to the risk of such buying. If your capital is limited and your competitors are similarly situated in the financial sense, "little and often" is a pretty safe rule for buying. If, on the other hand, it is necessary to buy largely in order to meet competition and realize a satisfactory profit, you should buy as largely as your possible trade will warrant, but no more so. The man with a small capital had better buy early and often, and manage somehow to get along on a slightly smaller profit, if necessary, than to overbuy in order to meet a competitor on even ground. Of course his prices should not be higher than those of his competitor if he would hope to hold his own. It is a pretty good plan to think over and estimate as accurately as possible before buying for a new season your own capital and selling possibilities as compared with those of your competitors. If these and the business policies of your competitors are correctly sized up and you buy in the light of judgments thus found, you will be pretty safe.

A CURIOUS MINE.

One of the most curious mines that is worked is in Tongking, China, where, in a sand formation, at a depth of from 14ft. to 20ft., there is a deposit of the stems of trees. The Chinese work this mine for timber, which is found in good condition, and is used in making coffins, troughs, and for carving and other purposes. The stems are about 3ft. in diameter and 45ft. in length, and apparently belong to fir trees which were buried thousands of years ago by an earthquake or other similar convulsion.

THE
PAINTERS
PERFECT
WHITE
LEAD

is beautifully soft and fine in the grain. It mixes well with Linseed Oil, forming a creamy smooth paint of great covering power and undoubted durability. Every atom is paint — perfect paint — and there is no loss or residue of any kind. The Painters Perfect White Lead has become very popular everywhere. Book early to ensure early shipment.

WEST-INDIAN TRADE WITH CANADA

From The Argosy, Georgetown, Demerara.

ONE of the most hopeful signs of the times is the increased interest that is being shown by the colonies in one another's welfare. It is a manner for congratulation that British Guiana has taken a not unimportant part in the reciprocal negotiations, and the fostering of more friendly relationships. The visit of the deputation from the Canadian Manufacturers' Association to the various West-Indian colonies has given the commercial communities concerned an opportunity of becoming better acquainted with the products and manufactures of Canada, and has, at the same time, allowed the deputation to gather valuable information regarding the class of goods most suited to our markets. As was pointed out at the meeting of the Georgetown Chamber of Commerce on Monday, the West Indies need not trouble about the risk of jeopardizing our commercial relations with the United States. Sugar is our principal article of export, and it is true if it had not been for the good offices of the United States, we would have been in a much worse plight than we have been for years past. But, having served their own purpose as well as ours, and having now obtained sugar colonies under the flag of the "Stars and Stripes," indications are not wanting that before very long the United States market will be closed against us.

We have pointed out on previous occasions that we cannot look to Canada as a substitute for the United States; the population is too sparse, and the consumption of cane sugar too small to dispose of a fifth of the output, even of British Guiana, not to speak of the West Indies generally. But because Canada cannot take all our sugar, that is no reason why we should not make the most of the market it has. The endeavors being put forth by the wealthy and representative Canadian Manufacturers' Association to foster inter-colonial trade are to be welcomed, as they cannot fail to have beneficial results. That such efforts are necessary is only too evident from a comparison of the volume of trade between Canada and the West Indies, including British Guiana, during the six years ending 1900, the latest period for which figures are available. In 1894 it amounted to $4,170,-989; in 1900 it had dwindled to $2,707,350. This falling off must be in a large measure due to the increase of our trade with the United States, in consequence of the favorable terms on which that country has admitted our sugar.

It is but natural that we should have encouraged our customers by buying largely in their market, and it is not surprising, therefore, to find that in 1900 the West-Indian imports from the United States should have reached a total of $24,000,000. Reference was also made at the meeting on Monday to the steamship service between Canada and the West Indies, and it was pointed out that one of the most clamant needs was a fast service. This has already been pressed on the attention of both the Canadian and Imperial authorities, and perhaps when the bounties have been got rid of, the matter will be taken up and carried to a successful issue.

POPULATION OF NEWFOUNDLAND.

The following is the population of Newfoundland, according to the last census report:

Districts.	1891.	1901.
Twillingate	16,780	18,843
Fogo	6,700	7,666
Bonavista	17,849	20,638
Trinity	18,872	20,695
Bay-de-Verde	9,708	9,922
Carbonnear	5,766	6,024
Harbor Grace	13,881	12,671
Port-de-Grave	7,986	7,445
Harbor Main	9,180	9,445
St. John's West	15,251	18,483
St. John's East	20,775	21,511
Ferryland	5,853	5,697
Placentia and St. Mary's	12,801	15,806
Burin	9,059	10,402
Fortune Bay	7,671	8,762
Burgeo and LaPoile	6,471	7,010
St. George's	6,633	9,205
St. Barbe	6,690	8,126
Total for Newfoundland	197,934	215,616
Labrador	4,106	3,634
Grand total	202,040	220,349

U.S. STEEL OUTPUT IN 1901.

Bradstreets says: "The American Steel and Iron Association, in an estimate compiled from manufacturing statistics, shows that production of Bessemer steel ingots in the United States during 1901 increased 30¼ per cent. over 1900, and was much the largest in our history, while output of steel rails increased 20 per cent. The Association believes that final estimates will show a production of about 2,875,000 tons of all kinds of rails for 1901. It notes that this figure more than doubles the high-record figures of British production of Bessemer steel rails, which was 1,235,785 tons in 1882. Both in ingots and rails the 1901 American production broke all records. For Bessemer ingots the figures for 1901 compare as follows:

Gross tons.		Gross tons.	
1901	8,713,302	1898	6,609,017
1900	6,684,770	1897	5,475,315
1899	7,586,354	1896	3,919,906

The number of tons produced by States is thus compared for three past years:

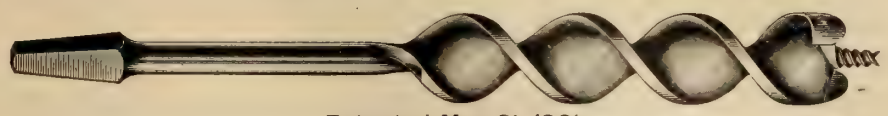
	1901.	1900.	1899.
Pennsylvania	4,293,439	3,488,731	3,968,779
Ohio	2,154,846	1,388,124	1,679,237
Illinois	1,324,217	1,115,571	1,211,246
Other States	940,800	692,344	727,092
Totals	8,713,302	6,684,770	7,586,354

Steel-rail production was divided as follows between Pennsylvania and the other States, the figures given being gross tons:

	1901.	1900.	1899.
Pennsylvania	1,406,008	1,195,255	1,224,807
Other States	1,430,265	1,166,666	1,015,960
Totals	2,836,273	2,361,921	2,240,767

In 1898 Pennsylvania produced 1,052,771 tons, and the rest of the Union 902,656."

APOLLO BEST BLOOM
GALVANIZED IRON



The metal-worker who uses common galvanized iron makes his business harder to do and harder to get; and of course, his profits less.

American Sheet Steel Company, New York

SOMETHING NEW

Caldwell Lightning Auger Bits.

Patented May 21, 1901.

This bit will bore two holes in less time than it takes to bore one with any other bit.

AGENTS:

Caverhill, Learmont & Co., - - - Montreal.
Wood, Vallance & Co., - - - - Hamilton.
Geo. D. Wood & Co., - - - - Winnipeg.

CURRENT MARKET QUOTATIONS.

April 4, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

WHEN WRITING ADVERTISERS PLEASE MENTION THAT YOU SAW THEIR ADVERTISEMENT IN THIS PAPER

A GENERAL AWAKENING.

THERE is an undoubted awakening throughout Canada in regard to tourist travel and its importance. And this awakening is peculiar to no one part of the country. The Atlantic Provinces, the Pacific Provinces and the inland Provinces are all more or less affected.

The Maritime Provinces were the first to recognize the importance of tourist travel. At any rate, they were the first to take an active interest in it. And this spring they seem to be more aggressive than ever in preparing ways and means to attract the tourist and to make his stay among them during the summer months pleasant.

The awakening which is so evident throughout Canada in regard to tourist travel is particularly gratifying to HARDWARE AND METAL, this journal having for years been impressing upon the business men of the country the importance of tourist travel to them.

While the awakening is so evident, there are yet a good many towns and cities in Canada in which there still appears to be a lack of interest in the matter, and it behooves the business men in such places to try and bring them into line with those that are already up and doing.

When a clock is wound up it goes ; when a business is wound up it stops.

BUSINESS MEN FOR THE LEGISLATURE.

It is probable that before many weeks the electors of Ontario will be in the midst of a general election campaign.

It is to be hoped the business men in the Province will not forget the business men who are in the field.

The greater the number of practical business men that are returned to the legislature the better it certainly will be for the commercial interests of Ontario. And whatever accrues to the advantage of the commercial interests will certainly not be without benefit to the whole Province.

A legislature that is not businesslike is lacking in the chief essential to good government. It follows, therefore, that the only way to get a businesslike legislature is to elect to it businesslike men.

FAILURES FOR THREE MONTHS.

FAILURES in Canada during the first quarter of 1902 were 363, according to Dun's figures. This is the smallest number since 1899, when the number was exactly the same, although the liabilities were much larger. During the same three months of 1901 the number was 424.

Trading concerns make up the great bulk of the failures, the total in that branch of commerce being 308, against 345 for the three months of 1901 and 318 for 1890. In manufacturing concerns the number of failures was nearly 50 per cent. less than in 1899.

The liabilities of the 363 firms which failed during the three months was $3,439,992 and the assets $2,359,427, while in 1901 the figures were $3,333,722 and $2,740,649 respectively. In other words, the percentage of assets to liabilities was 68.58 in 1902 against 82.21 in 1901. This is the most unsatisfactory feature in connection with the figures. As the failures were heavier in Ontario during the past three months than the same period a year ago, this is probably the explanation of the decrease in the percentage of the assets to the liabilities.

Whatever may be the explanation, it is rather surprising, in view of the active condition of trade, to know that the failures during the past three months of 1902 were more unsatisfactory than those during the same period of 1901.

One does not reach the highway to success by turning aside from the pathway of duty.

SHOULD MANUFACTURERS SELL TO RETAILERS?

MEETINGS of whole sale merchants have recently been held in Iowa and Nebraska, at which steps have been taken to boycott all manufacturers who sell over their heads to the retailer.

This draws attention to a most interesting and difficult question, namely : Should the manufacturer sell to the retailer? As our readers are well aware, those who essay to answer the question are usually influenced in their yea or nay according to the direction in which their self-interests lie. And, as a matter of fact, no general answer, either in the affirmative or in the negative, can be logically given.

There are a good many people who confidently assert that the wholesaler will in time be a thing of the past. We do not for one moment believe it. He is a necessary part of the machinery of trade and commerce. And, as long as he is such, he will be found regularly doing business. At present, there are no signs that he is becoming a sinecure.

There are manufacturers, and among them some of the most important in the country, who are doing business direct with the retailer, and they are successful. But there are many others who have tried it and failed, being only too glad to again resort to the jobber as a medium through which to reach the retail trade.

It is obvious, therefore, that, while some manufacturers find it most profitable to deal with the retailer direct, there are others whose experience is the very opposite. And, as long as this is so, it is equally obvious that the wholesaler is a necessity.

There is no business principle involved in the manufacturer going direct to the retailer. Neither is there if he chooses to confine himself to the wholesaler. The question resolves itself into this : Which is the better way for him to do business? Not for the wholesaler or the retailer, but better for himself.

The greater number of manufacturers, especially in a country like Canada with its "magnificent distances," find it to their advantage to do their business through the wholesaler. The wholesaler is the distributor. Each traveller he sends out has in his "grip" samples of the products of a score or more manufacturing concerns. By this means not only is the manufacturer's expense of selling goods much reduced, but he is enabled to have them distributed over a greater area of the country than, as a rule, would be the case were he dependent alone upon his own travellers. Where one of his own travellers would call on a score of customers, the travellers of the wholesale house would call on several scores.

Wholesalers sometimes turn manufacturers in the direction of the retail trade when, on a new line being shown them, they refuse to give an order until the manufacturer has sent representatives among the trade to get customers and then turn the orders in through them (the wholesalers). We know of no greater complaint on the part of the manufacturers against the wholesalers than this.

One of the most difficult things for a manufacturer is to do business with both the wholesaler and the retailer ; and especially when he refuses to sell to the former at a figure which will allow him a fair profit for handling the goods.

As a rule it is more satisfactory for the manufacturer to confine himself wholly to either the wholesaler or the retailer. Between two stools it is usually difficult to remain comfortably seated.

The boycott, aside altogether from its illegal character, is rather likely to aggrevate than to remedy the alleged evil. We believe that in the long run the employment of legitimate schemes for meeting the competition of manufacturers who sell to the retailers will be found much more profitable.

THE PRICE OF SCALES.

The trade last week were advised of an advance in the price of weigh beams. This makes an advance this year on all lines of scales except the standard lines.

These advances are evidently here to stay. On account, first, of the low prices ruling on the lower-grade scales for some time previous to the advance, and, secondly, the increased cost of material and labor.

HARDWARE AND METAL would not be surprised in the near future to hear of an advance on the higher grade of scales, and probably a further change in the discount on the "Champion" line of from 55 to 50 per cent.

PRICES LOWER ON TURPENTINE.

THE turpentine market in the South has had another weak spell. As a result, prices in Savannah are 3c. lower than they were a week ago, and 10c. per gal. lower than they were two weeks ago.

It is becoming more and more evident that the extraordinary advances during March, at the close of which prices touched the highest point of the year, were due nearly altogether to manipulation, although the fact that heavy rains in the turpentine country—retarding, as they did, shipments—was of some assistance to the manipulators.

In Canada, stocks of turpentine are light, importers having bought sparingly during the period of high prices. However, the weakness in the primary market has not been without its influence in this country, prices being 5c. lower in Toronto and 6c. lower in Montreal. Prices in the latter city advanced to a higher point than they did in the former city, and, although prices have been reduced more, quotations there are still above those ruling in Toronto.

Single barrels are now quoted at 70c. in Toronto and at 72c. in Montreal, and 2 to 4 barrels at 69 and 71c. respectively.

On Wednesday the Savannah market was steadier on account of purchases on export account, and on Thursday a private telegram from Wilmington said that turpentine was scarce and that there was none to offer.

It is only by doing something that a man can be something.

ADVANCE IN COTTON CORDAGE.

An advance of 1 to 1¼c. per lb. took place on Thursday, April 10, on cotton cordage, and of 7½ to 10 per cent. on cotton clothes lines.

Cotton twine is also very firm, and an advance in it in the near future is not unlikely.

The advance is in sympathy with the appreciation in the raw cotton market, which is fully 1¼c. above the prices ruling in February.

NEW FAST ATLANTIC ROUTE.

PROPOSALS have recently been made to the Newfoundland Government to have St. John's, Nfld., form one of the ports of call for the projected turbine steamship line across the Atlantic. St. John's is the nearest point to Europe in the Western Hemisphere, and this fact is influencing the company promoting this venture.

It is noteworthy that Marconi in his experiments in wireless telegraphy was one of the first to perceive the advantages of that Island. He received his first wireless signals from Europe at St. John's. This has probably influenced the promoters of this scheme in choosing that place as a port of call.

The time by this project that will be saved in crossing the Atlantic will be of especial benefit to Chicago and the Western States. They will have three opportunities of joining or leaving the ships—at New York, Halifax or St. John's, Nfld. The memorandum forwarded to Premier Bond of Newfoundland by the representatives of the company is as follows :

"I am requested to inform you that a proposal is being submitted to the British Government on behalf of the Berehaven Railway and Pier Company to run a line of 30-knot an hour ships twice weekly from Berehaven via St. John's, Nfld., and Halifax, N.S., on to New York, the time through from Berehaven to New York (including stoppages at St. John's and Halifax) being 110 hours, and vice versa—actual time, not local time, the running period at sea to be as follows :

	Hours.
Berehaven, s.w. of Ireland, across Atlantic to St. John's	60
St. John's to Halifax	20
Halifax to Sandy Hook Lightship, for New York	20
Stoppages at St. John's and Halifax	10
Total from Berehaven to New York	110

"It is proposed, in connection with the scheme, for the mails to leave London every Tuesday and Friday nights, leave Berehaven every Wednesday and Saturday at 1 p.m., and reach New York every Monday and Thursday mornings. Returning, steamers to leave New York every Tuesday and Saturday at 1 p.m., mails reaching London every Monday and Friday mornings (local time), the ships calling en route at St. John's and Halifax for brief periods, to transfer mails and passengers."

A subsidy for the carriage of the colonial mails outward to Europe or America is wanted from the Newfoundland Government. There will also most likely be ubsidies from Canada, the United States and Great Britain. The company state that they intend furnishing twice weekly the greatest possible postal and passenger facilities between the United States, Canada, Newfoundland and Europe, and faster to the Dominion and Newfoundland than to the Republic.

The steamers for the service are to be six in number, each 700 ft. long and 70 ft. wide, with a maximum draft of 29 ft. The turbine principle is to be applied to them for the development of the highest speed, and they are to be fitted up in a style exceeding even that of the finest of ocean liners now in commission. The promoters of the venture count with confidence on being able to divert a great deal of the present passenger traffic to their new line, because of the higher speed and superior accommodation which these ships will afford, and the great strength of their position lies in the fact that, even after allowing for the delays at St. John's and Halifax, they will still be able to make the journey between Berehaven and New York in about 24 hours less than the speediest liners now cover it. The ships of the proposed line are liable to be assumed by the British Government for use as auxiliary cruisers in the event of England's naval or military necessities calling for them, and any contracts closed with the several Governments named would be subject to that arrangement.

From Berehaven the ships will twice weekly proceed, via Boulogne and Dover, on to Flushing (Holland), the full running time at sea and schedule of ports being :

	Hours.
Flushing, for North German traffic, to Dover.	3
Dover, for London traffic, to Boulogne	1
Boulogne, for French traffic, to Berehaven	17
Berehaven, for British traffic, to St. John's	60
St. John's, for Newfoundland traffic, to Halifax	20
Halifax, for Canadian traffic, to New York	20
Total running time	121

That this project is well under way is evident from a recent press despatch from London announcing that the contract had been closed for the building of a pier 1,000 feet long at Rosslair, near Wexford, Ireland. This is for a new Irish Channel ferry service, a link of the whole line. The Southern Railway of England is laying a track to Fishguard in Wales. Here a channel steamer would rapidly transfer passengers and mail, speed them across to Rosslair, and thence they would travel by rail throgh Ireland to Berehaven, making practically an air line and joining the ocean steamers at that point. A decided saving in time and comfort would, it is claimed, be effected by this arrangement. Furthermore, this new ocean route via Berehaven promises to provide the quickest way for general transport between London and New York, as was emphasized last spring when the Bill for incorporating the company was brought before the Imperial Parliament.

The capital of the company is to be $30,000,000, and this figure would not only provide for the building and fitting up of the six steamers, but also for suitable stations at Berehaven, which would be the most important terminal in that respect.

The six ships would cost $2,500,000 each, and a seventh would be needed as a reserve, at the same cost. This would aborb $17,500,000 of the capital. The annual outlay —interest, depreciation, upkeep, insurance, operating, wages, coal and other details— would amount to about $5,000,000, but as against this it is estimated that the cargoes alone would more than offset this item. In such a steamship line the cargoes carried would be only of the lightest and most costly class of freight, and heavy charges can be levied thereon.

SEEKING A COMPOSITION.

F. W. Foster is a general merchant of Clinton and Ashcroft, B.C., who has failed with liabilities of $76,900 and assets of $132,199. A statement of his affairs has been sent out to his creditors with a proposition that they should accept 10 cents on the dollar every three months until the entire amount is paid. Mr. Foster proposes to retire from the active management of the business and a new manager will be appointed.

Mr. Foster has been in business in the West for 41 years and his principal place of business is Ashcroft. He runs a branch store at Clinton, B.C. Besides these he conducts a ranch which is included in his assets. His failure is attributed to overpurchasing and a recent illness.

IN THE MARITIME PROVINCES.

Mr. W. Stovert, the Canadian representative of Jenkins Bros., Boston, Mass., has just returned from a trip through the Maritime Provinces. Mr. Stovert reports the hardware trade there in the best of condition and everything pointing to an exceptionally busy season.

PERSONAL MENTION.

Mr. Smith, of Messrs. Smith & Hemenway, New York, is in Montreal this week.

Mr. E. W. McCarty, of Messrs. J. C. McCarty & Co., New York, has been calling on the Montreal trade this week.

TRADE IN COUNTRIES OTHER THAN OUR OWN

CARRIAGE SPRINGS HIGHER IN THE STATES.

ON account of the advance in steel the manufacturers of wagon and carriage springs have made an advance of ¼c. per lb in the prices of these goods. The market is very firm, and the demand of the trade is such that the manufacturers have difficulty in filling orders as promptly as their customers desire.—Iron Age.

CUT NAILS HIGHER IN THE STATES

The makers of cut nails at their meeting held in New York last week advanced the price for cut nails 5c. per keg. The price is now $2.05 base f.o.b. Pittsburg in carload lots and $2.10 base in less than carloads. This advance was made in view of the great advance in price of grey forge iron. The output of grey forge pig iron, according to Metal Market Report, is said to be practically all sold for the balance of the year.

WIRE NAILS IN THE STATES.

The wire-nail market is characterized by the activity which has prevailed for some time, and the mills are unable to ship goods nearly as fast as the trade desire. Transportation difficulties accentuate this feature, and there is no sign of an immediate change in this regard. The wisdom of the wire-nail manufacturers in refraining from making an advance last week is generally recognized. The conservative policy in avoiding unnecessarily high prices will undoubtedly contribute to the maintenance of present satisfactory and prosperous conditions.—Iron Age.

BRITISH TINPLATE MARKET.

Although the volume of business done during the past week has not been large, the market is steady and prices are well maintained. A good deal of second-hand business is reported. Common 14 by 20, 112 sheets, 108 lb. Bessemer cokes are just a shade easier, sales having been made for spot delivery at 13s. 9d. per box. Makers are comfortably booked over the next three months, generally speaking, and quotations for the standard size range from 13s. 7½d. to 14s. per box, full weights, according to specification, and delivery f.o.b. Wales, with Siemen's cokes at 1½d. per box extra.—Iron and Coal Trades' Review, March 28.

WOOD SCREWS IN THE STATES.

The leading producing interest says the market for wood screws is in a sadly demoralized condition. Ruling prices do not yield manufacturers any profit; in fact, screws are selling at under cost of production, largely the result of lack of co-operation among makers. The consolidation of Russell and Erwin Manufacturing Co. and P. & F. Corbin Co., which went into effect on March 10, has not resulted in any improvement in conditions nor is there any prospect of leading producers coming to an agreement.—American Metal Market.

METALS IN BRITAIN.

S. W. Rayse & Co., Manchester, Eng., in their report for March say: "As suggested in our report a month ago, the advances in prices of pig iron had been too rapid, and the disposition then shown to await the course of events has been justified, as values have receded during this month to the extent of about 1s. 2d. per ton for Scotch iron and 7d. per ton for Cleveland. Still, a fair business has been doing, and the markets have a good tone; stocks in makers' hands are not large, and there are good shipments to be made, and inquiries from abroad are now coming forward more freely. Other metals have not been moving well during this month. Copper has steadily fallen some £3 2s. 6d. per ton, and is weak. Spelter is about 5s. per ton lower, but is now steady. Lead is down about 2s. 6d. per ton, and is easy. Tin is an exception, having advanced £2 per ton, and is firm."

STRUGGLING TO KEEP PRICES DOWN.

The struggle to hold values down continues unabated, with indications that the market is not fully under control of the conservative element. Negotiations have continued between The United States Steel Corporation and the Bessemer Association, the furnacemen holding out for better terms for the requirements of the fourth quarter, on the ground that sales are being made at very much better figures, and that other grades of iron are selling at a much better price relatively. The impression prevails that $17 at Valley furnace, or $17.75, Pittsburgh, may be the basis of the new contracts. To the leading interest the matter seems to be a question chiefly of the effect of higher prices on sentiment, since the existence of many sliding scales based upon the price of Bessemer pig iron would largely compensate for any actual advance paid.—Iron Age.

IRON AND STEEL TRADE IN THE STATES.

The Pittsburgh correspondent of The American Metal Market, New York, says: "There is not the least sign of any weakening in the iron market this year. There may be slight declines in some lines, such as steel billets and iron bars, but they will only be in the line of averaging up prices to the proper relations. In lines where there is not much activity the mills are well sold ahead and can afford to do without a single new order for a couple of months. There may be a rub in some places when consumers have to come into the market after having used up material purchased at much lower prices than those ruling to-day, but consumption is bound to go right on, and production must go on too. Thus, the great bulk of the puddling to-day is being done on forge iron, costing much less than present prices, but, on the other hand, present market prices have already been paid for forge with deliveries running clear through the year, showing that consumers are able and willing to get on the new basis. Independent makers of wire are, in the main, using steel which cost them considerably less than $32 delivered, but when it comes time that they must contract for more steel, wire prices will go up or steel prices come down. The public will keep right on using wire, fencing nails, etc."

BRITISH PIG IRON MARKET.

In this department the influence of the approaching holidays has led to a somewhat quieter state of business, but, on the whole, the steady tone of the market is maintained, and values show but little change. In regard to warrants, there has been an upward move in Glasgow, where Scotch are quoted at 52s. 7½d., as against 52s. 4½d. a week ago, while in Middlesborough, Clevelands are at 46s. 10½d., as compared with 46s. 8d. Hematite iron is in good demand, and has good prospects apparently, steelmakers being busier. In the North of England prices have advanced, and mixed numbers are at 56s. 6d., while on the West Coast the figure is 60s. The exports of pig from the Cleveland district show a satisfactory improvement, being much in excess not only of those of last month, but also of March, 1901. Some of the iron sent from this centre to Scotland has been hematite, which is rather unusual, the quality usually shipped thither being ordinary Cleveland. The following is a statement of the stocks of pig iron in public stores:—

Public stores stocks, in tons:	Tuesday.
Connal's at Glasgow	53,500
Connal's at Middlesbrough	143,300
Connal's at Middlesbrough, hematite	300
West Coast hematite	18,600
N.E.R. Stores, Middlesbrough	1,120

HAMILTON, ONT.

ANOTHER RUMORED RAILWAY DEAL

THE Canadian Pacific Railway, it is stated on reliable authority, has completed arrangements for the purchasing of the Ottawa, Northern and Western Railway. The latter is the concern that came into possession two months ago of the Pontiac and Pontiac Junction Railway, the Interprovincial Bridge and The Hull Electric Company.

The purchase price is unknown, but it is estimated that at least $4,000,000 would have to be paid to buy out the Montreal syndicate who were to guarantee the bonds and other interests.

The Pontiac and Pacific Junction Railway runs from Ottawa to Waltham, Que., on the Ottawa river. It was some time ago intended to bridge the river to Allumette Island, about ten miles distant from its present terminus. This would bring the railway into Pembroke. It is said that the Canadian Pacific will extend the line from Waltham to connect with their line at Chalk River, and thus decrease the distance from the capital to that point by 30 miles. This would save about 15 minutes in the running time of a passenger train and give the people of Pontiac county an outlet for their supplies for lumbermen. A large hay business would be developed in that locality, and the distance of the Canadian Pacific to the Pacific Ocean would be shortened by 30 miles.

The syndicate who were to guarantee the bonds and other interests of the Ottawa, Northern and Western Railway is composed of A. F. Gault, Samuel Finley, S. H. Ewing and Hanson Bros., and the bond issue was to cover $3,800,000 of stock, $1,000,000 for the Pontiac and Pacific, $1,000,000 for the Interprovincial Bridge, another for the Gatineau Valley, and $800,000 for the Hull Electric. The original capital stock was $1,000,000, and there is now an application before Parliament to increase it to $10,000,000.

Determination

to win, no matter how strong the opposition; no matter how insurmountable the obstacles may seem, is one of the underlying principles of the success of

THE SHERWIN-WILLIAMS PAINTS

It's that determination that finds a ready sale for the goods. It's that determination that makes ***The Sherwin-Williams Paints*** the most profitable paints for the dealer to handle.

But back of it there is the strongest and most systematic selling organization in the paint world—one of the strongest and best in the entire business world. Everything moves like clockwork. There is no chance for failures. The minutest details receive the most careful attention. We never let up helping our agents. We never let up advertising for them. We are always trying to help them get more business. There's satisfaction and profit in being with such a house. There's the best and largest business in your town in it for you.

If you would like to know more about our goods and our methods, write asking for the B-13 Booklet.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CHICAGO, NEW YORK, NEWARK, MONTREAL, CLEVELAND, BOSTON, TORONTO, SAN FRANCISCO, KANSAS CITY.

ABOUT THE SIZE OF IT.

(From The Weekly Sun.)

"Is it true you didn't turn up at the Governor's ball?" was asked an Eastern M.P.

"That's so, I am sorry to say."

"Not unwell?"

M.P.: "Oh, no; but I have had to give up that sort of thing here."

"Sounds like doctor's orders."

M.P.: "It's business orders. Between letters, committees, the House, and the Departments, I've all I can do."

"Do you mean to say you can't even spare a couple of hours in dining out occasionally?"

M.P.: "That's what I mean, and it's explainable. Those dinners start between seven and eight, and it's well on towards 10 before one gets away. The whole of that evening, then, is gone. Next morning the chances are I am slack, and that feeling lasts pretty well through the day, and puts me behind in my work."

"How do those manage who are out at something every second or third night?"

M.P.: "I can't tell you. I've a strong suspicion they manage by skipping half their work and skimming the other. I'll give you an instance. An Ontario member, one of those who are too sociable to refuse an invitation, ran up against one of his constituents here. The pair made off for a quiet corner, and after a chat over home news, the member proposed a move for lunch. The constituent was willing, but thought, since he was to be off on an early train, they had better settle the affair he had been writing to the member about.

"'That's the first I've heard about it,' remarked the M.P.

"'How can that be?' asked the astonished constituent; 'I wrote you four letters in regard to the matter.'

"'Well, my dear fellow, I never got them,' was all the jovial member could say.

"Later on he found the four letters unopened and forgotten among a pile of papers."

"But, supposing you were, what doubtless you will be, a Cabinet Minister, wouldn't you conform to the custom of giving dinners?"

M.P.: "I'm too old a bird to say what I would do. All I know is that to get through the work of an ordinary member, which is little enough compared with the calls on a Minister's time, keeps me on the stretch so that I think myself lucky to get half-an-hour's stroll during the day."

"I'd infer from what you say a member's duties at Ottawa are so exacting as not to justify a night off now and again."

M.P.: "That's rather an extreme way of putting it. My point is: A representative has his hands full to get through what he should; he requires to be in the best of trim; and, for that reason, should eschew heavy evening meals and late hours."

"Do you go, then, so far as to say the entertaining done by the Governor, Ministers, Speakers, and others takes out of the members too much of the energy that ought to go into Parliamentary business?"

M.P.: "That's about the size of it."

A BIG HARDWARE TRUST.

It is stated with authority in the current issue of The Iron Age, of New York, that the great hardware jobbing interests of the United States have consolidated into a gigantic Trust capitalized at $120,000,000.

A RAILWAY COMMISSION TO BE CREATED.

THE long-expected Bill to create a Railway Commission in Canada was introduced in the House of Commons on Wednesday by Hon. Mr. Blair, Minister of Railways.

The Minister intimated that the decision to establish a Railway Commission was rather the result of strong popular feeling in Ontario and the West than of his own conviction on the subject. He said he did not expect the measure to redress all grievances, some of which were due to inevitable consequences, but he hoped it might prove useful in this respect. The Bill not only provides for the establishment of a Railway Commission, but it is also a complete and careful revision and consolidation of the existing railway law. The Railway Committee of the Privy Council is abolished and its powers, with additional jurisdiction, are transferred to the proposed commission, which would be empowered to regulate freight rates. In order to get good men it was necessary to provide for a long tenure of office and to pay a good salary.

A BOARD OF THREE.

It was proposed to constitute a board of three commissioners, who shall hold office for 10 years, during which term they cannot be removed except upon an address of both Houses of Parliament. The salary of the commissioners is not fixed in the Bill, but it is intended the chairman shall receive more than the other two members. One of the commissioners should be a lawyer of large experience and some knowledge of railway business, also of sufficiently high standing to qualify him for a judgeship; another would be an experienced railway man. The third should be a man with large knowledge of general business.

JURISDICTION OF BOARD.

The board will finally decide all matters of fact, the only appeal from its judgment being to the Governor-General-in-Council. The board is to have power to fix all traffic rates. This is divided into three classes—ordinary traffic, commodity traffic, and competitive traffic. At present the Governor-in-Council fixes the maximum and minimum rates, and within those limits the railways could charge as they liked. It was now proposed to enact that upon a scale being submitted to the board it shall say that it shall be the scale of rates for ordinary traffic. The commodity class of freight meant a special class to be arranged by the board. As to this the board shall fix the maximum and minimum rates, and it is only as to this class that the railway shall have power to change rates within these limits. This commodity class shall consist of goods taken out of the ordinary class, at the request of the railway company, perhaps. But the company having fixed its rates within these limits, they must be adhered to and the commodity rates so fixed published for the public information.

COMPETITIVE RATES.

Another class was the competitive class, embracing such goods as to which rates are bound to fluctuate. As to the competitive rates, the company must, upon making the scale, apply to the board for sanction of such rates, and they shall remain at those figures until changes are sanctioned by the board. Penalties for infraction of the law will be provided.

Provisions are made in the Bill in respect of foreign traffic, a very large discretion being vested in the commission as to this traffic.

So, too, running rights will be in charge of the commission, which would also control the matter of long or short-haul rates, it being declared that there shall be no higher rates charged upon the shorter haul than upon the longer, when the shorter is contained in the longer. Exception is made, however, of special cases to which it would be unfair to apply this rule. It was proposed that the commission would take into consideration in fixing competitive rates the charges for lake and river freight.

NO CONTROL OVER I.C.R.

Mr. Blair said the railway companies would continue to make their classifications and submit them to the commission. Further questioning elicited from Mr. Blair the admission that the commission would have no control whatever over rates on Government railways. He thought, however, the wisdom of giving such control to the commission might be considered in Committee on the Bill.

Replying to Mr. Barker, the Minister said the intention was to give the board control of through rates where the carriage was in part by vessel.

It is expected that the Bill will not finally be dealt with until next session.

A NECESSITY.

In remitting his subscription to "Hardware and Metal," Henry Taylor, dealer in shelf and heavy hardware, etc., Perth, Ont., says: "I have pleasure in complimenting you for the value of your journal. The market reports are a necessity to all dealers, and your articles contain much information that is useful."

THE STEVENS HAMMERLESS GUN.

THE latest production of the The J. Stevens Arms & Tool Company, Chicopee Falls, Mass., is their No. 140 single gun. This gun is hammerless, moderate in price, and has several special features that make it a superior arm. These are a Pyro-electro steel barrel, choke bored for nitro-powder, a walnut stock with a rubber butt plate, and a case-hardened frame. It has pistol grip and a new cocking device by which it cannot be opened for inserting a shell until the gun is at full cock. Its automatic safety equipment makes it impossible to discharge the gun before it is pushed forward. By two turns of a screw the operator can change the gun at will from an "ejector" to an "extractor." Its automatic shell-ejector, with a new device, renders this possible. Its mechanism is simple, and can be moved for inspection or repair by removing a screw that holds the trigger-guard in place.

CATALOGUES, BOOKLETS, ETC.

STOVE AND TINWARE CATALOGUE.

The catalogue for 1902-3 of The James Stewart Manufacturing Co., Limited, Woodstock, Ont., is a book of 150 pages, handsomely bound in colors of Scotch tartan, and containing descriptions and prices of their many lines of stoves and ranges. Since 1845 this firm have been placing their goods on the Canadian market, and have been adding new lines from year to year until now any style of stove or range that can be called for will be found in the list of this company. Their "Good Cheer" ranges come in many different sizes, to suit the small family or the hotel, and are adapted for burning coal or wood. Besides the above, The James Stewart Manufacturing Co., Limited, make pots and kettles, grates, registers, etc. Their catalogue is handsomly illustrated with engravings of all their goods, and has an index at the back, making it handy for reference purposes.

BICYCLE SUPPLIES CATALOGUE.

Rice Lewis & Son, Limited, have in press their new catalogue for bicycle supplies for 1902. It will be ready for distribution in a few days.

PARMENTER & BULLOCK'S PRICE LIST.

The price list of The Parmenter & Bullock Company, Limited, Gananoque, Ont., for 1902 is a book of 60 pages of interesting matter. In this catalogue are illustrated and described many lines of rivets, a full line of nails, fence, slating, barrel and boat nails, down to the common flat head varieties; carpenters' braces, hand drills and many other specialties. This firm was established in 1864, and incorporated in 1896. Besides their head offices at Gananoque, they have branch offices at Toronto and Montreal. To those of the readers of HARDWARE AND METAL who write, mentioning this journal, a copy of the catalogue will be sent by the company.

A CYLINDER DUST BELLOWS.

THE Smith & Hemenway Co., of 296 Broadway, New York City, are introducing a cylinder dust bellows, which is an article no printing office, factory, machine shop, telephone or telegraph establishment should be without. This bellows has no metal mountings, thereby preventing short circuits while cleaning. For cleaning in awkward corners, pianos, organs, machines, and all kinds of type cases it is indispensable. Any places that cannot be reached by a brush can be cleaned with a cylinder dust bellows, the compressed air being forced removes all particles of dust from inaccessible places. The principal advantages of these bellows are steady position of the point (on holding it between the fingers) absence of metal mounting, and therefore no risk of injury to the articles to be cleaned, easy and comfortable manipulation, employment of force according to will, direction in any position, introduction to any space proportioned to the cylinder and therefore the displacement of dust in otherwise inaccessible places without injuring the articles to be cleaned. These bellows are carefully made with the greatest care, the wood used in their manufacture taking two years to prepare.

The Hobbs Hardware Co., Limited, London, Ont., have been incorporated with a capital of $300,000. They take over the business of The Hobbs Hardware Co.

BUSY KENTVILLE.

A despatch from Kentville, N.S., says: "This energetic town is fast recovering from the depression caused by the epidemic of last year. The plucky storekeepers are hustling for business and are recovering their trade very rapidly. Prospects for the summer are particularly bright. The new court house will give work to quite a number of men, and it is expected that the D. A. R. will commence shortly to build the new station house. About $20,000 is the estimated cost of the improvements and enlargement of the railway station. There is also talk of the erection of a building for the double purpose of an agricultural show and skating rink."

GOING TO ENGLAND ON BUSINESS.

Mr. R. E. Thorne, manufacturers' agent, Montreal, sails from New York on April 19 by the Saxonia. Mr. Thorne, who represents the color house of Goodlass, Wall & Co., Liverpool, as well as several other English houses, finds that his ever-increasing business in British products necessitates this trip for the purpose of improving the facilities for doing business here in his several lines.

RESOLUTIONS ENDORSED.

At the regular quarterly meeting of the Kentville N. S. Board of Trade the secretary was instructed to write the Maritime Board to the effect that the resolutions adopted by that board re preferential trade, tourist travel and the development of trade between Canada and South Africa, had been adopted and incorporated in the minutes of the board.

A HARDWAREMAN WEDS.

R. J. McConnell, hardware merchant, Carman, Man., was married to Miss Edith Meikle last week, and the happy pair have gone on a wedding tour to the United States.

INCOMES OF SUCCESSFUL INVENTORS.

IT is generally understood that inventors are an unfortunate class of individuals who struggle through life surrounded by an unsurmountable barrier of penury and misfortune, writes Ansley Irvine, Liverpool, Eng., in Scientific American. This, doubtless, is true of many cases, but the obverse of the picture is gratifying and full of encouragement. Innumerable instances could be given where comparatively large fortunes have been made out of a simple article, which necessitated neither elaborate design nor great initial expenditure, and, when judged from a strictly utilitarian point of view, did not possess any practical value.

Some of the largest fortunes appear to have been derived from the invention of trivialities and novelties, such as the once popular toy known as "Dancing Jimcrow," which for several years is said to have yielded its patentee an annual income of upwards of $75,000. The sale of another toy—"John Gilpin"—enriched its lucky inventor to the extent of $100,000 a year as long as it continued to enjoy the unexpected popularity that greeted it when first placed upon the market. Mr. Plimpton, the inventor of the roller skate, made $1,000,000 out of his idea, and the gentleman who first thought of placing a rubber tip at the end of lead pencils made quite $100,000 a year by means of his simple improvement.

When Harvey Kennedy introduced the shoelace he made $2,500,000, and the ordinary umbrella benefited six people by as much as $10,000,000. The Howard patent for boiling sugar in vacuo proved a lucrative investment for the capitalists, who were able to remunerate the inventor on a colossal scale. It is estimated that his income averaged between $200,000 and $250,000 per annum. At first the process proved an entire failure and had to be laid aside as useless. It was not until an old German workman casually made a suggestion for a possible improvement that it was once more tried. The suggestion was improved upon and the invention rendered successful. All sugar refiners who used the new method allowed Mr. Howard a royalty of 24 cents per hundredweight on the raw material passing through the process.

Sir Josiah Mason, the inventor of the improved steel pen, made an enormous fortune, and on his death English charities benefited by many millions of dollars. He was one of the most generous of men, and during his life gave enormous sums to hospitals and industrial schools. The patentee of the pen for shading in different colors derived a yearly income of about $200,000 from this ingenious contrivance. It is stated that the wooden ball with an elastic attached yielded over $50,000 a year. Many readers will remember a legal action which took place some years ago, when, in the course of the evidence, it transpired that the inventor of the metal plates so often used for protecting the soles and heels of shoes from wear sold 12,000,000 plates in 1879, and in 1887 the number reached a total of 143,000,000, which realized profits of $1,150,000 for the year.

Women seem also to possess the inventive faculty, and, indeed, they must find plenty of scope for new ideas, as there are hundreds of little things waiting to be superseded by simple appliances that will minimize handwork and obviate the necessity of so much toil being daily expended in the household. The lady who invented the modern baby carriage enriched herself to the extent of $50,000;

An interior view of a model wall paper department, showing three of The Watson, Foster Company's most successful 1902 patterns. The company inform us they will cheerfully supply any new dealer, whether buying from them or not, with detail information regarding measurements of stock racks, sizes and estimated cost of pattern display frames, sample-book stand, system of stock keeping, and suggestions tending to advance the dealer's interests and dignify and develop the industry of wall paper and the art of decoration.

APRIL '02

and a young lady living at Port Elizabeth, South Africa, devised the simple toilet requisite, known as the "Mary Anderson" curling iron, from which she derives royalties amounting to $500 a year. It was the wife of a clergyman who designed an improvement for the corset and made a fortune out of it. Instances of ladies bringing forward inventions which have added to personal comfort and general utility could be given ad infinitum. They occupy all ranks of society, from the poor, struggling seamtress to the Empress of France, who, by the way, invented a dress improver, which years ago developed into the then fashionable crinoline. The gimlet-pointed screw, the idea of a little girl, brought many millions of dollars to the clever little inventor. Miss Knight, a young lady of exceptional talents, was gifted with wonderful mechanical powers, as will be seen by the complicated mechanism of her machine for making paper bags. We are told she refused $50,000 for it shortly after taking out the patent.

The history of the wire-wound gun, which was invented by Mr. J. Longridge, the famous engineer, throws some light on the insouciance and apathy that formerly enveloped the British War Office. Longridge invented the gun in 1854, and did all in his power to place it before the authorities, but they would have nothing to do with it. Thirty years afterward, however, the Ordnance Department at Woolwich subjected one of the guns to exhaustive tests, and so satisfactory were the results that they declared that nothing could equal it for heavy ordnance. Unfortunately, the inventor died from a broken heart before this end was attained. Another case illustrating the treatment sometimes meted out to inventors by the English War Office is that of Dr. Conan Doyle, the popular author of "Sherlock Holmes," who recently discovered a way to insure approximate accuracy in high angle or dropping rifle fire, the need of which has so often been felt in the present war in the Transvaal. The inventor states that the apparatus would be fitted to the rifle and would weigh comparatively nothing, cost but a few cents, take up very little space, and interfere in no way with the present sights. The novelist communicated with the officials in London and received the following reply: "With reference to your letter concerning an appliance for adapting rifles to high-angle fire, I am directed by the Secretary of State to inform you that he will not trouble you in the matter." As Dr. Doyle remarks, the invention might be absolute rubbish or it might be epoch making, but he has been given no chance of either explaining or illustrating it.

The machine with which the Brothers Morley, in the latter years of the 18th century, made their enormous fortune was the stocking loom, invented three generations earlier by the Rev. William Lee, a Fellow of St. John's College, Cambridge, England. Lee's life-story is full of sadness. According to one account Lee, falling in love with and marrying an innkeeper's daughter, lost his Fellowship, and was consequently reduced to extreme poverty. The wife knitted stockings for a living, and the husband, sitting by her side as she worked, watched the intricate movements of her hands, and was thereby led to speculate on the possibility of constructing a machine that would do the work more expeditiously. Lee came to grief, because his machine was believed to be a device for throwing people out of employment. He went ultimately to France, where he died poor and friendless, a disappointed man. Many years afterward English legislators so appreciated the value of the stocking loom that they prohibited its exportation; and so jealous was Parliament of foreign competition that it seems to have been doubtful, even as late as the middle of the 18th century, whether it was lawful to even publish a technical description of the apparatus. When the frame was introduced it completely revolutionized the stocking trade, producing 1,500 loops per minute as against the 100 loops in skilled handknitting.

It is difficult to realize that the art of perforating paper was unknown 50 years ago. Prior to 1854 postage stamps were issued in sheets, the purchaser having to cut them up in the way he found most convenient. In 1848, an Irishman named Archer introduced a machine for cutting small slits round each stamp. This was tried by the English postal authorities, but for some unexplained reason it did not work to their satisfaction, and, notwithstanding that Archer went to great trouble and expense in altering the machine so as to meet the objections, it was refused by the Government. Archer then constructed an entirely new machine which cut out circular holes. He received sufficient encouragement to induce him to still improve his invention, when, in 1851, after three years' continual labor, the Treasury proposed to buy the patent rights for $3,000. This parsimonious offer was, of course, refused, as Archer had spent considerably more than this on his various experimental machines. Eventually the matter was placed before the Select Committee of the House of Commons, and the pertinacious inventor was awarded $20,000, which, considering his apparatus in a few years saved the Government many thousands of dollars, was not excessive.

A NEW TOOL COMPANY.

The Maple Leaf Harvest Tool Co., Limited, Tilsonburg, Ont., is applying for incorporation. The names of the applicants, all of whom will be provisional directors, are as follows:—Cosmos John Shurly, Galt, Ont., manufacturer; Jerome Colwell Dietrich, Galt, Ont., manufacturer; Fred Douglas Palmer, Galt, Ont., bookkeeper; William Warden Janney, Galt, Ont., mechanic; Oscar Herman Vogt, Galt, Ont., traveller; Charles Derrick Lansing, Galt, Ont., mechanic.

The chief place of business of the company will be at Tilsonburg, Ont. The capital stock is placed at $100,000, divided into 1,000 shares of $100 each, and the purposes of incorporation are for the manufacture of harvest and mechanics' tools, saws, shovels, and agricultural implements.

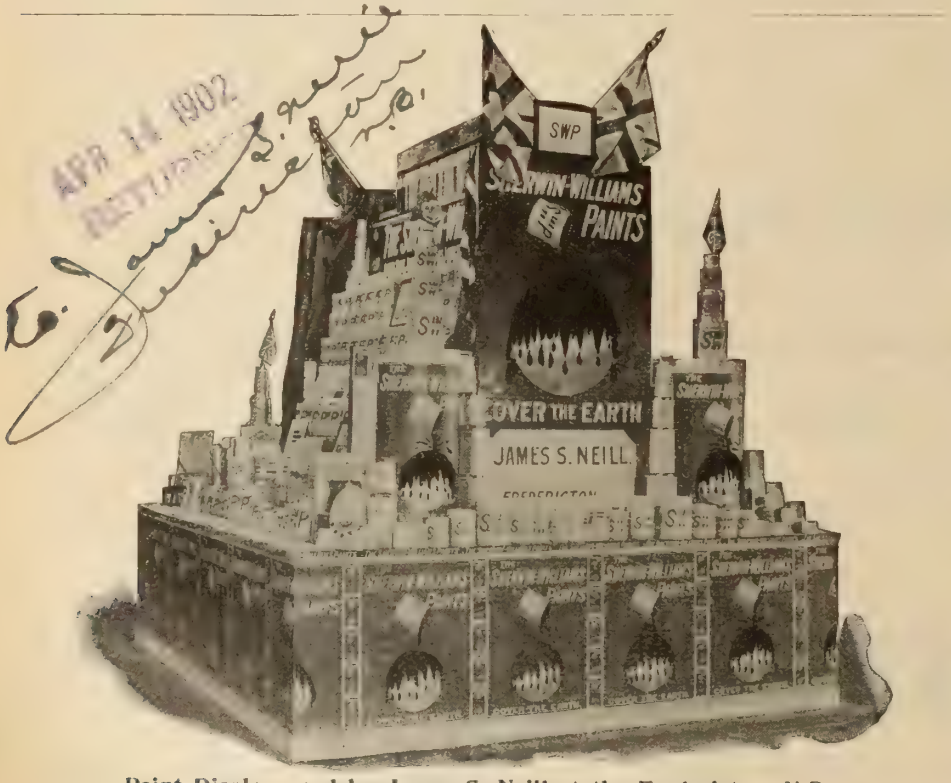
DECLINE IN PRICES.



"DUN'S" index number of the course of prices, with due allowance for the relative importance of each commodity, was $99,222 on April 1, compared with $101,593 a month previous and $94,910 a year ago. The fall of 2.3 per cent. during March was the logical result of the advancing season which brought higher temperature and expanding production of many articles of food. Consumptive demand continued heavy, even when supplies were procured with difficulty, owing to the prosperous condition of the people, so that quotations were sustained at an unusual position. As stocks return to a more normal figure it is natural that prices should do likewise.

The feature of most extensive influence on the index number appears in the division embracing dairy and garden products, where the decline amounted to 11.4 per cent. Most of this change was due to the fall in eggs, amounting to 13½c. a dozen, since the per capita consumption is heavy. Milk and butter also became cheaper, though fluctuations were less violent, and a decline occurred in the average of potatoes, apples, hay, and some minor articles.

Coal was also sharply reduced on April 1, and its large use made a drop in the metals class of nearly 3 per cent., notwithstanding the moderate advance in the list of iron and steel products. An advance in tin was about balanced by a fall in copper, while petroleum remained unchanged. Breadstuffs lost 3.3 per cent., the largest decline being supplied by oats, while both wheat and corn reacted slightly. The latter, however, is still stubbornly supported at a position that is abnormal, and until the new crop begins to move the index number must reflect the exceptional scarcity of this cereal. Barley, rye and peas are strong.

Meats advanced 6 per cent. during March, a somewhat exceptional occurrence considering the easier level of fodder. Live hogs and beef, mess pork, bacon, ham and lard all secured a materially higher position, and the change is doubtless due to the fact of earlier hasty marketing in order to avoid feeding stock during the winter and the resultant diminished arrivals of full-weight animals. Cured meats have also had the further support recently of large purchases for use by the British army.

A slight net decline appears in the miscellaneous food products, due to lower figures for tobacco and spices, but hops and malt both advanced a shade. None of the changes in this class were important, and no alteration at all was recorded in sugar, coffee, whiskey, tea, fish or salt. A small appreciation in the miscellaneous department was due to the strengthening tendency of building materials, as the open weather greatly facilitated outdoor work. Turpentine, soap and drugs were also higher, while hemp declined. All clothing items averaged slightly lower, without any alterations of importance. A further decline occurred in crude rubber, making the reaction almost without interruption since May 1, 1901, but cotton and wool rose slightly, while hides, leather, boots and shoes all averaged lower.

Paint Display used by James S. Neill at the Fredericton, N.B., Provincial Fair.

LABOR CONDITIONS IN ROSSLAND

Acting United States Consular Agent Ohren writes from Rossland, B.C., March 8, 1902:

"Rossland is recovering from the effects of the recent labor troubles, which caused disastrous depression. At some of the mines, the miners have not yet arrived at a settlement with the owners, and those mines are worked by what the unions here call 'unfair labor.' The merchants inform me that business is steadily increasing. Commercial travellers whom I have questioned say that Rossland is the most prosperous town in this section of the country, in spite of the fact that labor troubles have for several months caused an almost complete cessation of labor at the mines. The Le Roi mine, on February 27, 1902, added 42 men to its workers, who are to engage in sinking new shafts and drifts. The shipments from the mines have increased wonderfully, and I expect that those for the year ended June 30, 1902, will far exceed the exports of the previous year. The exports from this consular agency during the past month were valued at $424,541."

INQUIRIES ABOUT CANADIAN GOODS.

INQUIRIES regarding Canadian goods received by the Canadian section of the Imperial Institute, London, England:

1. A Liverpool firm desires the names of Canadian producers of black ash and basswood boards, also of birch chair seats.

2. An inquiry has been received for the names of Canadian manufacturers of excelsior.

3. A London house wishes to hear from Canadian lumber manufacturers who can contract for regular supplies of basswood boards cut to lengths and glued together.

4. A North Country firm of manufacturing confectioners desires information as to the particular kinds of confectionery in demand in Canada and also the names of the leading importers of these goods.

5. A house in Hamburg, Germany, wishes to be supplied with the names of Canadian exporters of pigs' heads in pickle and feet in salt; also various kinds of bacon.

6. A manufacturer of vulcanite pens, nibs and other stationery lines is prepared to appoint capable Canadian resident agent.

7. A firm claiming a large connection in all parts of the United Kingdom with the trade wishes to secure a first-class Canadian agency in white mouldings for pictures, hardwood mouldings, mouldings for mantels, etc.

8. A manufacturer of all sorts of deed and cash boxes, etc., seeks Canadian resident agent to introduce their goods.

[Names of the firms making the above inquiries can be obtained on application to the editor of HARDWARE AND METAL. When inquiring, kindly give date of issue and number of paragraph.]

BURLINGTON, ONT.

MANITOBA MARKETS.

Winnipeg, April 7, 1902.

IN actual hardware there is nothing new to report. Business is good in all lines and prices are holding steady. In paints and oils trade is quite active and there have been two changes of importance in the price list. Turpentine has advanced 2c. per gallon, making the new quotation 75c. in barrels. Linseed oil on the contrary has dropped 3c. per gallon, present quotations being 85 and 88 respectively.

BINDER TWINE—The week has been eventful as to the twine market. The majority of the large manufacturers have withdrawn quotations from this market. The reason for this would appear to be that at present it is impossible to forecast the market for twine, and if the crop should be a very heavy one in Manitoba and the Territories the present supplies of hemp would hardly be sufficient for the twine required. It is thought that the manufacturers in withdrawing quotations are simply playing a waiting game with a hope of higher prices than could be secured if contracts were made now. In the meantime quotations are nominally the same as they were in March when the market opened.

The price list is as follows :

Barbed wire, 100 lb	$3 30

NOTES.

The James Smart Manufacturing Company are adding a full line of wholesale hardware to the stoves and furnaces with which they opened their warerooms last fall.

Mr. Horace Wilson, who formerly managed for Clare Bros., will in future handle the goods of Finlay Bros., stove manufacturers, Carleton Place, and the furnaces of The Ottawa Foundry Company.

Some idea of the intention of increasing elevator capacity in Manitoba may be gathered from the fact the Vulcan Iron Works have supplied no less than 12 plants since January, an almost unprecedented occurrence for this season of the year.

A HEAVY LOSS.

Guindon & Co., Valleyfield, Que., were burned out last week. The fire originated in the cellar, and was caused by a combustion of oakum. Both the building and stock were totally destroyed. The stock was valued at $30,000 and was insured for $16,000. Messrs. Guindon expect to start business again in a week or two, and Mr. Guindon would like to have statements of his January and February accounts with the different firms he was dealing with mailed to him without delay. He is also open to receive any catalogues and booklets.

HARDWARE AND METAL and the trade in general extend to the firm their sympathy in the loss it has sustained.

A NEW FIRM.

Notice has been given at the Tutelle office, in the court house, Montreal, by Messrs. Thomas J. Drummond, of Drummond, McCall & Co., iron and metal importers, etc., and Edgar McDougall, of the Caledonian Iron Works Co., both of Montreal, that since April 1, 1902, they have together been doing business at Hamilton, Ont., under the style of The Canadian Iron and Foundry Company, manufacturers and dealers in iron and steel castings, car wheels, etc. The head office of the new firm is to be in Montreal.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, April 11, 1902.

HARDWARE.

THE market for general hardware is in a most healthy condition, and every dealer reports a big week's business. Most of the wholesale houses are working several nights in the week in order to keep abreast of the demand and to make deliveries of goods in the time called for. The meeting held last week in Montreal did not result in any change in the price of wire nails, a majority of those present deciding that such was not necessary at present. Some scarcity in bar iron and spikes is reported, due to the closing down of such mills as derive their power from the Lachine canal, from which the water will be out until May 1. The changes in quotations this week include Acme frying pans, which have advanced about 10 per cent., and the new price for 2-0, is $1.02; for 1-0, $1.15; No. 1, $1.37; No. 2, $1.51; No. 3, $1.70; No. 4, $1.92; No. 5, $2.20; No. 6, $2.61; No. 7, $3.02. The advances follow that in the raw material. The discount on lead pipe was changed on April 1, and is now 37½ per cent. instead of 35 per cent. off the same list. On weigh beams the discount has been advanced to 35 per cent., instead of 15 per cent. Some dealers are quoting $2.85 now for reeled machinery steel, a drop of 15c. The early opening of spring has stimulated the demand for several lines, including carpet beaters and sweepers, rubber hose and garden tools, etc. All sorts of kitchen utensils are also moving well. A splendid sorting trade is reported for the week.

BARB WIRE.—A brisk trade continues, and heavy deliveries are in progress. The same price is quoted, though the market is as firm as ever. We quote $3 per 100 lb. f.o.b. Montreal.

GALVANIZED WIRE. There is a moderate demand, and our quotations are: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05 No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—The market is still quiet and featureless. We quote: Bright iron and annealed on a base of $2.60 per 100 lb., f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras, per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—There is very little doing in fine wire, and no quotable change to note. The discount is unchanged from 22½ per cent.

BRASS AND COPPER WIRE.—Trade shows little or no improvement this week, the demand being still a small one. Both brass and copper wire are discounted at 60 per cent.

FENCE STAPLES. Along with barb wire these are moving well, and the market is in the best of condition. Prices are steady. We quote: $2.90 per 100 lb. keg, for bright, and $3.25 for galvanized. 25 and 50-lb. packages, 25c. extra.

WIRE Nails.—There is a splendid business doing in wire nails. The present prices are well maintained. We quote: $2.55 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—Cut nails are not in as active demand as wire nails, though there is a fair amount of business passing at steady prices. We quote $2.35 per keg, in small lots, and $2.27½ for carlots. The discount on flour barrel and coopers' nails remains at 40 per cent.

HORSE NAILS.—A large number of orders are still being booked for immediate delivery, and the market is active, but steady. We quote: "C" brand at 50 and 7½ per cent. off and "M" brand at 60 per cent. off on oval and new city heads and 66 2-3 per cent. off for new countersunk heads.

The "Model" Refrigerator.

Equal to the highest grade but sold at a moderate price.

The "Model" is built of the best quality of thoroughly kiln-dried lumber and pannelled all round, which makes it extra strong, and prevents any possibility of warping.

Its beautiful golden oak finish gives it a much better appearance than many of the higher-priced refrigerators.

Has strong, perfectly fitting, and self-retaining casters—they never fall out.

The ice-rack and shelves are made of galvanized steel, are removable and easily cleaned.

Zinc lining in the "Model" keeps the Refrigerator dry adds to its insulating qualities, and saves ice.

We also have the well-known **"Leonard" Cleanable Refrigerators.**

Place a sample of these lines in your showroom. They are good sellers.

The Robin Hood Powder Company

If you want the best Trap or Game load in the world, buy "Robin Hood Smokeless," in "Robin Hood" Shells. It is quick, safe, and reliable. Try it for pattern and penetration from forty to seventy yards against any powder on the market. We make the powder, we make the shells, and we load them. Write for our booklet, "Powder Facts."

The Robin Hood Powder Company

SWANTON, VT.

HORSESHOES.—An excellent demand continues. We quote as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS.—Screws are going well, but there is nothing new in the way of quotations to report. Discounts are: Flat head bright, 87½ and 10 per cent. off list; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.

BOLTS.—The somewhat dull feeling which has prevailed in this line since the advance a couple of weeks ago shows signs of improving. This week there has been a notable increase in the demand, and trade is in a much better condition. We quote: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3½c. per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—There is an active movement in building paper this week and business bids fair to continue in good shape for some time. No changes have been made in prices. We quote: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 30c. per roll; tar sheathing, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE.—Spring business in cordage is well up to the mark. The approaching opening of navigation has created a demand for cordage for use on boats, etc. Quotations follow: Manila, 16c.; British manila, 14c.; sisal, 12½c.; lathyarn, 11c. Prices on binder twine are as follows: Blue ribbon, 650 feet to the pound, 14½c.; Redcat, 600 feet to the pound, 13½c.; Tiger, 550 feet to the pound, 12½c.; Standard, 500 feet to the pound, 11c.; sisal, 500 feet to the pound, 11c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—Trade continues in its active condition. Discounts are: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, 35 and 5 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH.—There is a fair demand, and the price remains at $1.25 per 100 square feet.

POULTRY NETTING.—A good sorting trade is being done. We quote the discount on Canadian or English, 60 per cent. off 2 x 2 mesh, 19 wire, and 55 per

THE FRANCIS-FROST CO. Limited

TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

cent. off 2 x 2 mesh, heavier. Canadian list.

HARVEST TOOLS.—These are in active demand. The discount is 60, and 10 and 10 per cent.

FIREBRICKS.—The inquiry for firebricks is only fair, and the market is featureless. Scotch are quoted at $19 to $23.50, and English at $18.50 to $22.50 per 1,000.

CEMENT.—The cement market is quiet. Prices are unchanged. Quotations follow: German cement, $2.30 to $2.40; English, $2.25 to $2.35; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.20 to $2.30 ex-cars.

METALS.

The metal market, speaking generally, is active and still firm, although, in the primary markets, a certain amount of weakness has been shown in some lines. Canada plates and tinplates on the English market are also a little easier, due, in a great measure, to the fact that buyers have, for the most part, placed their orders, and the present demand is light. It is reported that the cargo of the wrecked steamer Lake Superior is badly damaged. Importers here who had a quantity of galvanized iron on board do not expect to receive their goods in very good shape, and some inconvenience will be felt by customers. The only noteworthy change has been in lead pipe.

PIG IRON.—There is no change to report in this market. The firm feeling is still prevalent. Canadian sells for $18.50 to $19, and Summerlee at $21 to $21.50.

BAR IRON.—Bar iron is still somewhat scarce, and the demand keeps up. Horseshoe iron is now quoted at only the one price, $2.20, instead of $2.15 to $2.20. Merchants' bar, in small lots, is worth $1.95.

BLACK SHEETS.—There is an active inquiry at unchanged quotations. Our quotations are as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—This is in moderate demand. Quotations follow: No. 28, Queen's Head, $4.40; Apollo, 10¾ oz., $4.40; Comet, $4.25, with 10c. extra for less than case lots.

INGOT COPPER.—There is no improvement in the demand, and 14c. is still quoted.

INGOT TIN.—A fairly good business is now passing in ingot tin, but the price has not changed and we still quote 29c. for Straits.

PIG LEAD.—The demand for pig lead is no more than moderate, though it is an improvement over a week ago. The price remains at $3.25.

LEAD PIPE.—The discount has been altered to 37½ per cent. in place of 35 per cent. List prices are unchanged at 7½c. for composition waste and 7c. for ordinary.

IRON PIPE.—An active market still prevails and the firm feeling is retained. Our quotations are now as follows: Standard pipe, per 100 ft., screwed and coupled, in lengths under 19 feet, as follows: Black pipe, ⅛, $3; ¼, $2.40, ⅜, $2.65; ½, $3; ¾, $3.70; 1-in., $5.25; 1¼, $7.40; 1½, $8.90; 2-in., $12.40. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $4; ¾, $5.05; 1-in., $7.25; 1¼, $10.10; 1½, $12.15; 2-in., $16.70. Extra heavy pipe, plain ends, are quoted, per 100 feet, as follows: Black, ½, $4.35; ¾, $5.30; 1-in., $7.60; 1¼, $10.60; 1½, $12.70; 2-in., $17.45. Galvanized, ½, $5.35; ¾, $6.70; 1-in., $9.60; 1¼, $13.30; 1½, $15.95; 2-in., $21.75. For threads and couplings 5 per cent. is added.

TINPLATES.—Locally, there has been no change in the situation. A moderate trade continues. The foreign market, however, shows some weakness. Cokes are worth $4.25 per box and charcoal, $4.75 to $5.25 per box.

CANADA PLATE.—Canada plate is easier on the English market, but this is likely to be only temporary. Here, there is a continued active inquiry at unchanged but firm prices. We quote as follows: 52's, $2.65 to $2.70; 60's, $2.75 to $2.80; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35.

STEEL.—There is a good demand. A number of dealers have reduced their price on reeled machinery steel to $2.85, a decline of 15c. We quote: Sleighshoe, $2.10; tire, $2.15; bar, $2.05; spring, $2.85; reeled machinery, $2.85; toecalk, $2.60.

SHEET STEEL.—There is still only a small amount of business doing, and no quotable change is reported. We quote: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—The inquiry is not great, but some improvement is noted. Jessop's sells for 13c., and Diamond for 8c.

TERNE PLATES.—Very quiet at $7.75 to $8.00.

COIL CHAIN.—The market is quiet and unchanged. We quote as follows: No.

6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-in., 7¼c. per lb.; 5-16, $4.80; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.85; 9-16, $3.75; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-in., $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—A few orders are being received, but, on the whole, the market is quiet. The price remains at $5.75 to $6.25.

ANTIMONY.—We quote 10c.

ZINC SPELTER.—There is little or no improvement. The price is 5c.

SOLDER.—This market is in a healthy condition and prices are steady and unchanged. Bar solder sells at 18c., and wire solder at 20c.

PAINTS AND OILS.

The absorbing feature of the paint and oil market is the sudden drop in the price of turpentine from 78c. to 72c. That the drop was unexpected is undoubted, as the opinion held by most operators here was that the scarcity of turpentine, combined with a very good demand, would keep the price up to last week's figure for some time. But it is likely that the reduction is owing to the fact that supplies have been coming in considerably better than was anticipated, and as the high price which was lately asked must have reduced the consumption to some extent, the market became overstocked, and the drop in price naturally followed. At the present quotation the market is quite firm, and no one is looking for a decline. Linseed oil is stationary. The market is bare and stocks low. A good many have orders waiting for the first arrivals, but it is reported that oil has been sold for delivery at a price as low as the new oil will cost. The early opening of spring has caused buyers to ask for deliveries of their orders immediately, and business in shipping is very active in the general list of paints and oils. We quote:

WHITE LEAD.—Best brands, Government standard, $5.87½; No. 1, $5.50; No. 2 $5.12½; No. 3, $4.75; No. 4, $4.37½ all f.o.b. Montreal.

DRY WHITE LEAD—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC — Pure dry, 6¼c.; No. 1, 5¼c.; in oil, pure, 7¼c.; No. 1, 6¼c.; No. 2, 5¼c.

PUTTY — We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200 lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL—Casks, 7c.; 100 lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD — Genuine red lead in casks, $4.50; in 100-lb. kegs, $4.75; less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE—Ground, casks, 5c.; less, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 80c.; boiled, 83c. In 5 to 9 bbls., 1c. less; 10 to 20 bbl. lots open, net cash, plus 2c. for four months. Delivered anywhere in Ontario between Montreal and Oshawa at 2c. per gal. advance and freight allowed.

TURPENTINE.—Single bbls., 72c.; 2 to 4 bbls., 71c.; 5 bbls., and over, open terms.

SHELLAC VARNISH — Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS—$1.20 to $1.45 per gal.

CASTOR OIL—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—47½ to 49c.

COD OIL—32½ to 35c.

PARIS GREEN — Petroleum barrels, 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

The market for scrap metals shows no material change from last week. A quiet feeling prevails. The scarcity of iron of all kinds has not been relieved. We quote: Heavy copper and wire, 11c. per lb.; light copper, 8c.; heavy red brass, 11c.; heavy yellow, 9c.; light brass, 5c.; lead, 2⅝ to 2⅝c.; zinc, 2¼c.; iron, No. 1, wrought, $18; No. 2, $8 per ton; machinery scrap, $15; stove plate, $10 to $11; malleable and steel, $5; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6c. per lb.

GLASS.

The glass market is quiet. A few late orders are coming in which have to be delivered from stock. We quote as follows: First break, 50 ft., $2.10; second, $2.20 for 50 ft.; first break, 100 ft., $4; second break, $4.20; third break, $4.70; fourth break, $4.95.

HIDES.

The only quotable change in the hide market is the advance of 1c. in calf skins. There is not a great demand, and offerings during the week have increased. We quote as follows: No. 1 hides, 7c.; No. 2, 6c.; No. 3, 5c.; No. 1 calfskins, 11c.; sheepskins, 65c.

MONTREAL NOTES

Turpentine is 6c. lower.

Frying pans have advanced about 10 per cent.

Reeled machinery steel is quoted at $2.85, a decline of 15c.

The discount on lead pipe is now 37½ per cent., instead of 35 per cent.

The discount on weigh beams has been advanced to 35 per cent., in place of 15 per cent.

ONTARIO MARKETS.

Toronto, April 11, 1902.

HARDWARE.

WHILE there is still a large quantity of goods being shipped out by the wholesale hardware houses, the latter are, perhaps, not so busy as they were a week ago. A feature of the trade this week is the shipments that are going forward to connect with the boats on Lake Superior and Georgian Bay ports. Some of the boats begin running on Monday. This is much earlier than usual. There have been some changes in prices this week. Cotton cordage and cotton clothes lines are dearer. The discount on lead pipe is now 37½ per cent. instead of 35 per cent. as formerly. Fancy bolts are higher. These are about the only quotable changes. Payments are only fair.

BARB WIRE.—Shipments on orders booked some time ago are still going out freely and a good many orders for small quantities are being received. Prices are steady and unchanged. Quotations are: F.o.b. Cleveland, $2.77½ for less than carlots, and $2.65 for carlots. From stock Toronto, $3.

A handsome steel siding for all kinds of building purposes; supplied either Galvanized or Painted.

OUR ROCK FACED STONE

is fire and damp proof—resists all weather conditions—is very reasonably priced — and can be so easily applied it gives universal satisfaction.

Find further facts about it in our catalog.

Metallic Roofing Co., Limited,
Wholesale Manufacturers,
Toronto, - - Canada

GALVANIZED WIRE.—The movement is brisk. Quotations follow: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15; No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15, $4.60 to $5.50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—There is an active trade this week in oiled and annealed fencing. In hay-baling wire very little is being done. Base price, $2.60 per 100 lb. Oiling, 10c.; coppering, 60c.; and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—The usual steady business is being done. Discount, 22½ per cent.

WIRE NAILS.—There is a steady demand and a good many shipments are going out. Our quotations are as follows: $2.55 for less than carlots and $2.50 for carlots. Delivery points, Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—Some business is being done in shingle nails, but in ordinary cut nails trade is still small. Base price: $2.35 per keg, with 7½c. allowance on carlots.

HORSE NAILS.—Trade continues quiet. Discounts are as follows: "C" brand, oval head, 50 and 7½ per cent., and on "M" and other brands, 50, 10 and 5 per cent. Countersunk head 60 per cent.

HORSESHOES.—Business is only moderate. We quote f.o.b. Toronto as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.60; snow shoes, $3.85; light steel shoes, $3.70; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy

(all sizes), $3.85; snow shoes, $4; light steel shoes, $3.95; featherweight (all sizes), $4.95.

SCREWS.—Trade is still fairly active. The discounts are: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze 70 per cent.

RIVETS AND BURRS.—The boilermakers are all busy and there is an active demand for rivets. Our quotations are as follows: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 and 10 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—The demand for bolts is brisk and manufacturers are unable to fill orders promptly. Our quotations are as follows: Carriage bolts, common ($1 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent.; machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66 2-3 per cent.

FANCY BOLTS.—Such fancy bolts as elevator, shaft, step and whiffletree are higher, the discount being 50 per cent. instead of 50 and 10 per cent.

ROPE.—Business is good and fully up to the average in spite of the high prices. The price of manila is now 16c., against 13½c. the same time last year, and sisal is 12½c., against 10c. a year ago. We quote: Pure manila, 16c.; British manila, 14c.; sisal, 12½c.; lathyarn, 11c.; sisal bed cord, 3 cord, 48 ft., 65c.; 60 ft., 80c.; 72 ft., 95c. per doz.

COTTON CORDAGE, ETC.—An advance of 1 to 1½c. per lb. was made by the manufacturers on Thursday in cotton cordage, and of 7½ to 10 per cent. in cotton clothes lines.

BINDER TWINE.—Although no large orders are being booked, there is a good demand and prices are firm. There have been some slight advances in the United States lately. We quote: "Blue Ribbon," 650 ft., 14½c.; "Red Cap," 600 ft., 13½c.; "Tiger," 580 ft., 12½c.; sisal, 500 ft., 11 cents.

MILK CAN TRIMMINGS.—A fair business is still being done for this time of the year. Discount, 25 per cent.

EAVETROUGH, ETC.—The movement in eavetrough and conductor pipe is good. Eavetrough is now quoted at $3.10 per 100 feet for 10 in., and conductor pipe at $1 for 3 in., and $5.25 for 4-in.

SCREEN DOORS AND WINDOWS.—Quite a few shipments are now going forward. Common doors, 2 or 3 panel, are quoted f.o.b. factory points: Walnut, stained, 3-in. style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-in. style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2.50 per dozen.

SPADES AND SHOVELS.—Both the supply and the demand are good. Discount, 40 and 5 per cent.

HARVEST TOOLS.—The demand continues active, and for some lines exceeds the supply. Discount 60, 10 and 10 per cent.

BUILDING PAPER.—A good trade is being done. We quote as follows: Dry sheathing, grey or straw, 30c. per roll; tar sheathing, grey or straw, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c per roll.

LAWN MOWERS.—Business is fair. The discount on high-wheel mowers is 50 per cent.; "Star" mowers, 9-in. wheels, $2.50 to $3; "Daisy" mowers, 17-inch wheels, $2.25 to $2.50.

POULTRY NETTING.—While a good deal of it is going out trade is pretty well over. We quote: 2-in. mesh, 19 w.g., discount, 60 per cent.; 2-in. mesh, 18 w.g. and heavier, 50 and 10 per cent.

GREEN WIRE CLOTH.—Prices have been advanced 5c., the quotation for 100 square feet now being $1.30. The sorting-up trade has not yet started, and most of the orders which had been booked have been filled.

CUTLERY.—A nice sorting-up trade is being done.

SPORTING GOODS.—Not many orders are being placed for sporting goods.

CEMENT.—Trade is becoming quite active, but the competition among manufacturers for the early orders is weakening the market. Quotations are as follows: Canadian Portland, $1.90 to $2.75; Canadian hydraulic, $1.25 to $1.50; German cement, $3; English, $3 to $3.15; Belgian, $2.50 to $2.75 per bbl., and American, $2.20 to $2.30 ex-cars.

METALS.

Business is keeping up well and prices are, on the whole, steady. The scarcity of iron and steel is still the feature of the trade.

PIG IRON.—The market is firm and the Canadian furnaces are filled up with orders. The price on track Toronto is about $19.50 to $20. One of the most interesting occurrences on the iron matket for some time is the purchase last week by The United States Steel Corporation of 225,000 tons of Bessemer iron.

BAR IRON.—The market is very strong. The difficulty of getting delivery is, if anything, rather more pronounced than it was even before. The sales agents of some of the mills will accept no more orders. We now quote $1.95 to $2.05. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

STEEL.—The steel market has lost none of its strength nor has the difficulty of getting orders filled lessened. And if the advices from the mills are any criterion it is not likely to be for some months. Quotations are: Merchantable cast steel, 9 to 15c. per lb.; drill steel, 8 to 10c. per lb.; "B C" and "Black Diamond" tool steel, 10 to 11c.; Jessop's, Morton's and Firth's tool steel, 14c.; toe-calk steel, $2.85 to $3; tire steel, $2.30 to $2.50; sleighshoe steel, $2.10 to $2.25; reeled machinery steel, $3; hoop steel, $2.90.

BLACK SHEETS.—The demand continues good and stocks light. We quote: Common, $3.15 for 28 gauge, dead flat, and $2.50 for 26 gauge.

CANADA PLATES.—Business is quiet and nearly all the orders for fall importation have been booked. We quote all dull, $3; half polished, $3.10; all bright, $3.75.

GALVANIZED SHEETS.—An active business is still being done in galvanized sheets, and the outside markets rule firm. Prices, locally, are unchanged at $4.50 for case lots, and $4.65 for smaller quantities.

TIN.—Since our last the primary markets have been somewhat irregular, with lower prices the net result, although at the time of writing the outside markets

WALTER GROSE, MONTREAL, Sole Selling Agent.

are again a little firmer. Locally, the demand is fair, with quotations unchanged at $29 to $30.

TINPLATES.—There is a fair business being done and shipments from stock are good. Stocks are still light, We quote I C at $4.25.

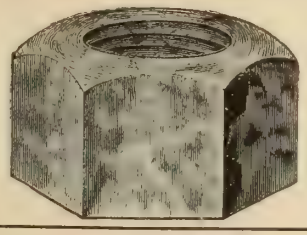
TINNED SHEETS.—The demand during the past week has been good and prices are steady and unchanged. We quote 70 x 30 up to 24 gauge, 7½c.; ditto, up to 26 gauge, 8c.

TERNE PLATES—Trade in this line continues quiet. We quote I C, 20 x 28, at $8.50.

COPPER—Business in ingot copper is a little quieter than it was and is now of moderate proportions only. Since the reduction in prices there has been an enormous increase in the consumption of this metal. In sheet copper, business during the past week has been rather better. We quote ingot at $15 per 100 lb., and sheet copper at $22 to $23. The outside markets are fairly steady at the moment.

BRASS—Brass keeps quiet with the discount unchanged at 15 per cent.

PIG LEAD—The demand during the past week has been fair and local quotations are unchanged. We quote pig lead at $3.50 to $3.75, and bar lead at $5.



LEAD PIPE—A reduction has been made in prices, the discount now being 37½ per cent. instead of 35 per cent. There is the usual steady trade being done in this line.

IRON PIPE —Business is just moderate with prices ruling firm. We quote as follows per 100 ft.: ⅛-in., $3; ¼-in., $2.50; ⅜ in., $2 75; ½-in., $3; ¾-in., $3 70; 1 in., $5.25; 1¼ in., $7.40; 1½ in., $8 90; 2 in., $12.40; galvanized, 1 in., $7.25. Trade discount 4 per cent.

ZINC SPELTER—Trade has been rather more active during the past week, and prices are unchanged at $5.50 to $6 per 100 lb.

ZINC SHEET—The demand is principally for small lots. We still quote cask lots at $6 to $6.25, and part casks at $6 25 to $6.50.

SOLDER—A good trade is still being done in solder, and prices rule as before. We quote: Half-and-half, guaranteed, 19c.; do. commercial, 18½c.; refined, 18c.; wiping, 17½c.

THE JOHN MORROW MACHINE SCREW COMPANY, Limited

Manufacturers of

Set and Cap Screws, Special Milled Work, Engine Studs, Etc. Cold Punched Nuts of every variety of finish.

INGERSOLL, ONT.

ANTIMONY — Trade is quiet, with the ruling price 10c. per lb. for Cookson's.

PAINTS AND OILS.

Following the drop in the South, turpentine here has declined. The white lead market is also weak, owing to one or two manufacturers cutting prices. In paints and oils generally trade is heavy, and all the paint houses report this year's trade much ahead of the same period last year. This is on account of the early opening of spring and also of the extensive building projects under way throughout the country this spring and summer. Another factor in increasing trade in this line is that manufacturers extensively using paints and varnishes in their factories are extra busy this year, and so are ordering large quantities of leads and varnishes. The spring also opening so early will greatly lengthen the season during which painting can be done, and this points to a larger amount of painting being done this year than usual. We quote as follows :

WHITE LEAD—Ex Toronto, pure white lead, $5.87½; No. 1, $5.50; No. 2. $5.12½; No. 3, $4.75; No. 4, $4.37½ in pkgs. of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb. $5 to $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

LITHARGE—Genuine, 6 to 6½c.

ORANGE MINERAL—Genuine, 7½ to 8c.

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.

BENZINE—In barrel lots, 17c. per gal.; less quantities, 25c. per gal.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING — 65c. per 100 lb.; Gilders whiting, 80c.

GUM SHELLAC — In cases, 35c.; in less han cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY—Bladders, in bbls., $2.25; bladders, in 100 lb. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

PUMICE STONE — Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS—Pure, $1.20 to $1.40 per gal.; No. 1, $1.10 per gal.

CASTOR OIL — English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL—Raw, 1 to 4 barrels, 82c.; boiled, 85c.; 5 to 9 barrels, raw, 81c.; boiled, 84c., delivered. To Toronto, Hamilton and London, 2c. less.

TURPENTINE—Single barrels, 71c.; 2 to 4 barrels, 70c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

The demand for glass is good, and the stocks on hand are not heavy. The import prices are firm, making the local market strong. We quote: Under 26 in., $4.25; 26 to 40 in., $4.65; 41 to 50 in., $5.10; 51 to 60 in., $5 35; 61 to 70 in., $5.75; 71 to 80, $6.25; 81 to 85, $7; 86 to 90, $7 75; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33⅓ per cent.

OLD MATERIAL.

The arrivals of scrap metals are light, and the prices are weak. We quote: Heavy copper and wire, 10¼c. per lb.; light copper, 8c. per lb.; heavy red brass, 10c.; heavy yellow brass, 8 to 8½c.; light brass, 5c.; lead, 2¼ to 2⅜c.; scrap zinc, 2¼ to 2½c.; iron, No. 1 wrought, $14 50 per net ton; No. 2 wrought, $6; machinery cast scrap, $14; stove plate, $10; malleable and steel, $5; old rubbers, 6c. per lb., and country mixed rags, 50c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES—There has been a decline of ½c. in hides all around. We quote: No. 1 green, 6½c.; No. 2 green, 5½c.; No. 1 green, steers, 7½c.; No. 2 green, steers, 6½c.; cured, 7¼ to 7½c.

SKINS—There are fair receipts of sheep and calf skins and the latter have advanced 15 to 20c. per skin. This is on account of the skins being larger now than formerly. We quote: No. 1 calfskins, 9c.; and No. 2, 7c.; deacons (dairies) 55 to 60c. each; sheepskins, 80c. to $1.

WOOL—Trade is dull and the market continues weak. We quote: Fleece at 13c., and unwashed, 7 to 8c. per lb. f.o.b. Toronto.

SEEDS.

The demand is commencing to slacken. Shippers are busy delivering spring orders and the prices are unchanged. We quote out of store at Toronto: Red clover, $7.50 to $9.50; alsike, $10 to $17, and timothy, $7.80 to $8.25.

COAL.

The demand is good, but the receipts from the mines are small. We quote prices at international bridges as follows: Grate, $4 75 per gross ton; egg, stove and nut, $5 per gross ton; soft coal, $2.50 to $3.25 in bond.

PETROLEUM.

Trade is quiet and prices are steady. We quote as follows: Pratt's Astral, 16½ to 17c. in bulk (barrels, extra); American water white, 17 to 17½c. barrels; Photogene, 16½ to 17c.; Sarnia water white, 16 to 16½c. in barrels; Sarnia prime white, 14½ to 15c. in barrels.

MARKET NOTES.

Turpentine has declined 5c. per gal.

Cotton cordage and cotton clothes lines are higher.

Green wire cloth is 5c. per 100 square feet dearer.

The discount on lead pipe has been increased to 37½ per cent.

Whiffletree, elevator, shaft and step fancy bolts are higher, the discount being 50 per cent., instead of 50 and 10 per cent.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

JOHN KERR, coal merchant, Brantford, Ont., has assigned to Wm. A. Hollindrake.

Peter L. McFarlane, machinist, Baddeck, N.S., is offering to compromise.

HEATING AND PLUMBING

BUILDING PERMITS IN TORONTO.

DURING the week building permits have been issued in Toronto to the following: J. G. Gooderham, for a two-storey brick and stone residence on Bedford Road, for $7,000; E. A. Drummer, for a pair of two storey brick and stone stores and dwellings on Bloor street west, for $3,800; Kuplsez, for a two storey brick dwelling on Lee avenue, for $2,000; Chas. Edmonds, for a two-storey wood and plaster dwelling on Waverly Road, for $1,500; E. R. Wood, for brick additions and alterations to dwelling on 591 Church street, for $1,000; Jos. J. Sheridan, for a two-storey brick and roughcast dwelling on Leslie street, for $800; James Crane, for three two-storey brick dwellings on 246, 248 and 250 Dovercourt Road, for $5,000; Havergal Ladies' College, for a three-storey brick and stone addition on Jarvis street, for $17,000; Telfer Mfg. Co., for a two-storey brick factory at the corner of Duncan street and Pearl lane, for $13,000; G. H. Muntz, for four two-storey brick dwellings on Bellwoods avenue and Trifford Place, for $5,500; E. B. Biggar, for a two-storey brick and stone dwelling on 473 Marion street west, for $3,000; F. Anderson, for a roughcast addition to dwelling on 48 Lansdowne avenue, for $150; W. W. Walsh, for a two-storey brick and stone dwelling on Arthur street, for $2,100; J. J. Walsh, for seven two-storey brick and stone dwellings on 230 to 246 Dufferin street, for $24,000; J. J. Walsh, for a pair of two-storey stone and brick dwellings on Close avenue, for $6,000; J. J. Walsh, for a pair of two-storey brick dwellings on 69-71 Baldwin street, for $7,000; Wickett Bros., for a pair of two-storey brick dwellings on Winchester street, for $4,000; Wickett Bros., for a two-storey roughcast dwelling on Sackville Place, for $2,400; W. J. Dickson, for a one-storey brick printing office, at 21 Bismarck avenue, for $500; Daniel Lamb, for a pair of two storey brick dwellings on 150 and 152 Winchester street, for $4,500; Mrs. M. A. Marshall, for two pairs of two-storey brick dwelling on 641 and 647 Bathurst street, for $8,000; Thomas Wright, for a two-storey brick dwelling on 57 Chicora avenue, for $3,700; John Kilgour, for a two-storey brick and roughcast dwelling on Bartlett avenue, for $900; W. G. Harris, for a one-storey brick and galvanized iron workshop on 17 and 19 William street, for $700; Henry H. Gilks, for a two-storey brick dwelling on 927 Bloor street west, for $1,000; Chas. L. Rosevear, for a three-storey brick store and a one-storey brick extension on 578 Queen street west, for $6,000; John William Galbraith, for a two-storey roughcast dwelling on Givens street, for $500; W. J. McClure, for a two-storey brick store on Denison avenue, for $1,800.

SOME BUILDING NOTES.

D. F. McLean is building a residence at Port Hood, C.B.

A brick building is to be erected at Windsor, Ont., for the Union Bank.

J. C. Brady is going to build an hotel at Rat Portage, Ont., during the spring.

Rhodes, Curry & Co. are building a residence on the old Bourinot property, Sydney, C.B.

The Southend Post Office Company, Limited, are erecting a new building at Southend, Ont.

Alfred Ansley is preparing for the erection of a residence at Glengrove Park, North Toronto.

Sir Thomas Shaughnessy, president of the C.P.R., is building a summer residence at St. Andrew's, N.B.

Mark Daniels has nearly completed his residence on the corner of Wellington and Adelaide streets, Chatham, Ont.

W. B. Harris is preparing to build a new three-storey block of brick and stone at Sault Ste. Marie, Ont., to cost $20,000.

PLUMBING AND HEATING NOTES.

Hickey, Aubut & McGoldrick, plumbers, Montreal, have registered.

R. & H. East, hardware merchants and plumbers, Montreal, have registered.

H. A. Johnson & Co., tinsmiths, Truro, N.S., are adding a plumbing department.

Joseph Picard, plumber, Notre Dame street, Montreal, died recently of heart failure.

PLUMBING AND HEATING CONTRACTS.

Mashinter & Co., plumbers and steamfitters, Toronto, have secured the contract for the heating and ventilation of the new Bathurst street public school.

The Bennett & Wright Co., Limited, plumbers, Toronto, have obtained the contract for the plumbing of a large building next the Union Station, Toronto, for the Dominion Express Co.

PLUMBERS BEAT MANUFACTURERS

An exciting game of baseball was played at Hanlan's Point on Saturday afternoon, April 5, when the plumbers' department of The Ontario Lead and Wire Co., Limited, defeated the manufacturing department by a score of 16 to 5.

The victory of the plumbers was greatly through the aid of their battery, Jack Matthews and Geo. Kohlmeyer. There will be another match in a short time. The score was as follows:

									R.	H.	E.
Plumbers.....	3	0	5	4	1	3	0	=	16	12	2
Manufacturers.....	0	1	0	2	1	1	1	=	6	2	7

BUILT BY CANADIANS.

The Webb Syndicate, who are trying to get the contract for building the St. Lawrence bridge at Montreal, state that if they are successful they will have the work done by a Canadian firm. The material for the bridge would also be obtained in Canada, probably from the Clergue works at Sault Ste. Marie.

The cost has been estimated at about $6,000,000, and the bridge, some 8,000 feet in length, when completed, will be the largest of its kind in the world.

MAKING CUTLERY FOR SIX CENTURIES.

The manufacture of cutlery is carried out at Scarperia (Mugello), on the slopes of the Apennines, and dates as early as the fourteenth century, according to an exchange. From a document in the Royal Archives of Florence, it appears that in the year 1535 a Cutlers' Union was formed, under the presidency of the Vicar of Scarperia, and a statute was drawn up and duly approved by Cosimo de Medici. Since then this industry has never ceased to be a specialty of that district. It may be calculated that it gives work to one-quarter of the population, viz., about 500 persons, occupying 30 shops. The daily earnings of each man may be valued at 1s. 10d., and their total production at about £10,000 of goods per annum, the largest part of which are sold through a co-operative society formed in 1889, the remainder being retailed by local dealers. Among the articles produced, there are no less than 70 varieties of pocket and table knives, their price ranging between 1s. and 12s. 10d. per dozen, and several kinds of tools for gardeners and handicrafts, and scissors of many shapes and sizes. The articles are good, but of an ordinary quality, although much improved of late.

LEADER Cchurn

New Century Improvements

FOUR DIFFERENT STYLES:

A—Steel Frame with double reversible Steel Lever.
B—Wood Frame with double reversible Steel Lever.
C—Steel Frame with Crank.
D—Wood Frame with Crank.

Styles **A** *and* **B** *may be operated from a sitting or standing position.*

Steel Frames and Hoops beautifully ALUMINIZED.

All LEADER CHURNS are equipped with BICYCLE BALL BEARINGS and PATENTED CREAM BREAKERS.

Stands are so constructed that they are particularly strong and rigid, and there is nothing to interfere with the placing of pail in the most convenient position for draining off buttermilk.

It Pays to Have the Best. None are Better Than the Leader.

THE DOWSWELL MANUFACTURING CO., LIMITED, HAMILTON, ONT.

Eastern Agents: W. L. Haldimand & Son, Montreal, Que.

CUSSIN'—DISCUSSIN'

Dealers may avoid the former and have the satisfaction of hearing their customers discussing in terms of praise the goods that are right.

Always handle the best.

Satisfaction is assured if the Dowswell Manufacturing Co., Limited, are the makers of the goods you sell.

The New Century Washing Machine

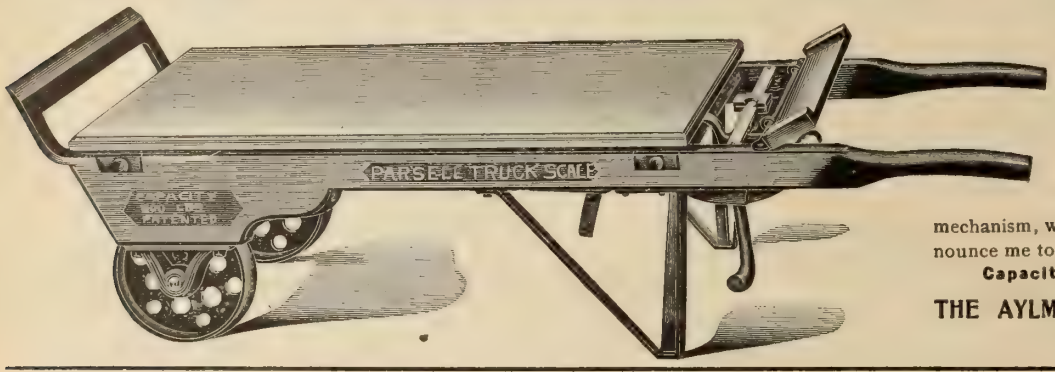
This cut illustrates the latest and best machine for washing clothes yet invented.

Having strong spiral springs and ball-bearings—the same as used in High-Grade Bicycles—very little effort is needed to do what with other means is hard work.

Nothing so easy—nothing so thorough—nothing less wearing on garments. It is perfection.

A customer says: "It has none but good points."

Another customer says: "It is a darling; washes a tubful in five minutes."



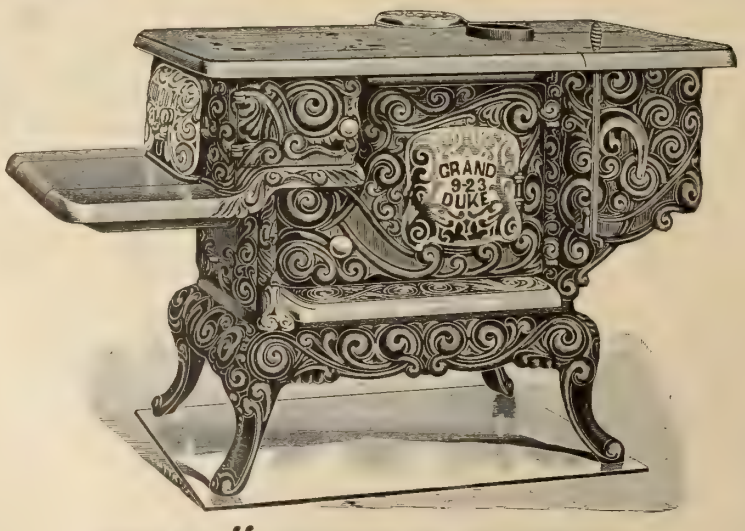
It is the **New Century Washer.**

Every Hardware Dealer should have them. They are not the cheapest, but are sellers, and will do all that is claimed

The operator can positively do the work, and without effort, while seated, and the machine is enclosed, retaining heat and vapor.

The Dowswell Manufacturing Co., Limited,
Sole Manufacturers in Canada. **Hamilton.**

I AM THE PARCELL DROP LEVER TRUCK SCALE.



I HAVE no connection or relationship with any other Truck Scale. INDUSTRIAL GOSSIP.

BERTRAM'S SHIPYARDS. The Bertram Engine Works Co., Limited, Toronto, have found it necessary to build new shipyards to carry out the large contracts they have recently received for vessels for the Upper Lakes, and, as Toronto is not adapted for their new works, they are seeking a site on Lake Erie. Plans and surveys of several ports are being made, and these will be submitted to the directors for them to decide on the location.

The new plant and shipyard will cost about $100,000, and about 200 or 300 hands will be employed at the start. This number they hope shortly to increase to 1,000. The works must be ready by next fall to permit their launching their first vessel by the spring of 1903. So the site will be chosen in two or three weeks.

By building their plant at some port on Lake Erie they hope to secure the construction of a number of the large 5,000-ton grain vessels for upper lake traffic. They also will be within easy reach of the coal mines of Pennsylvania and Carnegie's steel works, from which latter they receive a great part of their steel.

They have now the contracts for five large vessels, varying from 160 to 340 ft. in length, and some of these they hope to build in their new yards.

NEW CEMENT WORKS. A company has just been organized to work extensive deposits of marl at Caledon Lake, Ontario, near Orangeville. These beds have been known to exist for several years, but it is only recently that sufficient capital has been interested in the undertaking to insure its success. The new concern is known as the Superior Portland Cement Company, Limited.

Its head offices are in Toronto and its works will be at Orangeville. The capital of the company is placed at $300,000, divided into 30,000 shares of $10 each and the provisional directors are as follows: His Honor Judge Morgan, Judge of the County Court of York; E. J. Jackson, Albany Supply Co., Toronto; Jos. J. Follett, merchant, Toronto; R. J. Daley; Inspector Sun Life Assurance Co., Toronto; James McCullough, barrister, Stouffville; W. H. Jackson, broker, Toronto.

The objects of incorporation are for the manufacture of a high grade of Portland cement from the marl deposits existing in Caledon Township, Peel County, near Orangeville. These deposits average 12 feet in depth and extend over an area of 366 acres. It is estimated that there is sufficient marl available there to secure the continuous manufacture of cement for over 100 years.

The works will have a capacity of 600 bbls. of cement per day, be equipped with the latest machinery and appliances, and are expected to be in operation within six months from May 1.

STEEL SHIP-BUILDING IN HALIFAX. At a special meeting of the Halifax City Council the other day it was decided to snbmit a plebiscite to the ratepayers of the city granting $100,000 bonus towards the construction of steel shipyards in that city. There is a Bill now before the Provincial Legislature empowering the granting of a bonus to such an industry, and on the strength of this the above action was taken. The yard is to be built on the shores of Halifax Harbor. The site of the yard will be subject to the approval of the city council.

NEW FIREARMS COMPANY. A new firearms company for the Dominion has been incorporated under the style of The Ross Rifle Co., Limited. The head office of the new firm is to be at Ottawa, and the capital stock is placed at $2,000,000. The incorporators are Sir Thomas Shaughnessy, Sir C. H. Ross, Bart., Hon. Wm. Gibson, Hon. F. L. Bergue, D. D. Mann, Frederic Nicholls and Wallace Nesbitt. The principal object of the company is to buy, sell and deal in guns, rifles, small arms, ammunition, ordnance, military and sporting supplies, machinery, tools, etc.

WANT PREFERENTIAL TRADE.

AT a meeting of the St. John, N.B., Board of Trade, on April 5, a resolution was passed in favor of preferential trade within the Empire. The resolution is as follows:

As there are indications that it is the intention of the Imperial Government to make important changes in its tariff in consequence of the heavy expenditure in connection with the war in South Africa, it is therefore

Resolved, that in the opinion of this board any tariff made by the Imperial Government would be productive of the best results for the Empire by being so levied as to give a preference to products and manufactures within the Empire, such preference to be reciprocal and to be applied to the colonies as they enact legislation granting the same preference to British and colonial products.

This action on the part of the Imperial Government would, in the opinion of this board, also have the happiest effect in knitting more closely the ties binding the colonies to the Motherland and give increased impetus to the patriotic sentiment within the Empire, which, this board is glad to record, is already existing, the wonder and admiration of the world.

Copies of this resolution will be sent to the Premier of Canada; the Governor-General, for transmission to the Secretary of State for the Colonies; Lord Strathcona; the Premiers of all British colonies; the Chambers of Commerce in Great Britain, and the Boards of Trade in Canada.

USE PRICE TICKETS FREELY.

THERE exists in the minds of many merchants a genuine aversion to the use of the price-ticket. But that aversion is as needless as genuine. Sometimes it isn't even genuine.

Now, when a man makes up his mind to become a seller of something, he can't become a seller unless there's a buyer. Buyers of that "something" which this man proposes to sell must be told of his intention in some form or other. Perhaps it's only by hanging out a sign. Perhaps by opening a store. In some way or another those who buy must be told of things to be sold before any sale can result.

It's the part of the seller, therefore, to inform the buyer that he's ready for business. That part is recognized to a degree by every seller of things, but there are mighty few of them who realize how far to go in this matter. Some seem to think that a beginning is all that's necessary. After that, the buyer must find out for herself what the seller has and what his prices. In other words, the seller sits and waits in greater or lesser degree.

If every buyer was an anxious seeker after goods from your own store, there'd be no use, or but little use, spending much time to inform her of things and prices and descriptions. But, since there are other stores from which similar goods may be purchased, it's plain enough that if you are to have trade, increasing trade, much trade, some means must be used whereby prospective buyers shall imbibe a favorable opinion of your store and goods.

Among the various ways of giving information, price-tickets are worth more attention than many merchants give them. How many there are who make attractive displays in windows and store interiors, but who seldom or never dream of making those attractions more than eye-pleasers. The very attractiveness of some window and store displays makes people think that the goods there displayed are high-priced. Queer, perhaps, but true. One naturally inclines to the notion that things are good if nicely packed, arranged, put-up, displayed.

If you don't believe it, just try it for a while. And why not search yourself and see if you are affected by price-marks at all? Haven't you often seen an article which caught your fancy but yet didn't buy because you didn't care to ask the price, or because it looked so good that you jumped at the conclusion that it would probably cost more than you cared at that time to pay? And, upon the other hand, haven't you seen other articles with prices attached, and those prices seemed so small that you bought at once? The price caught you. You thought the article good for the money, and you bought because the price-mark was a silent salesman. I'll warrant that the same thing has happened to lots of folks who never stopped to reason regarding the process of the selling. They simply saw; liked; learned price; bought.

Every day there's somebody in your store. Every day somebody sees the same displays and pays not a particle of attention to them. Or, if ever, but little. You've made the display for her benefit, but you've left out the most important item—information. I've nothing to say against good store attractions. As a whole, and looked at in their entirety, good displays are pretty. But they're never of great interest unless they vouch-safe information in some form or other.

The wide-awake dealer not only shows what he has to sell, but tells its price. He can do it through the newspaper; the storepaper; the booklet; through price-marks. They should all be used, and the latter never disregarded. They cost next to nothing; are standing ads.; can be changed frequently; appeal to the eye; sell goods. One likes to shop where there's something to read—if it's nothing but little cards on goods. It looks like business; it helps one fill in the time during a wait; it makes trade for the merchant; it often keeps the customer so busy that she forgets she's waiting—that means a good deal sometimes.

I can't think of a single unanswerable objection to the placing of prices on goods. I've heard one man say that it "looked cheap." Rot and tommy-rot! So long as the price-cards are neat, they simply can't be "cheap-looking." It doesn't appear cheap at all. It appears businesslike. Appears as if the merchant desired his customers to have as much information as he could give them. That's a point which, if not openly appreciated, will bring business.

Besides which, it rather makes an onlooker believe that the merchant isn't afraid to quote his prices. Makes one think that such a merchant knows the worth of his goods; has nothing to hide; wants everybody else to know it. If a price is high, it won't spoil a sale, because folks will have to learn the price in some way or another and won't buy if price doesn't suit; while, if price seems low, as it frequently is, there's a great positive advantage in having that price known.

So, give your prices. Never leave them out of a window display and always have them pretty thoroughly scattered around the store's interior.—W. Woodhouse, jr., in American Grocer.

LEBEL AND CO. WON.

Lebel & Co., general merchants, Pincher Creek, Alberta, who were defendants in a suit brought by one Senten for recovery of damages for alleged illegal seizure of his ranch property, have been declared not guilty of the charges brought against them.

The jury declared that the defendant had not by false and fraudulent representation induced the plaintiff to sign any documents, and that the plaintiff was aware, on the occasions of signing both chattel mortgages that they were chattel mortgages he was executing. That at the time the defendant seized under the mortgages he honestly deemed himself unsafe. That the plaintiff suffered no damage by seizure or stoppage of business. On the malicious prosecution part of the case the jury found that the defendant honestly believed in the charge he had laid before the justice of the peace, and was not actuated by malice in the proceedings then taken, and that no damages should be given the plaintiff.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

ADVANCE IN BUILDERS' HARDWARE.

AN advance of 10 per cent. is announced this week by the Canadian manufacturers in locks, knobs (except porcelain, mineral and jet), escutcheons, inside, front and store door sets, and all lines of builders' hardware. The new discount is 40 per cent.

Canadian porcelain, mineral and jet knobs, which have been sold at different prices during the last couple of months, owing to United States competition, are now held, as a rule, by the jobbing trade at 95c. per doz. in case lots and $1 per doz. in less quantities. It appears that the United States competition has been withdrawn.

While the Canadian manufacturers have advanced their prices 10 per cent., an appreciation of double that percentage has taken place in builders' hardware in the United States.

On Friday, importers in Canada received notices from a number of the leading manufacturers in the United States that they had advanced their prices 20 per cent. Such a sharp advance was altogether unlooked for, and even the representatives of the United States manufacturers who were here at the time appear to have been as much taken by surprise as our own importers.

It is claimed that raw material has appreciated 25 to 40 per cent. during the last 10 or 12 months.

Canadian importers have not yet received lists of the new prices from the manufacturers in the United States, but it is understood that some of them are marking their figures up the full 20 per cent.

WOOD STOVES ADVANCE 5 P. C.

Wood stoves and wood ranges have been advanced 5 per cent. in price. The change went into effect on Saturday last, and with the concurrence of nearly all the manufacturers.

Wages as well as raw material have recently advanced, and the decision of the manufacturers to put up their prices was based on this.

No change was made in coal stoves and ranges, but we understand that an advance is probable in this line as well.

KNOW THE GOODS YOU SELL.

IT is a good thing when a merchant can speak with authority in regard to the quality of the goods he has in stock. His customers will look upon him as a man who knows his business and whose word can be relied upon.

It follows, therefore, that the merchant, in order that he can speak with authority, must himself have knowledge of the goods he buys.

Frequently one house will offer at a much lower price an article which is held to be just as good as that offered by a competitor. It is possible that it may be just as good; but in these days of keen competition the chances of this being true are more often to the contrary than otherwise. But, granted that all asserted be true, the merchant should take every means to satisfy himself upon this particular point before he purchases.

He cannot afford to run any risks. A customer, when offered a new line of goods, usually questions the merchant in regard to quality. If the quality subsequently turns out to be inferior to the recommendation, the merchant's reputation is sure to suffer. And, if a merchant's reputation is injured, the keystone in the arch of his business career is impaired.

There are merchants in some lines of trade who make it a practice of putting to their own use new goods that come upon the market before they offer them to their customers. And where it can be practised it is certainly a safeguard.

The glue combination in the United States is sticking together.

CANADA AND THE NEW BRITISH DUTIES.

THE new British Customs tariff naturally excites a great deal of interest. This interest is of a two-fold character. The one connects itself with the duties themselves; the other with the departure from an economic principle to which a great many people thought Great Britain eternally wedded. The new duties, therefore, have a particular interest both to the business man and to the politician.

In Canada our chief interest is, of course, centred around the duties on grain, flour and meal. These duties are 3d. per hundredweight on grain and 5d. per hundredweight on flour and meal. A later cable says the 3d. tax falls on the following:

All cereals, including maize, buckwheat, peas, dholl beans, haricot beans, locust beans, lentils and rice.

And the 5d. tax falls on the following:

All the flours and meals from the above-mentioned products, as well as macaroni, vermicelli, starch, farina, arrowroot, mandioca flour, semolina, cassava powder, mancacroup, potato flour, tapioca, sago, sago meal, rice meal and rice dust, shredded wheat, and preparations containing any of the foregoing products.

It will be noticed therefore that the effects of the new tariff will be far reaching, like that of the sugar tariff brought down a year ago.

Of the cereals which are affected by the new duties Canada produces about 285,000,000 bushels. These figures are based chiefly upon official reports to which we have access, and what actual figures are wanting we have supplied by a moderate estimate. The total is made up as follows:

GRAINS PRODUCED IN CANADA.

	Bushels.
Wheat	90,000,000
Barley	25,000,000
Oats	127,000,000
Peas	11,000,000
Rye	2,500,000
Buckwheat	3,500,000
Corn	25,000,000
Beans	1,000,000
Total bushels	285,000,000

In view of these figures and the fact that Great Britain is our best foreign customer, we as Canadians can scarcely fail to be concerned in the advent of the new duties.

The total exports in 1901 to all countries of grain and its products were valued at $19,000,000, and of this 78 per cent. went to Great Britain. This will be seen from a glance at the following table:

GRAIN AND ITS PRODUCTS EXPORTED IN 1901.

	Exported to G. B.	Exported to all countries.
Barley	$ 947,964	$1,123,055
Beans	11,049	418,161
Buckwheat	93,798	227,717
Oats	1,996,298	2,490,521
Peas, whole	1,991,247	2,482,249
" split	70,824	192,463

Taking into account that which goes in the shape of flour, our exports of wheat to Great Britain last year were a little over 12,000,000 bushels.

The duty of 3d. per 112 lb. on wheat is equal to a little over 3c. per bushel. At this rate it is not likely to materially affect our export trade in wheat. We cannot, however, speak with the same confidence in regard to flour; and, in fact, in regard to meal as well. It takes 270 lb. of wheat to produce a barrel of flour, and the duty on this at 3d. per cwt. is equal to about 16.20c., while the duty on a barrel of flour is equal to 19.60c. This, it will be readily seen, gives the British miller a preference of about 3½c. per barrel. This, while small, is sufficient to endanger the Canadian export trade in flour with Great Britain, for exporters often work on a smaller margin of profit than 3½c. per barrel. So small is the margin of profit that it would not pay Canadian millers, as a rule, to run their mills wholly on export trade account. What they export is the surplus over and above the requirements of the home market.

There are some who speak of the new duties as a restoration of the old Corn Laws. This is scarcely accurate. The Act abolishing the Corn Law was, it will be remembered, passed in 1846. The Repeal Act provided that the duties on wheat were to cease in 1849, and that, in the meantime, the duties to be levied on wheat were reduced to 10s. per quarter, when the market price was 48s. per quarter. At every rise of 1s. per quarter in the market price the duty was to be 1s. per quarter lower, until wheat should be at 54s. and the duty at 4s., after which the duty was not to further change. When the Corn Laws finally disappeared, a registration fee of 1s. was retained. This, in turn, was wiped out 20 years later, when, in 1869, Mr. Lowe declared the last vestige of protection had been removed. The present duty of 3d. per cwt. is equal to about 1s. 1d. per quarter.

AN ANALYSIS OF FAILURES.

IN last week's issue we gave briefly a synopsis of the commercial failures in Canada during the first three months of the year. We are now able to give an analysis of these failures as prepared by R. G. Dun & Co., showing the number in the different branches of trade and the liabilities of each:

	1902 No.	1902 Liabilities.	1901 No.	1901 Liabilities.	1900 No.	1900 Liabilities.
Iron	...	.....	...	.....	...	.....
Tools	1	$ 1,500	5	$ 11,600	5	$ 7,650

Transporters, etc	6	170,437	6	112,470	10	38,480
Total	363	$3,439,992	424	$3,333,722	406	$2,754,041

It will be noticed that while the total number of failures is less than during the same period last year the liabilities were larger. The increase in the failures among manufacturing firms was more than accounted for by the failures in one branch, namely, clothing, which in turn can be accounted for by the insolvency of one well-known concern.

The increase in the number of failures of general merchants and grocers cannot with certainty be accounted for. As the total increase in the failures of all kinds was largely confied to Ontario it is possible the increase in the general and grocery trades is a reflex of the short grain crops in that Province last year.

The condition of the trade in iron, tools, and leather is satisfactorily reflected in the above record.

U.S. MANUFACTURERS AND PROTECTION.

SIGNS of doubt and hints of heresy, on the subject of protection, have long been multiplying among its supposed beneficiaries in the United States, but few declarations in favor of a modified confession of protectionist faith have been more frank and decided than those lately made public in a number of letters from manufacturers to the editor of The American Machinist. They embody the views of some 58 leading makers of machine tools, and may be taken as the fruit of the business experience of men employing over 21,000 artisans, and with more than $35,000,000 of invested capital. Of the 58 who were willing that their views should be put into print, no less than 38 endorsed, without qualification, the opinion as to the necessity of reciprocity treaties laid down by the late President McKinley in his last speech at Buffalo ; seven approved it with some qualification, and none disagreed. Thirty-four openly acknowledged that on their own products they need no protective tariff, while only two asserted that there is still such a need. On the question whether to modify or do away with the present tariff on machine tools, there were 42 for and but three against a change. Thirty-eight expressed the belief that the tariff now in force restricts the foreign trade of the United States in machinery.

Hardly less revolutionary are the reasons assigned by the manufacturers for their present belief. Conditions, they make bold to pretend have changed. "We have largely outgrown the need of protection," says one ; "it is already beginning to hamper and injure our industries by retarding the growth of our foreign trade." Another adds : "We are out of our infancy as a manufacturing country, and have very few industries that cannot stand alone. What we want is markets, not protection." Protection is but "a course of training for that industrial and financial battle for the world's supremacy, which it is our determination to win." Says one letter : "The alarm about the tariff is an inheritance which became rooted at a time when conditions were almost directly the reverse of what they are to-day." Labor is no gainer from protection, believes a Philadelphia manufacturer of gear wheels. "Tariff can protect only investors of capital. Labor cannot profit by it, for it tends to increase wages only in the measure in which it tends to increase prices." So the comments run. Gentle or harsh, the criticisms passed on existing laws are manifestly not the result of any idle web-spinning, but rather the product of long and often costly experience in broad commercial fields.

The deduction for Canadians from these views is that, with protection to nurse infant industries that use our own raw material, they can, by the time they have attained the strength of manhood, not only hold their ground against all comers, but cross our borders or go over the seas, and contend with them for the markets of the world.

IRON AND STEEL AMALGAMATION.

THE Dominion Coal Co. has been leased to The Dominion Iron and Steel Co. for the consideration of the payment of 8 per cent. dividend to the shareholders of the former company, the retirement of its preferred stock and bonds, and substituting common stock to the amount of $5,000,000, making a total of $20,000,000. The Iron and Steel Co. will add $5,000,000 to its common capital stock, bringing it also up to $20,000,000. The $5,000,000 stock will be issued at 60. This agreement was arrived at on Monday, April 14, the directors of both companies being present.

The Steel Company had a lease to acquire The Coal Company on a basis of 6 per cent. on the common stock and for other considerations, but since the option was granted The Coal Company has developed so remarkably that it was thought that it would not be fair to it to enforce the option on those terms. The terms of the old option were as follows :

1. The Steel Co. agreed to pay the fixed charges of the Coal Co., that is, the interest on its 6 per cent. bonds, the dividend on its 8 per cent. preferred stock, and the sinking fund of 5c. per ton on the entire output to provide for the redemption of the bonds and preferred stock.

2. A 6 per cent. dividend on the common stock.

3. An allowance of $25,000 a year for the Coal Co.'s expenses, the latter company having to maintain a staff to look after its property, and for accountancy work, etc., etc.

4. The Steel Co. to pay to the Coal Co. $600,000 in cash as a forfeit for the due carrying out of the terms of the lease.

5. The Steel Co. to pay the Coal Co. a royalty of 15c. per ton on every ton of coal taken out of the property in excess of 3,500,000 tons in any one year.

6. The Steel Co. to assume and pay all the debts and liabilities of the Coal Co., less the value of certain cash assets, which the Coal Co. was to retain. The obligation of the Steel Co. in this respect involved an immediate payment of about $2,000,000.

7. The property to be leased did not include all the properties of the Coal Co., certain valuable properties, including shops and the entire mercantile business of the Coal Co., being excepted.

In deciding what changes to make in the option, consideration was taken of these facts :

1. The Coal Co. had earned during the past two or three years $1,530,000 in excess of all its fixed charges, but none of this had been distributed amongst its common stockholders by way of dividend, and it was admitted by all concerned that the stockholders were entitled to this surplus in the event of the option being exercised by the Steel Co.

2. The ability of the Steel Co. to raise the $600,000 and the other sums required to discharge the debts and obligations of the Coal Co., which, as above mentioned, would amount to about $2,000,000 more.

3. The disruption of the business now carried on by the Coal Co., if but part of its properties and assets were taken over, leaving still in the hands of the Coal Co. valuable assets, including its mercantile business.

As a result, the agreement decided upon embodied the following terms :

1. The present agreement to be modified so as to make it include all the properties and assets of the Coal Co., including the $1,530,000 surplus earnings above referred to.

2. The Coal Co. to pay off its bonds and preferred stock by the issue of $5,000,000 common stock at 120 to its common shareholders, thereby increasing its total capital to $20,000,000.

3. The Steel Co. to be relieved from the obligation to provide the $600,000 forfeit money, and to pay the Coal Co. a rental equal to 8 per cent. on its $20,000,000 capital stock.

Mr. H. M. Whitney will retire from the presidency of The Iron and Steel Company at the annual meeting, although he will still remain a director, and in all probability Mr. James Ross will be made president of both the coal and steel companies.

It is expected that the combining of the two companies will result in a great saving of money. For one thing, the two lines of steamships will not be necessary, and in this regard alone the saving will be very great.

It is understood that the agreement was eminently satisfactory to both parties.

A TRAVELLER DISAPPEARS.

Mr. J. B. McDonnough, one of the travellers of Henderson & Potts, paint manufacturers, etc., Montreal, disappeared some six weeks ago, and no trace of him has as yet been discovered. Mr. McDonnough had been going through the eastern part of Ontario, and after visiting Brockville and Kingston, returned to Prescott. He left the hotel he was stopping at about 6.30 in the morning and did not return. He was noticed to act strangely while stopping at the hotel in Prescott, and before he left Montreal, he was in such a despondent mood that friends advised him not to go away. There have been some reasons for thinking that he has been drowned in the St. Lawrence river, somewhere near Prescott.

It is stated by his wife that about two years ago he disappeared for a couple of weeks, and was found in a condition of nervous prostration in a country hotel, so that hopes are still entertained for his return.

Mr. McDonnough is a member of the Dominion Commercial Travellers' Association, and is well known by the hardware trade in Montreal and elsewhere.

EARLY CLOSING IN MONTREAL.

The retail clerks of Montreal, who have inaugurated a movement to bring about early closing of stores during the summer months, will have the co-operation of the hardware clerks of that city. A committee has been appointed by the hardware clerks which will interview the various merchants in that trade on the subject, and report at a general meeting to be held shortly. Representatives of other lines of the retail trade have signified a willingness to allow early closing if at all possible, and the hardware merchants would have no good reason in staying out. It is altogether probable that if the clerks make a strong attempt to obtain this concession, and do not go about it in a half-hearted way, as was the case in other trades last year, that they will easily gain their ends.

THE TRAPPING OF WOLVES.

DURING the past two years wolves have multiplied very rapidly in all the Western States and Canada. Cattlemen have suffered so severely from their depredations that concerted action has been taken against them. As a result generous bounties are now offered in all the infested regions and an active campaign begun.

Old hunters say that trapping is the most trustworthy way to kill wolves. The remarkable sagacity of the animal makes even trapping a tax on the shrewdness and ingenuity of the trapper. The first thing necessary is to kill the odor of the iron, which is done by smoking the traps with cedar, by rubbing them with beeswax, or by dipping them in blood. Wolf lures, such as asafoetida, aniseed oil or oil of petroleum, are condemned, as their only effect is to make the animals suspicious.

The trapper begins by tying to a wagon a large piece of beef, venison or antelope, which is dragged over the country where the traps are to be set. Wolves like to run in cow trails, and a spot where a number of trails cross is a good place to set traps. Some hunters put their traps where the wolves can walk into them, while others lure the wolves by baits. Traps should not be set in deeply worn parts of the path, as wolves travel on the higher parts. The necessary equipment for setting traps is, in addition to shovels, a couple of large blankets or sheets, a bucket of fresh blood, two or three rabbits, a beef liver, a pound of cotton wool and the paw of a wolf or coyote. An old trapper describes the actual setting of the traps as follows:

As soon as the drag has passed over the chosen spot, the first thing the trappers must do is to dip their boots and implements in the blood, then spread the blankets on the ground and proceed to put on these, first, the sod, which is to be carefully removed, and afterwards the loose earth as it is being dug out of the holes that are to hide the logs to which the traps are fastened. When the holes are ready bury the logs and chains with great care, replacing the sod and leaving no loose soil visible and no trace whatever of any disturbance of the earth. Then, in the trail, dig the shallow holes that are to receive the traps, and be sure they are just deep enough to be level with the trail, when there is a quarter of an inch of dirt put over the pan. As soon as each trap is set in place, lift the loose jaw until it is perpendicular, and insert under the pan a piece of cotton wool large enough to prevent any dust or sand falling beneath it, as this would entirely hinder the springing of the trap. In handling the trap and earth that covers it wear a pair of gloves dipped in blood. When all the traps are properly concealed and the surplus earth on the blanket has been carried 20 or 30 yards away, take one of the rabbits and use it as a brush to remove all traces of your feet or tools. Then scatter pieces of meat or rabbit over the traps. It is a good plan also to use the foot of a wolf or coyote to make a series of tracks over the traps, and finally, when all this is done, to dip the tail of a beef in the blood and sprinkle the place. A setting of traps every two miles is considered enough, but the thicker the better.

The dust over the pan should be a little more even than elsewhere, as wolves like to tread on a smooth place. A piece of white cotton or a tuft of white feathers properly placed often adds a good finish to the setting as a wolf, attracted by the general scent of blood, will at once see and minutely examine the white object. Dark, stormy, cold nights are the best for the wolf-trapper.

A book on "How to Catch Wolves," by Ernest Seton-Thompson, will be sent free on application to The Oneida Community, Limited, Niagara Falls, Ont.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

MOHR & RYAN, lumber and general merchants, Killaloe Station, Ont., have effected a compromise.

Thomas Battye, lumber merchant, Pictou, N.S., has assigned.

P. Langlois, general merchant, St. Gregoire, Que., has assigned.

O. P. Fraser, lumber merchant, Liscomb, N.S., has assigned.

C. Collette, general merchant, St. Antoine, Que., has assigned to Lamarche & Benoit.

The creditors of John Kerr, coal merchant, Brantford, held a meeting on April 18.

Rochon & Son, general merchants, Copper Cliff, Ont., have assigned to A. B. Simard.

James Hamilton, hardware merchant, Woodstock, Ont., has assigned to Edward W. Nesbitt.

F. C. Dunning, general merchant, Allan's Corners, Que., is offering 20c. on the dollar cash.

Joseph Bergeron, general merchant, Ste. Anne du Saults, Que., has assigned to Lamarche & Benoit.

D. McNaughton, general merchant, Stobie Mine, Ont., has called a meeting of creditors for Tuesday, April 22.

Laurent & Lamoureux, painters, Montreal, have assigned to Marcotte & Marcotte, and their assets have been sold.

The assignment of Wm. Adair & Co., general merchants, Parry Sound, Ont., has been transferred to R. Osler Wade, Toronto.

Code & McKerchar, general merchants, Neapolis, N.W.T., have assigned to J. de Sousa, Calgary, and their creditors met on April 18.

PARTNERSHIPS FORMED AND DISSOLVED.

Cucksey & Pritchard, builders, Chatham, Ont., have dissolved partnership.

Herbert & Patenaude, general merchants, St. Valeatin, Que., have dissolved.

J. A. McDonald, blacksmith, Moose Jaw, N.W.T., has admitted W. A. Foy into partnership.

Caster & Pruner, general merchants, Aurora, Ont., have dissolved; Thomas Caster continues.

Robert Donaldson & Sons, machinists, Montreal, have dissolved, and a new partnership has been registered.

Murray & McGougan, general merchants, Kensington, P.E.I., have dissolved partnership; Donald McKenzie continues.

SALES MADE AND PENDING.

The Metagama Lumber Co., Limited, Orillia, Ont., has sold out.

W. Millburn, general merchant, Swift Current, N.W.T., has sold out.

T. Cooper, harnessmaker, Drayton, Ont. is advertising his business for sale.

The assets of Magnan Freres, hardware merchants, Montreal, have been sold.

The assets of Gilbert Labonte, department store, Montreal, have been sold.

Albert Dawson, blacksmith, Port Lambton, Ont., is offering his business for sale.

The stock of A. Sauterre, general merchant, Cedar Hill, Que., has been sold at 65c. on the dollar.

The stock of F. X. Roy, general merchant, St. Philippe de Nery, Que., has been sold at 65¼c. on the dollar.

W. Doherty & Son, painters and wall paper manufacturers, Toronto, are advertising that they are retiring from business and offering their stock for sale by auction on April 21.

CHANGES.

The McLaughlin Carriage Co., Limited, have registered at Montreal.

Daniel McMinn, blacksmith, Orillia, Ont., has sold out to T. Wren.

M. D. Cosman, tinsmith, Canning, N.S., has sold out to A. F. Parsons.

The Northwest Hide Co., Winnipeg, is succeeded by Telke & Finklestein.

H. B. Moat, harnessmaker, Snowflake, Man., has sold out to C. W. Dawdy.

E. Jobin & Co., importers and general merchants, Montreal, have registered.

H. E. Moddock, general merchant, Newmarket, Ont., has sold out to Hunter Bros.

The assets of O. Rajotte, general merchant, Shawenegan Falls, Que., are for sale.

Patenaude & Langlois, general merchants, St. Valentin, Que., have registered.

S. & J. Hopper, hardware merchants, Arcola, N.W.T., are succeeded by J. G. Hopper.

Lavigne & Co., general merchants, Beaumont, Que., have sold out to Chas. Morneau.

McGratton & Co., stoves and tinware merchants, Uxbridge, Ont., have sold out to John Small.

W. H. Payne, agricultural implement agent, Milestone, N.W.T., is succeeded by Glenn Bros.

Murphy, Brown & Co., hardware merchants, Carberry, Man., are succeeded by Brown & Armstrong.

Prompt Shipment.

The ONTARIO TACK CO.
Limited
HAMILTON, ONT.

Schurman, Lefurgey, Clark & Co., Limited, contractors, Sydney, C.B., are retiring from the retail lumber branch.

Levi Hauck, grain merchant, Oil Springs, Man., is succeeded by J. L. McRae & Son; he is removing to Dresden.

The Turnbull & Russell Co., manufacturers of elevators, Toronto, are succeeded by The Turnbull Elevator Manufacturing Co.

The corporate name of The Hahn Brass Co. of New Hamburg, Limited, New Hamburg, Ont., has been changed to The Hahn Brass Co., Limited.

FIRES.

The sawmill of H. Elderkin & Co., general merchants, Port Grenville, N.S., has been burned.

W. F. Dibblee & Son, wholesale hardware merchants, Woodstock, N.B., were burned out; the insurance was $15,000.

DEATHS.

Wm. Craig, sawmill proprietor, Dunchurch, Ont., is dead.

R. Smeall, wood and coal merchant, Montreal, is dead.

A GROWING SILVER INDUSTRY.

THE annual meeting of The Toronto Silver Plate Co., Limited, was held on Friday, April 11, at 12 o'clock (noon), Mr. W. H. Beatty, president, in the chair. The report submitted to the shareholders was one of the most satisfactory reports in the history of the business, and the usual dividend was declared.

There was no change in the personnel of the directorate, which is as follows:—W. H. Beatty, Geo. Gooderham, W. H. Partridge, James Webster, A. L. Gooderham, H. W. Beatty, Wm. Thomson, Frank Turner, E. G. Gooderham.

At a subsequent meeting of the board Mr. W. H. Beatty was reelected president, and Mr. H. W. Beatty was elected as vice-president. The change as to the vice presidency was on account of the continued illness of Mr. Alfred Gooderham.

The Toronto Silver Plate Co., Limited, are probably, for their size, one of the most progressive and aggressive silverware companies. They not only do probably the largest silverware trade in Canada, but thoroughly cover the Australian market by a direct representative. They also have a showroom at 23 Thavies Inn, Holborn Circus, London, Eng., and are now drumming up the South-African market.

They recently have gone into the manufacture of German silver on a much larger scale, having created a separate department for same. This was necessitated by the recent large hotel orders they received for silverware for hotel purposes manufactured of this base metal. They were the successful tenderers for about two-thirds of the order for silverware for The King Edward Hotel Co., Toronto, and have important orders also in hand for the Grand Trunk Railway Company and the Canadian Pacific Railway Company. The silverware for the new steamer Montreal, of The Richelieu & Ontario Navigation Company, they are also making.

In connection with The King Edward Hotel Co.'s order, competition was extremely keen, and it must be most gratifying to have secured such a large share of the order in the face of competition with Elkington & Co., England; The Gorham Manufacturing Co., International Silver Co., Reed & Barton, The Barbour Silver Plate Co., etc., of the States.

Determination

to win, no matter how strong the opposition; no matter how insurmountable the obstacles may seem, is one of the underlying principles of the success of

THE SHERWIN-WILLIAMS PAINTS

It's that determination that finds a ready sale for the goods. It's that determination that makes ***The Sherwin-Williams Paints*** the most profitable paints for the dealer to handle.

But back of it there is the strongest and most systematic selling organization in the paint world—one of the strongest and best in the entire business world. Everything moves like clockwork. There is no chance for failures. The minutest details receive the most careful attention. We never let up helping our agents. We never let up advertising for them. We are always trying to help them get more business. There's satisfaction and profit in being with such a house. There's the best and largest business in your town in it for you.

If you would like to know more about our goods and our methods, write asking for the B-13 Booklet.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CHICAGO, NEW YORK, NEWARK, MONTREAL, CLEVELAND, BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY.

ATLANTIC STANDARD TIME.

AT last it seems the Provinces of New Brunswick and Nova Scotia are within measurable distance of securing the adoption of a uniform time standard. The use of Eastern Standard time by railways is about to be abandoned and Atlantic or Halifax time substituted therefor. The new C. P. R. time table employs the latter, and the Minister of Railways states that a similar change for the Intercolonial is under consideration. The use of Eastern Standard has been a source of great annoyance to the travelling public. Its employment in the first instance was warranted only by the assumption that it would come into general use. Now that its failure to do so is evident, the railways do well to adopt a more rational and correct system. Atlantic Standard time has long been uniformly used throughout the entire Province of Nova Scotia, and at the recent session, the New Brunswick Legislature introduced a Bill for its adoption in that Province also. This Bill will not come into force until proclaimed by the Governor-in-Council in the event of its adoption by the I. C. R.—Maritime Merchant.

PAINTERS' STRIKE SETTLED.

The Toronto painters and decorators who have been on a lockout for the past two weeks have won the fight. On April 15 the men in those shops which had not acceeded to their demands did not go back to work, but gathered in Richmond Hall to the number of 100, all of whom worked in shops represented in the Master Painters' Association. The master painters, early in the day, sent word that they would receive a committee from the men, and a conference was held. The bosses decided to grant the increase to 30c. an hour demanded by the men. This was gratifying to the strikers who all returned to work next day, April 16.

A NEW STEEL COMBINE.

A big steel combine has been organized in the United States. The new corporation will include ten furnaces and twenty mills and will have a capital of $200,000. A large number of independent blast furnaces and steel mills in the East and Middle West that were not taken into the Steel Trust will be included in the combine.

The organizers, Mr. F. H. Clarke, one of the promoters' legal advisers said, were principally Joshua Rhodes & Co., of Pittsburgh; E. N. Ohl, of Newcastle, Pa.; E. J. Baird, of Ironton, Ohio; and J. Gifford Ladd, of New York, representing the Youngstown concerns behind whom was Mr. Frick.

The $200,000,000 of stock would be divided, he said, equally into preferred and common stock. Last year, the earnings of the companies, Mr. Clarke said, were $12,500,000, the blast furnaces alone producing 50 per cent. of the iron ore used in the Bessemer steel plants of the country.

Mr. Clarke said that no name for the new concern had been decided on as yet, and it was too early to give out a list of officers. The company would be incorporated in New Jersey this week.

OPEN-HEARTH STEEL IN THE UNITED STATES.

THE American Iron and Steel Association reports that the total production of open-hearth steel in the United States in 1901, including direct steel castings, was 4,656,309 gross tons, against 3,398,135 tons in 1900, an increase of 1,258,174 tons. The production of open-hearth steel has more than doubled in the last four years, having increased from 2,230,292 tons in 1898 to the figures above given for 1901. The following table gives the production of open-hearth steel ingots and castings by States in 1901 :

States—	Gross Tons.
New England	170,876
New York and New Jersey	82,985
Pennsylvania	3,594,763
Ohio	184,943
Illinois	398,522
Other States	224,220
Total	4,656,309

The open-hearth steel made in 1901 was produced by 90 works in 14 States : Massachusetts, Connecticut, Rhode Island, New York, New Jersey, Pennsylvania, Delaware, Tennessee, Alabama, Ohio, Indiana, Illinois, Wisconsin and Missouri. Neither Maryland, Kentucky, Michigan nor Minnesota produced open-hearth steel in 1901, although all of the four States were producers in 1900. Rhode Island made open-hearth steel for the first time in 1901.

In 1900, the production of open-hearth steel by the basic process amounted to 2,545,091 tons, and by the acid process to 853,044 tons. In 1901, 3,618,933 tons were made by the basic process and 1,037,316 tons were made by the acid process.

FIRE IN ROLLING MILLS.

Some excitement was caused on Tuesday, April 15, by an alarm of fire for a blaze in one of the sheds of the Pillow & Hersey Manufacturing Co., Limited, Montreal, but the damage done was very small, though almost the whole fire-fighting force of the city turned out. Messrs Pillow & Hersey's own firemen, however, were on the scene in quick time, and as the establishment has a thoroughly up-to-date equipment, the flames were kept well under until the city firemen arrived. The fire was soon extinguished.

NOTE CLOSE MESH AT BOTTOM

Page Acme Poultry Netting

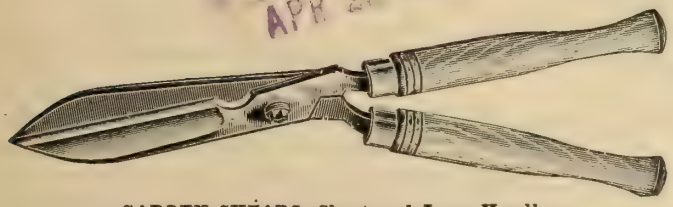
is close meshed at bottom and does not require rail or board support at edges, having strong straight wire (No. 12 guage) at top, bottom and in centre, cannot sag and is easy to erect. The "Page Acme" netting is of neat appearance, very durable and cheap. We also make farm and ornamental fence, gates, nails and staples. The name of Page is your guarantee of quality.

The Page Wire Fence Co., Limited, Walkerville, Ont. 5

INDUSTRIAL GOSSIP.

TAR WORKS TO MOVE. It is reported that the tar works of Caritte & Patterson, Halifax, are to be removed to Sydney, C. B., and it is rumored that The Dominion Iron and Steel Co. have induced them to make the change. This would enable the coal company to dispose of a by-product to the others. It is also stated that a tar distillery will be started at Sydney.

CARRIAGE AND IMPLEMENT COMPANY. Application is being made to the Lieutenant Governor of New Brunswick by The Lounsbury Co., Limited, for incorporation. This new company proposes to purchase the carriage and implement business carried on at Newcastle, N.B., by the late George A. Lounsbury ; conduct a wholesale and retail business in carriages, sleighs, agricultural implements, furniture, machinery, pianos, organs, etc., and establish branches in different parts of the Province. The provisional directors are John T. Clark and William G. Clark, merchants, Fredericton, N B., and Chester C. Hayward, accountant, Newcastle, N B. The capital stock of the company is $45,000, divided into 450 $100 shares.



FIRE IN ELECTRIC WORKS.

On April 13 the premises of the Maritime Electric Co., Halifax, N.S., were damaged by fire to the extent of $2,000. The stock of electrical supplies, books, etc., were injured considerably. The cause of the fire is unknown.

THE MESSRS. JOHN M. AND ADAM TAYLOR.

MR. JOHN M. TAYLOR, who recently resigned the general managership of the Dominion Radiator Co., Limited, of Toronto, to enter the manufacturing firm of A. R. Woodyatt & Co., Guelph, although still a young man, has had an experience of 24 years in the foundry business. He began his career with the James Morrison Company when 13 years of age, and remained with that firm until 1887, when the Dominion Radiator Co. was formed and he became its first manager. The Dominion Radiator Co., or as it was then called, the Toronto Radiator Company, was a small affair. To-day it is the largest purely radiator company in the British Empire. The well-known phrase which has become so popular in connection with the company, namely, "The Largest Radiator Manufacturers Under the British Flag," was coined by Mr. Taylor.

Since 1887 Mr. Taylor has found time to travel extensively, but always in the interest of Safford radiators. The Domnion of Canada he has covered from one end to the other, while to most of the chief countries of the world he is by no means a stranger. In the United States he is well known, and when it was announced that he was resigning his position as secretary-treasurer and general manager of The Dominion Radiator Co., he received a flattering offer from a certain manufacturing firm in that country, the largest of its kind in existence, to enter its services.

For two years Mr. Taylor was chairman of No. 7 district (Canada) of the National Founders' Association of North America. At present he is chairman of the Parliamentary Committee of the Canadian Manufacturers' Association.

His decision to resign his position of manager of The Dominion Radiator Co. was regretted a great deal by many of the company's customers, if the numerous letters which Mr. Taylor has received can be taken as a criterion. Some even expressed the opinion that if they could only have a few minutes' talk with him they might be able to induce him to reconsider his decision. Some of the agents also expressed their regret, while the employes of the company gave expression to their feelings in an address and in the presentation of a handsome office desk by them. The address read as follows :

John M. Taylor, Esq., Secretary-Treasurer and General Manager of The Dominion Radiator Co., Toronto.

Dear Sir,—Having learned with deep regret that you have decided to sever your connection with this company as general manager, we, the office staff and employes, desire to take this opportunity of expressing our sorrow at parting with one, whom, during the many years we have spent with him, we have always found to be not only a just and considerate employer, but a true friend, and one who has ever been thoughtful of the welfare and comfort of those in his employ.

We sincerely regret that you have decided to leave us, but can assure you that you carry with you our very best wishes for your future prosperity, and as a slight token of our respect and good-will, we ask your acceptance of this desk, which, as you sit by it, we trust will ever serve to remind you of the many friends you have left behind you amongst the employes of The Dominion Radiator Co.

Thanking you sincerely for the many kindnesses we have received at your hands, and wishing you every success in your new field of labor.

Signed on behalf of the employes of the company,

A. J. HOOEY, S. W. HOWARD,
GEORGE THORN, JOHN JEFFERY,
ERNEST BURNER, W. R. HAMMOND.

MR. JOHN M. TAYLOR.

MR. ADAM TAYLOR.

Mr. Adam Taylor, who for some years has been assistant manager of the Dominion Radiator Co., Limited, also resigned with his brother. Mr. Adam Taylor has the distinction of being both the first traveller and the first assistant manager of the company.

Although both have retired as officers of the Dominion Radiator Co., Limited, they are still shareholders and directors of that concern.

In A. R. Woodyatt & Company they have the controlling interest, Mr. George D. Forbes being the other partner. As our readers are aware, A. R. Woodyatt & Co. are extensive manufacturers of general hardware, lawn mowers, etc., whose products have a high reputation in Great Britain and several of her colonies as well as in Canada. Under the management of the Messrs. Taylor we may expect to see a further increase in the firm's business and reputation.

The Messrs. John M. and Adam Taylor are twins, and a peculiar fact in connection with their history is that they have never been parted. In the enterprise in which they have embarked it is to be hoped, not only that they will be successful, but that they may long be associated.

A NEW FIRM IN ST. JOHN.

The W. H. Hayward Co., Limited, St. John, N.B., is applying for incorporation. This company proposes to purchase the crockery business of Harvey P. and Augusta M. Hayward, in St. John, N B., and conduct in future a business of buying and selling of china, glassware, jewellery, hardware, cutlery and fancy goods. The capital stock is placed at $80,000, in 800 shares of $100 each. The incorporators are Harvey P. Hayward, Frank S. Parlee, David Churchill, Augusta M. Hayward and Annie E. Hayward, all of St. John, N. B. The first three named are the provisional directors.

INDUSTRY'S MAGIC STORY.

How Some Successful Business Men Started in Life.

AN event long to be remembered was the great dinner given to the "Captains of Industry" in New York. It was a high honor to the 100 distinguished Americans whom the German Prince Henry had expressed a wish to meet. Among them were men who had begun life at the forge, bench or desk, and worked their way up to wealth and fame.

For the first time since a blacksmith sat with King Solomon on his throne the "iron-worker" was again at the right hand of royalty, among the honored of the land. Royalty crosses the sea and banquets with the Captains of Industry — all because of the power of the artisan, the inventor and man of affairs. Among the men called to that dinner to meet a Prince were those who had begun life with nothing but their genius and their hands.

When Graham Bell, who is a Canadian by birth, reached London in 1878, with his newly-invented telephone, he met discouragement on every hand. It was called an amusing scientific toy of no commercial value. He even found difficulty in getting his instruments repaired. First in London, then in Sheffield, he vainly tried to get a finger length of steel fashioned for some vital part of his apparatus. None would attempt it. "We have no patterns for such work," said the head mechanic.

"What is your weekly pay?" asked Professor Bell of a Sheffield expert.

"Thirty shillings," he said.

"I'll give you two pounds to work for me an hour, and I will tell you how to do it," said Professor Bell.

"Thanks, but I must decline. You see, sir, we do all our work by patterns. I'd rather not try it."

Much annoyed, Professor Bell exclaimed: "It is an easy job. I could do it myself in half an hour were I at home."

"Oh, sir, you are welcome to use our ools as long as you please," replied the foreman, relieved. Mr. Bell went to the bench, and in half an hour had his telephone repaired and in working order. He was then a poor man. To-day he is worth millions and his fame encircles the globe.

Among those Captains of Industry, modest and silent in the presence of the Prince, was a man whose career began on the eastern slope of the Alleghanies — at Altoona. They are discussing it to this day. A railroad problem was perplexing the superintendant one morning, when an employe offered a suggestion. It was followed by silence, then exclamations.

"Who told you that? Do you think i will work? It's a bright idea. Try it." And he did. They called him a genius, and he went to work for himself and won. His name is George Westinghouse, and that was the beginning of his air brake and his great fortune that enabled him to pay Tesla a million dollars for inventions in electricity.

Next, the story of Charles Schwab, who now controls the nickel mines at Sudbury, Ont., reads like a chapter of magic in the Arabian Nights. He began as the humblest worker in Pennsylvania's greatest steel mills. From an apprentice he rose to the presidency of the American Steel Trust, capitalized at more than $1,300,000,000, and employing—Napoleon's army—150,000 men, receiving more than $150,000,000 in wages annually. From his visit to the crowned heads of Europe this Yankee Captain of Industry returned to join his fellow workingmen and meet the Prince and the learned professors at the Sherry dinner.

And so one might go on, finding inspiration and wonder in each man's career. In view of this—the general interest and the lesson of it have been asked for a brief account of how these men of science and industry made their first start in life, of the difficulties met, how they were encountered and to what particular endeavor they attribute their success. From the answers received the following extracts are given.

George F. Baer, Reading, Pa.

The corporate representative of the largest anthracite coal interests of Pennsylvania and prominent in financial matters there and in New York City. He was born in Somerset county, Pennsylvania, 1842. He graduated from Franklin and Marshall College. At 13 he began work on The Somerset Democrat, and in 1861, with his brother, became owner of the paper. When his brother went to the war he still ran the paper, yet studied law, principally at night. In August, 1862, he raised a company of volunteers, was elected captain and went to the front. Joining the army at the second battle of Bull Run, he participated in all the engagements up to and including Chancellorsville, when he was detailed as adjutant-general of the Second Brigade.

After the war Mr. Baer resumed his legal studies and was admitted to the bar in 1864. In 1868 he removed to Reading, and rapidly gained prominence at the Berks County Bar, and was an active practitioner for many years. His connection with the Reading companies dates back to 1870, when he became counsel for the Philadelphia and Reading Railroad. He subsequently became a director of that company, but, being unable to agree with the policy of President McLeod, he resigned.

For years he has been the confidential legal adviser of Mr. Morgan in Pennsylvania. When the Reading Railroad was reorganized after the receivership of 1893 he took a prominent part in it, and, in April 1901, was elected president, and also of the Central Railroad Co. of New Jersey.

Eliphalet W. Bliss, New York.

President of the E. W. Bliss Co., inventor and manufacturer of presses, dies and special machinery for working sheet metals; also the sole mannfacturer of the Whitehead torpedo and appliances for the United States navy, and president of the United States Projectile Co., manufacturer of shells for the army and navy. In response to inquiry, he says:

"My start in business was by serving five and a half years as machinist apprentice; was afterward connected with the Charles Parker Gun Company, in Meriden, Conn., for seven years; then came to Brooklyn to manufacture what were known as Campbell printing presses. Working for a percentage produced an envious feeling on the part of my employer, owing to my making more money than he had thought possible. That forced me into the press and die business, of which I was almost the pioneer, and resulted in my building up a business considered the largest of its kind in the world.

"The difficulties I encountered were very great, having no capital, no one of whom I

could ask favors, depending on my word with the bank and my customers.

"Securing the confidence of one's customers and of the bank with which you do business, never failing in your promises to pay, and striving to fulfil all promises to customers will approach as nearly to a successful stage as anything."

Charles F. Brush, Cleveland, Ohio.

Scientist and inventor, awarded the great Rumford medal for the practical development of electric arc lighting. He is the founder of the American arc - lighting industry, and is a life member of the British Association and of many engineering and scientific societies in America and Europe. He writes :

"I was educated as a mining engineer, taking my first university degree in 1869. Believing there was a bright future for the professional chemist and metallurgist in the industrial arts, I followed this line of effort for several years. Time has long since proved my belief well founded, but its realization was too slow to warrant waiting.

"In 1877, after some years of study, thought and experiment, I gave up all other business and thereafter for many years devoted my time entirely to the invention and development of electric arc lighting on a commercial scale. This was an entirely new industry, and the attendant difficulties were great in consequence.

"The necessary inventions had to be made, patented and defended against piracy ; the machinery had to be designed, experimented with and modified until it was reduced to the simplest and most efficient form, and the public had to be educated to the new light in the face of strong opposition from the gas companies everywhere.

"It was in the practical development of electric arc lighting that I achieved business success, and I attribute that success to the selection of a congenial and promising field of effort, followed by years of study and hard work, intelligently directed to a definite end."

Alexander Cassatt, Philadelphia,

President of the Pennsylvania Railroad system, located in 13 States, with more than 10,000 miles of railroad, about 152,-000 employes, and with gross earnings of more than $200,000,000 a year. Of Huguenot-Scotch ancestry, Mr. Cassatt was born in Pittsburg in 1839. Educated at Darmstadt, Germany, and the Polytechnic Institute, Troy, N.Y. He is fond of horse racing and with his family and friends comes frequently to the Ontario Jockey Club races at Toronto.

After "locating" a railroad line in Georgia the young man entered upon his career.

Here is his career in a nutshell. In 1861 Mr. Cassatt shouldered the rod of under surveyor and began the real work of his life. He rose to be general manager—the office was created for him—became vice-president and is now president of the Pennsylvania's great system.

Under his administration the soft coal territory of Pennsylvania was secured ; also control of the Baltimore and Ohio, the Chesapeake and Ohio, the Norfolk and Western systems, and, more important than all, the Long Island Railroad, with tunnels under New York and its two great rivers, with stations in the heart of the city. With these properties $175,000,000 was added to the capital stock of the Pennsylvania road.

Among the achievements of Mr. Cassatt related as characteristic of his Napoleonic ability is the story of how he snatched a $14,000,000 railroad property from Mr. Garrett, of the Baltimore and Ohio Road, in a single night.

Charles F. Clark, New York.

Organizer and president of the Bradstreet Company, international commercial credit organization, with 140 offices distributed throughout the civilized world. He was born in Preble, Cortland County, New York, son of a Presbyterian clergyman. "I am indebted to my father," said Mr. Clark, "for my early education and to my mother for whatever executive ability and virility I have since shown. Her character, capacity and executive ability could have controlled and made successful any business enterprise."

Mr. Clark went to Detroit, entered the service of Senator Zachariah Chandler; next studied law with a firm that made a specilty of commercial and real estate transactions. While there he became correspondent of J. M. Bradstreet & Son, who published Bradstreet's book of commercial ratings, and aided in compiling the names and credit of Detroit firms.

Mr. Clark studied the system and resolved to make it his life's profession, but it did not then pay. To meet living expenses he pulished the Detroit directory, and step by step rose to the management of the Bradstreet enterprise, and finally became president of an organization with standing and credit in every part of the civilized world.

John H. Converse, Philadelphia.

General business and financial manager of The Baldwin Locomotive Works, now finishing its twenty thousandth locomotive, He was born in Burlington, Vt., on December 2, 1840. Went from college to The Burlington Times newspaper office as editorial writer ; next entered the service of the Chicago and Northwestern Railroad, and later went to the Pennsylvania Railroad at Altoona, when Dr. Edward H. Williams was superintendent at that point. Later, that gentleman became one of the owners of The Baldwin Locomotive Works, in Philadelphia, and Mr. Converse was soon taken into the firm. As business and financial manager, Mr. Converse has achieved great success, expanding the output of locomotives from 200 to 1,000 per annum.

Mr. Converse is also director in many of the leading banks and trust companies of Philadelphia. He is a philanthropist, and has liberally endowed universities, churches and libraries. His career exemplifies to a marked degree the value of trained intellect in extensive business affairs and fidelity in the administration of great trusts.

Francis B. Crocker, New York.

Chief instructor and professor of electrical engineering in Columbia University. He is the founder of the Crocker-Wheeler Electric Company, and was the president of the American Institute of Electrical Engineers in 1897 and 1898 ; is the author of several books and numerous papers on electrical engineering subjects.

He says: "In the first place, I believe a man should take up the profession or business he is most interested in and for which he possesses some talent. I believe this plan should be followed, even though it conflicts with family or social prejudices. A man should also prepare himself very thoroughly for his life's work, particularly if it is professional.

"Perhaps the most important quality is the ability and willingness to work hard. This does not necessarily mean an incessant grind from one year's end to another, but it does signify that one must be keen after his duties and not in the slightest degree inclined to shirk them. It is only by doing the work of the man ahead of you as well as your own that one can be promoted. It is almost always foolish to avoid responsibility. This is bound to come to one and it is impossible to dodge it."

Clement A. Griscom, Philadelphia.

Founder and president of the International Navigation Company, which owns and operates twenty-six transatlantic steam ship lines, and also president of the American Society of Naval Architects and Marine Engineers. Identified as director with important railroad, manufacturing and marine insurance companies.

As an employe in the shipping firm of Peter Wright & Co., Philadelphia, Mr. Griscom, of a distinguished family, studied marine architecture, and arose to found steamship lines ; was first president of the Society of Naval Architects and Marine

Engineers, and has been reelected each year. As president of the International Navigation Co., he bought the Inman Line and added it to the fleet, and later the New York and Paris.

Through his energy special Congressional legislation was secured permitting these ships to sail under American register. Then he contracted with the Cramps for the two home-built ships, the St. Louis and St. Paul. In the Spanish War many of the company's ships were used by the Government, winning historic fame. Mr. Griscom has been specially honored and decorated by foreign Governments, belongs to the principal clubs and commercial organizations, and is at the head of leading banks, insurance companies and great industrial corporations.

Henry O. Havemeyer, New York.

Prominently identified with the sugar industry and influential in every branch of enterprise. He says:

"I started at the refinery in Brooklyn to learn the technical part of the business at the age of eighteen; was there until I was transferred to the Wall street office, to learn and attend to the mercantile part, at the age of twenty years and six months, succeeding in the department of my brother-in-law, who died. When I became twenty-one I was admitted to the firm, and, of course, went into the Trust at its formation, so that I became connected with the sugar refining business at eighteen, was a partner at twenty-one, and have been identified with it ever since.

"The so-called Trust has carried the business on profitably since its formation at a less margin between raw and refined than for the corresponding period previous thereto, an achievement for the share in which I have anticipated I am proud.

"I have nothing more to add."

Frederick Pabst, Milwaukee, Wis.

A brewer, one of the prominent men of the West, public spirited, identified with many financial interests. He writes:

"To start a business enterprise on a small scale at this stage of the commercial world's history, and to build it to proportions of national and even international repute; to do the work of manufacturing in a small room to which materials for the finished product are hauled by a yoke of oxen, and, sixty years later, to possess a plant which covers seventeen acres, and whose supplies each day equal what was used in ten years by the original establishment, that is called business success."

Edwin Reynolds, Milwaukee, Wis.

Inventor of the Reynolds-Corliss engine, president of American Society of Mechanical Engineers and chief engineer of the Allis-Chalmers Company, the constructors of the largest stationary steam engine. Born in Mansfield, Conn., in 1831. Went from farm to machine shop at 16; became foreman, then superintendent and finally was engaged by George H. Corliss, of Providence, R.I., as chief engineer and salesman. He reached the highest position with the then greatest engine works in the country.

Then he went to the Allis-Chalmers works, in Milwaukee, and under his management the force was increased from 300 to 2,500 men. He revolutionized engine building. The Reynolds-Corliss engine has grown from the 80 to 100 horse power of 1877 to the 10,000 to 12,000 horse power monster of to-day.

About 1880 he designed a blowing engine for the Joliet Steel Company of so radical a departure from existing types that it caused a sensation. It attracted Andrew Carnegie, who saw the machine and ordered one built, resulting in $5,000,000 of still more business from that company. Even to-day, after 20 years, its principal features are unchanged, and it is the accepted type of this class of engine.

Elihu Thomson, Lynn, Mass.

Electrician, founder of the Thomson-Houston Electric Company, which was consolidated in 1892 with the Edison interests as the General Electric Company; inventor of electric welding and working. He claims he is not a business man, so called, but a professional engineer and scientist.

His inborn tastes shaped his course from early childhood. Unless such compelling tastes existed, coupled with good judgment and energy in overcoming obstacles, success would not have been possible.

"Publicity," he has said, "interferes with study, with work, with usefulness in a large measure when it concerns careers" such as his. He does not seek and never has sought it, and says the same of "honors" and "awards." He repeats the saying that "when a man does anything of value, attracting public notice, all the world seems to conspire to prevent his doing more of it."

"Some credit me with being what I certainly am not — a typical American millionaire, etc.—under a mistaken notion that a man only becomes known by his financial or business success."

George Gray Ward.

Vice-president of The Commercial Cable Co., also of The Postal Telegraph Co., was born at Great Hadham, Hertfordshire, Eng., December 30, 1844. Educated at a private school at Cambridge.

Mr. Ward learned telegraphy at 10, and received a prize for his knowledge of the art. Entering the Electric Telegraph Co.'s service, and passing the various grades at different stations, resigned in 1865 and joined the Egyptian Government Telegraph Service and was three years at Alexandria. Mr. Ward was one of the few who stuck to their posts during the cholera of 1865. His valuable services were especially acknowledged by Ismail Pacha, the late Viceroy. Next he was with the first French Atlantic Cable Co., in 1869, and sailed on the Great Eastern as a member of the electrical staff during the laying of the cable.

Mr. Ward was stationed at St. Pierre, Miquelon, five years. He was next superintendent of the Direct United States Cable Company, and organized its system in the United States. Up to that time it had been considered a great feat to receive an answer to a cablegram from London inside of thirty or forty minutes. Mr. Ward reduced the time to a minimum, and it is now a daily occurrence to receive replies in less than five minutes.

This accelerated service created the Stock Exchange arbitrage business between New York and London, which has assumed such large proportions. He made the Direct Cable Company popular with the public and rendered valuable aid to the press. He also introduced the system of registered addresses, now adopted throughout the world.

In 1884 Mr. Ward became secretary and general manager of the Commercial Cable Company. In 1890 he was elected its vice-president, and in this position has achieved great success in perfecting an up-to-date, unique, unexcelled transatlantic service.

Charles D. Walcott, Washington.

Director of the United States Geological Survey, and organizer and leader in scientific and higher educational institutions, and member of many scientific organizations, was born in 1850, at New York Mills, N.Y.; began collecting rocks and fossils at 13, and soon decided to follow geology as a profession. Unable to attend college, he learned the steel and iron business, and studied alone. In 1876, he became a member of the New York State Geological Survey, and two years later was appointed to a position on the United States Geological Survey.

MANITOBA MARKETS.

Winnipeg, April 7, 1902.

BUSINESS is reported good for the week and prices firm in nearly all lines. There have, however, been two fairly important changes: Canada plate has dropped 25c. and is now quoted at $3 25; while picks and mattocks have advanced 50c., being quoted at $5.50 and $6.50 respectively.

PAINTS OILS AND GLASS—No changes are recorded under this head, the drop in turpentine in Savannah so far not having affected this market. There is some doubt, however, of the recent advance being maintained.

BINDER TWINE—There is nothing new in the situation, prices being nominally those with which the market opened. No transactions of moment are reported for the week.

SCRAP—There is a steady demand in all lines but prices are without change.

IMPLEMENTS—The trade has been very good this week, particularly in the line of plows, and this too in spite of the bad roads. Various sections of the country, however, have started seeding and it is thought by the dealers that by the end of the week there will be a largely increased demand for drills.

The price list is as follows :

THE WORLD'S OUTPUT OF ZINC.

Henry R. Merton & Co. have issued the following statistics of the zinc output of the world. The figures, it will be observed, are most complete :

	1901. Tons.	1900. Tons.	1899. Tons.
Rhineland (Belgium and Holland	199,285	186,330	189,955
Silesia	106,385	100,705	98,590
Great Britain	29,190	29,830	31,615
France and Spain	27,265	30,620	32,955
Austria and Italy	7,700	6,975	7,190
Poland	5,935	5,875	6,225
	375,760	360,325	366,630
United States	12 ,830	110,465	115,845
World's output	498,590	470,790	482,485
Average price ex-ship, Thames	£ 9 0s. 7d.	£20 5s. 5d	£24 17s. 2d.
Zinc imports into Great Britain, Tons	68,454	69,536	69,949

EXPORTING LAWN MOWERS.

A. R. Woodyatt & Co., Guelph, Ont., last week shipped two carloads of lawn mowers to Palmerston, New Zealand, and one carload to London, England.

ADVANCE IN PRICE OF STOVES.

The Western Stove Manufacturers' Association, at a meeting held in Chicago a few days ago, decided to raise the price of stoves 5 per cent. The Association represents 40 different concerns. According to the stove men, higher prices for raw material made the increase necessary.

DECLINE IN SILVER PRICES.

The present price of silver, 24¾d. an ounce, is the lowest since September, 1897, when a dip was made to a low record of 23⅝d., against a level of 26d. in the previous and succeeding months. The highest London price recorded for silver was 62¼d. in 1859. As late as 1890 it was 54⅝d. and in 1900 30¼d. The tendency is believed to be still downward, as the East is taking little new silver, while American and Australian supplies are more than equal to the demand. The immediate decline is due to he troubled state of the Indian and Chinese markets.—American Metal Market.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, April 18, 1902.

HARDWARE.

THE business done in hardware during the past week has been most satisfactory all round. Merchants who placed their orders for delivery on May 1 are asking to have the goods shipped immediately, the spring business having commenced earlier than was anticipated, and the hurry displayed by the trade everywhere to have their orders filled now is evidence that stocks are light throughout the country. The wholesale houses are consequently very busy. The opening of navigation between Montreal and Quebec and other eastern points has greatly stimulated the trade in that direction. Such lines as washing machines, wringers, etc., are moving well at present. Cutlery is also in good demand. The market shows an upward tendency in many lines, and several advances are reported this week. Builders' hardware is among this list, and on all lines the feeling is firm. Cabinet hardware has advanced. Screen wire cloth, cordage and some brands of scales are higher. Warren's "Champion" scales are now discounted at 55 per cent. instead of 65 per cent. Warren's weigh beams are discounted at 35 per cent. American prices on cabinet hardware have advanced about 20 per cent. Scythes have commenced to move well, and prices quoted are somewhat altered. The advance is mainly on account of the scarcity of raw materials. Peterborough and Gurney locks and builders' hardware have advanced, and the discount is now 40 and 10 per cent. off. Common door knobs are 5c. higher, now being quoted at 95c. per dozen.

SCYTHES.—There is a better demand for these, and the trade is picking up gradually. We quote: Lance, No. 80, $5.50; Hurd's Clipper, $6.50; concave, $7.50; Sibely, $8.50. Cradle scythes, cast steel, $8.50; silver steel, $9.50; "Harvest King," $10.50. Bush scythes, $6.50.

BARB WIRE.—There is a good business doing in this wire at unchanged quotations. The price is $3 per 100 lb. f.o.b. Montreal.

GALVANIZED WIRE.—The market is in much better shape this week, and orders are now being placed freely. We quote: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

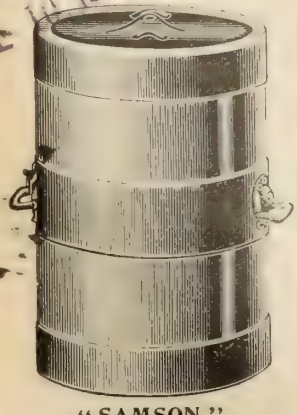
SMOOTH STEEL WIRE.—There is no improvement to note this week. We quote: Bright iron and annealed on a base of $2.60 per 100 lb., f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras, per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—The market is dull. The discount is 22½ per cent.

BRASS AND COPPER WIRE.—The discount is 60 per cent. on both wires. Trade is quiet.

FENCE STAPLES.—The demand for fence staples is very good and keeps up steadily. Prices are unchanged. Our quotations are as follows: $2.90 per 100-lb. keg, for bright, and $3.25 for galvanized. 25 and 50-lb. packages, 25c. extra.

WIRE NAILS.—The market is active at the present quotations. We quote: $2.55 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.



CUT NAILS.—There is a fairly good trade doing in cut nails, and the price remains at $2.35 per keg, in small lots, and in carlots, $2.27½. The discount on coopers' and flour barrel nails is 40 per cent.

HORSE NAILS.—Business is brisk. We quote as follows: "C" brand at 50

Anticipating that the demand for the following goods would be much greater than many in the Trade expected, we made up large stocks of each line and stored them in our warehouses ready for immediate shipment.

The rush orders already received for made-up cans have confirmed our anticipations, and if **you** have underestimated **your** requirements we can fill your orders so promptly that you need not be out of stock at any time during the season.

and 7½ per cent. off and "M" brand at 60 per cent. off on oval and new city heads and 66 2-3 per cent. off for new countersunk heads.

HORSESHOES.—These continue to move rapidly. No quotable change has been made. We quote as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS.—There is a very good demand still, and the market is steady. The discounts are as follows: Flat head bright, 87½ and 10 per cent. off list; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.

BOLTS.—A gradually improving market is experienced for bolts, and at present a fair trade is doing at steady prices. We quote: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3½c. per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—This is being freely inquired after, and a good business is doing at quoted prices. Dry and tarred sheathing are particularly active. Our quotations are as follows: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 30c. per roll; tar sheathing, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE.—The market is active and firm. There has been an advance of ½c. on British manila, sisal, and lathyarn. Quotations follow: Manila, 16c.; British manila, 14½c.; sisal, 13c.; lathyarn, 11½c. Prices on binder twine are as follows: Blue ribbon, 650 feet to the pound, 14½c.; Redcat, 600 feet to the pound, 13½c.; Tiger, 550 feet to the pound, 12½c.; Standard, 500 feet to the pound, 11c.; sisal, 500 feet to the pound, 11c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—There is still a good demand. The discounts on copper rivets were inadvertently given as 35 and 5 per cent. instead of 45 and 10 per cent. Our quotations are as follows: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 and 10 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH.—An advance of 5c. per roll has been made in screen

wire cloth, the price now being $1.30 per 100 square feet. Trade is fair.

POULTRY NETTING.—There is a moderate business doing. Prices are unchanged from last week, and the market is steady. Canadian or English is discounted at 60 per cent. off 2 x 2 mesh, 19 wire, and 55 per cent. off 2 x 2 mesh, heavier, Canadian list.

HARVEST TOOLS.—The discount has been changed, and is now 60 and 10 per cent. off. The market is active.

FIREBRICKS.—There is only a moderate trade passing. No change has been made in prices. We quote: Scotch, $19 to $23.50, and English, $18.50 to $22.50 per 1,000.

CEMENT.—The market is quiet and steady. Stocks of imported cements are quite light here, and jobbers are awaitquotable change, however, has occurred. ing the arrival of new goods by the first steamer. Quotations are as follows: German cement, $2.30 to $2.40; English, $2.25 to $2.35; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.20 to $2.30 ex-cars.

METALS.

The position of metals has not materially altered since our last report. Everything is firm, and a good demand continues. Furnaces and mills are being run to their full capacity, but even night and day work does not enable them to supply the demand as promptly as buyers would like. Many orders have gone to Scotland from here for steel, buyers failing to obtain it in the United States. This trade is greater than it has been for many years. The feeling in the English markets is still strong, and importers here are being urged to wire any firm orders they have, as the market has a decided upward tendency.

PIG IRON.—The great demand for pig iron continues, and notwithstanding the increased supply there is difficulty in obtaining enough for all requirements, and the market is very firm. Canadian is quoted at $18.50 to $19, and Summerlee at $21 to $21.50.

BAR IRON.—There has been no further change in prices in this market. Bar iron is in active demand, and is firm at the present quotations. Merchants' bar, in small lots, sells for $1.95, and horseshoe iron for $2.20.

BLACK SHEETS.—The demand is still good. English prices on black sheet steel were cancelled on Friday, April 11, but some importers have received firm quotations since then at unchanged figures. We quote as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—The market is active and continues as firm as ever. No Our quotations are as follows: No. 28, Queen's Head, $4.40; Apollo, 10¾ oz., $4.40; Comet, $4.25, with 10c. extra for less than case lots.

INGOT COPPER.—This still is quoted at 14c. There is not a great business passing.

INGOT TIN.—Trade shows some improvement over that of last week. The price of Straits has been advanced 1c., and is now 30c.

PIG LEAD.—We quote $3.25. There is not much doing.

LEAD PIPE.—The price for composition waste is 7½c. and for ordinary, 7c. The discount is 37½ per cent.

IRON PIPE.—There is a good demand. Our quotations are as follows: Standard pipe, per 100 ft., screwed and coupled, in lengths under 19 feet, as follows: Black pipe, ⅛, $3; ¼, $2.40, ⅜, $2.65; ½, $3; ¾, $3.70; 1-in., $5.25; 1¼, $7.40; 1½, $8.90; 2-in., $12.40. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $4; ¾, $5.05; 1-in., $7.25; 1¼, $10.10; 1½, $12.15; 2-in., $16.70. Extra heavy pipe, plain ends, are quoted, per 100 feet, as follows: Black, ½, $4.35; ¾, $5.30; 1-in., $7.60; 1¼, $10.60; 1½, $12.70; 2-in., $17.45. Galvanized, ½, $5.35; ¾, $6.70; 1-in., $9.60; 1¼, $13.30; 1½, $15.95; 2-in., $21.75. For threads and couplings 5 per cent. is added.

TINPLATES.—There is not much doing. Our quotations are not changed from last report. Cokes sell for $4.25 per box, and charcoal for $4.75 to $5.25 per box.

CANADA PLATE.—The market here is quite as firm as ever, though a continued easy feeling prevails in England. The demand is active. Quotations are as follows: 52's, $2.65 to $2.70; 60's, $2.75 to $2.80; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35.

STEEL.—Since the reduction of last week there has been no further quotable change. Business is very good. Our quotations are now as follows: Sleighshoe, $2.10; tire, $2.15; bar, $2.05; spring, $2.85; reeled machinery, $2.85; toecalk, $2.60.

SHEET STEEL.—There has been almost no improvement in this market, and trade remains quiet. Quotations follow: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—Trade is better, though

the movement is still light. Jessop's is worth 13c., and Diamond, 8c.

TERNE PLATES — The market is firmer, and a much better business has been done during the past week. The price is $7.75 to $8.

COIL CHAIN.—The business doing in chain is not great, and prices remain as quoted. American manufacturers have refused to take orders for future delivery, owing to the uncertainty as to what labor difficulties may result before July 1, which is the time when such questions are settled for the year. We quote: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-in., 7¼c. per lb.; 5-16, $4.80; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.85; 9-16, $3.75; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-in., $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—We quote $5.75 to $6.25.

ANTIMONY.—There is little doing. The price is 10c.

ZINC SPELTER.—Trade is fair this week, showing some improvement. The price is 5c.

SOLDER.—There is no change in quotations. A good trade continues. Bar solder is worth 18c., and wire solder, 20c.

PAINTS AND OILS.

Turpentine has shown no further signs of a decline since last week, and now is slowly but surely assuming a stronger position. The primary market is once more steady after the recent fluctuations. The outlook is not clear, but reports from the interior point to a smaller production than last year. Linseed oil, on the English market, is still unsteady, but with a fairly strong undertone. Locally, there is no change. Business in all paints and oils is very active. We quote:

WHITE LEAD.—Best brands, Government standard, $5.87½; No. 1, $5.50; No. 2 $5.12½; No. 3, $4.75; No. 4, $4.37½ all f.o.b. Montreal.

DRY WHITE LEAD—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC — Pure dry, 6¼c.; No. 1, 5¼c.; in oil, pure, 7¼c.; No. 1, 6¼c.; No. 2, 5¼c.

PUTTY — We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200 lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL—Casks, 7c.; 100 lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD — Genuine red lead in casks, $4.50; in 100-lb. kegs, $4.75; less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE—Ground, casks, 5c.; less, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 80c.; boiled, 83c. In 5 to 9 bbls., 1c. less; 10 to 20 bbl. lots open, net cash, plus 2c. for four months. Delivered anywhere in Ontario between Montreal and Oshawa at 2c. per gal. advance and freight allowed.

TURPENTINE.—Single bbls., 72c.; 2 to 4 bbls., 71c.; 5 bbls., and over, open terms.

SHELLAC VARNISH — Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS—$1.20 to $1.45 per gal.

CASTOR OIL—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—47½ to 49c.

COD OIL—32½ to 35c.

PARIS GREEN — Petroleum barrels, 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

There is still some scarcity of scrap iron, though, with the improvement of the country roads, deliveries have been freer, and the market has been relieved somewhat. It is expected that prices will go down shortly, as the supplies to arrive from abroad are large. Prices are unchanged, and our quotations are as follows: Heavy copper and wire, 11c. per lb.; light copper, 8c.; heavy red brass, 11c.; heavy yellow, 9c.; light brass, 5c.; lead, 2⅞ to 2⅝c.; zinc, 2¼c.; iron, No. 1, wrought, $18; No. 2, $8 per ton; machinery scrap, $15; stove plate, $10 to $11; malleable and steel, $5; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6c. per lb.

GLASS.

The market is still quiet. Early shipments are expected to arrive in a week or two. Our quotations are as follows: First break, 50 ft., $2.10; second, $2.20 for 50 ft.; first break, 100 ft., $4; second break, $4.20; third break, $4.70; fourth break, $4.95.

HIDES.

The hide market is still quiet. An advance of 1c. has taken place in beef hides. Calf skins are easy. We quote: No. 1 hides, 8c.; No. 2, 7c.; No. 3, 6c. No. 1 calfskins, 11c. Sheepskins, 65c.

MONTREAL NOTES

Ingot tin is 1c. higher.

Beef hides have advanced 1c.

Screen wire cloth has gone up 5c. per roll.

Common door knobs have advanced 5c. per dozen.

British manila rope, sisal, and lath yarn are all up ½c.

The discount on harvest tools is now 60 and 10 per cent. off.

Warren's "Champion" scales are now discounted at 55 per cent. instead of 65 per cent.

ONTARIO MARKETS.

Toronto, April 18, 1902.

HARDWARE.

THE feature of the wholesale hardware trade this week is the advance in builders' hardware, both the Canadian and United States manufacturers having put their prices up, the latter 20 per cent. and the former 10 per cent. Wood stoves and ranges are also higher by 5 per cent. Harvest tools have again advanced, the discount now being 60 and 10 per cent. Trade continues active. Fancy wires are going out freely. The demand is fair for wire nails. Very little is being done in either horseshoes or horse nails. Eavetrough and conductor pipe are in active request, and a good business is being done in tinware and enamelled ware. In gas stoves, oil stoves, refrigerators and ice-cream freezers a large business is being done.

BARB WIRE.—A good many orders are being shipped both from stock and from factory. The business in fence wires this spring appears to be larger than usual. We quote: F.o.b. Cleveland, $2.27½ for less than carlots, and $2.65 for carlots. From stock, Toronto, $3.

GALVANIZED WIRE. Shipments are going out freely this week, and our quotations are as follows: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15; No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15 $4.60 to $5.50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE. The demand for oiled and annealed wire is good. We quote the base price, $2.60 per 100 lb. Oiling, 10c.; coppering, 60c.; and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—The demand is steady. Discount, 22½ per cent.

WIRE NAILS.—The demand is good and nearly altogether for prompt shipment. Our quotations are as follows: $2.55 for less than carlots and $2.50 for carlots. Delivery points, Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—Business continues to be only of a limited nature. The base price, $2.35 per keg, with 7½c. allowance on carlots.

HORSE NAILS.—Trade is quiet, and the discounts are as follows: "C" brand, oval head, 50 and 7½ per cent., and on "M" and other brands, 50, 10 and 5 per cent. Countersunk head 60 per cent.

HORSESHOES.—Very little doing. We quote f.o.b. Toronto as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.60; snow shoes, $3.85; light steel shoes, $3.70; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy

(all sizes), $3.85; snow shoes, $4; light steel shoes, $3.95; featherweight (all sizes), $4.95.

SCREWS.—A good trade is being done in screws. Several of the large contractors have lately booked for the whole of their estimated supply for the season in expectation of an advance in prices. The discounts are: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze 70 per cent.

RIVETS AND BURRS.—There is an active demand. The boiler and machine shops are working overtime and are experiencing difficulty in getting skilled mechanics. We quote: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 and 10 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS. Trade is active, some large lots going out. Our quotations are as follows: Carriage bolts, common ($1 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent.; machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66 2-3 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

ROPE.—There has been another ½c. advance in prices on several lines, and the demand is good. We quote as follows: Pure manila, 16c.; British manila, 14½c.; sisal, 13c.; lathyarn, 12c.; sisal bed cord, 3 cord, 48 ft., 65c.; 60 ft., 80c.; 72 ft., 95c. per dozen.

BINDER TWINE.—The demand is fair and prices firm.. We quote as follows: "Blue Ribbon," 650 ft., 14½c.; "Red Cap," 600 ft., 13½c.; "Tiger," 580 ft., 12½c.; sisal, 500 ft., 11c.

EAVETROUGH, ETC.—Large quantities of eavetrough and conductor pipe are going out this week. Eavetrough is quoted at $3.10 per 100 square feet for 10-in., and conductor pipe at $4 for 3-in. and $5.25 for 4-in.

SCREEN DOORS AND WINDOWS.—A large quantity has been shipped and the sorting-up business has not yet begun, of course. Common doors, 2 or 3 panel, are quoted f.o.b. factory points: Walnut, stained, 3-in. style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-in. style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2.50 per dozen.

SPADES AND SHOVELS.—There is a good movement and the manufacturers are short on some lines. Discount, 40 and 5 per cent.

HARVEST TOOLS.—Some lines are still very scarce, the manufacturers experiencing difficulty in getting malleable "D" tops. Prices are higher, the discount now being 60 and 10 per cent. instead of 60, 10 and 10 per cent.

BUILDING PAPER.—The demand is good. Quotations are as follows: Dry sheathing, grey or straw, 30c. per roll; tar sheathing, grey or straw, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c per roll.

LAWN MOWERS.—Business is fairly good. Discount on high-wheel mowers is 50 per cent.; "Star" mowers, 9-in. wheels, $2.50 to $3; "Daisy" mowers, 17-inch wheels, $2.25 to $2.50.

POULTRY NETTING. Business appears to be pretty well over as far as the jobbers are concerned. Quotations are as follows: 2-inch mesh, 19 w.g., discount, 60 per cent.; 2-inch mesh, 18 w.g. and heavier, 50 and 10 per cent.

GREEN WIRE CLOTH.—Business is good at the advance, and jobbers are looking for still another appreciation in values. We quote $1.30 per 100 square feet.

BUILDERS' HARDWARE.—There has been an advance by both the United States and Canadian manufacturers in many lines of builders' hardware, fuller particulars of which will be found in our editorial columns.

TINWARE AND ENAMELLED WARE.—Trade is fair in enamelled ware and a good business is doing in tinware.

WOOD STOVES.—Prices have been advanced 5 per cent. on wood stoves and ranges.

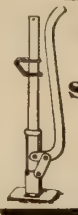
CEMENT.—Trade is commencing to pick up, causing the manufacturers to become busy. The market is not so weak, as the United States manufacturers are raising their prices. Quotations are as follows: Canadian Portland, $1.90 to $2.75; Canadian hydraulic, $1.25 to $1.50; German cement, $3; English, $3 to $3.15; Belgian, $2.50 to $2.75 per bbl., and American, $2.20 to $2.30 ex-cars.

METALS.

The metal market continues strong and active. Pig iron is still scarce and high, and steel, it is almost impossible to get.

PIG IRON.—The demand is fair and the market continues strong. The demand still exceeds the supply. We quote, nominally, $19.50 to $20 on track Toronto.

BAR IRON.—The position remains much as before, the demand being good and supplies scarce. We quote $1.95 to $2.05. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.



STEEL.—There do not yet appear to be any signs of relief to the scarcity of steel. Some of the mills in the United States have this week notified their representatives in Canada to accept no orders under three months' delivery. Our quotations are as follows: Merchantable cast steel, 9 to 15c. per lb.; drill steel, 8 to 10c. per lb.; "B C" and "Black Diamond" tool steel, 10 to 11c.; Jessop's, Morton's and Firth's tool steel, 14c.; toe-calk steel, $2.85 to $3; tire steel, $2.30 to $2.50; sleighshoe steel, $2.10 to $2.25; reeled machinery steel, $3; hoop steel, $2.90.

BLACK SHEETS—Business is active, and stocks are light. We quote: Common, $3.15 for 28 gauge; and dead flat, $2.50 for 26 gauge.

CANADA PLATES—The demand is light. We quote: All dull, $3; half polished, $3.10; all bright, $3.75.

GALVANIZED SHEETS—Trade is remarkably good. The early spring has naturally started up outside work earlier than usual. Many dealers who had placed orders for May delivery are now to have delivery made at once. As wholesalers appear to have ordered their spring stocks earlier than usual, they have been able to some extent to accommodate their customers. Prices, locally, are unchanged at $4.50 for case lots, and $4.65 for smaller quantities.

TIN — The outside markets have been characterized by a good deal of strength during the past week, and advances have been steady. A week ago, spot tin closed in London at £125 5s. for spot and £124 for futures. At the time of writing, the quotation is £128 5s. for spot and £125 15s. for futures. In New York, the market is dull, but spot tin is quoted at $28 50 for one to four-ton lots, compared with $27 85 a week ago. Locally, trading is chiefly confined to small lots, the high prices keeping large buyers out of the market. Our quotations are 1c. higher at $30 to $31 per 100 lb.

TINPLATES—Shipments have been coming forward rather freely during the week, and stocks are now in fairly good condition. A good business is being done in both large and small lots. We quote I C at $4.25.

TINNED SHEETS — A moderate amount of business is being done. We quote: 70 x 30, up to 24 gauge, 7½c.; ditto, up to 26 gauge, 8c.

COPPER—Trade is quiet in both sheet and ingot copper. At the time of writing the New York market is steady in tone, while London is a little lower. We quote ingot at $15 per 100 lb., and sheet copper at $22 to $23.

BRASS—Trade is a little more active. Discount 15 per cent.

PIG LEAD — The market is firm and London closed 1s. 3d. higher on Wednesday. Locally trade is quiet. We quote pig lead at $3.50 to $3.75, and bar lead at $5.

IRON PIPE — Business is fair and the market strong. We quote as follows per 100 ft.: ⅛-in., $3; ¼-in., $2.50; ⅜ in., $2.75; ½-in., $3; ¾-in., $3.70; 1-in., $5.25; 1¼-in., $7.40; 1½ in., $8 90; 2 in., $12.40; galvanized, 1-in., $7.25. Trade discount 4 per cent.

ZINC SPELTER—The demand is moderate. The outside markets are, as a rule, steady to strong. Locally, prices are unchanged at $5.50 to $6 per 100 lb.

ZINC SHEET—Orders are numerous but small. We still quote cask lots at $6 to $6.25, and part casks at $6.25 to $6.50.

SOLDER—A good business is being done and prices are unchanged. We quote as follows: Half-and-half, guaranteed, 19c.; do. commercial, 18½c.; refined, 18c.; wiping, 17½c.

ANTIMONY — There has been more movement during the past week. We quote 10c. per lb. for Cookson's.

PAINTS AND OILS.

The prices of turpentine are unchanged, and the market is steady. It is reported that the bulk of the coming crop in the South is already sold for export and also that the crop this year will be late. Others say that the turpentine market is being manipulated by a few holders and that the high prices cannot long be maintained. The market for raw and boiled linseed oil is strong and there is a good demand for that article from all quarters. The warm weather and the settlement of the painters' lockout, has resulted in a big local demand for leads, oils, and dry colors. The wholesale jobbers and the manufacturers are busy for this time of the year and report this one of the best Aprils they have ever had. Some jobbers state that, following the rush of last week, trade will be quieter for a week or 10 days, until the repeat orders come in. The travellers have been all over their fields, and report that prospects for a large season's trade are excellent. There has been no change in prices, so we quote:

WHITE LEAD—Ex Toronto, pure white lead, $5.87½; No. 1, $5.50; No. 2. $5.12½; No. 3, $4.75; No. 4, $4.37½ in pkgs. of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb. $5 to $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

LITHARGE—Genuine, 6 to 6½c.

ORANGE MINERAL—Genuine, 7½ to 8c.

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.

BENZINE—In barrel lots, 17c. per gal.; less quantities, 25c. per gal.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING — 65c. per 100 lb.; Gilders whiting, 80c.

GUM SHELLAC — In cases, 35c.; in less han cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY—Bladders, in bbls., $2.25; bladders, in 100 lb. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

PUMICE STONE — Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots, and 8c. in bbls.

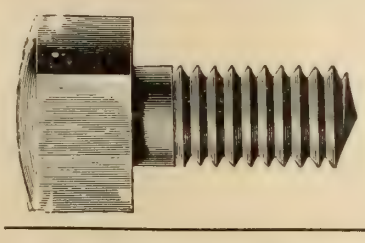
LIQUID PAINTS—Pure, $1.20 to $1.40 per gal.; No. 1, $1.10 per gal.

CASTOR OIL — English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL—Raw, 1 to 4 barrels, 82c.; boiled, 85c.; 5 to 9 barrels, raw, 81c.; boiled, 84c., delivered. To Toronto, Hamilton and London, 2c. less.

TURPENTINE—Single barrels, 71c.; 2 to 4 barrels, 70c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra

Why is it AMERICAN BRAND FILES AND RASPS have such a reputation ?



BECAUSE—they are made from high-grade steel by experienced mechanics.

CAREFULLY TESTED AND WARRANTED.

will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

There is a glass famine threatening in the fall, owing to a lockout amongst the glass-makers in Germany and Belgium. The stocks here are light and the prices are firm. We quote: Under 26 in., $4.25; 26 to 40 in., $4.65; 41 to 50 in., $5.10; 51 to 60 in., $5.35; 61 to 70 in., $5.75; 71 to 80, $6.25; 81 to 85, $7; 86 to 90, $7.75; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33⅓ per cent.

OLD MATERIAL.

Trade in scrap metals is improving with the warm weather. The market is steady. We quote as follows: Heavy copper and wire, 10¼c. per lb.; light copper, 8c. per lb.; heavy red brass, 10c.; heavy yellow brass, 8 to 8½c.; light brass, 5c.; lead, 2¼ to 2½c.; scrap zinc, 2¼ to 2½c.; iron, No. 1 wrought, $14 50 per net ton; No. 2 wrought, $6; machinery cast scrap, $14; stove plate, $10; malleable and steel, $5; old rubbers, 6c. per lb., and country mixed rags, 50c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES—The supply is small, but the demand is slack. The market is steady. We quote: No. 1 green, 6½c.; No. 2 green, 5½c.; No. 1 green, steers, 7½c.; No. 2 green, steers, 6½c.; cured, 7¼ to 7½c.

SKINS—Calfskins have advanced 1c. per lb. This is owing to local competition, the foreign market being still unchanged. Lambskins are coming in now, and the receipts of sheepskins are light. We quote: No. 1 calfskins, 10c.; and No. 2, 8c.; deacons (dairies) 55 to 60c. each; sheepskins, 80c. to $1; lambskins, 15c.

WOOL—The market for coarser wool seems to be in a hopeless condition, and prices have declined ½c. per lb. We quote: Fleece wool, 12½c., and unwashed, 7 to 8c. per lb.

SEEDS.

The prices of red clover and alsike have weakened slightly, but timothy remains firm. Trade is a little slack owing to the lateness of the season. We quote out of store at Toronto: Red clover, $7.50 to $9.50; alsike, $10 to $17, and timothy, $7.80 to $8.25.

COAL.

The opening of navigation is giving the coal merchants an opportunity to replenish their stocks. We quote prices at international bridges as follows: Grate, $4.75 per gross ton; egg, stove and nut, $5 per gross ton; soft coal, $2.50 to $3.25 in bond.

PETROLEUM.

There has been an advance of ½c. all around. We quote: Pratt's Astral, 17 to 17½c. in bulk (barrels, extra); American water white, 17½ to 18c. in barrels; Photogene, 17 to 17½c.; Sarnia water white, 16½ to 17c. in barrels; Sarnia prime white, 15 to 15½c. in barrels.

MARKET NOTES.

Harvest tools are dearer.

Pig tin is quoted $1 per 100 lb. higher.

Several lines of cordage are ½c. higher.

Builders' hardware is 10 to 20 per cent. higher.

Petroleum has advanced ½c. per gallon all around.

H. S. Howland, Sons & Co. have just taken in stock Egyptian cement for mending crockery. It is claimed to be one of the best cements of the kind on the market.

NOVA SCOTIA MARKETS.

Halifax, N.S., April 14, 1902.

NOTWITHSTANDING the interruptions of trade consequent on the late strike of the longshoremen—who handle all the outgoing and incoming water importations—the wholesale hardwaremen are quite satisfied with the last week's business. The fishermen are still sorting up their last necessities for the season's work—even at the last moment there remains something to procure. Orders are coming in from the various routes covered by the travellers, and all report brisk business in every quarter. There is a building boom on in Nova Scotia, and the necessities in this line are being heavily dealt in. Money seems to be plentiful all over the Province, and payments are met readily, much to the satisfaction of the trade.

* * *

The retail trade is only fairly active, as no doubt it has been somewhat interfered with by the auction sale of Crowell Bros.' large stock lately damaged by fire. Still, the business since the first of the year has been so good that they are not dissatisfied to allow a slacker period to average up with a rushing one.

* * *

That the trade in all lines has been good for the year so far is evidenced by exports, which, since last September, are a half million ahead of the year previous and that was considered an exceptionally good year. At the same time it should be noted that during the last two weeks, for the reason given at the opening of these notes, the exports fell off nearly one half, being at least $100,000 less than last year.

* * *

Just now the hardwaremen are exercised over the fact that the insurance companies propose to raise their rates—they have "struck," as it were, for a higher premium. The principal hardwaremen had a meeting last week and it "struck" them that the insurance men did not know a good thing when they had it. They will make a determined effort to prevent any increase in the present rates, but as they are in a measure at the mercy of the insurance companies they may have to pay the extra demand or go uninsured.

* * *

There is no material change in the hardware prices in the city, though there may be some cutting in glass, as heavy importations arrived last week and a large quantity is expected this week from Germany. The same steamer is also bringing a large quantity of cement.

* * *

Everything in iron and steel is firm, and in some lines difficulty is experienced in getting orders filled promptly by the manufacturers, or in the primary markets. Linseed oil, which advanced sharply some weeks ago, is easier, but no reduction has been announced. Turpentine has advanced slightly since last report.

R. C. H.

MANILA HEMP.

The United States Government has remitted the export duty on manila fibre for export to the United States, notwithstanding a promise their Government had made to that of Great Britain on the annexation of the Philippines that they would impose no preferential tariffs detrimental to the old-established trade between Great Britain and those Islands. The British Government has decided to instruct their ambassador at Washington, Lord Pauncefote, to call the attention of the Government of the United States to the effect of the Philippine hemp tariff on the rope industry of Great Britain.

A deputation of Canadian manufacturers of binder twine will also wait on the Dominion Government and point out that the present preference will give the United States manufacturer an advantage of $7.50 a ton.

FIRE IN A HARDWARE STORE.

The hardware store of W. F. Diblee & Sons, Woodstock, N.B., was the scene of a fire on April 9 that did some damage before it was put out. The flames originated in the cellar and were caused by a clerk who went down into the basement to draw some japan in a measure. The stuff got on fire and the flames quickly spread over the cellar and upstairs. The arrival of the fire brigade put a stop to the devastation going on, but much stock was damaged by the water. There was an insurance of $1,500 on the building and contents.

B.C. IRON FIRMS AMALGAMATE.

Ten iron manufacturing firms in British Columbia have amalgamated, and the work of the Province will be distributed amongst the several plants according to their capacity. The firms in the amalgamation are the Vancouver Engineering Co. and the Albion Iron Works, Victoria; the Albion Iron Works, Vancouver; the Victoria Machinery and Depot Co.; the Andrew Gray Iron Works, the Schaake Iron Works, the Dobson Iron Works, Nanaimo, and the Wilson Iron Works.

PERSONAL MENTION.

Mr. E. S. Batchelor, representing the Russell-Erwin Manufacturing Co., New York, has been calling on the Montreal hardware trade this week.

MR. EDGAR WILLS RESIGNS.

Mr. Edgar A. Wills, formerly secretary of the Toronto Board of Trade, has severed his connection with the Iron Ox Co., of Walkerville, of which he was appointed manager a few months since.

HEATING AND PLUMBING

BUILDING PERMITS IN TORONTO.

During the week permits have been granted from the office of the city commissioner, Toronto, as follows : The City Corporation, for a one-storey cement building at the Exhibition Grounds for the Dairy Exhibit, to cost $13,300 ; W. E. Rontrey, for a two-storey roughcast dwelling on Givens street, for $500 ; J. Cohen, for alterations and a new front to store at 105 Queen street west, for $350 ; W. McBean, for a two-storey brick and stone dwelling on the north side of Dundas street, for $12,000 ; R. H. Good, for a one storey and attic frame house in rear of 620 Island Park, at west point near lake shore, for $500 ; Greenway & Parker, for a pair of two storey brick vencered dwellings at 1914 and 1906 Queen street east, for $2,000 ; Mr. Butland, for a one-storey roughcast addition to residence at 13 Essex street, for $300 ; A. H. Moore, for a two-storey brick dwelling on the south-west corner of Bloor street and Lansdowne avenue, for $1,500 ; W. Haines, for brick alterations to dwelling on Pape avenue, for $1,000 ; Alfred Batho, for a pair of two-storey brick and roughcast dwellings at 206 and 208 Marguretta street, for $2,400 ; W. Warsfold, for a pair of two-storey stone and brick dwellings on the east side of Brock avenue, for $2,500 ; R. M. Wallace, for a two-storey roughcast dwelling at 650 Shaw street, for $700 ; W. C. Hamilton, for a two-storey brick dwelling on Bellwood's avenue, for $3,000 ; Thomas Moore, for a pair of two-storey brick dwellings on the east side of Markham street, for $6,000 ; W. J. Pearson, for a two-storey wooden summer cottage on lake front, near Hooper avenue, for $3,700 ; and Mrs. M. E. Chinn, for a two-storey brick dwelling on Albany avenue, for $5,000.

PLUMBING AND HEATING CONTRACTS.

McDonald & Wilson, house furnishings, etc., Toronto, have secured the contract for the gas and electric fixtures of the St. George apartment house on St. George street, Toronto ; for the electric fixtures of a residence for Gen. Fitzhugh, at Cobourg, Ont., and the electric fixtures of a new Presbyterian church at Edmonton, N.W.T.

Maxwell & Johnson, plumbers, etc., Toronto, have secured contracts for the plumbing, heating, gas fitting and electric wiring of two houses on Brunswick avenue for A. B. Smith, and the plumbing, heating and gas fitting of six new houses on the corner of Albany and Barton avenues.

The John Ritchie Plumbing and Heating Co., Limited, Toronto, have secured contracts for the plumbing and heating in connection with the remodeling of the Union Loan Building, Toronto street ; the plumbing of the new factory of The Grant-Hamilton Oil Co., on Strachan avenue ; the plumbing of two houses on Langley avenue, for Frank Hillock ; the plumbing and heating of a residence in Rosedale for Hugh Munroe ; the plumbing of three houses in Parkdale, for John Laxton, and the plumbing in connection with the remodeling of a house on Wellesley street, for R. J. Christie.

A SEPTIC TANK RECOMMENDED.

Engineer Rust is recommending the erection of a plant for the treatment of sewage in that part of Toronto lying east of the Woodbine race course. He proposes the construction of a small septic tank and bacteria beds at the foot of Woodbine avenue. This place would take in that part of Toronto from the Woodbine to a point 1,220 feet east of Lee avenue and would cost about $35,000 besides an annual outlay for maintenance of about $600. This amount would include the construction of a drain for sewage only, the building of the septic tank and bed, and ejectors to lift the sewage at one or two points. A portion of the cost of this work could be avoided, Mr. Rust thinks, by constructing the proposed main intercepting sewer along Queen street.

A NEW CHURCH.

A new Methodist church will be built at Birr, Ont., at a cost of $4,000. The church proper will be 30 x 44 feet, with a 10 x 16 alcove for the choir. The Sunday school room in the basement will be 30 x 32 feet, with a meeting room in the rear 12 x 18 feet. The church will be heated by a furnace, lighted by acetylene gas, and have a seating capacity of 250. The exterior will be of white brick.

BUILDING OPERATIONS IN THREE TOWNS.

There will be quite a number of buildings constructed in the towns of Windsor, Walkerville, and Sandwich, Ont., this year.

In Windsor land is being bought for the erection of about 60 houses in the south-east portion of the town. They will be mostly frame cottages and two-storey buildings. A temple, for the Masons, and a new $20,000 public library building will also be constructed there as well as a new $40,000 town hall. The Roman Catholics may also build a church and two separate schools.

During the summer about 50 houses will be built in Walkerville, and a greater number at Sandwich.

NEW BLOCK IN VANCOUVER.

A new block will be erected at Vancouver shortly on Hastings street. It will be a three storey structure with a 50-ft. frontage. The basement will be equipped with Turkish baths, the ground floor will be divided into stores, the first floor into offices and the third floor will be a dancing hall. The plans are being prepared by Emil Guenther, architect, and work will be commenced on the building in a few weeks.

SOME BUILDING NOTES.

A Methodist church is to be built at Wakefield, Man.

A farmers' elevator is being constructed at Wolseley, Man.

A large summer hotel will be built at Lake Massasaga, Ont., this year.

A movement is on foot to erect a new Anglican church at Rossland, B.C.

The Roman Catholics of Rossland, B.C., are considering the erection of a church there.

A new business block is being commenced for R. J. Inglis on St. Catherine street, Montreal.

Dr. McGillvary is building a two-storey brick building for store and office purposes at Sydney, C.B.

The congregation of St. Stephen's Church, Winnipeg, will build a new church at a cost of $40,000.

A company with a capital of $20,000 has been formed for the construction of a summer hotel at Kincardine, Ont.

A new ten-roomed schoolhouse will be erected on the site of the present Mary-street school, Hamilton, Ont.

John Clapper is building a tenement house, and J. S. Fralick intends building a residence at Morven, Ont.

Farr & Lee and Edward Bros. will both erect buildings on Granville street, Vancouver, B.C., this summer.

The Ontario Fruit Package Co. are building an addition to their factory at Ingersoll, Ont.

C. F. Doe has taken out a building permit at London, Ont., for the erection of three brick cottages on Hyman street, for $4,000.

The Baptists are preparing to erect a new church at Durham, Ont. A new residence will also be erected there by the Rev. Mr. Newton.

PLUMBING AND HEATING NOTES.

Bridgewater, Ont., is putting in a waterworks system, and the clerk of the town is advertising that there is a good opening for a plumber there.

HARDWARE FIRM DISSOLVES.

The partnership that has heretofore existed between James J. Bambridge and W. A. Sherrin, hardware merchants, Souris, Man., has been dissolved and the business is being continued by James J. Bambridge and C. W. Miller, the latter having purchased Mr. Sherrin's interest in the firm, under the style of Bambridge & Co. This firm has been in business at Souris for eight years, carrying a $10,000 stock. They write to "Hardware and Metal" : "We have been profiting every month through reading your valuable journal."

A large Monarch brickmaking machine is being installed by The Mira Brick Co. at their works, Mira Ferry, near Sydney, C.B., and it is expected that the output of these works during the season will be about 3,000,000 bricks.

RAMSAYS VIENNA GREEN IS GREEN AND STAYS GREEN

Every painter wants a green generally that he can depend upon. Window blinds, doors, and all zinc trimmings must have **good** green. Ramsays Vienna Green is for good work. It is the richest, the finest ground, purest in tone, and the strongest of all the greens. Give your painters a green that will do good work, that will please their customers, and the difference of a cent or two in cost will not count. We have booklets to assist you.

Eastern Agents: W. L. Haldimand & Son, Montreal, Que.

CUSSIN'—DISCUSSIN'

Dealers may avoid the former and have the satisfaction of hearing their customers discussing in terms of praise the goods that are right.

Always handle the best.

Satisfaction is assured if the Dowswell Manufacturing Co., Limited, are the makers of the goods you sell.

The New Century Washing Machine

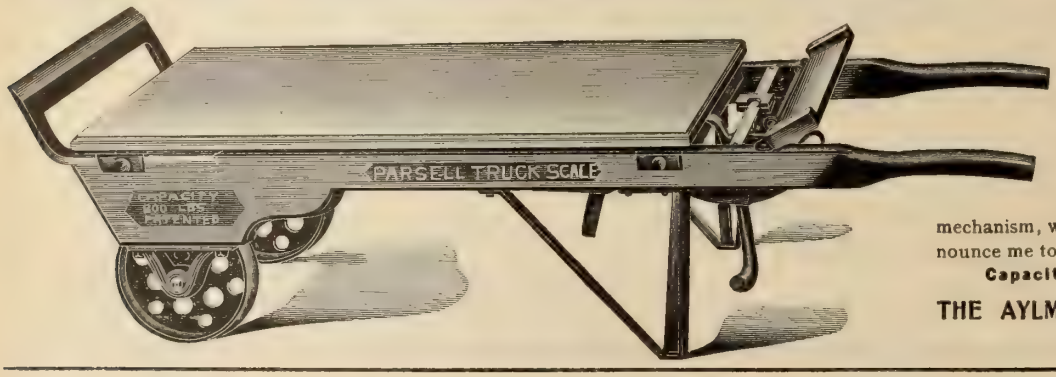
This cut illustrates the latest and best machine for washing clothes yet invented

Having strong spiral springs and ball-bearings—the same as used in High-Grade Bicycles—very little effort is needed to do what with other means is hard work.

Nothing so easy—nothing so thorough—nothing less wearing on garments. It is perfection.

A customer says: "It has none but good points."

Another customer says: "It is a darling; washes a tubful in five minutes."



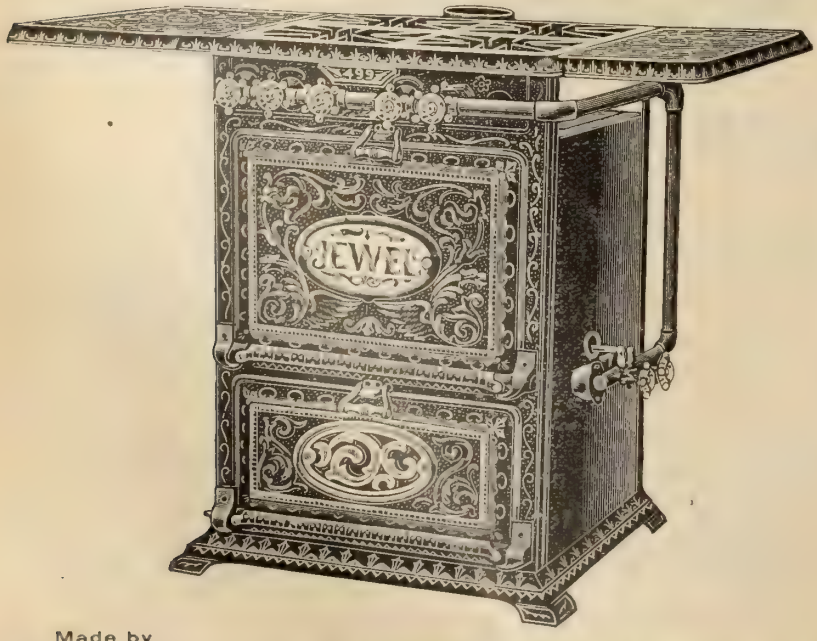
It is the **New Century Washer.**

Every Hardware Dealer should have them. They are not the cheapest, but are sellers, and will do all that is claimed

The operator can positively do the work, and without effort, while seated, and the machine is enclosed, retaining heat and vapor.

The Dowswell Manufacturing Co., Limited,
Sole Manufacturers in Canada. **Hamilton.**

I AM THE PARCELL DROP LEVER TRUCK SCALE.



I HAVE no connection or relationship with any other Truck Scale. Do not condemn me because some other Truck Scale was not right, but give me a chance to prove to you that I am the most convenient scale made, and that I am perfectly correct and a first-class piece of mechanism, which I must be, as good inspectors pronounce me to be a first-class article.

P.S.—Catalogue on application.

The best for the purpose:—

In buying an article, it is always economy to procure the best for the purpose it is required. If you want a suit of clothes for hard and rough wear you would not think of getting a fine class of tweed or cloth; or a pair of boots for outdoor use to stand wet and rough usage, you would not buy a patent leather pair which would be suitable for indoor use. So with reference to horse nails, which have to stand the constant pounding on the roads of a heavy horse all day long, and the hard shocks and strains against all kind of obstructions, you want the very best material for this purpose, and made in the best way.

We make the "C" brand horse nails from the best material known or used in the world for making horse nails, and by our "hot-forged" process obtain the best results it is possible to get. The "C" horse nails will stand the most severe tests and hardest usage, and last longest as compared with any other nail.

Their first cost is a little more but they are worth the difference. It is only a trifle on a set of shoes, less than one cent for the 32 nails. In ordering demand our "C" brand if you want the best for the purpose of shoeing a horse.

Canada Horse Nail Company

MONTREAL.

INCREASED PIG IRON OUTPUT.

THE Iron Age in its last issue had the following summary of blast furnace capacity in the United States now in operation :

"Although, quite a considerable number of active furnaces have been forced to blow out for repairs, yet the capacity at work is larger than it has been. Owing to the fact that the figures for one large interest were based on February 1 and March 1, on rated capacity rather than on the actual output, although the latter was available, the capacity on those dates was placed too high. We have revised the figures as below.

"It looks as though we might after a while reach a monthly output of fully 1,300,000. As a matter of fact, we have been falling 40,000 to 50,000 tons a month short of this—in full months and with the plant keyed up to its best even moderate additions are not readily achieved.

"Stocks have now dwindled until they are insignificant.

"The weekly capacity of the furnaces in blast on April 1 compares as follows with that of the preceding periods :

	Total capacity per week. Gross tons.	Coke capacity per week.	Charcoal capacity per week.
April 1, 1902	337,424	331,140	6,284
March 1	323,028	316,039	6,989
February 1	332, 45	32[illegible],440	6,005
Janua y 1	298,460	291,992	6,468
December 1, 190[illegible]	324,761	3[illegible]7,358	7,403
November 1	320,824	313,775	7,049
October 1	307,982	300,538	7,444
Septemt er 1	299,861	293,256	6,605
August 1	303,847	297,269	6,578
July 1	310,950	303,793	7,157
June 1	314,505	306,991	7,514
May 1	301,125	293,915	7,210
Ap il 1	296,676	288,766	7,910

FURNACE STOCKS :

"The position of furnace stocks, sold and unsold, as reported to us, was as below on April 1, as compared with the five preceding months, the same furnaces being represented as in former months. This does not include the holdings of the steel works producing their own iron :

Stocks—	Nov. 1.	Jan. 1.	Mar. 1.	Apl. 1,
Anthracite and coke	223,089	179,993	96,315	69,974
Charcoal	50,162	38,091	29,030	24,289
Total	273,251	218,084	125,348	94,263

BOUNTY ON ARSENIC.

The request of the large delegation of mining men from Central Ontario who waited on the Dominion Government recently, asking for a bounty on arsenic, will be granted. The sum of $150,000 will be donated, spread over a period of seven years, on a basis of so much per ton. This grant is conditional upon the Ontario Government voting $100,000 to assist the industry, in place of the $50,000 adopted by the last Legislature.

SCREW MACHINES.

⅝, ⅞ and 2″ Cleveland auto, A1.
Lot of No. 1 and No. 2 P. & W. hand.
No. 0, No. 1 and No. 2 P. & W. double turret, auto.
20 x 7 Fay & Scott, univ.
15 x 6 Jones & Lamson turret.

SHAPERS.

24″ Walcott shifting belt.
18″ Wright friction.
20″ Chase friction.
Lot of trav. hd. shapers, different sizes.

PLANERS.

51 x 50 x 18 second-hand planer, 1 hd., good.
30 x 30 x 8 Whitcomb, 1 hd., good.
30 x 30 x 8 L. W. Pond, 3 hds, good as new.
24 x 28 x 6 hendey planer, all feeds.
24 x 24 x 6 Powell 1 hd., good.

DRILLS.

6′ arm univ. radial heavy pat.
Pond Machine Tool Co.'s radial drill.
Pond Machine Tool Co.'s heavy suspension, A1.
4′ arm Betts radial.
40″ Gleason upright, B. G. & P. F.
42″ Cin. ditto.
40″ Michigel upright.
25″ Gould & Eberhardt, B. G. & P. F., good.

MILLING MACHINES.

No. 3 Cin. univ., without hd.
18- No. 2 P. & W. Lincoln pattern miller's, good.
Heavy Pedrick & Ayer univ., all feeds.
4 No. 2 B. & S. plain miller's, good as new.
2 No. 1 B. & S. dittos.

MISCELLANEOUS.

No. A ¼ New Doty punch and shear, 9″ throat.
Lot of friction board drop hammers, Nos. 400 to 1700.
No. 600 P & W. drop hammer.
Small No. 400 steam hammer.
200-ton vert. hydr. press.

Also large assorted stock of other tools. Send for complete list.

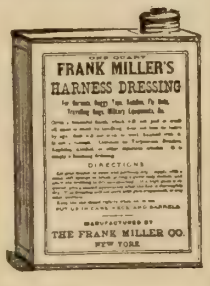
FRANK MILLER'S

HARNESS PREPARATIONS.



FRANK MILLER'S

HARNESS DRESSING

Recognized as

"THE STANDARD."

Produces a brilliant jet-black gloss which will not peel or smut and to which dirt will not stick.

Frank Miller's

Harness Soap

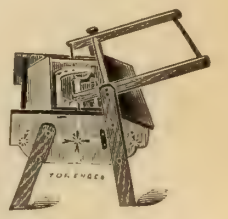
Unrivaled for cleaning and softening Harness. Put up in cakes, pans, boxes and tubs.

FRANK MILLER'S

Harness Oil.

Preserves and softens the leather, thus adding life.

The highest quality of oil on the market.



"DAISY" CHURN

Has tempered steel cased bicycle ball bearings, strongest, neatest and most convenient frame. Only two bolts to adjust in setting up. Steel Bow Levers, suitable for either a standing or sitting posture. Has four wheels and adjustable feet to hold stand steady while churning. When churn is locked to stand the bow can be used as handles to move it about on the front wheels as handy as a baby carriage. Open on both sides to centre, giving free space for pail. Made with wood or steel stands, with Cranks only, or Bow Levers as desired.

Vollmar Perfect Washer

Has a most enviable record. A perfection of its kind—will wash more clothes in less time, do it better and easier, with less wear and tear, than any other machine.

HEAD OFFICE: OWEN SOUND.

A BRIEF HISTORY OF STREET GAS.

THE beginning of the last century, says Scientific American, was marked by an invention which, although of no apparent promise at first, did much to change our methods of illumination. The invention in question was the industrial production of gas from vegetable and mineral fuels, and was the culmination of a series of investigations instituted by the French engineer, Philippe Lebon d'Hambersin, whose name is now almost forgotten.

Combustible gases were known before Lebon's day. The existence of gaseous fluids was known, even to the ancients, notably atmospheric air. Other gases were recognized by their effects upon various bodies. Carbon dioxide, for example, was a familiar gas by reason of its destructive effects; combustible marsh gas was also known. Coal-mining, with which mankind has been more or less familiar for thousands of years, undoubtedly revealed combustible gases; but since there were no means of ascertaining the chemical nature of these gases, they were simply regarded as modifications of ordinary air, which had acquired new properties.

Van Helmont was the first who discovered the existence of gaseous fluids of constant chemical composition — fluids which were to be sharply distinguished from ordinary air, and which he called "gases." The name applied by Van Helmont to these fluids is still used to-day in modern chemistry. In the Philosophical Transactions of 1667, a spring in the vicinity of Wigan, Lancashire, is described from which inflammable air arose. In the volume of the Transactions for 1733 a gas is mentioned, which was produced in a coal mine in Cumberland, and which was collected in a vessel in such a manner that it could be ignited by means of a burner-pipe.

Nothing more was done to ascertain the nature of these combustible gases until Dr. John Clayton distilled hard coal in a closed vessel and obtained a black oil and a constant gas, which latter he collected separately in a closed vessel, from which burner-tubes led. An account of these experiments may be found in the Philosophical Transactions for 1739.

After a series of experiments with vegetable material, Dr. Hales found that fully a third of a distilate of oil was lost in the form of an inflammable vapor.

Watson, Bishop of Llandaff in 1767, studied the nature of this vapor and of the gaseous products of the distillation of coal. He found that the volatile product could be ignited, not only as it was discharged from the distilling apparatus, but that the inflammable properties were preserved even after the gas passed through water and through two long coils of pipe. Watson's constant products were obtained from ammoniacal fluids, from a viscid, tar-like oil, and a spongy coal which we now call coke. These were only laboratory experiments, for the purpose of determining the constituents of the oil. No one dreamed of practically using the volatile inflammable products.

The first investigator who laid claim to the discovery of illuminating gas was undoubtedly Philippe Lebon. The idea of using carbureted hydrogen gas for illuminating purposes seems to have had its birth in Paris in 1786. But the laboratory experiments made in England and France up to the year 1799 yielded no practical results. In the year VIII. of the Republic (1799) Philippe Lebon, who at that time was well known for his improvements in steam engines, described an invention for the utilization of inflammable gas as an illuminant. Lebon generated his carbureted hydrogen gas by distilling wood, obtaining as a by-product tar, wood alcohol and all the other substances found in a retort after the destructive distillation of vegetable material. The first carbureted hydrogen apparatus was installed at Havre for the illumination of the lighthouse. In the same year Lebon took out a patent on his invention. He exhibited his apparatus at his house between 1799 and 1802. The odor of illuminating gas, when it first comes out of the retort, is by no means agreeable. Frenchmen, therefore, immediately condemned the new system of illumination.

In order to overcome this objection as well as others, and to make the invention of Lebon more practicable, it was necessary to wash the gas. Had Lebon not died in the midst of his labors, he would undoubtedly have devised a method of ridding the vapors of some of their impurities. His widow in the year X of the Republic received a patent on an improved process. She died soon after her husband.

Lebon's memorial was published in 1801, and bore the title "Thermo Lamps or Stoves, which Heat and Light Cheaply and which generate Power, useful for all Machines." Lebon's invention was developed in England, and was first practically utilized in that country by an engineer named Murdoch, in Soho, near Birmingham, at the large factory of James Watt, the inventor of the steam engine. In 1802 the entire facade of this large building was illuminated by gas in honor of the peace of Amiens. Shortly after this event a German named Winsor, who had translated Lebon's memorial into German, came to London, collaborated with Murdoch, and received from King George the exclusive privilege of lighting London by gas. On July 16, 1816, his privilege was confirmed by Parliament; and by 1823 England had adopted gas.

After Winsor had assured himself of the success of gas illumination in England, he went to France in 1815, rented an establishment in the Passage des Panoramas, and in a short time had the whole Passage lit by gas as well as the Palais Royal. After these successes, Winsor succeeded in founding a company, which was, however, by no means successful. Other companies soon followed, and in a short time gas became one of the most-widely used illuminants.

Lebon was born in Brachay (Departement Haute Marne) in May, 1767. He studied in Paris, and graduated from the Ecole des Ponts et Chaussees. As we have already remarked, his first scientific successes were achieved in the field of steam engineering. His improved steam engine received a prize of 2,000 livres in 1792. Lebon was murdered on December 2, 1804, under circumstances that have never been cleared up.

A number of tinsmiths from the surrounding districts held a meeting on April 3, at Winchester, Ont., to form a protective association and to take steps to regulate prices and prevent manufacturers from selling a certain class of goods to general stores.

Apollo galvanized iron commands more money and shorter credit—at wholesale —than any other—but saves the worker money.

STICKY TARRED PAPER.

Most of you have had more or less trouble owing to Tarred Paper sticking, and we admit we used to make some of that kind ourselves. During the last five years we have had only two complaints, and in both cases the sticky Tarred Paper complained about had neither been manufactured nor sold by us.

Our Registered Brands are: **"Red Star", "Anchor," "O.K." and "Victoria."** Don't you think you had better handle them?

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

"That Made the Hit"

This is a drawing of the Patent Connection that made the "SAFFORD" famous the world over; that revolutionized radiator building; that made it possible to put a radiator together without bolts, red lead, rods or packing.

The "SAFFORD" is the only radiator on the market for hot-water and steam heating. It means satisfaction every time—is easy to handle for the contractor.

KEEPING UP THE ASSORTMENT.

The fellow in the picture is in the employ of one of those merchants who are **wide awake** to the fact that to meet the demands for **ALABASTINE** which come at this season of the year, he must have an assortment of all shades in stock.

CUSTOMERS for ALABASTINE, or anything else for that matter, who have to go elsewhere to get what they want, may be lost altogether. At any rate the opportunity is given the other dealer to explain how people can **always get** everything they call for at **his** store, etc.

ALABASTINE is the goods that are in demand. It has stood the test of time, and people know it is all right. It is made in Canada, by Canadian labor and from rock taken out of Canadian mines. Is your assortment complete?

For sale by Wholesale Hardware and Paint Dealers. Manufactured by

The ALABASTINE COMPANY, Limited, PARIS, ONT.

HARVEST TOOLS AGAIN ADVANCE.

HARVEST TOOLS have again advanced 10 per cent. This is the second advance in less than two weeks, and the third since the opening of the season.

The season, it will be remembered, opened at a decline of about 40 per cent., compared with the figures ruling last year, due to the collapse of the combination in the United States and the consequent threatened competition of the manufacturers of that country. There was some competition, but the demand in the home market has been so active that it was not so keen as anticipated.

The Canadian manufacturers have also been experiencing an unusually brisk demand, which, owing to the difficulty of getting raw material, particularly malleable iron, they have been unable to fully satisfy. It is under these circumstances that the manufacturers have been induced to advance prices so rapidly.

In the three advances that have been made there is a total appreciation of about 33⅓ per cent. As there is talk of still higher prices, it is possible figures may be worked up to where they were last year. And it must be remembered that iron and steel are a great deal dearer now than in 1901.

HIGHER PRICES ON WOOD HANDLES.

WHITE hickory and ash handles of the better grades are among the goods that are advancing in price this week.

White ash handles, second growth and extra, are now quoted at 25 per cent. discount off the list, while on other grades the discount is 35 per cent. The discount on hickory fork handles, firsts and seconds, is 50 per cent. off the list, and on other hickory lines 35 per cent.

The advance is understood to be due to an increasing scarcity in the particular kinds of wood from which the handles are made. There is, it appears, plenty of red wood in the country, but, so far, hardware merchants have insisted on white wood being furnished, although, it is claimed, that red wood is just as serviceable and can be finished equally well. It is thought by some in the trade that the high price of the white will result in more attention being paid to red wood handles.

NEW PRICES ON WASHING MACHINES.

THE agreement of April 17 to maintain prices between manufacturers of washing machines was signed by Messrs. Cleland Bros. & Co., Meaford; The London Foundry Co.; The Dowswell Manufacturing Co., Hamilton; F. Sandford, Fenelon Falls, and J. H. Connor & Son, Ottawa. Considerable price cutting was done by one firm, which has now become one of the combination, and the agreement will put an end to this.

The following price list was issued by The Dowswell Manufacturing Co., Limited, Hamilton, on washing machines, on April 18:

	Per doz.
Jubilee	$33 00
Ontario	33 00
Canadian	34 00
Dowswell	36 00
Peerless	38 00
Leader	41 00
Eastern Star	41 00
Hamilton	42 00
Rocker	48 00
Re-Acting, round	51 00
Re-Acting, square	54 00
Premier	54 00
Sunlight	66 00
New Century	72 00

Terms—3 per cent. 30 days, or 4 months. Freight equalized with Montreal, Ottawa, Fenelon Falls, Meaford, Toronto, Hamilton and London, on shipments of half-dozen and upwards.

A BIG COMBINATION'S EXPANSION.

THE expansion of the Atlantic steamship combination is easily the subject of most general interest in the financial and commercial world this week.

Mr. J. Pierpont Morgan, who was the chief factor in bringing about the combination last year, has been equally as active in promoting the present scheme, which enormously increases the magnitude and importance of the organization of last year.

Full details of the undertaking have not yet been made public, but enough is known to give one an idea of its importance.

The White Star Line, with its steamers aggregating 133,675 tonnage, has certainly been taken over by the combination. The White Star Line is noted for having the largest steamers plying between America and Europe, namely, the Oceanic of 17,274 tons and the Celtic of 20,900 tons.

Negotiations are apparently pending with other lines. But it remains to be seen whether they will be successful or not. It is well known that the efforts to secure the Cunard Line have so far proved abortive. The Cunard Line, in fact, appears to have got up a little combination on its own account, having, it is said, secured working agreements with such Transatlantic companies as the North German Lloyds, the Hamburg-American, Generale Transatlantique (French), and the Allan and Anchor Lines.

Mr. Morgan's steamship combination now controls about 840,077 of Atlantic tonnage, made up as follows, counting the steamers of the absorbed companies now being built :

Leyland Line	110,607
West India and Pacific Fleet	158,659
American Line	44,871
Red Star Line	131,173
White Star Line	133 675
Atlantic Transport Line	185,343
Dominion Line	73,749
Grand total	840,077

The new combination is to be incorporated under the laws of New Jersey. The exact capital stock has not yet been decided upon, but it is expected to be from $150,000,000 to $200,000,000. The money necessary to carry out the deal has already been subscribed.

The underwriting syndicate is practically the same which underwrote the Billion-Dollar Steel Trust, as it is called, and it is understood that each of the different lines comprising the steamship combination will conduct its own affairs, subject to supervision by the head centre, just as is done by the different companies which compose the steel trust.

The fact that some of the steamers which have become the property of the combination are on the British Admiralty list has caused some concern as to whether, if Great Britain was at war, she could secure these vessels if required for service. Upon this point Mr. Perkins, one of Morgan & Co.'s partners, in an interview in a New York paper says : "There will be no change in the status of steamers sailing under the British flag. In case of war Great Britain has the right to call upon these ships for service, notwithstanding they are under control of an American company."

If this is true it will greatly reconcile the British—and the Canadian public as well—to the gigantic combination which has just been effected by Mr. J. Pierpont Morgan and his associates.

BRITISH HARDWARE EXPORTS TO CANADA.

THE British trade returns for the first three months of the present year show an all-around increase in the exports of hardware, cutlery, iron and steel to Canada during that period. This will be be gathered from a glance at the following table :

BRITISH EXPORTS TO CANADA (3 MONTHS).

	1901.	1902.
Cutlery	£10,035	£10,994
Pig iron, tons	196	1,280
Tinplates, tons	2,271	4,396
Railroad iron, tons	....	3,908
Galvanized sheets, tons	339	1,119
Hardware	£5,631	£6,836

The increase is quite substantial in nearly every line. Whether, however, we can look for the increase to be maintained in the future is another matter. In some lines, particularly railroad iron and galvanized sheets, the increase is, no doubt, in part at leost due to the extraordinary demand that is being experienced in the United States, which is causing the manufacturers there to pay less attention than usual to the Canadian market.

The general export trade of Great Britain during the three months in the hardware and metal trades compares on the whole fairly well with the corresponding period of 1901. Cutlery shows a slight falling off, the figures for the respective periods being £155,931 and £146,901. In spite of an increase of nearly 20,000 tons in the exports of pig iron, the total to all countries was 149,213 tons against 163,583 tons during the same three months of 1901. Tinplates, unenumerated cast and wrought goods, railroad iron, black plates, galvanized sheets, agricultural machinery (not steam), copper, bar, angle, bolt, wire and wire rods, hoops, unwrought steel, old iron, sewing machines and cycles, all showed increases. Among the lines which showed decreases were steam engines, implements and tools, plate and plated wares, and small firearms.

One of the features of the British export trade in iron and steel for the three months was the shipments to the United States. And in this connection the following table from The Iron and Coal Trades Review will doubtless prove interesting to our readers :

BRITISH IRON AND STEEL EXPORTS TO UNITED STATES (3 MONTHS).

	Tons.	Value.	Avg. value per ton.
Pig iron	24,687	£103,995	£ 4.2
Bar, angle, etc	1,087	21,982	20.2
Wire	1,050	23,099	22.0
Tinplates	20,669	276,726	13.3
Cast and wrought, etc.	818	14,790	18.0
Unwrought steel	4,631	91,154	19.6
Steel manufactures	63	18,803	298.4
Total	53.005	£550,556	£ 10.3

The iron and steel trade in Great Britain is fair, on the whole, with prices firm, although these conditions are not nearly as pronounced as they are on this side of the Atlantic.

WHY TILSONBURG HAD ONE "L."

A good many people have no doubt wondered why the name of Tilsonburg has been spelt with one "l" when the name of the founder, George Tillson, was spelt with two "l's."

During the last session of the Ontario Legislature a Bill was introduced to spell the word with two "ll's," and it then came out that the cause of the word being spelled with one "l" was an error on the part of a clerk. But, although it was an error, the town had to get along with one "l" until an Act was passed at the last session of the Ontario Government to spell it as it was originally intended, with two "ll's," after the founder of the town, whose son, Mr. E. D. Tillson, died in January last at an advanced age.

Such are the ways of red-tape.

TRADE IN COUNTRIES OTHER THAN OUR OWN

SUPPLY AND DEMAND AND THE IRON TRADE.

QUOTATIONS of iron and steel cannot yet be considered inflated, but the market is following a natural course, despite the efforts of leading interests to maintain a conservative position. Supply and demand must in the long run govern prices, and, in this industry, needs are greater than available stocks, although productive capacity has largely expanded. Pressure for pig iron is very great, but furnacemen have contracted for their output far into the future, and consumers who want prompt delivery are willing to pay premiums. Similarly as to steel rails, the regular price of $28 has become nominal on current business, an advance of $5 a ton being readily paid for immediate delivery. This is especially noticeable on urgent trolley construction. Specifications for new buildings promise abundant additional contracts for structural material, while some mills have already sold their entire output for 1902. Machinery and hardware lines share in the exceptional activity, and are doing a brisk export business in spite of high prices.—Dun's Review.

GALVANIZED SHEETS.

The American Sheet Steel Company has started quoting net prices on galvanized sheets. This custom, according to The American Metal Market, has been more or less general in the jobbing trade for years. One large jobber in Pittsburgh states that about 90 per cent. of their sales have been made on net prices for some time. The independent mills are still quoting discounts off list, but the change instituted by the largest producer is considered a good one, as it will save considerable clerical work. The small buyer invariably insists on net quotations, and the reform means, not the introduction of any new system, but the abolishment of one of the two systems which have been in use side by side.

The immediate motive for the change seems to have been a desire to revise the relative prices in the heavy gauges. On the light gauges the new net prices show no change, but in the heavy gauges, some are lower and some are higher. This is seen in the following table :

Gauge.	List.	New Net Price.	Equivalent Discount.
14	12c.	3.06c.	70, 10 and 5½
16	12c.	3.18c.	70, 10 and 2
20	13c.	3.38c.	70, 10 and 3¼
22 to 24	14c.	3.69c	70, 10 and 2½
26	15c.	3.95c.	"
27	16c.	4.20c.	"
28	17c.	4.47c.	"

Prices on 500-bundle lots and over are slightly lower than the above, corresponding to the old discount of 70, 10 and 5 per cent., which is still quoted by the independent mills. On carload lots, for quick shipment, the market is all of 70 and 10.

PIG IRON HIGHER IN GREAT BRITAIN.

The general tone of the pig-iron market is decidedly steady, with here and there an upward tendency, which is, perhaps, most pronounced in the Cleveland district, where warrants, which last month fluctuated in the neighborhood of 46s., are now maintaining an average level of at least 1s. more, while Scotch warrants, which a week ago were quoted at 53s., now stand at 53s. 5d. No. 3 Cleveland has advanced about 6d., having been selling at about 47s. 6d., although some business was done below that figure by second hands. The average realized price per ton of No. 3 for the first quarter of the year—44s. 0.13d.—shows a reduction of nearly 10½d., as compared with the figure for the previous quarter. There is a fair demand for hematite. In Middlesbrough, prices of mixed numbers have fallen away slightly ; but in Barrow they are maintained. The following is a statement of the stocks of pig iron in public stores :—

Public stores stocks, in tons :	Wednesday.
Connal's at Glasgow	53,320
Connal's at Middlesbrough	140,500
Connal's at Middlesbrough, hematite	300
West Coast hematite	18,000
N.E.R. Stores, Middlesbrough	360

During the week ended April 7 the stocks at Middlesbrough increased by 328 tons, while at Barrow and Glasgow, there were decreases of 10 and 62 tons respectively. On the year there is an increase of 2,864 tons at Middlesbrough and 3,079 tons at Barrow, but a decrease of 4,991 tons in Glasgow. The net change during the week is an increase of 256 tons, and during the year to date an increase of 952 tons.—Iron and Coal Trades Review, April 11.

NEW YORK METAL MARKET.

The cable this morning brought news of a further very decided slump in pig tin values on the London market. It was learned that the break was due to the withdrawal as a buyer of the interest which had been supporting that market, owing to the fact that it was compelled to take too much metal to maintain its position. The price of spot tin broke £3 10s., making since Friday's close a total decline of £4 15s. Futures dropped £3 early in the day but recovered 5s. later and closed steady under liberal buying. The effect of to-day's London news on this market was not as pronounced as was the lesser decline of yesterday, for the reason that New York did not fully respond to the previous advance on the other side, and this last break puts prices there only to about a parity with New York. With the tendency downward buyers here are less inclined than ever to take hold, and the market closed dull though the tone was steadier than earlier in the day. Spot was held at 27.75c. with 27.50c. bid ; April was quoted at 27.25c. bid and 27.75c. asked ; May, 26.90 @ 27.25c., and June, 26.50 @ 27c.

The quotations cabled from London were as follows :

	Noon.	Close.
Spot tin	£126 0s. 0d.	£126 0s. 0d.
Tin, three months	122 15s. 0d.	123 0s. 0d.
Sales of spot		150 tons.
Sales of futures		450 tons.

COPPER.—There was a renewal of speculative interest in standard here today, resulting in sales of 200 tons July at 11.25c. There was very little trading in the open market, business being restricted to occasional sales of small lots to cover passing wants of smaller consumers. Lake was held at 12.25c., but the views of large buyers were not above 11.75c. For electrolytic 11.60c. was bid and 12c. asked, but no doubt the latter price would have been shaded. For casting 12c. was nominally quoted. The closing quotations on standard were 11.10 @ 11.30c. for May, June and July. London was weak this morning, declining 7s. 6d., but recovered 2s. 6d. of the loss after noon and closed steady.

The London market was reported by cable as follows :

	Noon.	Close.
G. M. B. copper	£52 12s. 6d.	£52 15s. 0d.
G. M. B. copper, 3 months	52 12s. 6d.	52 15s. 0d.
Sales of G. M. B. spot		450 tons.
Sales of G. M. B. futures		200 tons.

PIG LEAD.—The London market continues to advance, to-day's rise of 1s. 3d. putting the price 7s. 6d. above the point at which the upward movement began. The New York market remains uninteresting with prices steady at 4.10 @ 4.15c. as to quantity and date of delivery. The St. Louis market was reported to be quiet at 3.97½ @ 4c.

SPELTER.—In sympathy with recent advices from the West the market here is easier and a shade lower, spot being quoted at 4.42½c., and May-June at 4.37½c. St. Louis was quiet at 4.15c. The London market was unchanged.

London, April 22.—G. M. B. spelter firm at £18.

REGULUS ANTIMONY.—Business is of a moderate jobbing character, and prices are unchanged at 10¼c. for Cookson's ; 8 @ 8¼c. for Hallett's, and 7½ @ 8c. for other brands.

OLD METALS.—Nothing new was noted in this market. The demand was slow with the tone steady.

Although the demand for foundry pig lacks the strength shown until very recently there is no prospect of early relief from the great scarcity of material. Deliveries are delayed because the furnaces have not been able to catch up with their contracts, and are in many instances so far behind that foundrymen with deliveries on low-priced contracts due have to pay high premiums on what little iron they can pick up. A local agent of a large Southern company states that many foundries are consuming more iron than they had expected to use and are asking to have deliveries anticipated. The companies, however, are unable to comply. While some of the furnace companies are under the impression that foundrymen are overbuying, he fails to find any evidence in support of it among his customers. On the other hand, he knows that some foundrymen have bought iron on speculation and have tried to have their contracts turned over to other parties. The companies, however, endeavor to avoid making such deliveries on the ground that they sold the iron to the original buyer for his own consumption. A Pittsburgh report is to the effect that The United States Steel Corporation contemplates importing large quantities of Bessemer iron, and asserts that The Bessemer Furnace Association finds that it will be unable to deliver in the fourth quarter the proportionate amount of the recent sale of Bessemer iron to the Trust. Such delivery, the report says, will be deferred.

Continued activity exists in nearly all branches of finished material, and very full prices are being paid for anything obtainable for delivery at a reasonably early date. Some large lots of angles are coming from abroad, it is reported, and will relieve the stringency in that line temporarily, at least.

TINPLATE.—The market remains very quiet, the only movement being in the way of deliveries on contracts. Prices are maintained at the previous quotations.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

WALTER ANDERSON, Hamilton, Ont., has been appointed permanent liquidator of The Canada Can Co., Limited, manufacturers, Dundas, Ont.

Thomas Turff, builder, Toronto, has assigned to R. H. McKay.

John Coyne, general merchant, Portage du Fort, has effected a compromise.

Gauthier & Dufresne, lime burners, Montréal, are offering to compromise.

Thomas Dunn & Co., Limited, hardware merchants, Vancouver, B.C., have assigned.

P. Ferland, general merchant, St. Jean Chrysostome, Que., has assigned to V. E. Paradis.

W. J. Clelland, general merchant, Hemmingford, Que., has compromised at 50c. on the dollar.

Ovide Martin, general merchant, St. Guillaume D'Upton, Que., has assigned to Lamarche & Benoit.

The creditors of James Hamilton, hardware merchant, Woodstock, Ont., held a meeting on April 25.

John McConville & Co., general merchants, Texada City, B.C., are offering to compromise at 50c. on the dollar.

V. E. Paradis has been appointed curator of P. Langlois, general merchant, St. Gregoire, Nicolet Co., Que.

F. W. Foster, general merchant, Ashcroft, B.C., has assigned to Hugh Davidson, and his creditors held a meeting on April 23.

PARTNERSHIPS FORMED AND DISSOLVED.

Guy & Lefebvre, tanners, Edmonton, N.W.T., have dissolved.

Roussin & Desjardins, blacksmiths, etc., Montreal, have dissolved.

Poirier & Therien, general merchants, St. Remi, Que., have dissolved.

C. F. Comer & Co., hardware merchants, Calgary, N.W.T., have dissolved.

Ratz Bros., sawmill proprietors, Khiva, Ont., have dissolved. John Ratz continues.

Pavey Bros., carriagemakers, St. Thomas, Ont., have dissolved; Eli Pavey continues.

W. A. Kirkpatrick & Son, harnessmakers, etc., Toronto, have dissolved; W. E. Kirkpatrick retires.

Theodore Goulet & Co., manufacturer of sashes and doors, Shawenegan Falls, Que., have dissolved.

SALES MADE AND PENDING.

The assets of C. Collette, general merchant, St. Antoine, Que., have been sold.

M. W. Stroud, general merchant, Beaverton, Ont., is offering his stock for sale.

The assets of The Shipe Manufacturing Co., Limited, rims, skewers, etc., Clarksburg, Ont., are advertised for sale by tender.

William Murray, blacksmith, Victoria, B.C., is offering to sell out.

The stock of O. Rajotte, general merchant, Shawenegan Falls, Que., has been sold.

J. C. Nation, general merchant, Morpeth, Ont., is advertising his business for sale.

The Strathcona Electric Light Company, Limited, Strathcona, N.W.T., have sold out.

The assets of L. B. Fontaine, general merchant, St. Jacques, Que., are to be sold on April 29.

The trustees of the estate of R. B. Canfield, general merchant, Wallace, N.S., are advertising for claims.

An assignee's sale of the land of James Ritchie, sr., blacksmith, insolvent, Amherst, N.S., is advertised for May 1.

CHANGES.

Chapleau & Desjardins, masons, Montreal, have registered.

Marier & Tremblay, painters, etc., have registered at Quebec.

P. Dionne & Cie., contractors, Montreal, have registered.

Delorme & Cardinal, lumber merchants, Montreal, have registered.

Delorme & Cardinal, lumber merchants, Montreal, have registered.

P. Therien & Cie., general merchants, St. Remi, Que., have registered.

J. M. Hyde, general merchant, Vanessa, Ont., is succeeded by G. A. Howey.

J. H. Alliss, hardware merchant, Essex, Ont., has sold out to I. L. Cooke.

Wier & Hannan, machinists, Picton, N.S., are succeeded by Robb & Sons.

W. C. Latimer, general merchant, Creemore, Ont., has removed to Beaverton.

B. J. Collins, harnessmaker, Edmonton, N.W.T., has sold out to Wm. McArtney.

Alphonse Lefebvre & Co., hay merchants, St. Hugues, Que., have registered.

V. H. Pickering & Co., bankers, Shoal Lake, Man., are succeeded by Saltwell & Co.

D. C. McArthur, general merchant, Ninga, N.W.T., has sold out to N. J. Ryan.

S. A. Stockton, general merchant, Anagance, N.B., has sold out to G. W. Stockton.

J. Menzies, general merchant, Westholme, B.C., has sold the Chemainus branch to Hy. A. Howell.

The stock of Bellvance & Frere, general merchants, St. Fabien, Que., has been sold to Ed. Petitgrew, Trois Pistoles, Que.

J. E. Corbett, general merchant, Harbor au Bouche, N.S., is opening a branch at St. Peter's, under the style of J. F. Corbett & Sons.

The V. & B. Sporting Goods store, general merchants, Que., have disposed of the stock of Magnan & Frere to Cote, Boivin & Co., Chicoutimi, Que., at 67½c. on the dollar.

Gillespie, Bell & Co., dealers in automobiles, etc., Ottawa, have started business.

Sauve & Dagenais, wholesale and retail hardware merchants, etc., Montreal, have registered.

E. F. Bonsell, agricultural implement and bicycle agent, Almonte, Ont., is starting business.

Albert White, hardware, boot and shoe, and furniture merchant, Dutton, Ont., is closing out his boot and shoe department.

W. B. Bashford, hardware merchant, Rosthern, N.W.T., is reported to be succeeded by The Canada Territories Corporation, Limited.

Thomas Birkett & Son, Limited, wholesale and retail hardware merchants, Ottawa, have disposed of their Rideau street branch to Thomas Shore.

FIRES.

W. G. Simmie, Clavering, Ont., had his sawmill burned.

WHO SHALL BE MASTER?

THE following interesting letter appeared in The Montreal Gazette a few days ago. It was signed by Mr. C. T. Williams, of George W. Reed & Co., the well-known roofers of Montreal, and explains itself :

Editor Gazette,—An item in a late issue of your paper, referring to the demands of the metal roofers for a new scale of wages, contains the following sentence: "One large firm has refused to consider it." As the firm of G. W. Reed & Co. is evidently the one referred to, I should like to state plainly my position.

On the receipt of the circular from the local union, I placed the following letter in the hands of my men in order that there might be no ground for misunderstanding between us:

"To my employes,—I am in receipt of a circular from 'Local Union No. 116,' asking me to sign articles of agreement with them to take effect on May 1 next. I wish to say to the men in my employ that, after watching the results of such agreements, I am satisfied that they are not a benefit, either to the workmen, or the employer, and that I cannot undertake to risk capital or do business on such a basis.

"There are two items in the circular to which I especially object, and which I cannot accept under any conditions:

"1st. 'That the agent of the union shall have right of access to the shop, or work, at any time.'

"This I cannot permit. If any man has any cause of complaint, I am always ready to listen to him, and, if possible, come to an agreement in the matter; but no outsider has any business to come in between the men and myself, and will not be allowed on the premises.

2nd. 'None but members of Local Union No. 116 to be employed.'

"Any man has a right to decide for himself whether he wishes to belong to the union or not, and it is not for me to compel him to do so against his will. The only questions I have to ask are: 'Is he honest?' and 'Can he do his work?'

"Another thing I have always objected to is the placing of men on a level in regard to wages. Every man has a right to all he is worth, and no more. I would rather have a good man than poor, and am ready to pay each man all he will make himself worth without regard to the others.

"The relations between the firm and the men have been pleasant for many years, and I hope they will always remain so. I do not know who are and who are not union men, and do not wish to know. I can only add that if anyone cannot work under these conditions, I shall be sorry, but we shall part good friends. I only ask that you let me know at once, so that I can act accordingly."

It is not with me a question of wages. The house has always paid the highest market rates, and will continue to do so. Our best men, according to their own testimony, are perfectly satisfied with their wages, and wish to remain at work in what they claim is the best shop in the city, but the union has ordered that unless I sign their agreement they must strike. The whole thing is an attempt on the part of professional agitators from the United States to force Canadian employers of labor to submit to their dictation. It matters nothing to them that the pleasant relations of years between the employer and his men shall be broken up, nor how much the family of the honest workman shall suffer, so long as they can make a show of authority. As one of them told me only last week, "unless you sign that paper, you will not be allowed to finish your contracts."

I have always had to earn my own living. I know from experience what the life of a tradesman is. I have for years had control of men, but I long ago came to the deliberate conclusion that before I would sign any agreement that placed capital and credit at the mercy of professional agitators I would close up my business and find some more self-respecting method of earning a living.

The Moment You Accept

THE SHERWIN-WILLIAMS PAINT AGENCY

that moment you become part and parcel of one of the greatest, most forceful, most energetic, and most successful business organizations in the whole world. From that moment you begin to get selling helps that will lift up your general business, that will make your paint department more successful, better paying. When we sell a merchant a bill of goods, our interest in him has just begun. We stay by him through thick and thin, we push with him and for him, we never let up advertising for him, we are constantly thinking and planning new ways to get him paint orders, new ways to help increase his general sales. Our whole aim is to make him still more successful, to make his paint department a pronounced success.

If you would like to know more about our goods and our methods, if you want to avail yourself of all the helps we are ready to give you, send for the B-13 Booklet.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CHICAGO, NEW YORK, NEWARK, MONTREAL, CLEVELAND, BOSTON, TORONTO, SAN FRANCISCO, KANSAS CITY.

LE PAGE DOOR CHECK CO.

The Le Page Door Check Co., Toronto, whose address was given in an advertisement in the recent special number of HARDWARE AND METAL as 1397 King street west, have removed, and are now located at 102 Tyndall avenue.

COAL OIL STOVES CHEAP.

The Rochester Lamp Co., 24 Front street west, Toronto, are having a clearing-out sale of coal oil stoves to make room for fall stock. The line includes the blue flame electric oil cook stoves, which are well known among the trade. The coal oil stove season is now in full swing and the opportunity is a rare one to any dealer who wants to make a quick and profitable turnover. An advertisement on page 22 gives further particulars.

THE STATE OF MAINE.

Maine is generally known as the "Pine Tree State." A native of Portland, Maine, was asked by a Westerner what they chiefly raised in addition to clams and rocks "'way down in Maine."

"Men!" came the prompt reply.

Dunlop Bros. & Co., the hardware merchants of Amherst, N.S., have an international reputation, having customers on both sides of the border, as the following will show :

In a letter from Rangeley, Maine, Mr. T. W. Mitchell, a "man of Maine" and a carriagemaker in Rangeley, says: "Messrs. Dunlop Bros. & Co., Amherst, N.S.: Please find funds enclosed, for which send me coach painters' drop black, as I cannot get the right thing here. I find that the Canada Paint Co.'s drop black in japan stands the best of any I have ever used."

NEARING COMPLETION.

The refrigerating plant that is being installed in the premises of several produce merchants on Front and Colborne streets is advancing towards completion. The boilers and engines are now being installed, and the whole thing is expected to be in operation by May 15.

BACK FROM THE WEST INDIES.

MR. ROBT. MUNRO, managing-director of the Canada Paint Co., and president of the Canadian Manufacturers' Association, and Mr. E. F. M. Stuart, also of the Manufacturers' Association, have returned to Montreal after making a tour of the West India Islands on the lookout for openings for Canadian trade with those colonies.

Speaking to a representative of HARDWARE AND METAL, Mr. Munro said that he very much appreciated the prominence that this journal had always given to the doings of the Manufacturers' Association.

Of their trips, he said: "We visited nearly all the Islands and Jamaica, and none of the important points were passed by. Mr. Stuart is at present engaged in preparing a report, which will be submitted to the Manufacturers' Association in a few days. We met all the Chambers of Commerce or leading merchants and planters of the Islands, and were well received everywhere. There is great room for improvement in the share that Canada enjoys of the trade of these Islands, and, with the existing friendly attitude of the people there toward us, the present time is opportune to foster that trade. As sister colonies, they are proud of Canada's achievements in the trouble in South Africa. I am sure they will give a cordial welcome to representatives of Canadian manufacturers who should wish to show their goods there.

"As to the conditions of the Islands, it must be said that some of them are still suffering from the terrible depreciation of sugar, and there is great anxiety shown as to what the Government of Great Britain will do until the bounties are abolished. But, at any rate, the trade of the West-Indian Colonies is well worth the attention of the manufacturers of Canada."

Mr. Munro did not care at present to go into the subject of what lines of trade could be made most profitable between Canada and the Islands. After the publication of Mr. Stuart's report a more comprehensive grasp of the subject would be afforded.

500 STORES OPEN ON SUNDAY.

The Montreal police have made a canvass of that city and have found that no less than 500 stores are kept open there on Sundays. The rental of these stores vary all the way from $30 a year to $1,000, and foreigners are found to largely predominate amongst the owners. These will be tabulated according to nationality, and the widows and sickly will be separated from those run by able bodied men.

After this is done the police will be able to decide on whether they will enforce Sunday closing or not.

A Bicycle so constructed that, with each thrust of the pedal, its hanger is forced to move out of alignment, **RUNS HARD** and will not wear well, as chain, sprockets, bearings and rear wheel are all subjected to unusual strains.

The Iver Johnson Truss Frame is the Solution

as this construction strengthens the frame and adds rigidity to the crank hanger, with the accruing results o "easy running" and durability.

CORONATION CUTLERY.

THE coming Coronation in England is an event that is eagerly looked forward to by many. Few people now living were at the coronation of Queen Victoria in 1837, and this has its effect in making people more desirous to view and remember this coming event. Preparations are already being extensively made, and numbers of merchants and manufacturers are placing souvenir goods on the market. And amongst others worthy of note are the Coronation pocket knives, scissors and razors of George Butler & Company, Trinity Works, Sheffield, England. These special lines are all handsomely gotten up, with finely engraved photographs of King Edward VII. and his Queen, and are all suitable for presents.

The prices of these goods are reasonable, that of the pocket knives varying from 18s. to 120s. per dozen, of the scissors from 1s. 6d. to 5s. per pair, and of the Coronation razors from 2s. 6d. to 5s. each. The scissors and razors may be had in cases at 40s. to 60s. per case of 6 pairs of scissors, and 13s. 6d. to 21s. per pair of razors in a case. The engraving is a representation of their Coronation pocket knives.

WIRELESS TELEGRAPHY.

The Canada Paint Company are contemplating the advisability of installing the aerial telegraphic system to maintain communication between their several factories and branches. In Toronto the office is at Bay street and the factory at Leslie street. In Montreal, in addition to the main works at No. 572 William street, there is a warehouse on Chatham street and the dry color plant situated on St. Patrick street. At St. Malo, Que., are the oxides mines, and near St. John, N.B., this company produce the diamond graphite. The Canada Paint Company like to be in close touch with their "outports" as it were, and the adoption of the Marconi system will in no way interfere with their present admirable Bell telephonic arrangement, which The Canada Paint Company at present patronize most liberally, and they, in fact, intend to avail themselves still more of the facilities for intercommunication offered by the telephone, which has proved such a powerful aid to the business community.

TOURIST TRAVEL IN NEW BRUNSWICK.

The Tourist Association of St. John, N.B., is preparing for a larger influx of tourists into that part of the Dominion this summer than ever before. It will send out 35,000 copies of its annual book, and issue a handbook of St. John, similar to that of last year. The Association has opened a bureau of information in the Board of Trade rooms, and has made arrangements with a number of lecturers to include references to that district in their course. It will furnish the lantern slides for this work. An effort is also being made to induce capitalists to build summer hotels, as the accommodation for visitors is at present inadequate.

THE ANTI-TRADING STAMP LAW.

The Court of Appeal has decided in a test case that the Ontario Legislature has power to pass an Act giving municipalities the right to prohibit trading stamp companies operating within their own boundaries. The Trading Stamp Act of 1901 is legal according to this.

Toronto City Council took advantage of this last year and trading stamp concerns in the city were closed on January 1 last. Announcements were made by the companies that they had closed down temporarily until the Court of Appeal had given its decision as to the power of the Legislature to pass the Act.

WILL SELL CANADIAN GOODS.

Mr. J. W. Walker, who was in Toronto a few months ago en route to Great Britain after having spent several years in Canada, has a general commission business at 65 Robinson street, Glasgow, under the style of J. W. Walker & Co. The firm will make a specialty of Canadian products.

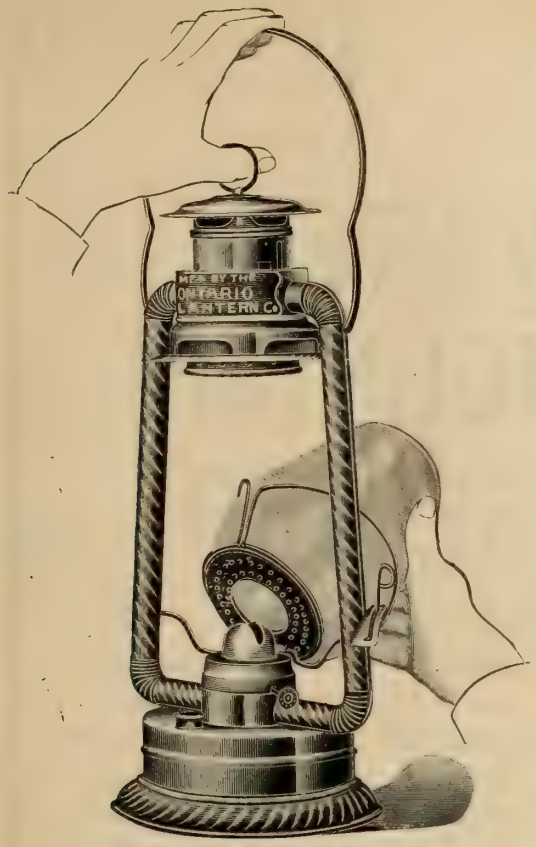
A NEW NAVIGATION COMPANY.

THE Algoma Navigation Company, Limited, Owen Sound, has recently been incorporated. The board of directors is as follows: John W. Munro, M.P.P., lumberman, Pembroke; Chas. A. McCool, M.P., lumberman, Ottawa; Angus McLeod, M.P., lumberman, Bracebridge; Geo. McCormick, M.P., lumberman, Orillia; Louis J. Breithaupt, M.P.P., tanner, Berlin; James A. McArthur, general manager Canadian Copper Co., Sudbury; Albert J. H. Eckardt, manufacturer, Toronto; T. M. Kirkwood, vessel owner, Toronto; F. M. Holland, general manager Dominion Permanent Loan Co., Toronto; John A. McKee, manufacturer, Toronto.

The capital stock of the company is placed at $250,000, divided in 2,500 shares of $100 each and there is being issued for present needs a bond issue of $150,000 of first mortgage bonds paying 6 per cent. These are guaranteed by the Trust & Loan Guarantee Company, Limited, of Toronto.

The boats of the Owen Sound, Georgian Bay Soo line will be taken over by this company. These boats ply between Owen Sound and Sault Ste. Marie and have been doing so since 1897 when the City of Windsor started on the route. The traffic increased very much and the City of Owen Sound was built and added to the line. This season the new company will add a new steamer to the vessels already on the route which will make two trips a week between Owen Sound and the Sault.

BERLIN (ONT.) MERCHANTS ORGANIZE



A branch of the Retail Merchants' Association of Canada has just been formed at Berlin and Waterloo, to be known as the Berlin-Waterloo Branch of The Retail Merchants' Association of Canada. The officers of this Association are:

McCLARY'S BALL A SUCCESS.

THE second annual ball and supper of the Employes' Benefit Society of The McClary Manufacturing Co., London, Ont., proved to be fully as successful and enjoyable as its predecessor a year ago. The adoption of the plan of holding an annual ball has evidently met with the complete approval of the firm's employes, and there seems no reason to doubt that future affairs of the kind will meet with fully as much success as, if not more than, the two enjoyable events already held. The fact that they are under the auspices of the benefit society is sufficient reason for them being enthusiastically carried through by the employes of the McClary works, for their proceeds are devoted to a worthy object, the assisting of employes, who, through continued illness or disability, become in need of such aid. The society has done a good work in the past, and under the able guidance of its present officers, and with such loyal support as is rendered by the employes, it seems certain to do still more good. The result of last night's function will be the adding of a tidy sum to the funds of the benefit society.

At the hall over 150 couples thronged the floor of the city hall and joined in the merry dance from 9 p.m., when the grand march was led off by Col. Gartshore, president of the company, and Miss Patten, till an early hour in the morning. Every one of the 26 numbers on the programme was enjoyed to the full by the dancers. Mr. Fred Floyd proved an ideal master of ceremonies, and kept things moving with smoothness and celerity. The hall was artistically decorated with bunting and flags, while the floor was in prime condition. A number of spectators watched the gay scene from the galleries and seemed to find as much pleasure in the spectacle as the merry participants themselves. About midnight a tasty supper was served at the Walsh House.

A pleasing feature of the affair was the enthusiasm with which members of The McClary Company entered into the initial arrangements and actual enjoyment of the ball. Every assistance was given the society in their efforts to make the ball a success, and members of the company were seen on the floor entering with zest into the mirthful spirit of the occasion. It is this cordial co-operation of sympathy between employers and employes which explains in a great measure the continued prosperity and success of the big manufacturing industry, of which the city of London is so proud.

The general ball committee, which worked faithfully and efficiently to make the ball an event to be long remembered by those present was composed as follows:—Hon. President, John McClary; president, W. M. Gartshore; 1st vice-president, J. Nicholson; 2nd vice-president, J. Pirie; secretary, F. J. Delaney; physician, Dr. B. Bayley; R. Spencer, H. Jinks, S. Reid, E. Wingett, D. Wilson, F. French, W. Bowden, H. Woodman, E. Donovan, C. Burns, M. Delaney, J. Head, J. Noulty, T. Hogg, J. Musner, F. Page, W. Dunham, C. Barker, J. Wolcott, Miss McNiff, Miss Osmond, Miss Orchard, Miss Porter, Miss Patten.

USEFUL SURPLUS PRODUCTS.

A HIGHLY interesting article in the March Engineering Magazine, entitled "The Fallacy of Over-Production," maintains that it is impossible to produce too much of any useful article, the argument being that systematic storage of supplies will take care of any temporary surplus. This is indicated by the following brief extracts from the article:

"The fact that most people believe that the accumulation of unsold goods is caused by 'over-production,' or that twin absurdity, 'under-consumption,' is not to be wondered at. On its face the theory seems to be self-evident, just as it seems to be self-evident that the sun rises and sets. But there is no more truth in one than in the other. This plausibility is what makes these terms so deceptive and mischievous, and probably no other popular error has done so much harm in the industrial nations of the world.

"By creating the modern systems of transportation, and by inaugurating the present system of cold storage, two long strides have been taken. Neither of these advances would have been possible but for the existence of one of nature's greatest gifts to man, temporary surplus production. Yet another long stride forward will be taken when the producers of staple commodities like coal, iron, steel, tin, copper, lead and rubber clearly understand that the present systems of storing these products are wholly inadequate. In the case of perishable agricultural produce, Nature long ago made it necessary for the merchants and bankers who handle them to adopt scientific systems of negotiable warehouse receipts for their safe storage. But in the case of the less perishable staples of manufacture, we are still hobbling along with the antiquated methods of our grandfathers—every producer for himself, and the devil take the hindmost. The result is shown in the violent fluctuations of market values which we have lately seen in coal, iron, steel, copper, and rubber—extreme fluctuations which are wholly needless, and which are certain to be rendered impossible so soon as producers, merchants, bankers and brokers can be brought to see the demoralization and waste that spring from mere lack of system in storing and carrying temporary surplus supplies of materials which form the very basis of all industry and all wealth.

"Is there anything in nature or history which does not teach man that if he would have anything when needed, he must gather it when it can best be produced? Is it not good business to gather surplus products when they are plenty and cheap and hold them until they are scarce and high? Have any 10 years passed in the recollection of men now living, in which the people of the foremost manufacturing nations have not suffered for the want of an adequate supply of some of the great staples—coal, iron, steel, tin, copper, rubber—which might have been stored up in times of dull trade? Has anyone ever heard of useful manufactured products being destroyed for want of a market? Have they not all been consumed in time? Is not this proof that each one of the overproduction claims put forth during the last two and a half centuries has been rank nonsense? Has not modern society simply failed to grasp one of Nature's great truths?"

STEVENS RIFLE TELESCOPE.

The J. Stevens Arms' and Tool Co., Chicopee, Mass., are the manufacturers of a rifle telescope, The Stevens Rifle Telescope, that can be fitted to rifles of any make. Every part of this instrument is being made by this firm themselves, under the direct supervision of an expert optician and optical instrument maker of 30 years' experience. The prices of these telescopes are moderate, the list ranging from $8 to $40, and the points of superiority claimed for them are apparent universal focus, perfect chromatic and spherical correction, remarkable illumination, indestructible cross-hairs, perfect definition, great variety of powers, and adjustable mountings for elevation and windage.

MOVING THE GRAIN CROP.

With the opening of navigation the work of moving the balance of the grain crop of the Canadian Northwest has begun. It is estimated that there are still 20,000,000 bushels of last year's crop to move. Some 13,000,000 bushels are along the lines of the C.P.R.

At Fort William great activity has commenced, and every day vessels clear with loads of grain for the lower-lake ports. The freight traffic department of the Canadian Pacific is showing great activity and is loading cars at the rate of 196 per day, and sending them down to the Fort William elevators. The farmers who have been holding their grain are now marketing, and a large movement has commenced all along the wheat belt. On the 10th inst., 72 cars were moved; on the 11th, 117, and on the 12th, 196. This volume will be increased in a day or two, but, notwithstanding this, it is estimated that both the Canadian Pacific and Canadian Northern will be hauling last year's wheat up to the time this year's wheat begins to move.

"New Century"

3 MEASURE SELF MEASURING

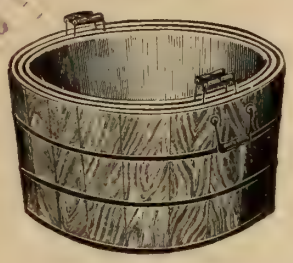
Oil Tank?

THERE ARE

100 REASONS 100 WHY YOU SHOULD.

Space will not permit us to enumerate them all and we want an opportunity to tell you all about it.

WE CAN POINT OUT TO YOU DEFINITELY



WHY IT WILL PAY YOU.

To Be Brief, It Will Pay You

Because it will save you money.
Because it measures accurate Gallons, Half-Gallons and Quarts.
Because it gives the customer what he buys and no more.
Because it will prevent all waste and slop.
Because it will soon pay its cost and become a profit-earner.
Because the Bowser is the only All Metal oil pump built.
Because it has the Anti-Drip nozzle.
Because it has the Dial Discharge Register.
Because it has the Double Float Indicator.
Because it has the Double Plungers.
Because it has Full Brass Cone Valves.
Because the tank is of Galvanized Steel.
Because it is the best oil outfit ever built.
Because it is sold under an absolute three years' guarantee.
Because its price is commensurate with its value.
Because you can have your oil tank in the store, under the floor, or in the cellar.

Our Catalogue and "Terse Tank Talks" tell the rest. They are free.

S. F. BOWSER & CO., 65 Front St. East, TORONTO. Factory, FORT WAYNE, Ind.

The Approval of the Dealer

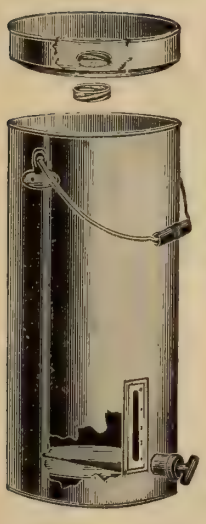
has always been our ambition. "Money back if goods are not satisfactory" is proof of our aim to supply only reliable goods. Dealers know that a poor article is dear at any price; that it pays to stock satisfactory goods because such goods create demand. Dealers have long realized that

CANE'S NEWMARKET WOODENWARE

Outlasts all the Flimsy Foreign Stuff being sold in Canada.

These standard Canadian goods bear our absolute guarantee. The amalgamation of our factories with Boeckh's Toronto factories and Bryan's London factories means that better goods than ever can now be manufactured by us and at no increase in price, but a larger margin of profit to the dealer.

—Write us for our Illustrated 1902 Catalogue
—if you have not received it.



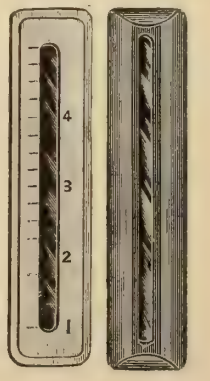
United Factories, Limited

OPERATING { Boeckh's Toronto Factories, Bryan's London Factories, Cane's Newmarket Factories.

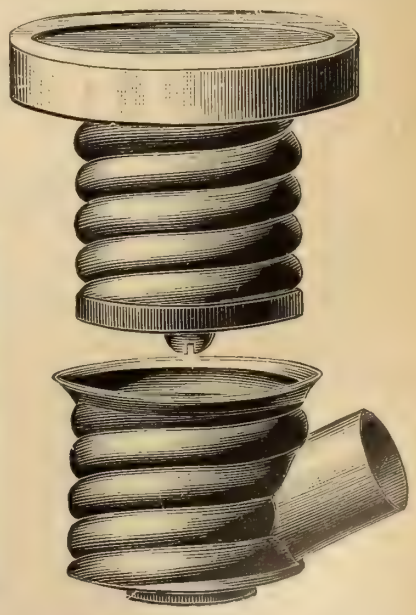
Head Office: TORONTO, ONT.

A Good Trade

does not necessarily imply buying at a reduction. It means an exchange in which each is gainer.



Practical Dealers Cannot Fail
to appreciate the good features of our



"SLIP COVER"

Creamer Trimmings

THEY make a quick Cover to ADJUST, permit the full submerging of the Can, are made to lock, Cover can be used as MILK STRAINER, and are same price as old style.

Front view. Back view.
Short, Tight, Easily Soldered.

Cheaper, Neater, Cleaner, Stronger than any other top made. Will not stick nor rust.

They teem with selling points, and will largely increase your trade.

THE THOS. DAVIDSON MFG. CO., Limited

ESTABLISHED 1869. **MONTREAL, CANADA.** INCORPORATED 1895.

MANITOBA MARKETS.

Winnipeg, April 21, 1902.

THE activity in all lines is very great, and there is constant complaint that orders do not come forward fast enough. Building hardware leads the van at present as so many new houses are going up all over the country to accommodate incoming settlers—for this reason, paints, oils and glass are in good demand.

The only change of price for the week in hardware is that harvest tools are now quoted at 60 and 10 per cent., as against 60, 10 and 10 per cent. In paints and oils turpentine has advanced 5c. per gal.

BINDER TWINE—There is no change in the situation, and there is but little activity at present. Dealers declare they have been placing orders pretty well up to their limit.

The price list is as follows :

NOTES.

There is a report in circulation that The Robt. McCausland Stained Glass Co. is about to open a branch factory here.

Mr. E. E. Devlin, late of Joseph Maw & Co., has received the appointment of representative of The Aermotor Co., of Chicago.

The excavation for the addition to J. H. Ashdown's warehouse is going forward rapidly. It has been decided to build it four storeys instead of two, as at first intended.

Geo. D. Wood & Co. have secured 68 feet to the south of their present warehouse and will erect an additional warehouse the full extent of the lot. It will be four storeys and basement.

COMMERCIAL DEPOT FOR LONDON.

The committees of the Toronto Board of Trade and the Canadian Manufacturers' Association held a joint meeting in the Board of Trade rooms on Tuesday afternoon, April 15, and considered the establishment of a commercial depot in London. Those representing the board of trade at the meeting were J. F. Ellis, J. D. Allan, Peleg Howland, R. J. Christie, Noel Marshall, W. J. Gage; while those representing the manufacturers were W. K. McNaught, G. H. Hees, J. O. Thorn, James P. Murray and P. W. Ellis.

After discussing at length the above proposition, a sub committee was appointed to draft a report and submit it to the general committee. J. D. Allan, J. F. Ellis, P. W. Ellis and G. H. Hees constitute this subcommittee.

WIDER MARGIN FOR DEALERS.

Under one strong management, titled United Factories, Limited, the running expenses of Boeckh's Toronto factories, Bryan's London factories and Cane's Newmarket factories can be considerably reduced and a better class of goods produced without additional cost. Users of brushes, brooms and woodenware will materially benefit by the consolidation, and there will be a wider margin of profit for the dealer than can be found in the output of any other factories of a similar class in the Dominion.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, April 25, 1902.

HARDWARE.

THERE has been no abatement to the excellent business done in general hardware, manufacturers and jobbers reporting themselves as busy as ever. The deliveries to the points from Montreal east are very large, though with Ontario and the West trade is in good condition, but the demand for immediate shipment is not heavy. Screen wire cloth has taken another advance, this time of 7½c. per roll. Harvest tools have gone up about 11 per cent. A combination on washing machines has sent up the price on these, and the new list will be found elsewhere in this issue. The demand for washing machines and wringers has been of the best up to now, and as dealers must have them it is not likely that under the advance there will be any material decrease in the trade. Bolts, screws, building paper and all lines of builders' hardware continue to move out rapidly.

SCYTHES.—Business is fairly good now, the demand being greater than during the previous week. We quote: Lance, No. 80, $5.50; Hurd's Clipper, $6.50; concave, $7.50; Sibely, $8.50; Cradle scythes, cast steel, $8.50; silver steel, $9.50; "Harvest King," $10.50. Bush scythes, $6.50.

BARB WIRE.—There is still an active inquiry, but some scarcity is experienced, as the factories are about a month behind in deliveries. The price is unchanged from $3 per 100 lb. f.o.b. Montreal.

GALVANIZED WIRE. The demand is brisk, and the market steady and unchanged, and our quotations now are: Nos. 6, 7 and 8 gauge, $3.15; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE. The market is still somewhat quiet and no quotable change has occurred. Quotations are: Bright iron and annealed on a base of $2.60 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—There is very little doing. Discount, 22½ per cent.

BRASS AND COPPER WIRE.—Trade has not improved. The discount remains at 60 per cent. for both wires.

FENCE STAPLES.—There is an active demand. Some difficulty, however, is experienced in obtaining supplies. There has been no change in prices. Our quotations are as follows: $2.90 per 100-lb. keg, for bright, and $3.25 for galvanized. 25 and 50-lb. packages, 25c. extra.

WIRE NAILS.—A very good business is still passing in wire nails at unchanged quotations. Our quotations follow: $2.25 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—The trade is not as active in cut nails as in wire nails, but there is still a satisfactory demand. The price per keg is $2.35 in small lots, and $2.27½ in carlots. The discount on flour barrel and coopers' nails is 40 per cent.

HORSE NAILS.—The demand for horse nails continues active. No change has been made in prices, and our quotations are as follows: "C" brand at 50 and 7½ per cent. off on "M" brand and 60 per cent. off oval and new city heads and 66 2-3 per cent. off for new countersunk heads.

HORSESHOES.—There is still a good business doing in this line. We quote: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4.00; X L steel shoes, all sizes, 1 to 5, No. 2 and

Have you ordered your stock of warm weather goods?

If not, you should place some of the following lines in your showroom at once, as your customers will soon be inquiring for them.

If you have, and need more, we can promptly ship you a further supply.

The Leonard Cleanable Refrigerator

The best refrigerator on the market. Is well known and sells easily.

larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS.—The market for screws is active. Discounts are as follows: Flat head bright, 87½ and 10 per cent. off list; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.

BOLTS.—Trade has entirely recovered since the falling off consequent upon the advance, and this week the demand is as brisk as ever. Our quotations are as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3½c. per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—There is a good demand. Our quotations are as follows: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 30c. per roll; tar sheathing, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE.—Business in cordage is quite active. The trade has received an impetus from the opening of navigation, boats putting in their supplies of rope. All grades of binder twine have advanced ½c. per lb., and our quotations are now as follows: Manila, 16c.; British manila, 14½c.; sisal, 13c.; lathyarn, 11½c. Prices on binder twine are as follows: Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c.; Tiger, 550 feet to the pound, 13c.; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound, 11½c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—A fairly active inquiry is being experienced this week, and our quotations are as follows: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 and 10 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH.—Another advance has been made of 7½c. per roll, making the current price $1.37½c. per 100 square feet. There has been a steady demand for screen wire cloth right along.

POULTRY NETTING.—This is moving rapidly. The market is steady. The discount on Canadian or English is 60 per cent. off 2 x 2 mesh, 19 wire, and 55 per cent. off 2 x 2 mesh, heavier, Canadian list.

HARVEST TOOLS.—Another advance has been made in harvest tools, and the discount is now only 60 per cent. off net instead of 60 and 10 per cent. as formerly.

FIREBRICKS.—No change has occurred. Trade is quiet. We quote: Scotch.

Canadian Agents for Buehne's "Red, White and Blue" Brand Steel Wool.

Do It To-day

Immediately after reading this, write a card to us and we will mail you our booklet on *"Paint Talk,"* which will be of great service to you in your paint trade. In it you will read what our customers say of

"Ark Brand" Paint.

THE **FRANCIS-FROST C°** Limited

TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

$19 to $23.50, and English, $18.50 to $22.50 per 1,000.

CEMENT.—There is only a moderate trade doing. We quote as follows: German cement, $2.30 to $2.40; English, $2.25 to $2.35; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.20 to $2.30 ex-cars.

METALS.

Cables this week from the English markets stated that an advance of 5s. per ton had been made in spelter, corrugated galvanized sheets, black sheet iron and pig lead. Charcoal tinplates have advanced 3d., Bessemer cokes, 1½d., and Canada plates, 2s. 6d. In other metals the same firmness is shown on the English markets. The price of Canada plates has been raised on this market, and there is a great scarcity. Some sizes of coil chain are higher in price, and the market is firm, though trade is not active.

PIG IRON.—Canadian pig iron sells for $18.50 to $19, and Summerlee for $21 to $21.50. Business is quite active still, though many buyers have now all their requirements filled.

BAR IRON.—There is a good demand for bar iron at unchanged quotations. Merchants' bar, in small lots, sells for $1.95, and horseshoe iron, $2.20.

BLACK SHEETS.—An active inquiry continues, but stocks here are very light, and the first steamers are awaited rather impatiently. Quotations follow: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—This is in good demand. Prices are firm. We quote: No. 28, Queen's Head, $4.40; Apollo, 10¾ oz., $4.40; Comet, $4.25, with 10c. extra for less than case lots.

INGOT COPPER.—We quote 14c.

INGOT TIN.—The market for ingot tin is still quiet. Since the advance of last week no further change has been made in the price. Straits sell for 30c.

PIG LEAD.—This is quiet and featureless. The price remains at $3.25.

LEAD PIPE.—A moderate business is passing at unchanged quotations. Composition waste is worth 7½c., and ordinary, 7c. Discount, 37½ per cent.

IRON PIPE.—There has been no quotable change. The market is active, and our quotations are now as follows: Black pipe, ⅛, $3; ¼, $2.40; ⅜, $2.65; ½, $3; ¾, $3.70; 1-in., $5.25; 1¼, $7.40; 1½, $8.90; 2-in., $12.40. Galvanized, ⅛, $3.20; ¼, $3.45; ½, $4; ¾, $5.05; 1-in., $7.25; 1¼, $10.10; 1½, $12.15; 2-in., $16.70. Extra heavy pipe, plain ends, are quoted, per 100 ft., as follows: Black, ⅛, $4.35; ¼, $5.30; 1-in., $7.60; 1¼, $10.60; 1½, $12.70; 2-in., $17.45. Galvanized, ⅛, $5.35; ¼, $6.70; 1-in., $9.60; 1¼, $13.30; 1½, $15.95; 2-in., $21.75. For threads and couplings 5 per cent. is added.

TINPLATES.—The market for tinplates is still quiet. Charcoal tinplates have advanced on the English market, and the price here is firm at $4.75 to $5.25 per box. Cokes are worth $1.25 per box.

CANADA PLATE.—The recent advance on the English market, coupled with a scarcity here, has had its effect on Canada plates in this market, and 52's and 60's have gone up 10c. There is an active inquiry, and the market is very firm. We quote: 52's, $2.75 to $2.80; 60's, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35.

STEEL.—Prices have not been changed. Market is active. We quote: Sleighshoe, $2.10; tire, $2.15; bar, $2.05; spring, $2.85; reeled machinery, $2.85; toecalk, $2.60.

SHEET STEEL.—A somewhat better trade has been done this week, but the market is still quiet. Quotations are: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—There is little doing. Jessop's is quoted at 13c., and Diamond at 8c.

TERNE PLATES.—Trade is dull. The price is $7.75 to $8.

COIL CHAIN.—Though the market is not active, some advances have been made in chain, 9-16 and ½-inch sizes being 10c. higher, and 5-16, 20c. higher. We quote: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-inch, 7¼c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—There is only a moderate demand. The price is $5.75 to $6.25.

ANTIMONY.—There has been no improvement in this market. The price remains at 10c.

ZINC SPELTER.—There is a fair trade doing. Spelter has advanced on the foreign markets, and the price here is slightly firmer. We quote 5c.

SOLDER.—The demand for solder keeps up well. The market is steady. Bar

solder is quoted at 18c., and wire solder at 20c.

PAINTS AND OILS.

The feature this week is the further decline in turpentine of 2c. This was not expected by operators, who considered the market in a steady condition and looked for turpentine to become firmer. Some slight fluctuations may occur for a while now, but the market is expected to regain some of its former firmness. Linseed oil is becoming scarce, and as stocks are extremely light spring arrivals are eagerly looked forward to, but in view of the heavy demand it is probable that prices may not then be materially weakened. White lead is in active demand. Varnishes and colors generally are feeling the effect of the brisk trade, and are being shipped freely to all parts of the Dominion. The opening of navigation to the eastern St. Lawrence ports has given the Quebec trade a tremendous impetus. Paris green, which was booked for in January and February, is now being shipped, and in addition to these orders the inquiry has slightly extended, though not in any marked degree. We quote as follows :

WHITE LEAD.—Best brands, Government standard, $5.87½ ; No. 1, $5.50 ; No. 2, $5.12½ ; No. 3, $4.75 ; No. 4, $4.37½ all f.o.b. Montreal.

DRY WHITE LEAD, $5.25 in casks ; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, 6¼c. ; No. 1, 5¼c.; in oil, pure, 7¼c.; No. 1, 6¼c.; No. 2, 5¼c.

PUTTY.—We quote : Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05 ; bladders, in bbls., $2.25 ; bladders, in 100 or 200-lb. kegs or boxes, $2.40 ; in tins, $2.55 to $2.65 ; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100 lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50 ; in 100-lb. kegs, $4.75 ; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25 ; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c. ; less quantities, 5½c.; flake litharge, casks, $5.25 ; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 80c.; boiled, 83c. In 5 to 9 bbls., 1c. less ; 10 to 20 bbl. lots, open, net cash, plus 2c. for four months. Delivered anywhere in Ontario between Montreal and Oshawa at 2c. per gallon advance and freight allowed.

TURPENTINE.—Single bbls., 70c. ; 2 to 4 bbls., 69c.; 5 bbls. and over, open terms.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45 ; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—47½ to 49c.

COD OIL.—32½ to 35c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms : 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

There is a good business passing in most lines of scrap metals. Iron has gone down in price some, the mills here having obtained all the supplies they needed. Several American concerns have been visiting this market, and are willing to take all the iron they can get at a good figure, besides paying a duty of $4 going into the United States. Nos. 1 and 2 wrought iron are $1 lower, and old rubbers, ¼c. per lb. higher. We quote as follows: Heavy copper and wire, 11c. per lb.; light copper, 9c.; heavy red brass, 11c.; heavy yellow, 9c.; light brass, 5c.; lead, 2⅜ to 2⅝c.; zinc, 2½c.; iron, No. 1, wrought, $17 ; No. 2, $7 per ton ; machinery scrap, $15 ; stove plate, $10 to $11 ; malleable and steel, $5 ; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6½c. per lb.

GLASS.

Trade on the local market is dull. Some shipments from Belgium, which were expected before this, have not yet arrived. The strike will affect late orders. We quote: First break, 50 ft., $2.10 ; second, $2.20 for 50 ft.; first break, 100 ft., $4 ; second break, $4.20 ; third break, $4.70 ; fourth break, $4.95.

HIDES.

Business in hides this week is confined mostly to small lots, but a greater interest is shown in the market than a week ago. The quality of the offerings is better. Calfskins have advanced 1c., and all grades of hides have taken a further advance this week of 1c. We quote as follows : No. 1 hides, 9c.; No. 2, 8c.; No. 3, 7c. No. 1 calfskins, 12c. Sheepskins, 65c

MONTREAL NOTES.

Turpentine is 2c. lower.

Hides and calfskins are 1c. higher.

Canada plates, 52's and 60's are 10c higher.

Screen wire cloth has advanced 7½c. per 100 square feet.

Nos. 1 and 2 wrought scrap iron are $1 per ton lower.

The prices of all grades of binder twine have gone up ½c. per lb

Harvest tools are about 11 per cent. higher, the discount now being 60 per cent. off list.

In coil chain there has been an advance in price in ½ and 9-16 sizes of 10c., and in 5-16 sizes of 20c.

ONTARIO MARKETS.

Toronto, April 25, 1902.

HARDWARE

ORDERS which had been booked for spring shipment appear to have been pretty well cleaned up. And as there is not a great rush of new orders coming in business is a little quieter than it was. At the same time, however, it is still fairly good, and the outlook is certainly favorable to a continuance of the present healthy trade condition. The week has been characterized by some further advances in prices. Still another 10 per cent. has been added to the price of harvest tools, which are in good demand and scarce. Binder twine is ½c. per lb. higher all round. Higher prices are ruling for washing machines. Cabinet locks have been advanced by the manufacturers in the United States. The handle makers have advanced their prices on the better grades of hickory and ash goods. Payments appear to be rather better than they were.

BARB WIRE. Shipments are going out steadily. We quote : F.o.b. Cleveland, $2.27½ for less than carlots, and $2.65 for carlots. From stock, Toronto, $3.

GALVANIZED WIRE.—The movement is fairly good. We quote : Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity ; No. 9, $2.85 to $3.15 ; No. 10, $3.60 to $3.95 ; No. 11, $3.70 to $4.10 ; No. 12, $3 to $3.30 ; No. 13, $3.10 to $3.40 ; No. 14, $4.10 to $4.50 ; No. 15, $4.60 to $5.50 ; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—A fair business is being done in oiled and annealed. We quote the base price, $2.60 per 100 lb. Oiling, 10c.; coppering, 60c.;and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—There is the usual steady trade being done. Discount, 22½ per cent.

WIRE NAILS.—Business is good, and some orders are for nice quantities. The prices are steady. Our quotations are $2.55 for less than carlots and $2.50 for carlots. Delivery points, Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—Business is only small and makers are getting less interested in this branch of their trade. The base price is $2.35 per keg, with 7½c. allowance on carlots.

HORSE NAILS. Trade is quiet, and the discounts are as follows : "C" brand, oval head, 50 and 7½ per cent., and on "M" and other brands, 50, 10 and 5 per cent. Countersunk head 60 per cent.

HORSESHOES Quiet and featureless. We quote f.o.b. Toronto as follows : Iron shoes, No. 2 and larger, light, medium and heavy, $3.60 ; snow shoes, $3.85 ; light steel shoes, $3.70 ; feather-

weight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85; snow shoes, $4; light steel shoe., $3.95; featherweight (all sizes), $4.95.

SCREWS. Business is good and prices steady. Discounts are: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze 70 per cent.

RIVETS AND BURRS.—Business continues active. We quote: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; cop per rivets, with usual proportion of burrs, 45 and 10 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS. The activity that has characterized trade in this line has been maintained and prices rule firm. Our quotations are as follows: Carriage bolts, common ($1 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent.; machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66 2 3 per cent.; elevator shaft and whiffletree bolts, 50 per cent.

ROPE. Trade keeps fairly good. We quote: Pure manila, 16c.; British manila, 14½c.; sisal, 13.; lathyarn, 12c.; sisal bed cord, 3 cord, 48 feet, 65c.; ditto., 60 feet, 80c.; ditto., 72 feet, 95c. per doz.

BINDER TWINE.—An advance of ½c. per lb. all round took place on Saturday last. The demand is fair. We quote: "Blue Ribbon," 650 feet, 15c.; "Red Cap," 600 feet, 14c.; "Tiger," 580 feet, 13c.; sisal, 500 feet, 11½c.

EAVETROUGH, ETC.—There is a free movement this week in both eavetrough and conductor pipe. Eavetrough is quoted at $3.10 per 100 square feet for 10-in., and conductor pipe at $4 for 3-in. and $5.25 for 4-in.

SCREEN DOORS AND WINDOWS. Trade is fair.. Common doors, two or three panel, are now quoted f.o.b. factory points as follows: Walnut, stained, 3-in. style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-in. style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2.50 per dozen.

SPADES AND SHOVELS.—The demand is good for spades and shovels and for all kinds of garden tools. Discount, 40 and 5 per cent.

HARVEST TOOLS.—Another advance of 10 per cent. has taken place, and the discount is now 60 off the list. The demand is good and a scarcity still exists in some lines.

BUILDING PAPER.—Business is good. Our quotations are as follows: Dry sheathing, grey or straw, 30c. per roll; tar sheathing, grey or straw, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

LAWN MOWERS.—The demand is good this week. Discount on high wheel mowers is 50 per cent.; "Star" mowers, 9 inch wheels, $2.50 to $3; "Daisy" mowers, 17 inch wheels, $2.25 to $2.50.

POULTRY NETTING.—The manufacturers are behind with their orders in some sizes, and particularly in 7 to 2 in. The demand is good and the season is the best manufacturers have had for some years. We quote: 2-in. mesh, 19 w.g., discount, 60 per cent.; 2-inch mesh, 18 w.g. and heavier, 50 and 10 per cent.

GREEN WIRE CLOTH.—Prices have advanced 7½ per cent., the quotation per 100 square feet now being $1.37½.

TINWARE AND ENAMELLED WARE. A very fair business is being done in both these lines.

REFRIGERATORS AND FREEZERS. The movement is quite brisk in both these lines.

GAS AND OIL STOVES.—A large trade is being done this week.

HANDLES.—White hickory and ash handles are higher. Discount on second growth and extra ash handles is 25 per cent., and on other grades, 35 per cent.; hickory fork handles, firsts and seconds, 50 per cent., and on other hickory handles, 35 per cent.

CABINET LOCKS.—At a meeting of the manufacturers of the United States on the 22nd inst., an advance in certain staple lines was decided upon.

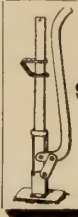
CEMENT.—There is a better demand springing up for cement, and travellers are sending in good reports. American cement is not now being offered on the Canadian market, recent advances in the United States indicating that there is a big demand over there for this article. The market is still weak owing to competition among the manufacturers. We quote: Canadian Portland, $1.90 to $2.75; Canadian hydraulic, $1.25 to $1.50; German cement, $3; English, $3 to $3.15; Belgian, $2.50 to $2.75 per bbl., and American, $2.20 to $2.30 ex-cars.

METALS.

The position of the iron and steel market continues to gather strength. Trade in metals generally is good.

PIG IRON.—Prices are advancing in the United States quite rapidly in Bessemer iron. The pig iron market in Canada keeps strong with the demand in excess of the supply. The idea as to price is about $19.50 to $20.

BAR IRON.—The demand continues in excess of the supply, but prices remain unchanged. We quote $1.95 to $2.05. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.



STEEL.—No relief yet appears in sight. Deliveries rather than improving are getting worse, while the demand is active. Quotations are as follows: Merchantable cast steel, 9 to 15c. per lb.; drill steel, 8 to 10c. per lb.; "B C" and "Black Diamond" tool steel, 10 to 11c.; Jessop's, Morton's and Firth's tool steel, 14c.; toe-calk steel, $2.85 to $3; tire steel, $2.30 to $2.50; sleighshoe steel, $2.10 to $2.25; reeled machinery steel, $3; hoop steel, $2.90.

BLACK SHEETS.—The demand is good. In Great Britain prices are rather easier. We quote: Common, $3.15 for 28 gauge, and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—Trade is quiet. We quote: All dull, $3; half polished, $3.10; all bright, $3.75.

GALVANIZED SHEETS.—This is the most active line on the list of sheet metals, and a large business is being done. Prices, locally, are unchanged at $4.50 for case lots, and $4.65 for smaller quantities.

TIN—The pig tin market has taken a decidedly weak turn again, and several sharp declines have taken place during the week in London. Locally, there is not much being done, and $29 to $30 represents the ruling prices.

TINPLATES—Business is good, and stocks, as noted last week, are in good condition. We quote I C at $4.25.

TINNED SHEETS—There are some going out, but the quantities wanted are small. We quote: 70 x 30, up to 24 gauge, 7½c.; ditto, up to 26 gauge, 8c.

COPPER—The outside markets are easy. Locally, business is quiet and prices unchanged. We quote ingot at $15 per 100 lb., and sheet copper at $22 to $23.

BRASS—Trade is fair. Discount 15 per cent.

PIG LEAD — Trade is quiet. There has been a slight reaction in prices in London, quotations closing on Wednesday at a decline of 1s. 6d. We quote pig lead at $3.50 to $3 75, and bar lead at $5.

IRON PIPE—The market continues firm. We quote per 100 ft.: ⅛ in., $3; ¼-in., $2.50; ⅜-in., $2.75; ½-in., $3; ¾-in., $3.70; 1-in., $5.25; 1¼-in., $7.40; 1½ in., $8.90; 2-in., $12.40; galvanized, 1-in., $7.25. Trade discount 4 per cent.

BOILER TUBES—Prices have been advanced 5 per cent. in the United States.

SPELTER—The tone of the outside markets is rather easy. Locally, business is moderate and prices unchanged at $5.50 to $6 per 100 lb.

ZINC SHEET—There is very little movement. We still quote cask lots at $6 to $6.25, and part casks at $6.25 to $6.50.

SOLDER—This is going out freely. We quote: Half-and-half, guaranteed, 19c.; do. commercial, 18½c.; refined, 18c.; wiping, 17½c.

PAINTS AND OILS.

The prices of turpentine continue unchanged, and the market for it is firm. Recent advices from the South tell of a slight advance there, but things are so uncertain that it is difficult to forecast how the market will turn. The new crop will not be in for over a month yet. Raw and boiled linseed oils are firm, and the demand therefor is brisk. The local stocks on hand are light. There has been a brisk movement in dry colors and zinc whites this spring, and the trade in white leads ground in oil and ready-mixed paints is heavy. It is reported that the market for white lead is being weakened by one or two manufacturers cutting prices. There has sprung up a brisk demand for shingle stains with the warm weather. Varnishes are active, but the high prices of shellac make it quiet. Some houses are experiencing a lull during this week, but expect trade to recover in a few days. We quote:

WHITE LEAD—Ex Toronto, pure white lead, $5.87½; No. 1, $5.50; No. 2, $5.12½; No. 3, $4.75; No. 4, $4 37½ in packages of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½ lb. packages; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb., $5 to $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4 50.

LITHARGE—Genuine, 6 to 6½c.

ORANGE MINERAL—Genuine, 7½ to 8c.

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6 25; Lehigh, in casks, $6.

SHINGLE STAIN—In 5-gal. lots, 60c. to $1.20 per gal.

BENZINE—In barrel lots, 17c. per gal.; less quantities, 25c. per gal.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING—65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2 25 to $2.35; white, $2 35 to $2 45 per gal.; in less quantities, 10c. extra.

PUTTY—Bladders, in bbls., $2 25; bladders, in 100 lb. kegs, $2 40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2 90.

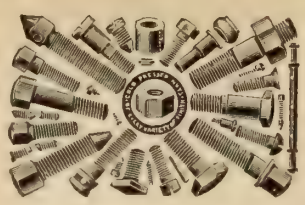
PLASTER PARIS—New Brunswick, $1.90 per bbl.

PUMICE STONE—Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS—Pure, $1 20 to $1.40 per gal.; No. 1, $1.10 per gal.

CASTOR OIL—English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL—Raw, 1 to 4 barrels, 82c.; boiled, 85c.; 5 to 9 barrels, raw, 81c.; boiled, 84c., delivered. To Toronto, Hamilton and London, 2c. less.



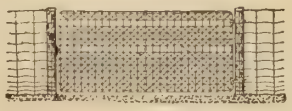
TURPENTINE—Single barrels, 71c.; 2 to 4 barrels, 70c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

An advance in glass shortly is not improbable, as, owing to the recent riots in Belgium, the glass manufacturers have withdrawn their quotations. We quote: Under 26 in., $4 45; 26 to 40 in., $4 65; 41 to 50 in., $5.10; 51 to 60 in., $5.35; 61 to 70 in., $5 75; 71 to 80, $6.25; 81 to 85, $7; 86 to 90, $7.75; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33⅓ per cent.

OLD MATERIAL.

There has been a marked improvement in trade with the warm weather and the prices are steady. We quote as follows: Heavy copper and wire, 10¼c. per lb.; light copper, 8c. per lb.; heavy red brass, 10c.; heavy yellow brass, 8 to 8½c.; light brass, 5c.; lead, 2¼ to 2½c.; scrap zinc,



THE JOHN MORROW MACHINE SCREW COMPANY, Limited

Manufacturers of

Set and Cap Screws, Special Milled Work, Engine Studs, Etc. Cold Punched Nuts of every variety of finish.

INGERSOLL, ONT.

PAGE METAL GATES are so low in price no one can afford to use wooden ones. Light, and yet strong enough to support a heavy man on the end while he swings around the circle without causing them to sag. They are neat in appearance, will last a lifetime. Will not sag nor get rickety. They are supplied with latches which allow them to be opened either way and are self acting. The only good metal gate that is low enough in price for General farm purposes. We also make Farm and Ornamental Fence, Poultry Netting, Nails and Staples. The Page Wire Fence Co., Limited, Walkerville, Ont.

BISHOP & CO. Established 1850.

27 and 28 Little Trinity Lane, - LONDON, ENG.

54 Scotland St., SHEFFIELD — Table Cutlery, all qualities.

23 Vittoria St., BIRMINGHAM — Wrought Steel Pots, round or oval. Tinned inside or enamelled.

Samples on view at the following Agencies:—

Alex. Thurber, 446 St. Paul St., - - MONTREAL.
E. Fielding, 34 Yonge St., - - TORONTO.
E. L. Denoncourt, 74 St. Joseph St., - QUEBEC.

2¼ to 2½c.; iron, No. 1 wrought, $14.50 per net ton; No. 2 wrought, $6; machinery cast scrap, $14; stove plate, $10; malleable and steel, $6; old rubbers, 6c. per lb., and country mixed rags, 50c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES—Trade is dull and prices are weak. We quote: No. 1 green, 6½c.; No. 2 green, 5½c.; No. 1 green, steers, 7½c.; No. 2 green, steers, 6½c.; cured, 7¼ to 7½c.

SKINS—The supply is small, but the demand also is small, and prices are steady. The prices of deacons have widened. We quote: No. 1 calfskins, 10c.; and No. 2, 8c.; deacons (dairies) 55 to 65c. each; sheepskins, 80c. to $1; lambskins, 15c.

WOOL—The market is weak, and there are no signs of a change for the better. We quote: Fleece wool, 12½c., and unwashed, 7 per lb.

SEEDS.

Although the season is nearly over, there is a good demand for all kinds of seeds. The prices of red clover and alsike have weakened, but timothy remains unchanged. We quote out of store at Toronto: Red clover, $6.50 to $9; alsike, $10 to $16, and timothy, $7.80 to $8.25.

COAL.

The demand for soft coal is heavy, owing to the activity of manufacturers here and elsewhere, while for hard coal it is quiet. We quote prices at international bridges as follows: Grate, $4.75 per gross ton; egg, stove and nut, $5 per gross ton; soft coal, $2.50 to $3.25 in bond.

PETROLEUM.

There is a good demand springing up, and prices are steady. We quote: Pratt's Astral, 17 to 17½c. in bulk (barrels extra); American water white, 17½ to 18c. in barrels; Photogene, 17 to 17½c.; Sarnia water white, 16½ to 17c. in barrels; Sarnia prime white, 15 to 15½c. in barrels.

MARKET NOTES.

Wringers are dearer.

Binder twine is ½c. per lb. higher.

Harvest tools have been advanced another 10 per cent. in price.

The makers of ash and hickory handles have advanced their prices.

Green wire cloth is 7½c. higher, being now quoted at $1.37½ per 100 square feet.

Cabinet locks have been advanced in price by the manufacturers in the United States.

CANADIAN IRON ON THE CLYDE.

An English trade paper says: "Another cargo of 5,000 tons of Canadian iron has just arrived in the Clyde. It seems to go readily into consumption, and gives, it is said, satisfaction to the buyers."

NOVA SCOTIA MARKETS.

HALIFAX, April 22, 1902.

THE hardware business in the city was very brisk during the past week, and there is every indication that it may continue so. Building operations are going briskly forward, both in the city and throughout the country generally, and there is a great demand for all kinds of building materials, roofing, cement, glass, etc. Jobbers' payments are exceptionally good, and there seems to be a healthy tone all over the country.

* * *

The event of the week has been a notice from the manufacturers of an advance of 20 per cent. on both American and Canadian builders' hardware. This came as quite a surprise, and, as there are many orders yet unfilled, and the expectation of a continued general demand during the summer, the dealers here will have to make a corresponding advance. Contractors who had not ordered their full requirements have been caught unawares, and the advance will mean considerable loss to them. However, the late continued firmness in iron and steel should have made this advance an expected contingency. As a matter of fact it did, and some of the wholesalers have in heavy stocks while others are short.

* * *

There was considerable activity during the past week among the hardwaremen who deal specially in fishermen's supplies. During the week, some 40 or 50 fishing vessels were in port getting their last supplies and outfitting previous to sailing for the fishing grounds, where they will remain until full cargoes are obtained. Some of these, from Lunenburg, Shelburne and other of the large centres, had bought their salt and much of their fishing gear at home, but there are always some things at the last moment which have to be procured at Halifax. So many vessels in at one time made business very active.

* * *

The cordage situation has been restless at times for some months, and various advances have been noted in sisal and British manila. These have again been subject to an advance of ½c., consequent on the scarcity of fibre. Other advances in cordage are anticipated. Pig iron has also been subject to further advance. The linseed oil and turpentine situation is now much easier, and it is possible that there may be some reduction from recent advances. There is considerable demand for both at this season.

* * *

Heavy importations of glass, cement, and general hardware have arrived by steamers during the last week, and dealers are fairly well stocked up, though in some lines there is still difficulty in having orders filled promptly in the primary market.

* * *

There has been considerable activity lately in wire fencing, as this is the season when this article is most in demand. There has also been considerable doing in mill and mining supplies. R. C. H.

ANDREW BELL AND CO DISSOLVE

Andrews, Bell & Co., Montreal, have dissolved. Mr. J. B. Bell, the resident partner in Montreal, has joined with his father, Mr. Thomas Bell, and his brother, Mr. Thomas Bell, jr., in forming a new company, carrying on business in Montreal and Liverpool. Messrs. MacGilchrist and Hobson, partners of the old Liverpool firm, are forming a new and separate company under the style of Andrews, Gillespie & Co., which will also do business in Montreal as well as in Liverpool.

BACK FROM THE PACIFIC COAST.

Mr. I. N. Waite, hardware, stove and tinware dealer, Picton, Ont., accompanied by Mrs. Waite, was in Toronto this week en route home from Colorado and California, in which States he and Mrs. Waite have been spending the winter.

Their friends in the trade will be glad to know they have returned much benefitted in health.

PERSONAL MENTION.

Mr. Adair, of J. & T. Adair, hardware merchants, Dawson, is in Toronto on a purchasing trip. The firm has several stores in the Klondike.

WHOLESALE HARDWARE

Wanted a gentleman thoroughly conversant with the Hardware business, as GENERAL MANAGER for a Wholesale Jobbing House about to be incorporated. Must have long experience, and be absolutely capable. Party with a few thousand dollars to invest would be preferred, but this is not the essential point.

Address, with full particulars and salary required, (in confidence),

Box 87, Hardware and Metal, Toronto.

HEATING AND PLUMBING

SOME BUILDING NOTES.

THE McClary Manufacturing Company are adding two more storeys to their warehouse on Water street, London, Ont., at a cost of $10,000.

W. Jack is erecting a new dwelling at Hagersville, Ont.

A new Anglican church will be built at Glenwilliams, Ont.

A new separate school will be erected at Port Arthur, Ont.

A new summer hotel is being built at Hillsboro', Albert County, N.B.

During the summer a new industrial school will be built at Hull, Que.

H. A. McKibbin is going to erect a new house at Port Arthur, Ont.

A new Roman Catholic convent will be built at Orillia, Ont., this season.

W. Nichols will build a storey-and-a half brick cottage on Blackfriars street and the Waincliffe Road, London, Ont.

J. T. Robinson has taken out a permit for the erection of a brick-veneered one-and-a-half storey cottage at London, Ont.

BUILDING PERMITS IN TORONTO.

During the week building permits have been granted from the office of the City Commissioner, Toronto, as follows: City Corporation for a one-storey building of stone, brick, steel and concrete, for Manufacturers' and Liberal Arts Building at Exhibition Park, for $10,000; S. H. Janes, for three one-storey brick dwellings on the north side of Ruskin avenue, for $3,300; T. H. Peacock & — —, Carton, for a two-storey frame factory, covered with galvanized corrugated iron, on the Don Esplanade, for $1,000; St. Luke's Church, for a one-storey brick Sunday school at the southeast corner of St. Joseph and St. Vincent street, for $6,500; George Wills, for two one-storey attached brick stores on the south side of College street, for $600; E. Howard, for a two-storey brick dwelling at 63 Walker avenue, for $2,400; The Merchants' Dyeing and Cleaning Co., for the erection of a brick and steel two-storey factory on the corner of Liberty street and Pacific avenue, for $6,000; S. H. Courtney, for a two-storey brick dwelling at 626 Bloor street west, for $700; W. McIlveen, for a two-storey frame store and dwelling on Gladstone avenue, for $1,400; A. J. Henderson, for a pair of semi-detached two-and-a-half storey brick dwellings at 29-31 Albany avenue, for $1,500; Robert Clayton, for a two-storey brick dwelling at 350 Markham street, for $3,000; C. F. Wagner, for a brick foundation under dwelling on St. Vincent street, for $600.

A BUILDER IN DIFFICULTY.

Thomas Turff is a carpenter and builder having his place of business at 92 Adelaide street west, Toronto. His affairs have been going behind for a considerable time, and he made an assignment to R. H. Mackay, Toronto, on April 19. There was a meeting of creditors on April 23, but no statement of his assets and liabilities could be submitted. Miles Vokes and Frank Hillock were appointed inspectors to act in conjunction with the assignee, and the assets will be sold by auction on Monday, April 28.

KINGSTON PLUMBERS MAY LOCK OUT.

The union plumbers of Kingston and their employers are differing. The union wants to have two grades of men recognized, one to be paid 22½c. an hour, or $2 per day, and the other to be paid 19½c. per hour, or $1.75 per day, the day in each case being an nine-hour one. The masters are willing to pay $2 a day to the better ones, but several object to paying the others $1.75 a day. The union also wants the bosses to employ only union labor, and to this some employers object. Other employers have signed an agreement acceding to the demands of the men, and it is said that if all have not signed the agreement before May 1 a lockout will take place.

SAFETY VALVES ON GAS-HOLDERS.

Herr Kreitling has recently been discussing methods for avoiding accidents with acetylene plants in one of the German journals. He points out that the great majority of explosions have been due to the stupid practice of entering the apparatus house with a naked light when it has become full of an explosive mixture of acetylene and air caused by an escape of gas from the generator. Sometimes the escape may be produced by the gradual rusting away of certain portions of a cheaply constructed machine, and at others to the stoppage of a pipe or cock. With automatic apparatus it may occasionally happen that the controlling mechanism breaks down, and a larger quantity of carbide than should be is decomposed, or, indeed, the whole of the carbide in the generator is attacked by the water instantaneously. This gas passes to the holder, and if the consumption be not equal to the make, the holder soon becomes quite full. Then there is no safe outlet for the surplus gas save through the safety-valve, whence it follows that the safety-valve should have a clear diameter equal in area to the pipe admitting acetylene to the holder. Safety-valves are now always fitted, but they are generally small in bore, and would not be able to cope with a rapid and long-continued overmake of gas. If the safety-valve is too small for its work the extra gas blows the seal, and the danger of an explosion arises at once. Generator-sheds should be provided invariably with external artificial illumination (not an acetylene lamp supplied by the same apparatus, we would remark), and the possessor might, with advantage, procure a Davy safety-lamp to take inside in case of an undiscoverable breakdown.

BUILDING IN WINNIPEG.

From January 1, 1902 until April 15, the total amount of the building permits issued in Winnipeg was $239,250 as against $373,425 for the same period last year.

LONG-DISTANCE HEATING IN GERMANY.

United States Consul-General Richard Guenther, of Frankfort, under date of March 24, 1902, reports the completion at Dresden of the largest long distance heating plant in Europe. From a central station, says the Consul-General, many public buildings on the left bank of the River Elbe, including the theatre, the museum, the castle, the Royal kitchen, the Customs house, etc., are heated. The greatest distance over which heat is transmitted is three-fourths of a mile. The total heat consumption per hour is 15,200,000 heat units. The usual steam pressure is two atmospheres. Ten of the 14 boilers are used, and to guard against accidents, two main lines of pipes have been provided. The loss of heat in transmission is from 4 to 4½ per cent. The pipes are protected by two layers of tin, the inner layer being perforated and the outer one covered with silk. The largest pipes have a diameter of 216 millimeters (8.51 inches).

A PAINTER'S GREEN

Ramsays Vienna Green is pre-eminently a painter's green. The moment he touches it he knows it is the smoothest, the finest ground, the richest, the strongest of all the greens. For use on blinds, doors, and everything that should be green and be kept green. Three shades—all size tins. Booklets and show cards. Ramsays **Vienna Green** is registered. Infringers will be prosecuted.

LEADER CHURN

New Century Improvements

FOUR DIFFERENT STYLES:

A—Steel Frame with double reversible Steel Lever.
B—Wood Frame with double reversible Steel Lever.
C—Steel Frame with Crank.
D—Wood Frame with Crank.

Styles **A** *and* **B** *may be operated from a sitting or standing position.*

Steel Frames and Hoops beautifully ALUMINIZED.

All LEADER CHURNS are equipped with BICYCLE BALL BEARINGS and PATENTED CREAM BREAKERS.

Stands are so constructed that they are particularly strong and rigid, and there is nothing to interfere with the placing of pail in the most convenient position for draining off buttermilk.

It Pays to Have the Best. None are Better Than the Leader.

THE DOWSWELL MANUFACTURING CO., LIMITED, HAMILTON, ONT.

Eastern Agents: W. L. Haldimand & Son, Montreal, Que.

CUSSIN'—DISCUSSIN'

Dealers may avoid the former and have the satisfaction of hearing their customers discussing in terms of praise the goods that are right.

Always handle the best.

Satisfaction is assured if the Dowswell Manufacturing Co., Limited, are the makers of the goods you sell.

The New Century Washing Machine

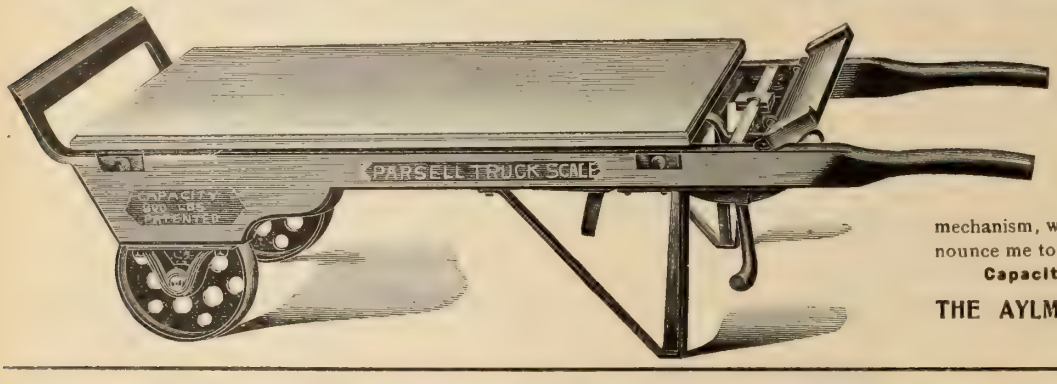
This cut illustrates the latest and best machine for washing clothes yet invented.

Having strong spiral springs and ball-bearings—the same as used in High-Grade Bicycles—very little effort is needed to do what with other means is hard work.

Nothing so easy—nothing so thorough—nothing less wearing on garments. It is perfection.

A customer says: "It has none but good points."

Another customer says: "It is a darling; washes a tubful in five minutes."



It is the **New Century Washer.**

Every Hardware Dealer should have them. They are not the cheapest, but are sellers, and will do all that is claimed

The operator can positively do the work, and without effort, while seated, and the machine is enclosed, retaining heat and vapor.

To Those About to Marry :—

Punch's advice was DON'T : and to those who are tempted by lower prices to purchase any other Horse Nails than the best, our advice is DON'T. You will repent it. Cheap Horse Nails may afford you more profit, but in selling the best, which is acknowledged to be the "C" brand, you will have the satisfaction of making permanent customers with the Farrier who uses them, for they will undoubtedly last longer, and prove in the end more economical. It stands to reason that it should be so, and it is supported by the experience of the world which has become embodied in the statement that "the best are the cheapest." The best goods are not made cheaply. The "C" Horse Nails are not made cheaply ; they are made only from the best obtainable material which is known or used for the purpose of making Horse Nails. The material therefore, commands the best market price. The process we use, and which is exclusively used in our works on this Continent, furnishes the best results in the best way. Every Nail is "hot forged" from the Rod of Swedish Charcoal Steel. Every Nail is examined singly before it is put into the box, in order to discover any imperfection. Every box of Nails is warranted perfect. Every box may be returned free of all charges, if not in every respect entirely satisfactory to the purchaser. We have been making nothing else but Horse Nails for thirty-seven years, and this long experience is embodied in the Nails you buy bearing our "C" Brand and name. You can do all your Horse Nail trade with one brand if it is our "C" Brand. Try it this year.

Your Orders Solicited.

Canada Horse Nail Company, MONTREAL.

A WELL-KNOWN MERCHANT DEAD.

Joseph Kerr, who for many years conducted a business as general merchant at Aultsville, Farran's Point and Wales, Ont., died at Wales on April 11, at the age of 64 years.

Mr. Kerr was born in County Fermanagh, Ireland, in 1838, and removed a few years later to Canada with his parents. In his earlier days he worked on the Grand Trunk Railway, becoming a conductor. He afterwards formed with his brothers the firm of Kerr Bros., general merchants, and had charge of their business at Wales.

In 1879 he was elected as Conservative member for Stormont in the Provincial Legislature and continued to be their representative until 1886.

DISAPPROVED OF THE PROTECTION

"I got no use for Congress," asserted Mr. Lemuel Higgins, proprietor of the Bowersville Grocery and Dry Goods Emporium. "Why, here's 'Si' Simpkins and 'Joe' Skinner has been owin' me $10 apiece fer sugar for six year, an' they jest won't pay up, an' now Congress is goin' ahead an' makin a law to pertect people like that. I don't see why sugar beats is entitled to any better show than any other rascals."—Baltimore American.

MR. GRANGER RE-ELECTED PRESIDENT.

At the annual meeting of the shareholders of The Auer Incandescent Light Manufacturing Co., Limited, Mr. A. O. Granger was reelected president. The directors, Messrs. John Murphy, S. Carsley, C. A. Duclos, J. G. Ross, F. E. Nelson, A. O. Granger, T. W. Boyd, Hugh Glassford and W. R. Granger were reelected for the ensuing year. Other officers elected were Mr. W. R. Granger, general manager and secretary, and Mr. Thomas Sutton, treasurer.

The annual statements and the report of the board of directors were unanimously adopted.

At another meeting a resolution of sympathy was passed for the death of Father Quinlivan, whose support and cooperation were very much appreciated by the members of the company.

THE ARGENTINE LINSEED CROP.

Reports from the Argentine Republic indicate that the linseed crop of the River Plate region will be considerably in excess of early predictions. Conservative estimates called for an 8,000,000 bushel crop, but, basing their figures on the shipments of the first four weeks of 1902, the opinion is becoming general that the crop will be 10,000,000 and possibly 12,000,000 bush.

THE CONDUCT OF THE COMMERCIAL LIFE.

From "The Empire of Business," by Andrew Carnegie.

IT is the fashion nowadays to bewail poverty as an evil, to pity the young man who is not born with a silver spoon in his mouth, but I heartily subscribe to President Garfield's doctrine that "The richest heritage a young man can be born to is poverty." It is not from the sons of the millionaire or the noble that the world receives its teachers, its martyrs, its inventors, its statesmen, its poets, or even its men of affairs. It is from the cottage of the poor that all these spring.

DISTRIBUTION OF WEALTH.

By administering surplus wealth during life great wealth may become a blessing to the community, and the occupation of the business man accumulating wealth may be elevated so as to rank with any profession.

Money is left by millionaires to public institutions when they must relax their grasp upon it. There is no grace, and can be no blessing, in giving what cannot be withheld. It is no gift, because it is not cheerfully given, but only granted at the stern summons of death. The miscarriage of these bequests, the litigation connected with them, and the manner in which they are frittered away seem to prove that the fates do not regard them with a kindly eye.

INHERITED WEALTH.

Nothing is truer than this, that, as a rule, the "almighty dollar" bequeathed to sons or daughters by millions proves an almighty curse. It is not affection for the child, it is self-glorification for the parent which is at the root of this injurious disposition of wealth. There is only one thing to be said for this mode; it furnishes one of the most efficacious means of rapid distribution of wealth ever known.

INDEPENDENCE OF CHARACTER.

One false axiom you will often hear, which I wish to guard you against:- "Obey orders if you break owners." Don't you do it. This is no rule for you to follow. Always break orders to save owners. There never was a great character who did not sometimes smash the routine regulations and make new ones for himself.

Boss your boss just as soon as you can; try it on early. There is nothing he will like so well if he is the right kind of boss; if he is not, he is not the man for you to remain with—leave him whenever you can, even at a present sacrifice, and find one capable of discerning genius. Our young partners in Carnegie Brothers won their spurs by showing that we did not know half as well what was wanted as they did.

CONCENTRATION.

"Don't put all your eggs in one basket" is all wrong. I tell you "Put all your eggs in the one basket and then watch that basket." It is easy to watch and carry the one basket. It is trying to carry too many baskets that breaks most eggs in this country. He who carries three baskets must put one on his head, which is apt to tumble and trip him up.

It took me some time to learn, but I did learn that the supremely great managers, such as you have these days, never do any work themselves worth speaking about. Their point is to make others work while they think. I applied this lesson in after life, so that business with me has never been a care. My young partners did the work and I did the laughing, and I commend to all the thought that there is very little success where there is little laughter.

TRUSTS.

The fashion of trusts has but a short season longer to run, and then some other equally vain device may be expected to appear when the next period of depression arrives; but, there is not the slightest danger that serious injury can result to the sound principles of business from any or all of these movements. The only people who have reason to fear trusts are those foolish enough to enter into them. The consumer and the transporter, not the manufacturer and the railway owner, are to reap the harvest.

Given freedom of competition and all combinations or trusts that attempt to exact from the consumer more than a legitimate return upon capital and services write the charter of their own defeat.

MILLIONAIRES.

Here is a remarkable fact, that the masses of the people in any country are prosperous and comfortable just in proportion as there are millionaires.

In the old home of our race, in Britain, which is the richest country in all Europe, there are more millionaires than in the whole of the rest of Europe, and its people are better off than in any other.

CAPITAL AND LABOR.

The trouble between capital and labor is just in proportion to the ignorance of the employer and the ignorance of the employed. The more intelligent the employer the better, and the more intelligent the employed the better. It is never education, it is never knowledge that produces collision. It is always ignorance on the part of the one or the other of the two forces. Speaking from an experience not inconsiderable, I make this statement. Capital is ignorant of the necessities and the just dues of labor, and labor is ignorant of the necessities and dangers of capital. That is the true origin of friction between them.

Wealth is being more and more distributed among the many. The amount of the combined profits of labor and capital which goes to labor was never so great as to-day, the amount going to capital never so small.

EDUCATION.

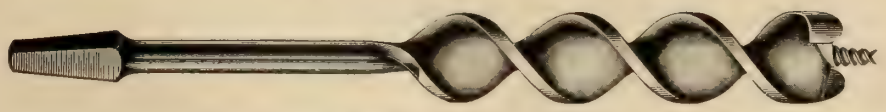
In my own experience I can say that I have known few young men intended for business who were not injured by a collegiate education.

Men have wasted their precious years trying to extract education from an ignorant past whose chief province is to teach us, not what to adopt, but what to avoid. Men have sent their sons to colleges to waste their energies upon obtaining a knowledge of such languages as Greek and Latin, which are of no more practical use to them than Choctaw.

Common galvanized iron

has all the faults there are;

the worst one is its varying.



Apollo is uniform.

CURRENT MARKET QUOTATIONS

April 25, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

STICKY TARRED PAPER.

Most of you have had more or less trouble owing to Tarred Paper sticking, and we admit we used to make some of that kind ourselves. During the last five years we have had only two complaints, and in both cases the sticky Tarred Paper complained about had neither been manufactured nor sold by us.

Our Registered Brands are: **"Red Star", "Anchor," "O.K." and "Victoria."** Don't you think you had better handle them?

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

"That Made the Hit"

This is a drawing of the Patent Connection that made the "SAFFORD" famous the world over; that revolutionized radiator building; that made it possible to put a radiator together without bolts, red lead, rods or packing.

The "SAFFORD" is the only radiator on the market for hot-water and steam heating. It means satisfaction every time—is easy to handle for the contractor.

"A WORD TO THE WISE IS SUFFICIENT."

Gold Dollars at 90c. each won't sell until you have convinced the customer that they are genuine. Have you the time to make the argument to do the convincing?

ALABASTINE is the standard wall-coating **"The World Over."** Would any dealer want to spend the time to convince a customer that a substitute, or something else, is "just as good" as **CHURCH'S**

ALABASTINE ?

Besides, substitution is suspicious, and often bears earmarks of a swindle.

We do not claim to know all that can be learned about the manufacture of wall coatings, but twenty-five years of experience must count for something, and the fact that **ALABASTINE** is the goods that are in demand speaks volumes in its favor.

Never until **M. B. Church** introduced **ALABASTINE** was it found practicable to make wall-coating adapted to be mixed with cold water.

We own the patents on the cold water process, and this statement is our only argument at this time on that point.

ALABASTINE is healthful and beautiful, has stood the test of time; is manufactured in Canada, and recommended by leading sanitarians throughout the country. There is nothing "just as good." Buy only the genuine.

Manufactured by — **THE ALABASTINE CO., LIMITED, Paris, Ont.**

NOT LIKELY TO BE REALIZED.

COMMERCIAL INTELLIGENCE, a journal published in London, England, in the interests of British and Colonial trade, recently contained an article showing the difference in trade between Great Britain and the United States.

"American exports," it says, "to our hospitable shores last year amounted to the neat little sum of £140,000,000, i.e. about half the total exports of the United States. At one time Uncle Sam used to reciprocate, but fiscal barriers have reduced our exports to America to £18,000,000. *** The limit of effective protection against us has been reached, and 80,000,000 Americans buy of us, how much? Goods valued just at 4s. per head per annum. We long suffering 40,000,000 Britishers, on the other hand, buy from the United States to the extent of the handsome figure of £3 10s. per head per annum."

In view of this large balance of trade against Great Britain, The Commercial Intelligence "feels sure that many Americans will blush when they read this."

Our contemporary can scarcely be serious when it ventures the opinion that the Americans must blush when they realize that the balance of trade is so much in their favor.

We have yet to hear that the United States are prepared to blush under any such circumstances, they rather congratulate themselves that their trade has developed so rapidly at the expense of other nations. They are, of course, not to be blamed for this, for they are certainly progressive, and the way their trade has developed is the fruit of this progressiveness. At the same time, the one-sided character of the trade between the United States and many other foreign countries is stirring the latter up to the devising of ways and means for correcting the inequality. It will be remembered that a year or two ago one of the members of the Austrian Government openly preached an alliance among the European nations with the avowed purpose of meeting the keen competition of the United States.

The balance of trade between Canada and the United States is, as our readers are aware, greatly in favor of the latter, and has stirred up a good many in this country to agitate for an increase in the duties on our imports of United States products. This movement is viewed quite seriously by a number of business men in the United States who are interested in Canadian trade, and they are busy on their side preaching closer trade relations with this country in the hope of thereby being able to remove the cause of which the threatened retaliation is the effect.

POLITICS CAUSED THE FAILURE.

A MERCHANT who recent failed ascribes his difficulty to politics. Just how they caused the failure is not explained.

Politics and business seldom mix well. And it is always dangerous to attempt to mix them. A good many people are exceedingly sensitive in regard to political matters, and the merchant who expresses disapproval of the party to which they belong may cause them to transfer their patronage to those who are not likely to give them offence in this respect.

Ontario is in the midst of a general election campaign, and business men will find it the better policy to refrain from discussing politics either with or in the presence of their customers. This is certainly the safer course to pursue, if unpleasant results are to be avoided.

It does not follow that business men should strictly eschew politics. On the contrary, every business man should give some concern to the political affairs of the country. It is the only way in which good government can be secured. But this can be done in a way that will earn the respect, rather than the disapprobation, of customers whose political faith is of the opposite kind.

THE LABOR DISPUTES--A REMEDY.

THERE are strikes and rumors of strikes these days. Coming at a time when trade conditions are so healthy they cannot be viewed with anything else but concern. This is particularly true of the strikes in the building and allied trades. Never in the history of Canada have building operations been carried on so extensively as they are at present, and never, in consequence, has there been such a demand for material and labor. What the effects of a prolonged strike would be under such conditions no one can to the full extent calculate. It can, however, be well expressed in the one word "disastrous."

We do not propose to enter into the merits or demerits of the questions which have led up to the strikes. But those who have given the matter any thought must have wished for the consummation of some practical scheme which would take the place of the strike or lockout as a means of settling disputes between capital and labor.

If those immediately interested in the labor disputes were the only ones to suffer, it would not be so much a matter of concern to the community at large. But the trouble is that trade and commerce also suffer. Anything, therefore, that can be devised, whereby strikes and lockouts can be obviated, would be a benefit to society at large.

If both parties to a dispute would agree upon submitting the same to arbitration, there would be no strikes. Only this week, Chancellor Boyd has agreed to arbitrate the labor dispute between the trackmen and the Canadian Pacific Railway Co. But the trouble is that all parties to a difficulty between employer and employe will frequently not consent to arbitration.

In New Zealand, as our readers are well aware, compulsory arbitration has been in existence for some time. And, while opinion is somewhat divided in regard to the working of the law, the fact that strikes have been prevented is an evidence that compulsory arbitration has succeeded in doing what it was designed to do. The fact that the new Australian Commonwealth has decided to imitate her sister colony is also an evidence that the compulsory arbitration of New Zealand must have some strong features to recommend it to the Commonwealth's Parliament.

Canada, too, is now proposing to take a step in the direction of compulsory arbitration, Hon. Wm. Mulock, who is Minister of Labor as well as Postmaster General in the Dominion Government, having introduced on Tuesday a Bill providing for compulsory arbitration for the settlement of railway disputes. It is therefore a Government measure.

When introducing the Bill he explained that it would apply to Government railways and to all railways under the control of the Dominion Parliament. Strikes and lockouts will be prohibited and penalties imposed for contravention of the provisions of the Bill. Every labor dispute was to be referred to a Provincial Board of Arbitration if the question were of a Provincial character. Larger disputes would be referred to a Dominion board. Each Provincial board would be provided with a clerk who, among other duties, would act as a medium of communication between the parties to the controversy. Each Provincial board would be composed of three arbitrators, one appointed by the railways operating within the Province, another to be chosen by the men, and a third to be chosen by these two. If these two failed to agree on a third, then the third would be chosen by the Governor in-Council. The Dominion board would consist of five members, two chosen out of the seven elected by the railway companies to the Provincial boards, two chosen from the seven elected by the railway employes to the Provincial boards, and a fifth to be named by these four, or by the Governor-in-Council. It would be the duties of these boards, first, to endeavor by conciliatory methods to arrange the matter in dispute; failing in that direction they would be clothed with ample powers to determine the dispute and make an award. On a Provincial board the decision of the chairman and one more would be an award. On the Dominion board the decision of the chairman and two more would be an award. This award would be current for such time, not exceeding a year, as the award should state, with provision that either party may terminate it within a lesser period, but that it must continue in force until another award has been made to take its place. The award shall not be cognizable in any court and shall not be removable to any court for the purpose of review, of amendment, or of being quashed.

It is not the intention of the Government to press the Bill through to its final stages during the present session of Parliament. That will be left to the next session. In the meanwhile the Bill will be printed and distributed, so that everyone interested may be able to thoroughly digest its contents and suggest any amendments that may be deemed necessary.

We believe the Bill is a step in the right direction, and it is to be hoped that it will be possible to eventually extend its principle to industrial disputes of all kinds, for all strikes and lockouts disturb the trade and commerce of the country.

Compulsory arbitration may be deemed by a good many people an interference with the liberty of the subject. But wherever there is an organized society there is interference with the liberty of the subject in order that the greatest good may be provided for the greatest number. And in the matter of compulsory arbitration the idea is certainly the greatest good for the greatest number.

WOULD NOT BE BOUGHT.

THE two tobacco trusts in Great Britain, namely, the American and the home trust, are making desperate efforts to secure control of the retailers.

It seems that the British combination approached the retailers and offered them a fair sum if they would agree to handle none but tobaccos supplied by it. The Americans were willing to go much better than this; in fact, they offered the retailers inducements said to be four times more valuable than those made by the British trust. But even this bait did not catch the retailers. They quietly gave both trusts to understand that they were not in the market to be bought.

The British retailers are certainly to be congratulated upon the stand they have taken. Merchants, either wholesalers or retailers, do not, as a rule, gain anything by binding themselves up to any one interest. The tobacco and all similar trusts only endeavor to get control of the merchants in order that they may use them as their tools. Their thought is their own welfare only, and not that of the merchants.

Merchants cannot afford to allow themselves to be used by any interest. Loss of free will means loss of one of the greatest essentials to success in business.

Successful merchants are those who act and think for themselves.

NEW YORK METAL MARKET.

COPPER—The weakness in copper has crystallized into a decline. The price of Lake, in its downward course, passed 12c. to-day, but the quotation of 11.95c. now made on any delivery, from spot to July, does not appear to be low enough to attract buyers. The latter are not prepared to pay more than 11.75c., that being bid to-day at the close. Both electrolytic and casting copper can be bought at 11.62½c. for spot to July delivery, with buyers not above 11.27½c. Standard copper also was easy. There was a sale of 100 tons for August delivery at 11.15c., and that was asked at the close for any delivery over the year, buyers bidding 10 85c. Offerings of all grades were made freely at the prices mentioned and in large quantities. The downward movement in London made further progress to day under the influences prevailing for some time past. The close was easy at a decline for the day of 5s.

PIG TIN—There were more sellers to-day, and this, in conjunction with weaker advices from London, caused an easier feeling, resulting in a decline of 25 points. Fifteen tons spot sold at 28.10c., and the market closed with that asked for spot and May, while 27.87½c. was bid for the former and 27.80c. for the latter delivery. June was quoted at 27.75c. bid and 28c. asked, and July at 27.50 to 28c. The London market broke 15s. before noon, and closed the day £1 lower than last night on spot and 12s. 6d. lower on futures, a considerable business having been done in the latter. The tone of the English market at the close was easy.

PIG LEAD—The market was dull, with prices steady, however, at 4 10 to 4 15c., as to quantity and date of delivery. St. Louis was steady at 3 97½ to 4c., and there was no further change in London.

SPELTER—There is little demand and the tone of the market is rather easy at 4 42½c. for spot; 4 37½c. for May, and 4.35c. for June shipment from the West. In St. Louis the market was firm, with sales of 100 tons at 4 17½c. and 100 tons at 4.20c. London was unchanged.

REGULUS ANTIMONY — The demand is moderate and prices are unchanged at 10½c. for Cookson's; 8 to 8¼c. for Hallett's, and 7½ to 8c. for other brands.

IRON—The situation in the iron market is practically the same as for several weeks past. While the tone is extremely firm reports like those circulated yesterday that prices are advancing, appear to have no other foundation than occasional forced purchases of small lots for specified deliveries upon which the buyers are obliged to pay whatever the holder who has the material to spare demands. Less anxiety concerning the future seems to be felt by actual consumers of pig iron than speculative operators who, it is claimed, are anxious for reasons of their own to see the market advance. A Philadelphia report presents the situation as it appears in all markets concisely as follows: "The market appears to have been sold to a standstill. There is practically nothing offering, and those who need iron have to go around until they find someone who has it to spare. Buyers appear to be less anxious, however, so that the demand is not nearly as urgent as it was two or three weeks ago, although prices are firm at the full figures then ruling."

There seems to be no relief of the stringency in supplies of finished material in sight. The mills seem to have all the work they can handle, particularly in structural iron, and new business for anything like early delivery goes begging. Whatever stock can be picked up from second hands commands high premiums, but the list prices do not change. As for weeks past, steel billets are exceedingly scarce, and it is impossible to give a quotation, as under the circumstances there is no market. Up to $32.50 to $33 delivered has been paid for small lots, but whether this could be duplicated or not could only be determined by a very thorough canvass of the market to find a seller. There is nothing offered openly at any price. Figures of imports of iron and steel prepared from Government returns by the New York Metal Exchange show an increase of over 100 per cent. in the imports, including iron ore, for the first three months of 1902, as compared with those for the corresponding time last year, the figures of the first-named period being 281,120 tons. Exports, on the other hand, decreased more than 50 per cent., being 110,097 tons for the three months of this year, against 229 862 tons for the same period in 1901.

TINPLATE—There was no change in the situation, the market being very quiet at the previous quotations.—New York Journal of Commerce, April 30.

GOOD MONEY

and plenty of business-increasing helps go hand in hand with

THE SHERWIN-WILLIAMS
PAINT AND VARNISH AGENCY.

There's no paint that is so well known and advertised, that is so easily sold, that is of such uniformly high quality, that gives so much genuine satisfaction, that brings so much profit to the dealer as The Sherwin-Williams Paint. It is a pure lead zinc, linseed oil paint, made by the largest paint and varnish makers in the world. It is a paint that brings with it advertising helps that build up business, that make the paint department the best paying department, that advertise the entire store—helps that never fail to win trade if properly employed.

The same is true of The Sherwin-Williams Varnishes. They are the most economical varnishes made. They are uniformly good and always true to the label. Dealers who sell them have no difficulty in getting and holding the Painters' and Decorators' trade.

If you are not now a Sherwin-Williams agent it will pay you to write at once for the B-13 Booklet, which describes briefly The Sherwin-Williams Paints and Varnishes, and tells how they can be sold by any dealer anywhere with profit and satisfaction. Better write for it now—a postal card will bring it.

GERMAN CUTLERY INDUSTRY.

A cable from Berlin says: "A report of the Chamber of Commerce of Solingen, Prussia, says the depression in the cutlery industry has been partly relieved by large American orders. Although Solingen goods are now largely made in the United States, behind the tariff wall, the report goes on to say, still the American manufacturers are unable to meet the demand which requires them to supplement their production with German goods."

STEAM POWER IN THE FILE WORKS.

SHORTLY after The Nicholson Co., of Providence, U.S.A., purchased The Globe File Manufacturing Co.'s business at Port Hope, they discovered that it would be impossible for them to be enabled to supply the demand for their goods by operating their works altogether by water-power, on account of the uncertainty and limited amount of power at their disposal. Consequently, as soon as they had completed the extensive changes and additions made to this factory, they decided to put in a 175 horse-power engine and boiler, which will give them all the power required in the different departments, and will enable them to run their works full blast all through the year and will make them independent of the water power.

No expense has been spared to place this plant on an equal footing with any of their six American manufactories. The daily output of the different brands, which they now control, will soon enable them to execute all back orders, and they advise their many customers that they will be in a position by June 1 to execute all orders promptly.

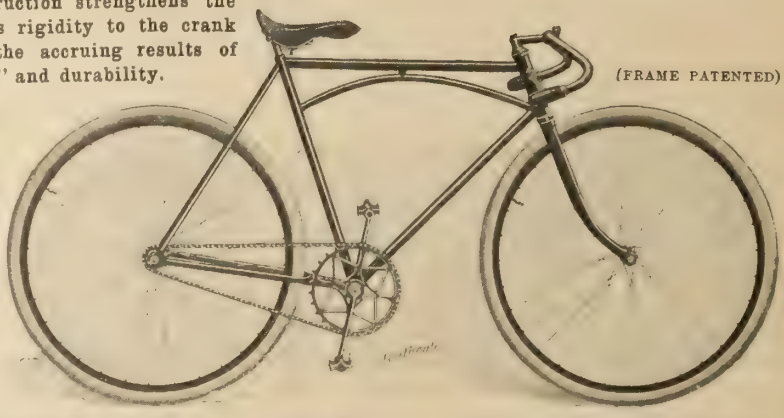
This industry has proved a great boon to Port Hope, as they have supplemented the working staff of the old company by bringing in a number of experienced mechanics, who will become permanent residents.

FAILURE OF A HARDWARE FIRM.

Thomas Dunn & Co., wholesale and retail hardware merchants, Vancouver, have assigned with liabilities of $275,000. Of this $150,000 is owing to a bank in Ontario which holds chattel mortgages as securities, it is claimed. Thomas and Peter Dunn, the original members of the firm, sold out in 1894 to a joint stock company with a capitalization of $250,000, the two partners holding the largest amounts of stock. Branches had been opened in Atlin and Dawson, but they are now closed. The creditors will hold a meeting on May 6. Several Toronto houses suffer by this failure.

WINDING UP A TIRE COMPANY.

E. R. C. Clarkson is winding up The American Tire Co., Toronto, but there will be but little realized from the estate. The liabilities are about $150,000. The plant, which has a nominal value of $30,000, will be offered for sale in a day or so. The late manager, H. P. Davies, is believed to be in Mexico. A judgment against him for $8,000 was recently secured by the liquidator.



A Bicycle so constructed that, with each thrust of the pedal, its hanger is forced to move out of alignment, **RUNS HARD** and will not wear well, as chain, sprockets, bearings and rear wheel are all subjected to unusual strains.

The Iver Johnson Truss Frame is the Solution

as this construction strengthens the frame and adds rigidity to the crank hanger, with the accruing results of "easy running" and durability.

NOVA SCOTIA MARKETS.

HALIFAX, April 29, 1902.

THE spring demand for hardware still continues unusually heavy, and, since the opening of the season, there has been a brisk demand in nearly every line of rade, though some lines are more called for at this season than others. Continuous orders of good value are coming in from the travellers on the road, and members of the trade are kept very busy filling and shipping orders.

* * *

There is a specially heavy demand for builders' hardware and materials in that line. The demand in these commenced early and still continues without any abatement, indicating that there is a heavy building boom on in almost every part of the Province. There is not so great a demand for these at Sydney as for the last two years, but Sydney Mines, the location of the Nova Scotia Steel and Coal furnaces, is a big market this season, as is also Glace Bay. Halifax is doing fairly well in this line, with heavy improvements at North Street Station, a new Customs House, many buildings, public and private, and, possibly, the $75,000 Carnegie gift library building.

* * *

In Halifax, where nearly every wholesaler is also a retailer, it is hard to distinguish between the activity of one and the other, but those who do a retail trade only have nothing to complain of in the way of activity. Both wholesalers and retailers report money plentiful and payments met with unusual promptness. All concur in the opinion that the season, so far, has been remarkably good, and the prospects for a continued demand in all lines of the trade are excellent.

* * *

Prices remain much the same as previously reported, but the iron and steel markets abroad remain so firm that advances at any time are expected. Large stocks of glass, zinc and cement arrived lately from Antwerp by steamer Albuera and by English steamers, and orders which were waiting have been filled. Prices remained stationary. Turpentine is weaker, on account of a recent report of a drop of $4 per bbl. at Savannah, but local prices are unchanged. There is also an easier feeling in linseed oil, and, the present spring demand over, prices may decline somewhat in both oil and turpentine.

* * *

The cordage situation is unsatisfactory. Recent advances have been made, and further advances are looked for. Manila rope, now unusually high, has been advanced, also jute wool twine, lathyarn and other lines. Foreign markets are very firm in these lines—no doubt in sympathy with the cotton situation—and, if anything, higher prices are expected. Manila is now quoted at 16c. base ; British Manila 14½c.; sisal 13c.

* * *

Some of the commodities most in demand now are : Wire and cut nails, quoted at, cut, $2 35 base ; wire, $2.55 base. Wire fencing, at $3 base for fencing, and 4 to 4½c. for staples, which lately advanced. Linseed oil, raw, 85c. ; boiled, 88c. Turpentine, at 28c. in bbls. White lead, at $5.87½ for pure, and $5 50 for No. 1. Roofing, three ply at $1.50 per roll ; two ply, 90c.; tarred felt, $1 80 ; tarred sheathing, 40c.; dry, 30c. Cement, $2 40 for Belgian ; $2.75 for English. Glass, in 50-foot boxes, first break, $2.10 ; second break, $2.20 ; in 100-foot boxes, first, $4 ; second, $4.25 ; third, $4.85 ; fourth, $5.25. Pig lead, which has advanced 25c , $3.75 to $4.

R. C. HAMILTON.

MONTREAL PLUMBERS' STRIKE.

THE long promised strike of the plumbers of Montreal commenced on May 1, when about 145 men quit work. The places affected were those of Ald. Jos. Lamarche, J. W. Hughes, Ogilvie Bros., Blouin & Desforges, Telesphore Latourelle, David Ouimet, Thomas O'Connell, Thos. Moole, Denman & Bethune, M. Walsh & Co., M. Roussin, Drapeau & Champagne, M. Charest, H. Thibault, Chas. Garth & Co., Gordon & Egan, W. H. Stevens, Marier & David, E. Lesperance and W. J. Maguire.

The demands of the men are :

1. Nine hours (9) shall constitute a day's work, and the salary paid shall not be less than twenty-five (25) cents an hour.

2. That all master plumbers employing journeymen plumbers, gas and steam and hot water fitters, in the city of Montreal and vicinity, bind themselves to employ none but good standing members of Local Union 144.

3. Five years (5) shall constitute the time each apprentice shall have to serve before he shall be recognized as a journeyman plumber, gas or steam and hot water fitter, and be entitled to admission and protection of this Union 144.

4. All overtime shall be paid at the rate of time and a half, and double time for the following holidays: Sundays, Christmas, New Years, Labor Day and Dominion Day.

5. All members of this Local working outside the city shall be governed by the rules of this Local, and shall have their transportation and board paid, and shall receive single time pay, during travelling, day, night, Sunday, or holiday.

6. No members of Local 144 shall be permitted to take sub-contracts, or do any jobbing, or to work for any person who shall take such sub-contracts or jobbing.

7. No members of this Local shall install any material which shall not be furnished to him by a Master Plumber, under a fine of twenty-five ($25) dollars or expulsion of this Local Union.

8. No member of Local Union 144 shall install any material supplied by wholesale houses or other which shall not protect the trade.

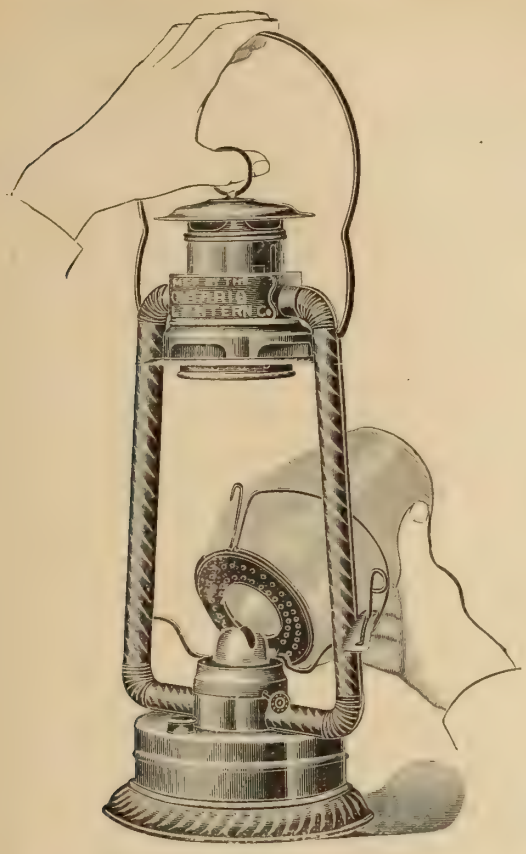
9. No member of this Local Union shall have more than one helper, except when working on 2½ in. pipe or over, or over 6 in. soil pipe, or in any dangerous place.

10. All members starting a day's work shall be employed by his boss the entire day or shall be entitled to a day's pay.

The above agreement is to be in force for one year. Most of the city master plumbers signed the agreement, but many still hold out. The advance in wages would likely be allowed by all the employers, though one or two have declared that to give higher wages they would have to increase their charges, and instead of charging 40c. per hour, as now, would be compelled to ask 60c.

But the chief objection to the demands of the men is in the second clause, which requires the master plumbers to employ none but men of the local union. This would not allow them to bring in men from outside the city if that were necessary in order to complete a big contract, and the failure of filling which would make them liable to damages.

The union, however, expects the strike to end shortly. The men declare that the employers are rapidly coming around to the proposed agreement, and that the affair will be settled in a few days.



ELECTRIC PLANT IN THE SLOCAN.

AN application for the water rights of Box Canyon, in the Slocan, British Columbia, has been filed at New Denver, by N. J. Cavanagh and Oscar V. White. The application calls for 1,000 inches of the water of Carpenter Creek, to be used in developing electric energy. The White Company intends to put in a large electric plant with which to supply Sandon, Three Forks, New Denver, Silverton, and Slocan City with light, besides furnishing power to mines, compressors, concentrators, etc., all over the Slocan district. The site chosen is probably the best unoccupied site for a power plant in the district.

With 1,000 feet, there can be developed a flume head of nearly 250 feet, and this, with 1,000 inches of water, will furnish upwards of 2,000 horsepower, if that much power should be necessary.

Sandon alone uses 1,200 lights, and the company now supplying the electric energy has no exclusive franchise. There is probably room for 100 lights in Three Forks, 500 in New Denver, 300 in Silverton, and 600 in Slocan City, or 2,800 lamps altogether. And the mines will also furnish a big demand for electricity, both for power and light. The White Company have not yet decided what style of generators they will install and will not start work until the water rights are granted.

Murray A. Kerr, president of The Hamilton Steamboat Co., Hamilton, Ont., is dead.

RESOURCES OF THE CANADIAN NORTHWEST.

REPORTS of sermons are not, as a rule, published in the columns of the trade and financial press. A sermon, or, more strictly speaking, an address that was delivered in a Toronto church on Sunday last was so filled with matter of interest to the commercial world, that no apology is necessary for reproducing a summary of it in the columns of "The Canadian Grocer."

The preacher was Rev. John McDougall, who, for 42 years, has been a missionary in the Canadian Northwest, except during a few months in 1885, when he acted as a scout for the Canadian troops during the Riel Rebellion.

His subject was the

"RESOURCES OF THE CANADIAN NORTHWEST."

He said he spoke fron an experience of 42 years in travel and work throughout every part of the Northwest, and yet confessed that he knew only a part of it, notwithstanding the fact that the pastor had introduced him as a man knowing more, perhaps, about it than any other living person.

Mr. McDougall took as an illustration of the greatness of that country a block of land 1,000 miles square (640,000,000 acres), abutting the 49th parallel, and lying between the Rockies and the western boundary of Ontario. This great stretch of territory contained, in his estimation, more acres capable of agriculture and of responding to the thrift and mechanical operation of industrious men than any other stretch of like dimensions on the face of the globe. He called it the very acme of God's work in this respect. Of this great block of land he took 100,000,000 acres, less than one-sixth of it, and placed a conservative estimate of a yield, when cultivated, of 15 bushels an acre. Then he took the bulk estimate, and asked what it would mean to move it to the markets of the world. Looking at it as Mr. McDougall presented it, the haulage necessary seems enormous. He took a train of 40 cars leaving Winnipeg for the east. Each car would carry 1,000 bushels, making an aggregate cargo of 40,000 bushels. Then he asked how many trains of that kind it would take to move the conservative estimate of 15 bushels an acre of one sixth of his selected block. He had found that it would take 37,500 trains of 40 cars, or a little more than 102 trains a day for every day of the year. Figuring more finely still, he had found that it would keep one of such trains moving out of Winnipeg every 15 minutes, day and night, for 365 days to move the wheat crop of but one sixth of that stretch of country.

OTHER THINGS THAN WHEAT.

But Mr McDougall did not confine his estimates to wheat alone. He supposed that in time live stock would be raised in that part of the country. He had waited 23 years for a railway, and had come to know the virtue of patience. The country was rich in pasture land and grasses of rich butter and cheese producing qualities, so that it promised great possibilities. Mr. McDougall allowed one fat bullock a year for shipping purposes to every 40 acres of one-sixth of the block 1,000 miles square. That meant 16,000,000 head of cattle a year. At 20 head a car it meant 40,000 trains of 20 cars each, or a little more than 100 trainloads of cattle moving out of Winnipeg every day for a year. To every 10 acres he allowed one fat sheep and one marketable hog. That meant 64,000,000 of each, which, loaded 200 to a car, would show 32,000 trains of 20 cars each moving out of Winnipeg—one about every 15 minutes, day and night, for a year. Butter and cheese were not overlooked, but of wheat and live stock alone, at this very conservative estimate, it was shown that 109,500 trains of 20 cars each would pass out of Winnipeg every year, or one train every five minutes, to the markets of the world.

Mr. McDougall said that he himself had traced along the eastern base of the Rockies 500 miles long and 200 miles wide one great bed of rich anthracite and bituminous coal, or, in other words, 100,000 square miles of it. He had heard that China had the largest coal beds in the world, but his own observations had led him to believe that she had not one-fifth as much as this one block.

Then there were great water powers. Mr. McDougall, in his travels, had found strong and persistent currents. He and a companion, in an old punt, had once gone with the current down the big Saskatchewan 160 miles in 28 hours. There were also great natural reservoirs of water, with splendid tumbling power. The country along the valley of the North Saskatchewan was compared with England. It looked to Mr. McDougall as if some great race had lived there centuries ago, so splendid were the terraced forests and natural beauties.

CATALOGUES, BOOKLETS, ETC.

A PUMP CATALOGUE.

The fifty-third annual catalogue of Rumsey & Co., Limited, manufacturers of hydraulic engines, Seneca Falls, N.Y., is a book of 250 pages, substantially bound in red cloth. In it are lists and prices of different pumps made by them, from the common well and cistern to the huge force pumps for railways and mines. This firm are also the makers of hydrants, hydraulic rams, fire alarm bells and hand fire engines. The catalogue contains illustrations and descriptions of all of these, and, besides, a telegraphic cipher code and some tables of interest to those who have work in connection with pumps and other lines mentioned above.

This book, which is fully indexed, will be sent on application to any of our readers writing and mentioning "Hardware and Metal."

A PAINT FIRM'S BLOTTING PAPERS.

Stewart & Wood, paint and oil merchants, Toronto, are sending out to their customers blotting paper, on one side of which is the card of the firm and a handsome engraving in colors. The designs comprise bunches of roses, a group of children under an umbrella, beautiful Eastern girls, and others.

A TOOL CATALOGUE

Among the leading lines of goods manufactured by North Bros. Manufacturing Co., Philadelphia, are their "Yankee" tools and ice-cream freezers. These are noted for their simplicity, durability, smoothness of working and moderate cost. Their Yankee tools are accurately and strongly made, and tested before being put on the market, and their freezers are durable and contain many special features making them simple to operate. They have just issued a catalogue containing descriptions, engravings and prices of all these and other lines that are worth writing for by any of the readers of "Hardware and Metal."

Messrs. Douglas, Pike & McWilliams, representing a large linseed oil concern in Minneapolis, are in Winnipeg seeking a site for the location of linseed oil mills there.

W. A. Sherrin and J. Y. Bambridge, who conducted a hardware business in Souris, Man., under the name of J. Y. Bambridge & Co., have dissolved partnership, and the business henceforth will be conducted by Mr. Bambridge under the name of Bambridge & Co.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

THE creditors of D. Meharey, general merchant, Russell, Ont., have held a meeting, and the stock has been sold at 73½c. on the dollar.

George C. Smith, painter, Montreal, has assigned.

G. A. Dugal, tinsmith, etc., Masson, Que., has effected a compromise.

A consent of assignment of George C. Smith, trader, Montreal, has been filed.

George H. Harshaw, general merchant, Camilla, Ont., has assigned to John M. Bennett.

Jos. Savaire, general merchant, Ste. Anne du Sault, Que., is offering to compromise.

Octave Roberge, sawmill owner, St. Paul de Chester, Que., is offering to compromise at 15c. on the dollar.

The creditors of the estate of E. C. Gooden, general merchant, Baie Verte, N.B., held a meeting on April 28.

James Glanville, Toronto, has been appointed curator of Hawkins Bros., general merchants, Blind River, Ont.

Dryden & Gibson, agricultural implement agents, Moncton, N.B., are offering to compromise at 25c. on the dollar.

John Hyde and John J. Griffiths have been appointed curators of C. A. Miller, general merchant, Windsor Mills, Ont.

The creditors of Thomas Dunn & Co., Limited, wholesale and retail hardware merchants, Vancouver, B.C., meet on May 6.

PARTNERSHIPS FORMED AND DISSOLVED.

Greer & Wigmore, painters, London, Ont., have dissolved.

The Deering Harvester Co., Montreal, have dissolved and registered.

Lilly & Carter, general merchants, Dauphin, Man., have dissolved.

Leroux and Therien, wood and coal merchants, St. Louis de Mile End, Que., have dissolved.

Thomas Myles & Sons, coal merchants, Hamilton, Ont., have dissolved. A. H. Myles retires.

Oakley & Holmes, stoneworkers and contractors, Toronto, have dissolved. Frederick Holmes continues.

George A. Bull, agricultural implement agent, Yorkton, N.W.T., has admitted E. E. Pettit into partnership.

W. H. Kemp, livery and implement agent, Innisfail, N.W.T., has admitted as partner, H. A. Hetherington.

Charles Kearney & Son, general merchants, Florenceville, N.B., have dissolved; J. V. Kearney continues.

SALES MADE AND PENDING.

Elliott & Burdick, carriagemakers, Lacombe, N.W.T., have sold out.

The stock of Louis Doyon & Cie., general merchants, St. Victor de Tring, Que., has been sold at 67½c. on the dollar.

The stock of Daniel Johnson, general merchant, Combermere, Ont., has been sold.

The stock of The American Tire Company, Limited, Toronto, is advertised to be sold by auction commencing May 8.

The assets of John W. Lavallee, general merchant, St. Charles, Bellechasse, Co., Que., have been sold by auction to The V. & B. Sporting Goods Co., Quebec.

CHANGES.

Berube & Lachance, blacksmiths, Montreal, have registered.

The Dominion Sporting Goods Co. has registered at Montreal.

Lemair & Boivin, hardware merchants, Magog, Que., have registered.

Bennett & Moncel, electrical contractors, Montreal, have registered.

Samuel Moore, mason, Parrsboro', N.S., has removed to Port Greville.

Asselin & Smith, general merchants, St. Telesphore, Que., have registered.

Lamarre Freres, hardware, paint and oil merchants, Montreal, have registered.

G. W. McKay, general merchant, Moncrieff, Ont., has sold out to J. A. McKay.

A. McLarty, machinist, Portage la Prairie, Man., is succeeded by S. Robinson.

Marie Honorine Chamberland has registered for E. Clement, leather merchant, Quebec.

C. W. Gaetz, general merchant, Pine Lake, N.W.T., has sold out to C. D. Jermyn.

Simon Dragon, general merchant, Fernie, B.C., is succeeded by Dragon & Stensick.

J. R. McLaurin, general merchant, Vankleek Hill, Ont., has sold out to John S. McIntosh.

James Thompson, general merchant, East Templeton, Que., is succeeded by X. Mongeon.

G. H. Karstedt, tinware merchant, Georgetown, Ont., has sold out to Esther J. Karstedt.

Morkill & Whitworth, lumber and implement agents, Lowe Farm, Man., are succeeded by E. McTavish.

John White has registered at Halifax under the style of John White & Co., tinware merchants, Halifax.

Emilien and Wilfrid Lupien, sawmill owners, have registered at West Wickham, Que., under the style of Lupien & Lupien.

FIRES.

Robert Paul, sash, blinds, etc., Newburgh, Ont., has lost slightly by fire.

Charles Galbraith, blacksmith, North Augusta, Ont., has been burned out.

James York's sash and door factory at Chesterville, Ont., was recently burned.

T. E. Warren & Co., general merchants, North Augusta, Ont., have been burned out.

A. N. McLean & Co., lumber merchants, Windsor, Ont., have sufffered loss by fire.

Edwin Stickney's foundry and machine shop at Newburgh, Ont., has been burned.

The mill of John Cooper, lumber merchant and stavemill owner, Wallaceburg, Ont., was burned.

The Alex. Fleck Co., Limited, machinists and founders, Ottawa, were slightly damaged by fire; the premises were insured.

DEATHS.

Thomas McCrum, gunsmith, Brockville, Ont., is dead.

Samuel Chapman, harnessmaker, Sussex, N.B., is dead.

W. K. Karns, general merchant, Treadwell, Ont., is dead.

Wm. Reardon, brush and broom manufacturer, Ottawa, is dead.

J. Wesley Ross, wood merchant, North East Margaree, N.S., is dead.

Daniel MacLaren, of MacLaren & Co., general merchants, Strathcona, N.W.T., is dead.

WIRE ROD AND WIRE NAIL PRODUCTION.

According to The Bulletin of the Iron and Steel Association the production of iron and steel wire rods in the United States in 1901 amounted to 1,365,934 gross tons, against 846,291 tons in 1900, 1,036,398 tons in 1899 and 1,071,683 tons in 1898, showing an increase of 519,643 tons, or over 61 per cent., in 1901 as compared with 1900. Of the total production in 1901, 1,365,459 tons were steel and 475 tons were iron rods. The following gives the production (in gross tons) in the last three years:

States	1899.	1900.	1901.
Mass., Conn., Rhode Island, New York and New Jersey.	139,945	134,502	176,101
Pennsylvania	319,058	240,533	386,037
Kentucky, Alabama and Ohio	312 620	244,731	422,679
Indiana and Illinois	264,775	226,525	381,117
Totals	1 036,398	846,291	1,365,934

Pennsylvania made the largest quantity of wire rods in 1901, with Illinois a close second, Ohio third, and Massachusetts fourth. Seven other States, Rhode Island, Connecticut, New York, New Jersey, Kentucky, Alabama and Indiana, also rolled wire rods in 1901. With the exception of Rhode Island, which first rolled rods in 1901, all the States named also produced rods in 1900. The production of steel wire nails in the United States in 1901 amounted to 9,803,822 kegs of 100 lb., as compared with 7,233,979 kegs in 1900, an increase of 2,569,843 kegs, or over 35 per cent. In 1899 the production amounted to 7,618,130 kegs, in 1898, to 7,418,475 kegs, in 1897, to 8,997,245 kegs, in 1896, to 4,719,869 kegs, and in 1895, to 5,841,403 kegs. The wire nails produced in 1901 were manufactured by 61 works, as compared with 56 in 1900. The production in 1901 was greatly in excess of that of any other year, exceeding by 906,577 kegs that of 1897, the next year of largest production. The following gives the production of wire nails in 1900 and 1901 in kegs of 100 lb.:

States.	1900.	1901.
Mass., Rhode Island and Con	212,584	71,553
New York	63,466	136,118
Pennsylvania	2,158,399	3,118,508
Md., W. Va., Ky., Ala. and Ohio	2,516,391	3,613,894
Indiana and Illinois	2,195,672	2,716,748
Mich., Wisconsin and California	87,467	127,001
Totals	7,233,979	9,803,822

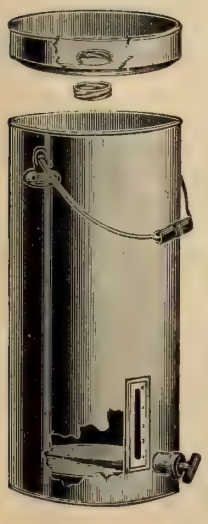
THE "NEW GEM" SAFETY RAZOR.

Shaves the STRONGEST as well as the MILDEST BEARDS - utterly impossible to cut the face. It is the Simplest and Surest shaving device ever invented. The AUTOMATIC STROPPING MACHINE KEEPS THE BLADES IN KEEN CUTTING ORDER – a novice gets as good results as an expert. Sold by leading CUTLERY and JEWELERY dealers all over the civilized world, or mailed post-paid by the makers at the following prices:

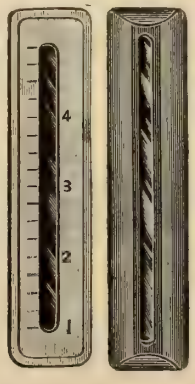


Razor, in Tin Box	$2.00
Razor, with Two Blades, in Handsome Morocco Case	3.50
Automatic Stropping Machine, with Strop	2.00

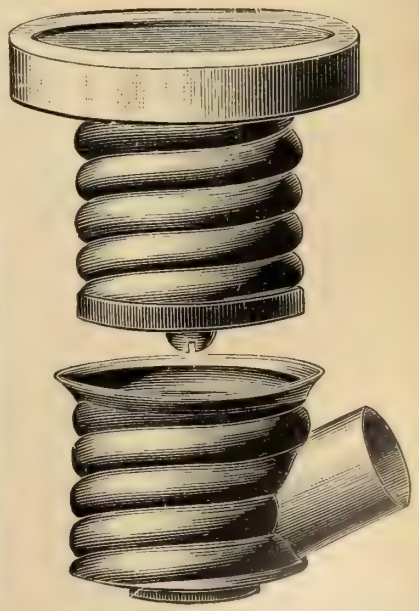
When making your purchase be SURE and take none without the above "Trade Mark" and "Guarantee Ticket." It permits you to have the Blades REHONED or RESHARPENED FREE OF CHARGE. Catalogue Mailed Free from the following distributing agents: **Montreal**–Caverhill, Learmont & Co.; **Quebec**–Chinic Hardware Co.; **Berlin**–Jno. Fennell & Son; **Hamilton**–Wood, Vallance & Co.; **St. John, N.B.**–Kerr & Robertson; **Halifax, N.S.**–A. M. Bell & Co.; **Winnipeg, Man.**–J. H. Ashdown Hardware Co.; **Vancouver, B.C.**–McLennan, McFeely & Co.; **Victoria, B.C.**–M. & H. A. Fo ; or direct from the makers, **The Gem Cutlery Co.**: Works - 34 Reade St., **N.Y.C.**; 9 London St., E.C., **London**; 9 Pickhuben St., **Hamburg, Germany.**

Dealers can be supplied at a large discount from the above firms.

A Good Trade



does not necessarily imply buying at a reduction. It means an exchange in which each is gainer.



Practical Dealers Cannot Fail
to appreciate the good features of our

"SLIP COVER"
Creamer Trimmings

THEY make a quick Cover to ADJUST, permit the full submerging of the Can, are made to lock, Cover can be used as MILK STRAINER, and are same price as old style.

Front view. Back view.
Short, Tight,
Easily Soldered.

Cheaper, Neater, Cleaner, Stronger than any other top made. Will not stick nor rust.

They teem with selling points, and will largely increase your trade.

THE THOS. DAVIDSON MFG. CO., Limited

ESTABLISHED 1869. MONTREAL, CANADA. INCORPORATED 1895.

MANITOBA MARKETS.

WINNIPEG, April 28, 1902.

WHOLESALE houses are still busy, and, owing to the great delay in getting goods forward, are still occupied in getting spring goods out. A number of new stores have started in various parts of the Province, and this has been an additional incentive to business.

The only change in price reported for the week is the further advance in harvest tools, the quotation now being 60 per cent. as against 60 and 10 per cent. last week. Indications are that sales of harvest tools will be very heavy this year. In paints, oils and glass, the trade is heavy and steady, with no change in prices to record. The advance in the price of gasoline in the United States has not as yet effected prices here, but an advance is expected next week.

Implement men are winding up their spring business, which is reported both heavy and satisfactory.

BINDER TWINE—Business is practically at a standstill here at present, and the opening list of prices is nominally quoted.

The price list for the week is as follows :

Barbed wire, 100 lb	$3 30
Plain twist	3 40
Staples	3 95
Oiled annealed wire No. 10	3 85

NOTES.

The Brandon Hardware Co., Limited, has been incorporated, and will take over the business of The Jas. Robertson Co.

Representatives of some of the large linseed oil mills in Minnesota are now looking over the ground here with a view to establishing mills.

The Winnipeg linseed oil mill has closed for the season after a run of about six months. It will not open again until the new crop comes in.

Merrick, Anderson & Co. have been appointed agents for the Imperial standard scales, and will not only carry a large stock here, but are putting in a scale-repairing department in connection with their business.

PERSONAL MENTION.

Mr. Samuel A. Crowell, of S. A. Crowell & Co., wholesale and retail hardware merchants, Yarmouth, N.S., paid a visit to Montreal this week, accompanied by his wife and daughter.

The Canadian representative of Jenkins Bros., Boston, Mr. W. R. Stavert, has started on a tour of Ontario. He will visit the hardware trade as far west as Sault Ste. Marie.

H. M. Davies, treasurer of The Dominion Iron and Steel Company, Sydney, C.B., has resigned to accept the management of an extensive cement industry at Rochester, N.Y.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, May 2, 1902.

HARDWARE.

THE trade of the week has been quite satisfactory all round, showing a considerably larger volume than for the same period of last year. All such lines as screen doors and windows, garden hose, poultry netting, lawn mowers and shears, fishing tackle, etc., etc., are moving well. Ice-cream freezers have also begun to sell rapidly. Cut nails have been advanced, and are now on a base of $2.45 instead of $2.35. It is expected that wire nails will soon follow this advance, but how soon cannot be determined. Pressed spikes are now discounted at 22½ per cent. instead of 25 per cent. A new shoe finders' discount sheet has been issued. The changes made are in shoe nails, in iron and soft steel, which are both 60 per cent. off now, and in clinch points, brass, which are discounted at 45 per cent. The prices fixed by the Canadian Handle Association last week give an advance in some cases. Second growth in extra ash goods are now discounted to the trade at 25 per cent.; all other grades, in ash goods, 35 per cent.; extra Nos. 1 and 2 hickory sledge hammer and hatchet handles, 50 per cent.; all other lines and grades in hickory goods, 35 per cent. Terms, four months, or 3 per cent. off for cash in 30 days.

SCYTHES.—There is a continued improvement in the trade in scythes. Business this week has been very good. We quote: Lance, No. 80, $5.50; Hurd's Clipper, $6.50; concave, $7.50; Sibley, $8.50; Cradle scythes, cast steel, $8.50; silver steel, $9.50; "Harvest King," $10.50. Bush scythes, $6.50.

BARB WIRE.—The inquiry for barb wire keeps up well, but supplies are becoming scarcer and some jobbers are having a little difficulty in filling all orders as promptly as they would wish. The price per 100 lb. f.o.b. Montreal is $3.

GALVANIZED WIRE.—A fairly good business is being done. We quote as follows: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—There is nothing new to report in this market. Trade is not active. We quote as follows: Bright iron and annealed on a base of $2.60 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—The market has shown no improvement, and business is still quiet. The discount remains at 22½ per cent.

BRASS AND COPPER WIRE.—There is not much doing. Discount, 60 per cent.

FENCE STAPLES.—These are among the most active lines in the hardware trade at present. The demand, however, is somewhat greater than the supply. We quote: Bright, $2.90 per 100-lb. keg; galvanized, $3.25. An extra of 25c. is charged for 25 and 50-lb. packages.

WIRE NAILS.—The demand for wire nails is fairly good, and some dealers are looking for higher prices in the near future. We quote as follows: $2.55 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—As was anticipated, an advance of 10c. has been made in cut nails, and the present price is $2.45 per keg, in small lots, and $2.37½ in carlots. There is a good demand. Flour barrel and coopers' nails are discounted at 40 per cent.

HORSE NAILS.—Business is still quiet active, and prices are unchanged. We quote: "C" brand, 50 and 7½ per cent. off; "M" brand, for "Oval" and "New City" heads, 60 per cent. off, and for "New Countersunk" heads, 66 2-3 per

When King "Sol" Decides.

Old King "Sol" may decide to give us hot weather any day now, and the chances are he won't give much notice.

When he does there will be a sudden rush of your customers for warm-weather goods, and if you do not have them in stock you'll lose the cream of the trade.

Telephone, Telegraph, or Write for any of the following goods and we'll ship them the same day:

"LEONARD CLEANABLE" AND "MODEL" REFRIGERATORS

"WHITE MOUNTAIN" ICE CREAM FREEZER

"DANGLER," "GOLDEN STAR," "SUMMER QUEEN," and "TRIUMPH" OIL STOVES.

cent. off. "Monarch" horse nails are also discounted at 66 2-3 per cent.

HORSESHOES.—The demand keeps up. Our quotations are as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4.00; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS.—There is a very good business doing in screws, and the market is steady at our present quotations. The discounts are: Round head bright, 82½ and 10 per cent.; flat head bright, 87½ and 10 per cent.; brass, round heads, 75 and 10 per cent.; brass, flat heads, 80 and 10 per cent.

BOLTS.—The trade during the past week in bolts and nuts has been satisfactory all round, and no quotable change has occurred. Our quotations are as follows: Norway carriage bolts, 55 per cent.; common, 50 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 per cent.; coach screws, 66 2-3 per cent.; sleigh shoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50 and 5 per cent. To any retailer an extra discount of 10 per cent. is allowed. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼ per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—This continues to sell rapidly at current prices. We quote: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 30c. per roll; tar sheathing, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE.—Business is going along at a good pace, and the market is steady. Quotations follow: Manila, 16c.; British manila, 14½c.; sisal, 13c.; lathyarn, 11½c. Prices on binder twine are as follows: Blue Ribbon, 650 feet to the pound, 15c.; Redcat, 600 feet to the pound, 14c.; Tiger, 550 feet to the pound, 13c.; Standard, 500 feet to the pound, 11½c.; sisal, 500 feet to the pound, 11½c. Prices are subject to a rebate of ¼c. in carload lots.

RIVETS AND BURRS.—There is no change in prices. The market is steady under a good demand. Quotations are: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 and 10 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH.—The price per 100 square feet for screen wire cloth is $1.37½. The market is active.

POULTRY NETTING.—The inquiry for poultry netting is active, and no change has been made in the price. Canadian or English is discounted as follows: 60 per cent. off 2 x 2 mesh, 19 wire, and 55 per cent. off 2 x 2 mesh, heavier, Canadian list.

HARVEST TOOLS.—No further change

THE FRANCIS-FROST CO. Limited

TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

has occurred since the advance of last week. The whole advance in harvest tools is now about 33 1 3 per cent. The discount is 60 per cent.

FIREBRICKS.—The market remains quiet and featureless. We quote: Scotch, $19 to $23.50, and English, $18.50 to $22.50 per 1,000.

CEMENT.—Nothing new has occurred. Jobbers are still awaiting the first shipments. Our quotations are as follows: German cement, $2.30 to $2.40; English, $2.25 to $2.35; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.20 to $2.30 ex-cars.

METALS.

The local market for almost all kinds of metals is active, with firm prices. Ingot tin is scarce and higher. In Canada plates, 52 sheets, we quote a lower price this week. Bar iron has been advanced by some houses, while others still sell at the old figure. On the English markets there have been no further advances, and though the position of all metals is still strong, the continual advances have ceased for the time.

PIG IRON.—There is still a fair amount of business passing in pig iron. The price of Canadian is $18.50 to $19 and of Summerlee, $21 to $21.50.

BAR IRON.—Some sizes in this are very scarce. A considerable quantity of English has been coming into this market recently, and this has had some effect on the market. The price of merchants' bar, in small lots, has been advanced to $2 by the majority of the houses. But except in very small quantities, other jobbers are still quoting $1.95. Horseshoe iron remains at $2.20. The demand for bar iron has been very heavy, and the reason for the advance given by those houses quoting it is merely that of supply and demand.

BLACK SHEETS.—These are moving rapidly, and stocks on hand have become very small. We quote as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 21 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—There is an active inquiry and the market is fully as firm as ever. We quote as follows: No. 28, Queen's Head, $4.10; "Bell" brand, $4.30; Apollo, 10¾ oz., $4.40; Comet, $4.25, with 10c. extra for less than case lots.

INGOT COPPER.—The price of ingot copper has not been changed from 14c. Business is about as usual and shows no improvement.

INGOT TIN.—There has been an advance of 1c. in Straits, which is now quoted at 31c. This is likely to be advanced another cent before a week's time. There is not any great demand, but supplies are hard to obtain, and the market is firm in consequence.

PIG LEAD.—There has been no change in this market. Trade continues on the quiet side, and the price is unchanged from $3.25.

LEAD PIPE.—The market is fairly active at the prices we quote, which are unchanged from last week. Composition waste sells for 7½c., and ordinary for 7c. The discount is 37½ per cent.

IRON PIPE.—There is a very good demand for iron pipe. No quotable change has occurred, and quotations are as follows: Black pipe, ⅛, $3; ¼, $2.40; ⅜, $2.65; ½, $3; ¾, $3.70; 1-in., $5.25; 1¼, $7.40; 1½, $8.90; 2-in., $12.40. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $4; ¾, $5.05; 1-in., $7.25; 1¼, $10.10; 1½, $12.15; 2-in., $16.70. Extra heavy pipe, plain ends, are quoted, per 100 ft., as follows: Black, ½, $4.35; ¾, $5.30; 1-in., $7.60; 1¼, $10.60; 1½, $12.70; 2-in., $17.45. Galvanized, ½, $5.35; ¾, $6.70; 1-in., $9.60; 1¼, $13.30; 1½, $15.95; 2-in., $21.75. For threads and couplings 5 per cent. is added.

TINPLATES.—There has yet been no advance made in the price of tinplates on this market, but the feeling is somewhat stronger. Charcoal tinplates are quoted at $4.75 to $5.25. The price of cokes is $4.25 per box.

CANADA PLATE.—Although we quote a lower price this week for large quantities of Canada plates, 52 sheets, this is not to be taken as an indication that the market is easier. On the contrary, it retains all its firmness, under an excellent demand. There is an active inquiry now for Canada plates for roofing purposes. The market has further been cleaned up by a Toronto firm, which bought up all the goods procurable in Montreal. We quote: 52's, $2.70 to $2.80; 60's, $2.85 to $2.90; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35.

STEEL.—There is a good demand for steel at the prices here given: Sleighshoe, $2.10; tire, $2.15; bar, $2.05; spring, $2.85; reeled machinery, $2.85; toecalk, $2.70.

SHEET STEEL.—The inquiry for sheet steel is not active, and the market has not noticeably improved over a week ago. Our quotations are as follows:

Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—The market is quiet and featureless. No quotable change has occurred. Jessop's is quoted at 13c.; Diamond, 8c., and Leonard's at $7.50 per 100 lb.

TERNE PLATES.—There is still only a small amount of business passing, and the price remains at $7.75 to $8.

COIL CHAIN.—Since the advances of a week ago no further changes have occurred in the price of chain. A moderate trade is being done at the following quotations: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-inch, 7¼c. per lb.; 5-16, $5; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.95; 9-16, $3.85; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-inch, $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—The market is quiet. An advance of 10c. has been made, which brings the price up to $5.85 to $6.25.

ANTIMONY.—There is still a very small demand for antimony, and the market is quiet and steady. The price is unchanged from 10c.

ZINC SPELTER.—The price of spelter remains at 5c. The feeling on the primary market is steadier, and no further advance was made. Locally, there is a moderate inquiry.

SOLDER.—The market for solder is quite active and there is a firmer feeling in sympathy with the advance in tin. We still quote, however, 18c. for bar solder and 20c. for wire solder.

PAINTS AND OILS.

The sharp revival of the demand for paris green forms the chief feature of the paint and oil market this week. As is usual in May, when the first few days of warm weather make their appearance, paris green is bought largely for spraying purposes, and this important article, which has been rather sluggish for some time, now bids fair to be in lively demand for the next two months. Turpentine has not changed in price. The market has certainly shown no further weakness, and is considered by most operators to be in a stronger condition. Linseed oil is still scarce on the local market, and will continue to be so until the first arrivals from England, which are expected in a week or ten days. Even with the new oil here, though, the market is not likely to be materially affected, for there are only sufficient goods on the way now to supply the demand for immediate consumption. We quote as follows:

WHITE LEAD.—Best brands, Government standard, $5.87½; No. 1, $5.50; No. 2, $5.12½; No. 3, $4.75; No. 4, $4.37½ all f.o.b. Montreal.

DRY WHITE LEAD.—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC.—Pure dry, 6¼c.; No. 1, 5¼c.; in oil, pure, 7¼c.; No. 1, 6¼c.; No. 2, 5¼c.

PUTTY.—We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200-lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL.—Casks, 7c.; 100 lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50; in 100-lb. kegs, $4.75; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c.; less quantities, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 80c.; boiled, 83c. In 5 to 9 barrels, 1c. less. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gallon advance, and freight allowed.

TURPENTINE.—Single barrels, 70c.; 2 to 4 barrels, 69c. Terms, net cash in 30 days.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.45 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—47½ to 49c.

COD OIL.—32½ to 35c.

PARIS GREEN.—Petroleum, bbls., 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½ lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

The local price of iron has been somewhat affected by the fact of the rolling mills having placed heavy orders for foreign scrap, to arrive on the opening of navigation. But, taking the market as a whole, it continues very firm. A few American buyers have continued to visit this market, but the demand on United States account is mostly for some special orders, the prices in that market not warranting their buying here and paying a heavy duty. The prices remain unchanged, and our quotations are now as follows: Heavy copper and wire, 11c. per lb.; light copper, 8c.; heavy red brass, 11c.; heavy yellow, 9c.; light brass, 5c.; lead, 2⅝ to 2¾c.; zinc, 2¼c.; iron, No. 1, wrought, $17; No. 2, $7 per ton; machinery scrap, $15; stove plate, $10 to $11; malleable and steel, $5; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6¼c. per lb.

GLASS.

There is nothing new to report in this market. A batch of invoices were received last week, and shipments are expected to arrive shortly. We quote as follows: First break, 50 ft., $2.10; second, $2.20 for 50 ft.; first break, 100 ft., $4; second break, $4.20; third break, $4.70; fourth break, $4.95.

HIDES.

There is a fairly good business doing in hides and skins. Calfskins are plentiful and unchanged in price. Sheepskins are 5c. higher, and beef hides, which are becoming scarce, show signs of advancing. Some advances have taken place already, it is rumored. We quote: No. 1 hides, 9c.; No. 2, 8c.; No. 3, 7c. No. 1 calfskins, 12c. Sheepskins, 70c. Lambskins, 10c. per lb.

MONTREAL NOTES.

Sheepskins are up 5c.

Cut nails are 10c. higher.

Pressed spikes have advanced, and are now discounted at 22½ per cent.

Ingot tin has gone up 1c., and a further advance is expected next week.

We have on hand a large stock of steel sheets for making

EMBOSSED CEILINGS,

etc., and are now prepared to make prompt shipment of anything required in our line, and shall be pleased to receive your orders, which shall have our best attention.

The Metallic Roofing Co.

Wholesale Manufacturers,
TORONTO, - - - CANADA.

ONTARIO MARKETS.

TORONTO, May 2, 1902.

HARDWARE.

BUSINESS has shown increased activity during the week, and the month promises to see a brisk trade in wholesale hardware. In all seasonable staple lines the demand is brisk. Fencing wires are not going out as briskly as they were. Wire nails are in fair demand. In bolts, nuts, and rivets and burrs business is characterized by its activity. Spades and shovels and harvest tools are going out well, and in the latter a further advance is looked for within the next few days. The movement is becoming brisk in lawn mowers. Builders' hardware is going out in large quantities in spite of the higher prices. There have been a few changes in prices during the past week. Cut nails have advanced 10c. per keg. The discount on pressed spikes has been reduced to 22½ per cent. New discounts are also out on shoe nails, and clinch and duck rivets. Poultry netting has been advanced 10 per cent. by the makers. Payments are as a rule fair.

BARB WIRE—There is a fair movement, although business is not as brisk as it was a week or two ago. This is no doubt due to the fact that the farmers are busily engaged in seeding. An improvement may be expected in the course of a few weeks. We quote as follows: F.o.b. Cleveland, $2.77½ for less than carlots, and $2.65 for carlots. From stock, Toronto, $3.

GALVANIZED WIRE—Trade has eased off a little, although there is still a fair movement. We quote as follows: Nos. 6, 7 and

8, $3.50 to $3.85 per 100 lb., according to quantity ; No. 9, $2.85 to $3.15 ; No. 10, $3.60 to $3.95 ; No. 11, $3.70 to $4.10 ; No. 12, $3 to $3.30 ; No. 13, $3.10 to $3.40 ; No. 14, $4.10 to $4.50 ; No. 15, $4.60 to $5.50 ; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE—There is some movement in oiled and annealed wire, but it is not brisk. We quote the base price, $2.60 per 100 lb. Oiling, 10c.; coppering, 60c., and tinning, $2 per 100 lb. extra. Delivery points, Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE—Trade is steady. Discount is 22½ per cent.

WIRE NAILS — Trade is fairly good. Our quotations are : $2.55 for less than carlots, and $2.50 for carlots. Delivery points, Toronto, Hamilon, London, Gananoque and Montreal.

CUT NAILS — The base price has been advanced 10c. to $2.45 per keg. Very little business is being done. The change went into effect on April 29. The allowance on carlots is still 7½c.

HORSE NAILS—Trade is quiet, although there are indications that prices will be higher before long. It is said that, based on the present cost of material, the manufacturers are selling at practically a loss. Discounts are as follows : "C" brand, oval head, 50 and 7½ per cent., and on "M" and other brands, 50, 10 and 5 per cent. Countersunk head 60 per cent.

HORSESHOES—Trade is quiet, and in these, too, prices are claimed to be unsatisfactory. We quote f.o.b. Toronto as follows : Iron shoes, No. 2 and larger, light, medium and heavy, $3.60 ; snow shoes, $3.85 ; light steel shoes, $3.70 ; featherweight (all sizes), $4.95 ; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85 ; snow shoes, $4 ; light steel shoes, $3.95 ; featherweight (all sizes), $4.95.

PRESSED SPIKES—The price has been advanced, the discount being 22½ per cent. instead of 25 per cent. as formerly.

TACKS—New discounts have been issued on shoe and clinch and duck nails. Discount on shoe nails is now 60 per cent., and on clinch and duck nails 45 per cent.

SCREWS — Trade continues active. Discounts are as follows : Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent. ; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze 70 per cent.

RIVETS AND BURRS—The demand is as brisk as ever. We quote as follows : Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 and 10 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS—There is no falling off in the brisk demand that has characterized trade in bolts and nuts during the past week. We quote as follows : Carriage bolts, common ($1 list), 50 per cent.; carriage bolts, full square ($2.40 list), 55 per cent.; carriage bolts, Norway iron ($3 list), 55 per cent.; machine bolts, all sizes, 50 and 5 per cent.; coach screws, cone points, 66⅔ per cent. ; elevator shaft and whiffletree bolts, 50 per cent.

ROPE—Trade is fairly good in rope. We quote as follows : Pure manila, 16c.; British manila, 14½c.; sisal, 13c.; lathyarn, 12c ; sisal bed cord, 3 cord, 48 ft., 65c.; 60 ft., 80c.; 72 ft., 95c. per doz.

BINDER TWINE — Prices are firm and the demand fair. We quote : "Blue Ribbon," 650 ft., 15c.; "Red Cap," 600 ft., 14c.; "Tiger," 580 ft., 13c.; sisal, 500 ft., 11½c.

EAVETROUGHS, ETC.—Business is good in both eavetrough and conductor pipe. Eavetrough is quoted at $3.10 per 100 square feet for 10-inch, and conductor pipe at $4 for 3-inch and $5.25 for 4-inch.

SCREEN DOORS AND WINDOWS—Customers are pressing for delivery and shipments are going forward briskly. Common doors, 2 or 3 panel, are quoted f.o.b. factory points as follows : Walnut, stained, 3 - in. style, $6.80 per dozen ; stained, yellow, $7 ; natural color, oil finish, $8.15 ; 4 in. style, 20c. extra per dozen. Windows : No. 0, $1.60 ; No. 1, $1.70 ; No. 2, $1.95 ; No. 3, $2.10 ; No. 4. $2.50 per dozen.

SPADES AND SHOVELS—The demand is good and the manufacturers are said to be running short in some kinds. Discount 40 and 5 per cent.

HARVEST TOOLS—These are going out freely at the higher prices. Manufacturers are still behind with their orders. Discount 60 per cent.

BUILDING PAPER — A good trade is still being done at unchanged prices. We quote : Dry sheathing, grey or straw, 30c. per roll ; tar sheathing, grey or straw, 40c. per roll ; dry fibre, 50c. per roll ; tarred fibre, 60c. per roll.

LAWN MOWERS—Are in good demand and quite a number of shipments are being made. We quote : Discount on high-wheel mowers is 50 per cent.; "Star" mowers, 9 in. wheels, $2 50 to $3 ; "Daisy" mowers, 17-in. wheels, $2.25 to $2.50.

POULTRY NETTING—Prices have been advanced 10 per cent. by the manufactur-

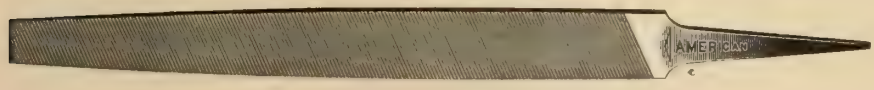
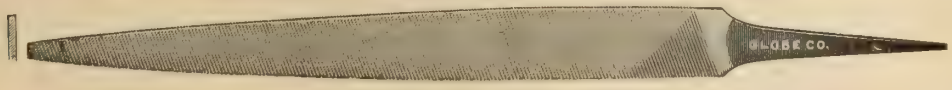
FILES and RASPS

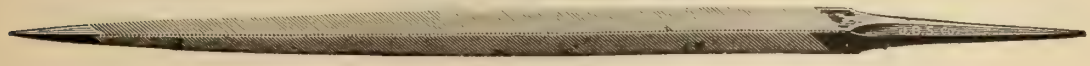


KEARNEY & FOOTE BRAND

GREAT WESTERN BRAND



AMERICAN BRAND



ARCADE BRAND

GLOBE BRAND

J. BARTON SMITH BRAND

The largest manufacturers in the world.

We manufacture the well-known brands of Cast-steel Files and Rasps shown herewith, all of which are warranted for high-class material and superior workmanship.

Our goods are now sold in the four quarters of the globe, command the highest prices, and have won for themselves an enviable reputation, acquired as the result of many years' experience.

Walter Grose, Montreal,

Selling Agent for the Dominion of Canada.

One or other of the above brands may be purchased from all prominent Hardware Merchants throughout the Dominion who carry an assorted stock.

ers. The season, however, is pretty well advanced, and the retailers have received the bulk of their supplies.

GREEN WIRE CLOTH—This is beginning to move fairly well. We quote $1.37½ per 100 square feet.

FENCING PLYERS—Some of the wholesale houses are sold out of fencing plyers and difficulty is being experienced in getting supplies.

BUILDERS' HARDWARE—There is a good deal of activity in this line, and dealers appear to be buying with a view to protecting themselves against the likelihood of another advance in prices.

SCALES—Prices are firm, and an advance within the next week is anticipated.

TINWARE AND ENAMELLED WARE — Business is keeping good.

REFRIGERATORS AND FREEZERS — The movement is brisk in both refrigerators and ice cream freezers.

GAS AND OIL STOVES—Business in this line is being well maintained.

HANDLES—There was a slight mistake in the prices quoted last week. The corrected figures are: Ash handles—Second growth and extra, 25 per cent.; other grades 35 per cent. off the list. Hickory handles—Sledge, hammer and hatchet handles, extra, No. 1 and No. 2, 50 per cent. off the list; all other grades of hickory handles, 35 per cent.

SPORTING GOODS—A good business is being done in ammunition, and a number of orders are being booked for guns and rifles.

CEMENT — Trade has much improved owing to a number of contracts for cement being closed. The market is still weak as there is keen competition amongst the manufacturers for the control of the trade. We quote as follows: Canadian Portland, $1.90 to $2 75; Canadian hydraulic, $1.25 to $1.50; German cement, $3; English, $3 to $3 15; Belgian, $2.50 to $2.75 per bbl., and American, $2 20 to $2 30 ex cars.

METALS.

Business continues good in metals. Iron, steel, tinplates, galvanized sheets, are firm. Copper is weak and tin is firmer.

PIG IRON—The market is strong with the furnace still fully supplied with orders. The nominal price for Canadian iron is $20 per ton.

BAR IRON—The scarcity is just as pronounced as ever, while the demand keeps active. We quote $1.95 to $2.05. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft. 20c.; over 20 ft. by special agreement, according to length and size.

STEEL The situation remains much as before. Deliveries are still slow, while the demand is fair. Quotations are as follows: Merchantable cast steel, 9 to 15c. per lb.; drill steel, 8 to 10c. per lb.; "B C" and "Black Diamond" tool steel, 10 to 11c.; Jessop's, Morton's and Firth's tool steel, 14c.; toe calk steel, $2.85 to $3; tire steel, $2.30 to $2.50; sleighshoe steel, $2.10 to $2 25; reeled machinery steel, $3; hoop steel, $2.90.

BOILER TUBES—These are scarce and higher in price. We quote, per foot: 1½, 1¾ and 4-in., 10c.; 2½-in., 17½c.; 3-in., 14c.

BOILER PLATES—These are practically unobtainable. Manufacturers in the United States advise importing houses in Canada that they are sold out of boiler plates until 1903, and cannot accept orders at any price. In view of this, prices are practically nominal, as those who have any can get whatever they choose to ask.

BLACK SHEETS — Trade is fair. We quote: Common, $3.15 for 28 gauge; and dead flat, $2.50 for 26 gauge.

CANADA PLATES — Trade keeps quiet. We quote: All dull, $3; half polished, $3.10; all bright, $3.75.

GALVANIZED SHEETS—Business continues active and prices are showing increased strength. We quote in case lots as follows. Queen's Head, $4.50 for 28 gauge; American, $4 40 for 29 gauge; Bell brand, $4.20 for 28 gauge.

PIG TIN—The market has again taken a firmer turn. On Wednesday the London market closed at an advance of £5 on spot tin and £1 17s. 6d. on futures.

Locally the market is dull at $29 to $30 per 100 lb.

TINPLATES—Business is keeping good. We quote I C at $4.25.

TINNED SHEETS — There is more going out than for some time previously. We quote : 70 x 30, up to 24 gauge, 7½c.; ditto, up to 26 gauge, 8c.

COPPER—The outside markets have ruled weak, although at the moment a steadier tone prevails. We quote ingot at $15 per 100 lb., and sheet copper at $22 to $23.

BRASS—Trade is fair. Discount 15 per cent.

PIG LEAD — The outside markets are steady and locally trade is quiet with prices unchanged. We quote pig lead at $3 50 to $3 75, and bar lead at $5.

IRON PIPE—There is a big demand from the West and Northwest, and prices are firm with an improved tendency. We quote per 100 ft.: ⅛ in., $3 ; ¼-in., $2.50; ⅜ in., $2 75 ; ½-in., $3 ; ¾-in., $3 70; 1 in., $5.25 ; 1¼ in., $7.40; 1½ in., $8 90; 2 in., $12.40; galvanized, 1-in., $7.25. Trade discount 4 per cent.

SPELTER — Trade is quiet and prices steady and unchanged at $5.50 to $6.

ZINC SHEET—There is not much doing. We still quote cask lots at $6 to $6.25, and part casks at $6.25 to $6.50.

SOLDER—The demand is good and prices firm. We quote : Half-and-half, guaranteed, 19c. ; do. commercial, 18½c. ; refined, 18c.; wiping, 17½c.

PAINTS AND OILS.

The feature this week is the decline of 2c. in turpentine owing to the weakness of the Southern market for that article. The stock on hand down there seems to be larger than was first supposed, and this is causing the prices to go down. The new crop will shortly be gathered, and then prices are expected to settle down to a steady basis. The stocks of raw and boiled linseed oil are becoming low with a number of local houses, and the oil manufacturers are behind with their orders. Some paint and oil firms report, however, that they have plenty of linseed oil on hand. The demand continues brisk for white leads in oil, varnishes and dry colors. There is also a big trade being done in ready-mixed paints. We quote :

WHITE LEAD—Ex Toronto, pure white lead, $5 87½ ; No. 1, $5.50 ; No. 2, $5.12½; No. 3, $4.75; No. 4, $4.37½ in packages of 25 lb. and upwards ; ½c. per lb. extra will be charged for 12½ lb. packages ; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb., $5 to $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4 50.

LITHARGE—Genuine, 6 to 6½c.

ORANGE MINERAL—Genuine, 7½ to 8c.

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.

SHINGLE STAIN—In 5-gal. lots, 60c. to $1.20 per gal.

BENZINE—In barrel lots, 17c. per gal.; less quantities, 25c. per gal.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING—65c. per 100 lb. ; Gilders' whiting, 80c.

GUM SHELLAC—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2 25 to $2.35 ; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY—Bladders, in bbls., $2 25 ; bladders, in 100 lb. kegs, $2 40 ; bulk in bbls., $1.90 ; bulk, less than bbls. and up to 100 lb., $2.05 ; bladders, bulk or tins, less than 100 lb., $2 90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

PUMICE STONE—Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity ; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS—Pure, $1.20 to $1.40 per gal.; No. 1, $1.10 per gal.

CASTOR OIL—English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL—Raw, 1 to 4 barrels, 82c.; boiled, 85c.; 5 to 9 barrels, raw, 81c.; boiled, 84c., delivered. To Toronto, Hamilton and London, 2c. less.

TURPENTINE—Single barrels, 69c.; 2 to 4 barrels, 68c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

There is a good demand locally, and the market continues strong. We quote : Under 26 in., $4.45 ; 26 to 40 in., $4 65 ; 41 to 50 in., $5.10 ; 51 to 60 in., $5.35 ; 61 to 70 in., $5 75 ; 71 to 80, $6.25 ; 81 to 85, $7 ; 86 to 90, $7.75 ; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33⅓ per cent.

OLD MATERIAL.

The demand continues brisk, and the arrivals are good. The market is strong. We quote : Heavy copper and wire, 10¼c. per lb.; light copper, 8c. per lb.; heavy red brass, 10c.; heavy yellow brass, 8 to 8½c.; light brass, 5c.; lead, 2¼ to 2½c.; scrap zinc, 2¼ to 2½c.; iron, No. 1 wrought, $14.50 per net ton ; No. 2 wrought, $6 ; machinery cast scrap, $14; stove plate, $10; malleable and steel, $6 ; old rubbers, 6c. per lb., and country mixed rags, 50c. per 100 lb.

HIDES, SKINS AND WOOL.

HIDES—Hides are scarce and the price has been advanced ½c. all around in sympathy with the high prices on the United States markets. We quote : No. 1 green, 7c.; No. 2 green, 8c. ; No. 1 green, steers, 8c.; No. 2 green, steers, 7c.; cured, 8c.

SKINS—Calfskins are scarce and sheep and lambskins have been advanced 5c. We quote : No. 1 calfskins, 10c. ; and No. 2, 8c.; deacons (dairies) 60 to 70c. each ; sheepskins, 80c. to $1 ; lambskins, 20c.

WOOL—The demand is slack and the market is weak. We quote : Fleece wool, 12½c., and unwashed, 7c. per lb.

SEEDS.

Trade is quieter and the prices are steady. We quote out of store at Toronto : Red clover, $6.50 to $9; alsike, $10 to $16, and timothy, $7.80 to $8.25.

COAL.

The receipts of hard and soft coal are fair, and the demand for the latter is good. The prices are firm. We quote prices at international bridges as follows : Grate, $4.75 per gross ton ; egg stove and nut, $5 per gross ton ; soft coal, $2.50 to $3.25 in bond.

PETROLEUM.

The prices are firm and the demand is steady. We quote : Pratt's Astral, 17 to 17½c. in bulk (barrels extra); American water white, 17½ to 18c. in barrels ; Photogene, 17 to 17½c.; Sarnia water white, 16½ to 17c. in barrels ; Sarnia prime white, 15 to 15½c. in barrels.

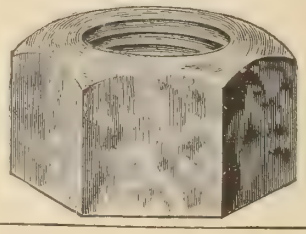
MARKET NOTES.

Cut nails are 10c. per keg higher.

There is likely to be another advance in harvest tools.

The discount on pressed spikes has been reduced to 22½ per cent.

The makers of poultry netting have advanced prices 10 per cent.



The discount on shoe nails is now 60 per cent. and on clinch and duck rivets 45 per cent.

HEATING AND PLUMBING

BUILDING PERMITS IN TORONTO.

DURING the week building permits have been issued from the office of the city commissioner of Toronto as follows: The Polson Iron Works, for a two-storey pattern shop of wood covered with iron on Esplanade street, for $3 500; J. J. Walsh, for two pairs of semi-detached two-storey brick dwellings on 287 to 293 Logan avenue, for $6,000; J. J. McKinnon, for a pair of two-storey brick dwellings on College street, for $3,000; H. F. Squires, for a pair of two-storey brick dwellings on 26 and 28 Albany avenue, for $6,500; S. R. Parsons, for a two-storey brick residence on the east side of Crescent Road, for $4,500; Charles R. Cooper, for the erection of a two-storey brick residence on Winchester street, for $3 500; the Royal Canadian Yacht Club, for a one-storey dinghy house of wood covered with galvanized corrugated iron, on Esplanade street, for $800; J. E. Ellerby, for a small two-storey frame and roughcast house on Radcliffe avenue, for $300; James Simpson, for a pair of semi detached two storey dwellings having a brick front and cellar, on the south side of Gerrard street, for $2,000; James L. Morrison, for two pairs of two-storey brick residences on 84 Winchester street, for $11,000, and Richard Dodson, for a two-storey frame and roughcast dwelling on 21 Regent street, for $450.

BUILDING AT CHILLIWACK.

At Chilliwack, B.C., W. D. Kipp is preparing to build a residence; A. C. Henderson is making ready to erect a warehouse, and B. A. Irvin will build a brick store next fall.

BUILDING PERMITS IN OTTAWA.

The following building permits have been taken out at Ottawa during the week: Thos. Flynn, for a frame dwelling covered with sheet iron on Botelier street, for $500; Baldwin Iron Works, for a brick foundry on Duke street, for $4,000; W. C. Cochrane, for a brick-veneered dwelling on Russell avenue, for $2,000; trustees of Bell Street Church, for a brick-veneered parsonage on Bell street, for $2,500; William Stirling, sr., for a brick-veneered dwelling on Bolton street, for $700; Catherine Aris, for a brick-veneered dwelling on Redpath street, for $700; Thomas Angel, for a brick-veneered dwelling on Flora street, for $1,200; Dr. R. P. Robinson, for alterations to building on Bank street, for $600; Mrs. D. R. Stewart, for a brick-veneered dwelling on James street, for $2,200, and Alexander Parker for a double brick-veneered dwelling on Nepean street, for $2,000.

SOME BUILDING NOTES.

T. Searson is building a new house at Warwick, Ont.
